As advertising mediums the Harmsworth publications stand in the first rank, and it is a recognized fact, both in England and the United States, that no large advertising enterprise which makes its appeal to the Anglo-Saxon races can succeed which does not avail itself of the very powerful help afforded by the newspapers and other publications controlled by Lord Northcliffe. No group of publications shows so gigantic a revenue from advertisements, a fact which points unquestionably to one conclusion.

First Harmsworth Daily.

It was in September, 1894, that Lord Northcliffe embarked upon the enterprise of daily newspaper publication by purchasing the "Evening News," which is now London's chief halfpenny evening paper. It had previously passed through a very chequered career, at least £190,000 having been
it by its various proprietors. Under t
regime things quickly put on a different
and under the capable management c
nedy Jones, the circulation has steadil
from next to nothing until it now st
over 300,000 copies daily; while the
have risen from a minus quantity t
£44,000 per annum.

The "Evening News" is recognized a
the best advertising medium among
British evening newspapers. From M
1904, to April 29th, 1905, this being t
six months of last year's financial peri
the first six months of the present f
year, the number of advertisements ap

Business in the World

"Evening News" amount to 65,815, cov-
67,487 inches of space. Of these, no
than 42,202 were "small" advertise-
, a line of business which the paper has
y developed.

The Daily Mail.

ly in 1894 Lord Northcliffe commenced
ng "The Daily Mail," which is recogniz-
roughout the world as England's smart-
d most go-ahead paper. From the first,
s resolved that the new service of "The
Mail" should surpass every existing
in completeness and efficiency, and the
face of the earth was so mapped out
nothing could happen anywhere without coming under the immediate cognizance of a paid representative having facilities for transmitting news direct to the London office. How successfully this was accomplished has been seen in the fact that "The Daily Mail" is generally the first of the London papers to publish important news, being sometimes as much as two days ahead of any of its contemporaries.

Careful Preparations.

More than half a million pounds was sunk in buildings and plant before the first copy was issued, and this was altogether apart from the capital required for daily working expenses. An experimental daily issue was regularly edited and printed for two months before the first copy was sold to the public on May 4th, 1896, over £40,000 being thus spent in paper, labor, salaries, telegrams, payments for contributions, etc., for a paper which was never seen outside the office. The result of this was seen in the fact that at its first issue everything was in perfect working order. So instant was the success of the new venture that the average daily sale for the first month was 171,121 copies. This has steadily increased until at the present time the regular daily sale is only slightly under 1,000,000 copies; while on all special occasions, 1,000,000 is considerably exceeded.

At the Head as a Medium.

"The Daily Mail" stands at the head of the newspapers of the world as an advertising medium, and is able to command from £350 ($1,750), to £400 ($2,000) per page for advertisements, about twice the rate of any other London daily.

"Overseas" Edition.

In November, 1904, a weekly "Overseas" edition of "The Daily Mail" was introduced in the special interests of English people in the colonies and abroad. It finds its way not only into the British colonies, but into every other country of the world.

Continental Edition.

A further development of "The Daily Mail" was seen on May 22nd, 1905, in the issue of a daily Continental edition printed at Paris. By this means the paper has more than quadrupled its circulation in the chief European centres, where it already occupied the premier place in the matter of circulation among English journals going to the Continent. This Continental edition circulates in the entire territory between St. Petersburg on the north and Khartoum on the south, with the exception of Scandinavia, which is served from London. With this exception there is not a single European country where "The Continental Daily Mail" is not on sale. It has an enormous circulation among three classes—English and American tourists travelling for pleasure, English and American business men having commercial relations with foreign countries, and foreign commercial men, having business relations with England and America. It will be obvious that such a medium is unrivaled for the purpose of advertising "Industries de luxe"—dressmakers, jewellers, wine merchants, liqueur makers, automobile manufacturers, and the like. The American advertiser desiring to reach Continental business men with important commercial connections finds no medium better suited for the purpose than "The Continental Daily Mail," which by the way, gives special attention to American news, being read, probably, by as many Americans as English on the Continent.

A Woman's Daily.

"The Daily Mirror" was founded by Lord Northcliffe, as a penny ladies' daily, in November, 1903, and, after passing through a very stormy time, ultimately became firmly established as an illustrated half-penny daily and has at the present moment a regular daily circulation of over 359,000 copies.

More Than a Century Old.

Another newspaper controlled by Lord Northcliffe is "The Weekly Dispatch," which was 102 years old when he purchased it in July, 1903, and has now a regular circulation of about half a million.

Other Harmsworth Newspapers.

"The Glasgow Daily Record," "The Leeds Mercury," "The Observer," "Vanity Fair," "The World," and "The Manchester Courier" are also included among the newspapers owned and controlled by the great journalistic genius who in eighteen years has built up from nothing the world's greatest publishing concern.

The first two of the Harmsworth Publications to be printed in Canada for the United States and Canada.

London, Ontario, 1906.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

Debentures for Sale.

Sealed tenders will be received by the undersigned up to noon on **Wednesday 23rd of May 1906**, for the purchase of $8,500.00 High School Debentures of the Town of Kincardine, dated the 31st December 19 '5, bearing interest at the rate of 4% per annum, a portion of the principal, together with the interest to be paid yearly on the 31st day of December in each of the 30 years during the currency of the said Debentures.

JOHN H. SCOUGALL.
Town Clerk.

Mercantile Summary.

The Canadian Pacific Railway has ordered two new vessels of the "Empress" type in order to enable it to give a fast weekly service between Quebec and Liverpool.

The Alberta Southern Railway Co. is asking the Provincial Legislature for a charter for a line from Crow's Nest Pass to Lethbridge, and from thence lines to Medicine Hat and Macleod.

Already this year the mines in the Boundary District of British Columbia have shipped 415,000 tons of ore. For last week the Granby sent 15,480, the British Columbia copper smelter 4,260 and the Dominion copper smelter 3,100.

It is reported from Vancouver Island that a man recently discovered in a remote section a new kind of pine tree, the wood of which contains no resin, and is not susceptible to injury by being cut against the grain or at an angle.

The Montreal Mining Exchange has held its first session. Three names were proposed for membership, and $250 each bid for the seats. It is said to be the intention of the committee in charge to keep a sharp lookout for the men who want to unload prospects—poor prospects at that—upon the public as first class properties, and if this be so the Exchange doubtless will fill a long-felt want.

It is gratifying news that comes from Scranton, Penn., that the miners' convention had unanimously voted to adopt a continuation of the award of the Anthracite Coal Strike Commission, which means that in all probability the threatened strike will be averted. It would appear that the miners were not ready for another strike, and feared they might lose what they had gained in the previous two.

City of Vancouver
DEBENTURES FOR SALE.

Sealed tenders marked "tender for debentures" will be received by the undersigned up till 4 p.m. on Friday, 6th July, 1906, for the purchase of $679,406.55 of the City of Vancouver 4% general and local improvement debentures, repayable as follows :

$483,629.00	**40 years.**
42,400.80	**30 years.**
43,551.63	**20 years.**
74,825.12	**12 years.**
35,000.00	**10 years.**

Full particulars of debentures can be secured on application to the undersigned. The debentures will be ready for immediate delivery.

Tenders must be accompanied by a marked cheque for 1% of the amount tendered, payable to the City Treasurer ; this amount will be forfeited if purchase be not carried out.

The highest or any tender not necessarily accepted.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

An American syndicate has, we hear, purchased the Robitaille timber limits in the Baie des Chaleurs region of New Brunswick for $600,000, and will begin extensive development at once.

The Home Telephone Company, of Portland, Wash., is making application to Vancouver city council for a franchise to operate an automatic telephone system, each subscriber being able, by means of a certain dial mechanism, to call up any other subscriber without the agency of a "central."

The Vancouver, Westminster and Yukon Railway Company is applying to the Dominion Government for power to build through the Yellowstone Pass to Edmonton. Members of the Railway Committee, however, charge the road with being an American Company, and protest against all the available passes in the Rocky Mountains being taken up by outside interests.

It is announced from Niagara Falls, Ont., that the Electrical Transmission Company, on behalf, it is supposed, of the Electrical Development Company of Ontario, has just acquired a large block of property in the centre of Niagara Falls, N.Y., extending from the United States end of the upper steel arch bridge northward along the bank of the river to the lands of the Niagara Falls Hydraulic Power and Manufacturing Company. The property is now occupied by business concerns. On it is to be erected a large transforming station, where the power received from the power house of the Electrical Development Company on the Canadian side of the river will be received and sent out again at the voltages required by different American consumers.

TOWN OF INNISFAIL, ALBERTA

Tenders are required for the whole or part of an issue of $8,000.00 debentures of the Town of Innisfail in multiples of $100.00 for improvements in the said town.

The Debentures will be dated the 1st day of June, A.D., 1906, and bear interest at the rate of five per cent. per annum and are repayable in equal annual instalments of principal and interest covering a period of twenty years from the 1st day of June, 1906, so arranged that the payment in each of the said twenty years shall be equal to the payments in each of the other nineteen years.

Tenders must be accompanied by an accepted cheque for 5% of the amount tendered for, which amount will be forfeited in case the successful tenderer neglects or refuses to deposit the balance of the amount of his tender with the undersigned on the 1st June 1906, or within ten days of receiving notification of the acceptance of his tender, whichever shall be the latest date.

If the deposit shall be later than the 1st of June, 1906, the successful tenderer shall also deposit interest at the rate of 5% per annum from the 1st of June, 1906 to the date of deposit of the balance of his tender.

Tenders will be opened on the 1st day of June, 1906. The cheques for the rejected tenders will be returned on the 2nd day of June, 1906.

The whole rateable value of the Town of Innisfail according to the last revised assessment roll is $268,502.00 and there is no existing debt outside of any debt due for the current expenses of the year.

54 King Street West TORONTO

Mercantile Summary.

The assessed value of property in Stratford is this year $2,281,260, and the population 7,722.

W. J. Huff, in a small general stor way at Farran's Point, Ont., has becom involved, and a meeting of his creditor is to be held in Toronto.

Some excitement has been caused in the neighborhood of Fort Frances, Ont., by reported discoveries of natural gas. Specimens of coal also have been found, it is said, in several places.

Building operations are extraordinarly active this year in Montreal. In April the permits issued totalled in value $871,940, and their aggregate value since the first of the year has been $1,357,711.

A petition for a winding-up order has been filed in the matter of La Societé Anonyme de Construction, Limited, Montreal, a concern incorporated under Quebec laws in August, 1903, with an authorized capital of $20,000. The company has been engaged in prolonged litigation in connection with the erection of the new factory which they erected for the Canada Radiator Co. at Lachine.

The Grand Trunk Railway Company is now asking the city of London, Ont., for a cash bonus of $300,000 in return for the former's projected improvements, or as an alternative to such bonus, its equivalent in exemption from taxation for twenty-five years, or the fixing of its assessment at such a figure as would practically bring this about. It also makes several stipulations regarding subways, bridges, level tracks, etc. If its wishes be acceded to, and the improvements made, it says it will spend something like $1,250,000 in London. The matter has not been fully discussed yet, but it is understood that the city council is against the acceptance of the railway's proposals.

The following patents have been granted recently by the Canadian Patent Office: W. Suddess, Toronto, sewing needles; W. J. Swain, Grandview, Man., plough attachments; G. Bishop, Oxboro', Sask., gang ploughs; C. A. Couch, Toronto. ties; S. Lemay, Windsor Mills, Que., boot calk plates; J. F. E. Rose, Montreal, apparatus for removing snow and ice from railways; J. L. Goffette, Montreal, hollow walls; C. Edwards, Calgary, Alta., safety devices for tripping unruly horses for shoeing; F. C. Kerby, Windsor, Ont., weather strips for windows; A. H. Taggart, Cayuga, Ont., cement brick machines; J. E. Lundy, Edmonton, Alta., filling and closing funnels for liquids; H. A. Crosby, Hamilton, Ont., machine for peeling and coring tomatoes; A.; J. Jackson, Toronto, pneumatic tires; S. Hallander, Vancouver, B.C., pipe boilers; J. Johnson, Warkworth, Ont., fitting stands; J. A. Lundstrom, Truro, N.S., transformable trunks; J. A. McAvity, St. John, N.B., water closets; E. E. Cowrick, Winnipeg, Man., and F. Reilly, Seattle, Wash., electric heaters.

A man named Patrick Flynn, who has been in the liquor business in Ottawa since last fall, and who was formerly a farmer at Chelsea, Que., has had his license cancelled, and has assigned to W. A. Cole.—W. Gauvreau, of Ottawa, in a small clothing way, has assigned to the same man.

On behalf of the Intercolonial Railway the Government has bought, we understand, a tract of land near Moncton, N.B., about 180 acres in area. The question of the location of the new shops, which has been the main topic of conversation ever since the fire, is thus put at rest.

We learn from the Guelph "Mercury" that at a recent meeting of the directors of the Guelph and Ontario Investment and Savings Society Mr. J. E. McElderry, the manager, was appointed to the vacancy on the board caused by the death of Mr. John M. Bond, and will now be known by the title of managing director. The appointment is a tribute to the esteem in which Mr. McElderry is held by the society, and, we believe, deservedly held.

One on the Printer.—We offer all necessary apologies to the persons concerned, of whom in last issue we are made to say, "fumigates his garments," when we attempted to say, "fulminates his arguments." We are disposed to blame the printer, of course.—Presbyterian Standard.

Thomas B. Dohan, a Montreal boot and shoe retailer, in business four or five years, and previously said to have been buyer for a leading Chicago concern, has assigned, and the estate will be closed out.—Mrs. P. Wilscam, a Montreal milliner, has assigned. She owes about $1,100.

The Breckenridge & Lund Coal Company, Lundbreck, Alberta, have just installed a 600 horse-power engine and boiler and some up-to-date mining machinery. The working shaft at the mines is now down 360 feet. They have a capacity at present of nearly 1,000 ton per day. J. Breckenridge, of Calgary, i president of the company.

The Electrical Construction Company, of London, Ont., is going t branch out, and, under the name of th International Electric Company, purposes extending its business very materially.

We are sorry to learn that the Dominion Gold Mining and Reductio Works at Kenora, Ont., were a few day ago burnt out and some valuable minin machinery destroyed, including a twenty stamp mill, cyanide plant, etc. The los will probably reach $75,000, if nc $100,000.

The sales of lands of the Hudson Ba Company during the year ended Marc 31st last amounted to £401,400, payabl over a term of years, and the cash receipts to £297,900, which compare wit sales for £170,200, and cash receipts fo £236,100 for the year ending March 3 1905.

TORONTO MARKETS.

Toronto, March 10, 1906.

Drugs, Chemicals, etc.—No feature has developed in the market for drugs this week, and prices are very little altered from a month ago. An average volume of trade is being carried on in the staple lines. Quinine, opium, carbolic acid and the other usual lines are in about the same position they were in last month, and there is little or no change. A report from Manchester, Eng., speaks thus of the chemical trade: The holidays seem to have caused less interruption to business this year than usual. This is generally a quieter time, but there has been a well-sustained enquiry for most classes of chemicals, and altogether the position may be considered satisfactory. In heavy alkalies a good business is being done. Bleaching powder and caustic soda are moving off steadily, and ammonia alkali has a good demand. Chlorates of potash and soda sell readily at the fixed prices. The export returns for the first quarter of this year as compared with the first quarter of 1905 show in bleaching materials an increase of 2,213 tons, or £9,187, and in soda compounds a decrease of 2,025 tons, or £31,327. In the tar products branch business has been fairly satisfactory. The low prices ruling for pitch are bringing consumers forward with their enquiries for next season, but makers are asking more money for that period. Benzole is somewhat weaker, the demand for enriching purposes having fallen away. Crude carbolic has slightly weakened; consumers generally have reduced their limits and are not anxious to purchase forward; crystal carbolic is quiet, and liquid has not much enquiry just now.

Flour and Grain.—The only difference in the flour trade compared with a week ago is that it is a shade firmer in the matter of prices. Holders are offered $3.10 for ninety per cent. patents, and some sales are being made at that rate, in buyers' bags. In wheat no great volume of trade is being done, and prices are fairly steady, though some changes may be seen in our prices current page. In other grains there is little of a striking character to record. Bran and shorts continue strong and at high prices.

Groceries.—There was another change in all grades of refined sugars last week, this time in an upward direction, an advance of 10 cents per hundred being recorded. The movement in this commodity, however, continues slow. Apart from this there is but little change in the situation to record. General trade, while not particularly active at the moment, is fairly satisfactory, and, according to reports from travellers in the field, such conditions are likely to continue. Canned goods are a feature, their firmness holding to the full.

Hardware and Metals.—The situation may be summed up by saying it continues much as was represented in our last report on the subject. A good and

ACENTS WANTED in every unrepresented District in Canada.

Town of Wapella Debentures

Sealed tenders will be received by the undersigned until 6 o'clock p.m. on Friday, the 18th day of May, 1906, for the purchase of $10,000 of the Town of Wapella debentures, bearing interest at the rate of five per centum per annum, payable in twenty equal instalments, at the Union Bank of Canada, Saskatchewan, on the 1st day of December in each year.

THOS. F. TERRY,
Secy.-Treas.,
Town of Wapella.

Dated at Wapella,
this 3rd day of March, 1906.

Debentures for Sale

The undersigned is prepared to receive tenders for the purchase of debentures of Drainage District No. 5 in the Province of Manitoba to the amount of $162,000.00 and of Drainage District No. 15 in the said Province to the amount of $22,000.00, said debentures being in denominations of $1,000.00 each, dated July 1st, 1906, payable in thirty years from the date thereof at the Union Bank of Canada, in the City of Montreal, and bearing interest at the rate of 4% per annum, payable half-yearly. These debentures are issued under the provisions of "The Land Drainage Act," and are guaranteed by the Province of Manitoba.

Tenders will also be received for debentures of the Central Judicial District in the said Province to the amount of $22,000.00, dated July 1st, 1906, payable on January 1st, 1924, at the Union Bank of Canada in the City of Montreal, and bearing interest at the rate of 4% per annum payable half-yearly.

All offers must be addresed to the undersigned, and marked "Tender for Debentures," and must reach this office not later than the 1st day of June, 1906.

Delivery and payment of debentures to be made in Winnipeg.

satisfactory trade is going on, both as recorded in the reports of men on the road and by the number of letter orders coming forward. Metals for the most part continue very firm, indeed, with a good volume of trade passing. During the early part of this month there was only a moderate amount of business in pig iron being done in the United Kingdom, but recently there has been a considerable improvement. Shipments from the Cleveland district are heavy, and now it is stated that British iron and steel will be required for America; this has stimulated enquiry, and some good business has been arranged. Prices of Scotch iron have only increased about 9d. per ton during the month, but Cleveland prices are some 3s. per ton higher, and the market strong and active. Copper in the same market has been strong throughout the month, but is only about 30s. per ton dearer. Tin has been an excited market, and has advanced some £12 per ton, and is strong. Spelter is very firm at an advance of 32s. 6d. per ton. Lead is unchanged, and is latterly firmer.

Hides, Skins and Leather.—Prices of hides are exceedingly strong just now, and there is no saying just when they are likely to become lower. In fact, some people are inclined to look for even higher prices yet. In tallow there is no appreciable change to report. An active trade is now being done in leather, and values continue very firm.

Provisions.—Prices for butter have a distinctly easier tendency, owing to the more liberal offerings. New cheese is coming forward more plentifully, being quoted at 11½ and 12c. (for twins). Old is steady. Eggs are hardly sufficient for the demand, and 17c. is now the ruling quotation. They are very dear for picklers' requirements. Good chickens are wanted, but there is little or no business passing. There is a good average demand for maple syrup. Stocks of hog products are becoming low, owing to the indisposition of dealers to load up at the high prices, but further advances are now in order. Hogs, too, are high. Beans are steady at $1.70 to $1.90, the latter being for best prime hand-picked.

Wool.—Large quantities of wool are coming in, and there is quite a large supply of unwashed throughout the country. For the latter 16 to 17c. is quoted. American buyers have been in the market for lots of old crop, and they have about cleaned it up. Conservative dealers believe there can scarcely be much upward movement in the near future, however, for the new clip.

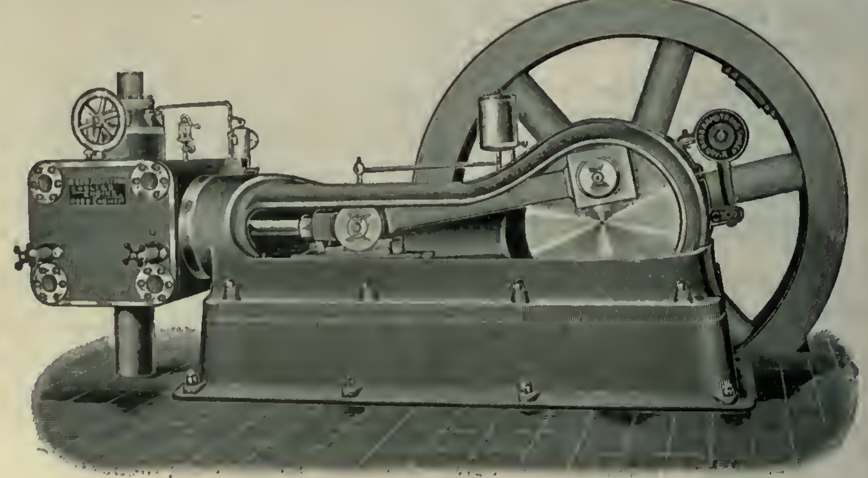
NOT ONE CENT FOR REPAIRS



An experienced engineer has written us as follows: "After eighteen months of hard service, the 'Robb' engines are in excellent shape, running very smooth and without a bit of vibration. Up to this time, they have not cost one cent for repairs, the only expense being steam, oil, and packing, and this below the average. Perfect alignment, parts well machined and good design make the 'Robb' the most economical and labour saving engine that has ever come to my notice."

MONTREAL MARKETS.

Montreal, 10th May, 1906.

Ashes.—The market is stronger at $5.40 for No. 1 pots, and probably a shade more would be paid for a round lot. Pearls are dull at $6.75 to $7. As showing how trade in this article is falling off the first outward bound steamers only took away 34 barrels, 22 of which went to Havre.

Cements and Firebricks.—There are already fair stocks of imported cements and firebricks on the wharves and summer quotations are in force. We quote: Belgian cement at $1.70 to $1.90; English ditto, $1.90 to $2.05; Canadian, $1.90; no American cement is offering. Firebricks are quoted at $17 to $21 per thousand. A good volume of business is reported.

Dairy Products.—Export business in cheese has opened well, and the seven first outgoing steamships last week carried 44,435 boxes, as against 10,891 boxes for the first week of navigation last year. Butter shipments were 1,039 packages. Owing to good export movement cheese prices are firmer than they were at the close of last week, and 11 to 11¼c. is quoted for fine white, and 10¾ to 11c. for colored. Finest creamery butter is quoted at 18 to 18¾c. per pound.

Dry Goods.—Though quite a fair number of country buyers have been in town this week, who report retail stocks on country shelves pretty full, owing to the cool, backward spring, yet payments on the 4th were very well met, some of the larger wholesale houses reporting from 85 to 90 per cent. of their customers' paper as being taken up. Sorting business cannot be called brisk, but quite a fair proportion of orders for fall lines, such as underwear, etc., are being booked. There has been some intimation from manufacturers of a probable further advance in cottons. Advices have been received from Europe of an advance in combs and other lines of hard rubber goods.

Groceries.—The week has developed very little that is new in this line, and bad country roads are apparently still affecting the movement of merchandise. The sugar market has been stationery since last report, the factory quotation for standard granulated being $4.10, with yellow ranging from $3.70 upwards. The molasses market is cabled stronger at the Island, 17c. being now quoted as first cost, with the crop pretty well sold up, and some 30,000 puncheons already delivered. Teas continue quiet. First parcels of new choice pickings have been marketed in Japan, and cable advices show rather higher figures for these than a year ago, but it is not expected there will be much variation in general quotations.

Hides.—The strength noted in the market last week is freely sustained, and local buyers are quoting 11½c. per lb. for No. 1 beef hides, 14c. for No. 1 calfskins, and 15c. each for lambskins. The volume is not great.

Leather.—The demand is less active, as some of the larger boot and shoe factories are working on curtailed time, owing to stock-taking. There is a steady export movement in splits, these goods being in active request in Britain. Values hold very firm, and we quote: No. 2 manufacturers' sole, 24½c.; slaughter sole, 28 to 29c.; Western splits, 26c.; Quebec ditto, 20 to 21c.; harness, 32 to 34c.; buff and pebble, 14 to 15c.; glove grain, 13 to 14c.; Scotch grain, 17c.; russet, 42 to 45c.

Metals and Hardware.—An active movement in these lines continues, and receipts of new stocks from abroad are fairly liberal. Pig-iron is moving pretty freely at $21.50 for best Scotch brands, and $18 for No. 3 Middlesboro; domestic brands are quoted at about $21. Bars are steady at $2 to $2.05, and nails at $2.10 for cut, and $2.15 for wire. There have been no recent changes in sheets, though it has been fully expected that an advance might take place in tinplates at any moment. Cakes of standard weight and brand continue to be quoted at $4, and charcoals at $4.25; Ternes, $6.85; galvanized sheets, $4.20 to $4.45; Canada plates, $2.60 for 52's; black sheets, $2.40. Boiler plate and iron pipe remain as quoted last week. Ingot tin continues to develop advance, and is now up to 47 to 47½c., while it is predicted it will go up to 50c.; antimony is also further advanced to 27 to 27½c.; lead, $4.25 to $4.35; spelter, $6.75 to $7; copper, 20½ to 21c. per pound.

Oils and Paints.—The linseed oil market abroad shows some ups and downs, but local quotations are fairly steady at 55c. per gallon for raw, and 58c. for boiled; turpentine quotes at 92 to 94c. as to lot; castor oil is firmer in primary markets, but local quotations remain at 8 to 9c. per pound, as to quality and lot. No new seal oil has reached here yet, and old stock of steam refined is selling at 44 to 45c.; Newfoundland cod oil is very dull at about 35c. Glass, leads, etc., are without change.

* * *

THE EXPANSION OF GERMANY.

The British Consul in Berlin in a recent report deals with an aspect of international competition which is of particular interest to British traders and manufacturers. It must be borne in mind that the rate of increase of population in Germany is higher than in any of the other great industrial countries, excepting, perhaps, the United States. The rate of increase in Germany was 13.8 per cent. for the decade ending 1900 (against 9.9 per cent. from 1891-1901 in the United Kingdom and 12.1 per cent. for England alone), while in the period 1896-1905 it amounted to fully 15.5 per cent.; in other words, the German Empire added within the last ten years 8,160,000 to its population, which in 1905 exceeded, 60,000,000, the growth being due almost entirely to natural reproduction. It follows that a much greater number, both absolutely and relatively, than in the United Kingdom has to be provided for every year, and that the stress on the labor market is much more formidable in Germany. That the general condition of the people is, on the whole, steadily improving in spite of these facts, speaks well, in the Consul's opinion, for the strength of the present favorable economic condition of the German Empire. The bad effects of years of depression like 1901 and 1902 are, of course, inevitable, but Germany has recovered therefrom quickly. In spite of the high rate of natural reproduction the percentage of unemployed in normal times is comparatively low, and, although the number of unemployed rose rapidly during the last period of depression (1901-1902), this calamity hardly assumed the proportions it did in the United Kingdom, and, moreover, disappeared much quicker. On the other hand, in good years, such as 1905, the national supply of labor does not even satisfy the demand, the scarcity of hands rendering it necessary to employ large numbers of Russians, Poles, Italians, and other foreigners in connection with house building, husbandry, earthworks, and the construction of canals and waterways.

The numerical increase, as well as the economic progress of the population, means a larger and a more prosperous market at home. Every year at present adds to the wealth of Germany, and the two bad years above mentioned retarded this upward movement only temporarily. All observers familiar with the aspect of Germany ten years ago cannot fail to notice the general improvement and greater prosperity; people dress better, houses are built better, numerous new and spacious factories bear testimony to the growing industrialization, and the communities of small towns and large cities in all parts of the country spend considerable sums on street and sanitary improvements and public buildings. This aspect of increasing prosperity is confirmed by the returns of the savings banks, income tax commissioners and insurance companies, and with an uninterrupted development at home, the foreign trade of Germany is likely to follow an upward course. The success of German manufacturers abroad cannot be explained by reason merely of low wages and unfair practices, such as the imitation of trade marks, substitution of inferior quality for dearer articles, etc.

* * *

PHOSPHORUS, THE ENEMY OF STEEL-MAKERS.

Twenty years ago or more Andrew Carnegie took a dozen friends, some Americans, some British, on top of a coach from Brighton to Inverness in June and July, and wrote a delightful description of the trip, which was afterwards published under the name of "An American Four-in-Hand in Britain."

The story, being written for private circulation, has all the racy freedom of the author's conversation, which, as those know who have met him, is discursive and merry enough. This trip was the realization of dreams shared by his mother and his partner and a friend when all were poor, and when the friend, being told of the first moderate success of Andrew and his partner, burst out: "Great Cæsar! boys,—if I ever get $1,500 a year income!" The book is full of contradictions: great admiration for Queen Victoria, but a contempt for monarchical institutions; passionate love for Scotland and great respect for England—but open sympathy for Ireland's rebellion; laudation of the United States and all her works and ways, banking included, at the expense of the bloated aristocracy of Britain and their down-trodden tenants; bitter hatred of war, together with eulogies of the ability of his favorite generals; exuberant fancy and a perfect mine of poetical quotation, with musical ecstacies and reflections upon libraries, alternating with shrewd business maxims and business sketches. One of these last we may give, as it illustrates the interest Mr. Carnegie can arouse in a subject with which he is familiar. At Windsor, the coaching party met Sydney G. Thomas, one of two young chemists who perfected the basic process of steel-making. Here is the story:

We were honored while here by the presence of Mr. Sidney G. Thomas and his sister, who came down from London and spent the day with us. Mr. Thomas is the young chemist, who, in conjunction with his cousin, Mr. Gilchrist, would not accept the dictum of the authorities that phosphorus, that fiend of steel manufacturers, cannot be expelled from iron ores at a high temperature. They set to work over a small toy pot, which deserves to rank with Watt's tea-kettle, to see whether the scientific world had not blundered. Let me premise that the presence of phosphorus in pig iron to the extent of more than about one-tenth of one per cent. is fatal to the production of good steel by the Bessemer or open-hearth processes. Do what you will, this troublesome substance persists in remaining with the iron. If there be phosphorus in the iron-stone you smelt, every atom of it will be found in the resulting iron; and if there be any in the limestone, or the coke or coal used, every atom of it also will find its way into the iron.

It is essential, therefore, that ironstone should be found practically free from phosphorus; but unfortunately such ore is scarce, and, therefore, expensive. The great iron-stone deposits of England are full of the enemy; so are those of America; hence, both countries depend largely upon ores which have to be transported from Spain and other countries. One authority estimates that if all the high phosphorus ores in Britain could be made as valuable as those free from the objectionable ingredient the saving per annum would go far to pay the interest upon the national debt. Many have been the attempts to devise some tempting bait to coax this fiend to forego his strange affinity for iron and unite with some other element. But no; his satanic majesty would cling to the metal.

Messrs. Thomas and Gilchrist, in studying some highly creditable experiments made by my friend, Lothian Bell, Esq. (for he was upon the right track), discovered an oversight which seemed to qualify the results which he reached, and to render his experiments inconclusive. It was possible, they thought, that his failure might have resulted from the fiend not being *kept* out when he *was* out. So they went quietly to work with their toy pot; and, Eureka! their charm had not only exorcised the fiend, but they had discovered how to lead him away from the molten metal into the refuse and shut the door on him there. Here was a triumph, indeed! I fancy they neither ate nor slept till repeated experiments proved that the true charm had been found at last.

Mr. E. Windsor Richards, the broad manager of the largest manufactory of iron and steel in the world, was soon acquainted by them with the discovery. He tried it upon a large scale, and announced the end of the reign of King Phosphorus; but he dies hard. This was some years ago, for I read the good news a few minutes after I had landed at Naples from the East, on my way round the world in the year 1879. Many obstacles had yet to be surmounted, but now every ton of steel manufactured at Mr. Richards' great works is made from iron-stone which a few years ago was counted worthless for steel. Enough iron-stone can be had for three dollars to make a ton of pig iron suitable for steel rails. The same amount of low phosphorus stone at Pittsburgh cost last year sixteen dollars, and yet there are intelligent people who do not understand why we cannot make rails as cheap as the English.

I wonder if I could explain to the general reader how Messrs. Thomas and Gilchrist succeeded. It always seems to me like a fairy tale. I will try. In making steel, ten tons of molten pig iron is run into a big pot called a converter, and hundreds of jets of air are blown up through the mass to burn out the silica and carbon, and finally to make it steel. Now, phosphorus has a greater affinity for lime than for iron when it reaches a certain temperature, and when the air-blast brings the mass to the required heat the million particles of phosphorus, like so many tiny ants disturbed, run hither and thither, quite ready to leave the iron for the lime. These clever young men first put a lot of lime in the bottom of the pot as a bait, and into this fly the ants, perfectly delighted with their new home. The lime and slag float to the top and are drawn off; but mark you, let the temperature fall, and the new home gets too cold to suit these salamanders, although the temperature may be over 2,000 degrees, hot enough to melt a bar of steel in a moment if thrown into the pot. No; they must have 2,500 degrees in the lime or they will rush back to the metal.

But here lay a difficulty: 2,500 degrees is so very hot that no ordinary pot lining will stand it, and, of course, the iron pot itself will not last a moment. If ganister or fire brick is used it crumbles away, and besides this, the plaguey particles of phosphorus will rush into it and tear it all to pieces. The great point is to get a basic lining; that is, one free from silica. This has at last been accomplished, and now the basic process is destined to revolutionize the manufacture of steel, for out of the poorer ores, and even out of puddle cinder, steel or iron much purer than any now made for rails or bridges can be obtained, and the two young chemists, patentees of the Thomas-Gilchrist process, take their rank in the domain of metallurgy with Cort, Nelson, Bessemer and Siemens. These two young men have done more for England's greatness than all her kings and queens and aristocracy put together.

UNITED STATES FINANCIAL CONDITIONS.

Henry Clews & Co., New York, in their special circular dated May 5, 1906, said:

A fresh wave of liquidation of almost cyclonic proportions struck Wall Street this week. Conditions were more or less unsettled by the San Francisco disaster, and the opportunity was seized to enforce some rather drastic liquidation, which fell chiefly upon a few prominent and rather too optimistic operators. This last decline in the market resulted in a drop of from 10 to 50 points in many of the active shares, inflicting severe losses in quarters which were fortunately able to stand them. In spite of this rather unusual break there are no rumors of serious trouble at this writing, and the financial atmosphere appears to have been much cleared now that the storm has spent its worst force. As has been repeatedly intimated in these advices, it was the monetary situation which furnished the instrument of power for the bears. Had it not been for the large demands of San Francisco upon an already overtaxed money market no such enforced decline would have been possible. Fortunately, we were able to secure material assistance from abroad, and thus mitigate the force of the blow. Some $30,000,000 of money has been remitted to San Francisco and over forty millions of gold has been ordered from Europe, being made immediately available through Secretary Shaw's leniency in depositing Treasury gold in return for bonds as collateral. Much of the money sent to San Francisco to strengthen local banks and prevent panic will soon return into the customary

SOLD BY ALL LEADING WHOLESALE HOUSES.

channels of circulation, so no further serious difficulty need be apprehended from Pacific Coast monetary demands, although this catastrophe will be a factor for some time to come.

Much relief has been furnished by the attitude of the foreign markets towards American securities. Over there confidence is evidently still strong in American investments. Large quantities of securities, especially bonds, have recently been sold to foreign purchasers, this being particularly opportune since our own markets are much weighted with new bond issues, which are slow of sale in a 5½ to 6 per cent. time money market. It is quite possible that further gold imports may be necessary, but American credit is in good form, and the activity in trade and industry insures a large and legitimate demand for money.

It is, perhaps, not sufficiently realized how great the decline in stocks has been. Since the high prices of 1905 many of the active shares have declined from 30 to 80 points. This is a tremendous shrinkage, amounting to probably one thousand millions. That such a contraction could take place without involving a single failure worth noting is remarkable testimony of the inherent strength of the financial situation. It, perhaps, can no longer be said that stocks are unduly high so long as industrial and commercial activity continues at its present level. Securities have certainly receded to a more natural level, and liquidation, if continued, should follow in other quarters where no recession has yet taken place after abnormally high prices. Speculation in real estate is still going on at a threatening pace, which cannot be indefinitely continued.

TRADE NOTES.

Mr. Robert J. Griffith, of the late Toronto wholesale grocery firm of W. & R. Griffith, and one of the oldest of Torontonians, died last week.

The death took place a few days ago of Mr. N. E. Hamilton, vice-president of the Hamilton Company, Montreal, and one of that city's most prominent business men. He had been in ill-health for several weeks.

Over a thousand employees of the Dominion Textile Company in Hochelaga, Montreal, quit work one day last week, the trouble starting, it appears, in a demand for a twenty per cent. increase in wages by the card-room workers. Four hundred workers also struck in the Ste. Anne's branch. It is understood that a basis of agreement has been reached.

The Dominion Linen Manufacturing Company, Limited, head office, Toronto, has been granted an Ontario charter empowering it to carry on the business of manufacturing and dealing in linen or other fibrous substances similar thereto, and dyeing or coloring the same. The share capital is $200,000. G. B. Strathy, barrister, of Toronto, is among those interested.

Figures are to hand respecting the acreage and yield of sugar beets in the Dominion last season. With the same number of plants in operation as in the previous year, there was an increase in sugar production amounting to 31,385 tons. The total acreage last year was 14,100, compared with 11,500 in 1904, and the quantity of beets received, 105,362 tons against 67,502 tons in 1904.

There are persistent rumors of a coming attempt in Brazil to corner the coffee crop, to be made by the new Government of that country. It is stated that a convention has been signed by the three presidents of the coffee States of San Paulo, Minas and Rio, by which it is agreed to maintain the price of coffee at 55 to 65 francs per sack of 60 kiles (130 pounds) during the first year, afterwards the prices to be raised to 70 francs per sack, to be levied, payable by the exporter, to provide the interest on a contemplated loan of $75,000,000, which is to be raised to enable the States to hold the coffee. Such attempts, however, seldom succeed, as past experience has shown.

* * *

The American Shippers' Association are holding conferences in Chicago to consider a movement for a general reduction of freight rates throughout the country. It is pointed out that the railroads by various subterfuges have been advancing their rates during the last few years, despite the fact that their traffic has been rapidly increasing, and this, the first concerted attempt to check this tendency, of a national character, is expected to do something in the right direction.

Mercantile Summary.

Both the Canadian Pacific and Grand Trunk Railways express their willingness, under certain conditions, to build a spur line to the factory section east of the Don.

At Regina were received in one month by the Canadian Pacific Railway 1,100 cars of settlers' effects. The railway stations and platforms were crowded at the close of April with these goods at various stations northward, so a recently-arrived traveller tells us.

The Montreal Reduction and Smelting Company of Canada, Limited, capital stock $2,000,000, has been incorporated by the Dominion Government. It will explore and search for mines, work them, produce electric power, etc. A Tremblay and J. H. Brown, of Montreal, are interested.

The J. W. Young Company, Limited. Toronto, has been incorporated for the purpose of buying, selling and manufacturing animal by-products, carrying on a general abattoir business, oil refinery and reduction works. J. W. Young and T. A. Rowan, both of Toronto, are among the provisional directors.

Jenkins Bros., Limited, of Montreal, have been granted a Dominion charter in order to make, sell and deal in valves, lubricators, injectors, couplings, machinery, etc. A. B. Jenkins, of West Orange, N.J.. and W. R. Stavert, of Montreal, are charter members of the concern, which has an authorized capital of $100,000.

For some twenty-seven years Mr. W. J. Tucker has done business as general merchant and druggist at Manitowaning, on Manitoulin Island. That gentleman tells us that he has now retired from all departments except the drug one in favor of his son, Eward R. Tucker, who will in future manage the other branches. Mr. Tucker is to be congratulated on a successful and worthy career as a general dealer.

As the result of a demand of assignment, made by an old partner, who had not been fully paid out, S. Adler, doing business in Montreal under the style of the Parisian Waist and Skirt Co., has put his affairs into the hands of Wilks & Michaud, accountants. The liabilities are said to reach $68,000, equal to the yearly extent of the business done, and appear to have been largely contracted within the past few months.

A despatch from Sault Ste. Marie says that an effort is being made at the Michigan Soo to have co-receiver appointed for the Michigan Lake Superior Power Company in the interest of the bondholders. The present receiver is Mr. Charles D. Warren, Toronto, president of the Lake Superior Corporation. Should the co-receiver be appointed he will look after the improvements to be made to the power plant in Michigan this summer, which will entail, it is said, an expenditure of half a million dollars.

Mercantile Summary.

The Queen City Plate Glass and Mirror Company, Toronto, had its premises badly damaged by fire last week, with a loss of some thousands of dollars. Insured.

The Winnipeg Electric Railway Company are engaged in the work of electrifying their Selkirk and Lake Winnipeg branch. Electric cars are already running as far as Kildonan.

The Canadian Westinghouse Company has been granted authority to increase its capital from $2,500,000 to $5,000,000, while the Mexican Consolidated Electric Company has been authorized to increase its capital stock from one to eight million dollars.

Joseph St. Amand, of Cabano, Que., which is near the New Brunswick line, was formerly a laborer, and for the past four years has been doing a limited business in a general store. He is now reported failed. He has been unsatisfactory in payments for some time past, and made an offer of 30 cents on the dollar about a fortnight ago.—Elie Falardeau, a carriage-maker, of St. Gabriel de Brandon, Que., a comparatively young beginner, has assigned, with small liabilities.

An offer of compromise at the rate of 50 cents on the dollar has been made by C. D. Dunfield, who is a general dealer of Bay Verte, N.B. Dunfield would appear to be something of a rolling stone, having served for a time in the British army in Egypt. He returned to New Brunswick, his native Province, about six years ago, but shortly afterward started storekeeping at Advocate, N.S. In 1902 he opened at his present address in a boot and shoe business, which he closed out in the course of a year or so, and in the spring of 1904 bought out the general store business of J. J. Brownell. He appears not to have shown much steady application in business matters, and his success as a storekeeper has always been regarded as problematical.

DEBENTURES
FOR SALE.

Sealed tenders marked "Tender for Debentures" will be received by the undersigned up to 5 o'clock p. m. on Friday May 18th next, for the purchase of $132,410.26 of City of London four per cent. Local Improvement Debentures.

Forms of tender giving full particulars of the debentures can be secured on application to City Treasurer.

The highest or any tender not necessarily accepted.

JOHN POPE,
City Treasurer.
JOHN FORRISTAL,
Chairman Finance Committee.

Unless the Government fails to complete its section of the Grand Trunk Pacific between Winnipeg and Lake Superior Junction, Mr. Morse says, that line will inaugurate its regular freight and passenger service between Edmonton and Winnipeg by the close of next year. Rails, ties and other accessories have already been purchased for this section, and every mile is now under contract, and material has been ordered for 1,000 miles of telegraph line to Edmonton. No definite conclusion has yet been arrived at in connection with the company's Winnipeg terminals.

Upon the demand of the Gault Bros. Co. an assignment has been made by J. E. Z. Plamondon, dry goods retailer in the city of Quebec. The liabilities are shown at $15,831, with assets nominally $15,200, consisting mainly of stock in Quebec and at St. Romuald.—Madam L. Noel & Co., in the millinery line at Quebec, has made a voluntary assignment to Lefaire & Taschereau. She owes but little.—F. X. Boisvert, machinist, in Quebec, is reported as compromising at 35 cents on the dollar.

The Ontario Government has decided to grant $3,000 per mile for twenty-five miles, to the Bruce Mines and Algoma Railway, to begin about twenty-five miles north of Bruce Mines. The object is to assist in the opening up of the copper mines in the Bruce Mines district. A grant of $5,000 per mile also is to be made to the Canada Central Railway Company for a line from Little Current to a point thirteen miles from Sudbury, where it will connect with a line already laid, a distance of fifty-three miles. This line would give Manitoulin Island easy access to the mainland.

The Ontario Government is understood to have expressed its willingness to give E. J. H. Pauley, of Toronto, a large free site on the Temiskaming and Northern Ontario Railway, between Cobalt and North Bay, on which to erect a smelter and refinery at a cost of $600,000. They are expected to be in operation by October. The coke required will be brought to the north shore of Georgian Bay and shipped in by rail. So far the mine owners at Cobalt have been met with the difficulty of how to smelt the ores without wasting one or other of the metals or minerals contained. Silver, cobalt, arsenic and nickel are all present generally in considerable quantities, and the mine owners were getting nothing for some of the products at the smelters in New Jersey. Saxon ores have been successfully treated which contain cobalt, arsenic and silver. The process is a secret one, but an arrangement was come to by which a license is granted to carry it on in Canada on condition that the process shall be in charge of two German experts to be sent out by the Royal Geological Institute of Berlin. It is quite possible that at a not very distant day the arsenic will be utilized in the manufacture of plate glass and a factory erected.

At a committee meeting in the Dominion House, held to consider the bill to incorporate the Hamilton, Waterloo and Guelph Railway, one member took the ground that the proposed railway would cross a Government canal and two railways, and, therefore, the Ontario Legislature would not under the circumstances have control of the road. Dr. Sproule also insisted that the Dominion Government should not take from the control of the Local Legislature what was purely a provincial railroad. Mr. R. G. Code appeared on behalf of the Ontario Government, and said he had received instructions to object to all such bills, which invaded provincial jurisdiction.

Messrs. Keating & Duncan announce the opening of offices at the Home Life Building, Victoria Street, Toronto, where they intend to carry on business as civil engineers, special attention being given to hydraulic, municipal, electrical and industrial undertakings. They will, we understand, prepare plans, specifications, estimates and reports on enterprises and concessions, either foreign or Canadian. Mr. Keating is a competent engineer and a gentleman of excellent reputation. He formerly acted as city engineer in Halifax, and for some years held the like position in Toronto, subsequently entering the employ of Mackenzie & Mann. Mr. Duncan has been city engineer at Port Arthur, and is highly spoken of.

Managers and Underwriters

—A New York despatch of May 7th states that stockholders of the New England and Telegraph Company voted on that day to increase the company's capital stock from $30,000,000 to $50,000,000.

The affairs of the Lake Superior Consolidated Corporation, Sault Ste. Marie, Ont., are now believed to be on a sound basis, both commercially and financially. The net profits of the corporation for the six or eight months of the last fiscal year were $520.000, and, according to present results, the net earnings for the fiscal year ending June 30th next will be $1,000,000 or possibly $1,250,000. The gross turnover is between six and seven million dollars per annum. The net earnings are, therefore, about two and a half times the interest on the first mortgage collateral trust bonds. The company's steel rail mills are working full blast, and have turned out from 600 to 800 tons daily, and, with the addition of two new blast furnaces, the foundations for which are already laid, the capacity of the rail mills can be nearly doubled. There are orders on hand which will keep these mills busy for many months to come.

THE WATERWAYS COMMISSION.

The International Waterways Commission has, it is understood, reached a practical agreement on several of the important questions which it had to deal with. The agreement arrived at has not, of course, been yet ratified by the Governments of Canada and the United States, but under it Canada will secure 36,000 cubic feet of water per second at Niagara, while the amount allotted to the United States is 18,500 per second. From Lake Michigan there will be drained 10,000 cubic feet per second for the Chicago drainage canal, which gives the United States altogether 28,500 cubic feet of water per second. At Sault Ste. Marie the water power is to be divided equally. The question of the division of other waters, such as the St. John River, has not been made the subject of any agreement, although the Canadian section lays down certain principles in regard to these. The United States section of the Commission, however, early in the negotiations took the ground that it had not competent power to deal with this latter phase of the question. It was the expressed opinion of the Commission after much deliberation that it would be a sacrilege to destroy the scenic effects of Niagara Falls, though they were not fully agreed as to the exact probable effects of the various diversions of water thereupon.

It was moved by Mr. George C. Gibbons, seconded by Mr. Louis Coste, that the Canadian section, while assenting to the above conclusions, did so upon the understanding that in connection therewith should be expressed their view that any treaty or arrangement as to the preservation of Niagara Falls should be limited to the term of twenty-five years, and should also establish the principles applicable to all diversions or uses of waters adjacent to the international boundary and of all streams which flow across the boundary.

* * *

—The census of population and employment, etc., is to be taken in Manitoba and the new Provinces of Saskatchewan and Alberta on the night of Sunday, June 24th, next.

—What is a national port? The question came up in the debate on Hon. Mr. Brodeur's bill in the House of Commons to reorganize the Montreal Harbor Board. He gave it as his opinion that all rivers and harbors should be under one responsible head, and favored making not only Montreal, but also Quebec, St. John, Halifax, Victoria, Vancouver, Midland and Port Colborne national ports and equipping them thoroughly. Then it was that the question came up as aforesaid, one which, so far as we understand, did not meet with a very definite reply. Something surely should be done to get out of the present state of deadlock at which the Montreal Harbor Board has arrived, which was good neither for the business interests of that city nor for anything else. And meanwhile the improvement of the St. Lawrence route between Montreal and Quebec seems to be making but slow progress.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Metropolitan Life Insurance Co.
(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve.
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

General Manager.

CONSERVATIVE PROGRESSIVE FAITHFUL

Some ot the cardinal aims of the Union Mutual management are—to be conservative in the choice of investments—to be progressive in the prosecution of the business—to be faithful to the interests of policyholders.

Agents of like inclination cordially welcomed.

UNION MUTUAL Life Insurance Co. Portland, Maine.

FRED E. RICHARDS, President.	ARTHUR L. BATES, Vice-President.

HENRI E. MORIN, Chief Agent for Canada,

RAILWAYS IN CANADA.

One of the marvels of the present day is the distribution of steam railway facilities over the world. There is probably half a million miles of railway in operation on the globe to-day, and of this one-half is on the continent of America. The share of the United States is in round numbers 200,000 miles. To be on a parity with the States in this respect according to population, Canada would require to have 15,000 miles of railway in operation. She had that much in 1893—she has far more now.

The latest printed statement of Canada's railway mileage in operation is in the Government Year Book of 1904, where the aggregate is given as 19,431 miles. Since that date, however, great and noteworthy additions have been made. For example:—

	Stated in 1904 at	Is to-day.
The C.P.R. system	8,062 miles.	9,004 miles.
The C.N.R. system	1,353 miles.	2,510 miles.
The G.T.R. system	3,144 miles.	3,943 miles.

In these three systems, therefore, an increase of 2,898 miles is seen. To this must be added the railway interests of Mackenzie & Mann in the Maritime Provinces, e.g., the Halifax and Southwestern, 245 miles, the Inverness Railroad in Cape Breton, sixty-one miles; the Great Northern, out of Quebec, 208 miles, making 3,412 miles added to two years, and increasing the total to 22,843 miles in operation in the Dominion. And there are possibly further increases by other roads.

Outside the comprehensive systems we have quoted, the largest separate stretch of railway is the Intercolonial, both in Prince Edward Island and stretching from Halifax to St. John and Montreal, which embraces 1,519 miles of track. The Canada Atlantic is credited with 458 miles, the Canada Southern with 382, the Calgary and Edmonton with 296, and so on. And the total passengers and freight carried in the last published Year Book is 22,148,000 passengers and 47,373,417 tons of freight. Scarcely any limit can be assigned to the rapid building of railways in Northwest Canada in the next few years. The competition in them is almost comparable to the rivalry now to be observed in the placing of bank branches by Canadian chartered banks. But whether Mackenzie & Mann, or J. J. Hill, or the Canadian Pacific build them, they are sure to be built, and the Canadian prairie farmer will have cause to rejoice.

* * *

NIAGARA POWER.

So pleased are Ontario people as a whole apparently, over the legislation of the present Government as to Niagara power, that it has become a common thing to hear from newspapers and individuals opinions, varying in intensity, as to the undoubted culpability of the power companies there for overcharging or intending to overcharge the consumer of electrical power. And when a concrete instance of such excessive charge was asked for, the reply was ready: "Look at the agreement of the Electrical Development Company with the Toronto Electric Company and the Toronto Railway. Thirty-five dollars is what the power company charges, and it is an outrageous price, considering what the Power Commission states as to the cost of electrical power in Toronto."

Without pronouncing upon the correctness of the Commission's estimate of cost, we might venture to ask any such questioners whether they know what the terms of the contract mentioned are, and if so, whether they are fairly set forth in the bald statement about $35 per measured horse-power per annum. We have ascertained from the document itself that it contains a distinct provision that whenever, from any cause, the developing company shall sell power at Toronto for a less rate than above-mentioned, the rate to the Toronto companies shall come down *pari passu*. Thus it is clear that when the pressure of competition shall, as it possibly may, reduce the price of electric power, these customers will share with other consumers in the decline.

The $35 rate is, as we understand it, for measured power. The Commission's figure is for flat power; and we are informed that a $35 measured rate is about equal to $25 flat rate. So that, the comparison should be as follows:—

Price for sale in Toronto, flat rate, according to report of Commission....	$16 53
Price to be charged flat rate to two Toronto companies	25 00

This is a more favorable showing for the Electrical Development Company than the $35 they were execrated for charging; the latter being double, and more than double the price which the Commission's expert advisers have led them to believe power can be furnished for at Toronto.

It is well to remember that, when the Government of Mr. Whitney disallowed the second concession of power made by the Ross Government to the Electrical Development Company, as they had a perfect right to do, they also confirmed the agreement made in January, 1903, between the Queen Victoria Park Commissioners and the Pellatt-Nicholls Syndicate, and likewise confirmed the assignment by the latter to the Development Company. This was done in May of last year, as Chap. 12 of the Ontario Statutes shows. The present Government had not, evidently, at that time, the light on the question of electrical power which has since resulted in the threatening legislation of this year's session.

According to a paragraph in Toronto dailies of Tuesday, the Premier can see nothing injurious to the rights of the power companies in the recent enactment, and he purposes to take steps to make it clear to the bondholders that there is no danger to their interests. We are glad to hear it; for there can be no doubt that the English bondholders are very strongly possessed of the notion that their interests are jeopardized, and that the effect of the present Government's legislation as to Niagara power derogates from the force of a bargain made by these bond-purchasers on the strength of an Act of a previous Government of the Province. And it will be well for him to so explain the meaning of the Act as to reassure them.

* * *

THE WOOLEN MARKETS.

Prices for wool are very high indeed; but notwithstanding this, an advance in unwashed was deemed advisable a few days ago, and has now come into effect. The quotation now is 17c. to 18c. Washed wool retains its last week's value of 25c. in the Toronto market, and reject 19 to 20c. Pulled wools are also quoted higher, as follows:—Combing, 24 to 25c.; super, 24 to 25c.; extra, 26 to 28c. These are high prices, as we have said, and some believe they are likely to go even higher, a contingency which, of course, the farmers are only too willing to look forward to. But so far as we can judge from the attitude of large handlers of the staple, to wait for further enhancement of values at this stage would be dangerous. The feeling is that wool is already too high. Farmers and country dealers should not be misled by reports that buyers from the United States have entered the Canadian market, and have been purchasers of Canadian wool. This is true to a certain small extent, but so far as we can gather, the wool transaction consisted of a carload of old wool bought here and there in small quantities. The purchase does not affect new clip at all. This latter is coming in now in fair quantities.

But while attempts to "boost" the price of wool still further are to be deprecated, it by no means follows that any great degree of weakening is to be looked for. The situation of all the wool markets in the world contradicts any such tendency. In both England and the United States the consumption of wool during the last year exceeded all records. A report from Philadelphia, however, refers to this point, so far as it affects the market for raw material, as follows:—

> "Owing to the heavy imports which are keeping close up to those of the same period last year, there is no acute scarcity. Manufacturers still find an ample assortment at a time when the new domestic clip is beginning to arrive in the market, and hopes of the rising prices predicted by some as a result of exhaustion of supplies, have now faded out of sight."

And again:—

> "Believing that wool had reached the top, manufacturers had no motive for buying ahead of their wants, and they have been either holding out of the market, or supplying themselves with foreign, which even with the high Dingley duties added, has proved to be relatively cheaper than domestic."

We hear also from United States wool centres that some manufacturers who are very large consumers, and who heretofore have used domestic wools, now report not having a single fleece of domestic in their mills. This is owing to the extraordinary high value of domestic wool at the points of production last year, and to the prices being higher for domestic than for the foreign plus duties and freight.

Another excerpt from the circular from the commission merchant's point of view, from which we quoted before, says that it is quite probable that dealers will be inclined to touch the coming clip lightly at first, and the services of commission houses may again come to be as great and as necessary factors to the western wool growers as in former years. During the past two seasons buyers were often found standing in rows at the shearing camps to buy the wool as soon as it was shorn, or even contracting for it on the sheep's back before shearing. The San Francisco calamity comes at a time to disturb the calculations of wool-growers for getting at least the closing prices of last summer.

Looking up references to conditions of the woolen trade, as they prevail abroad, we find the tone of the market in that great woolen centre, Bradford, to be extremely confident, all descriptions, both of home-grown and colonial wools being extremely firm in price. This is in keeping with the high values of finished goods (though often these are not high enough to be on a parity with the raw wool), and with the heavy and augmenting demand. And this accounts, too, for the keeping up of the prices on imported dress goods in Canada, which all dry goods merchants know so much about.

MR. HILL'S INTENTIONS.

The remarks recorded to have been made by Mr. Jas. J. Hill, President of the Great Northern Railway of America, during his recent visit to Winnipeg, and reception by the Canadian Club of that city, may be looked upon as an authoritative forecast of the intentions of the great Canadian-American railroader with regard to the Canadian North-West. They serve to show also that either some previous alleged disparaging expressions of opinion about the prospects of that great country were misreported, or that Mr. Hill recognizes "a foolish consistency to be the hobgoblin of little minds," and has the pluck to acknowledge his change of views. He now concedes that the possibities of the Canadian West are almost without limit, and that, as the country makes the city, Winnipeg must be a great city. And there will be, he foretells, as large a population west of the Red River as in all the rest of the Dominion within a short time. Transportation is the great, absorbing question. The greatness of the country has been proved, its fertility is unquestioned, and the obtaining of reasonable transportation facilities to the markets of the world is an assurance of prosperity, wealth and great population to western Canada.

Very frankly he stated that his company had had their eye on western Canada for many years, and now that existing systems of railway had become firmly established, they considered the time opportune to enter the field. Frankly also he said that, now they had made up their minds, they would not confine themselves to half measures. As an epitome of what the Great Northern has already done, or intends doing in connection with development work in the North-West, we cannot do better than repeat Mr. Hill's own words:—

> "We have brought our terminals into part of Winnipeg, and we shall lose no time in getting our connecting link from the boundary into the city constructed. We are now pushing forward grading on the branch lines from Gretna to Portage la Prairie, and from Botineau to Brandon, having secured terminals in both Brandon and Portage la Prairie. We have also fully decided on the main line from Vancouver to Winnipeg. Already we have a line in British Columbia to Fernie, and we propose to push that line across the great Western prairie until Winnipeg is reached. We propose to cross the C. P. R. and run our line considerably north of it, where the country is A1, and where local traffic is sure to be heavy."

Further, he declared that the G.N.R.R. had no intention of invading Eastern Canada, but would make use of the Canadian Pacific and Grand Trunk Pacific, and added that they would be in a position to forward freight from Winnipeg over the first trains run eastward by the latter road. No wonder Mr. Hill was received with enthusiasm by a people whose first thought is the development of their country.

Another important declaration made by the great railroad magnate was that close study of the situation had proved to him that the greatest boon from a commercial standpoint that could be conferred on the Dominion would be the consummation of the much-talked-of Georgian Bay route, that is the utilization of the Georgian Bay, the Ottawa River and the St. Lawrence for the establishment of a great permanent railway from the Gulf of St. Lawrence clear up to Fort William, Port Arthur, Duluth and other points on the Upper Lakes. "Nature," said Mr. Hill, "did about all she could for Canada when she pierced the continent with the St. Lawrence, the Ottawa, and the lakes, and to utilize this great boon you Canadians must do your share. If you did that you would soon have a continuous waterway, say of twenty-four feet, from Quebec or Montreal clear up to the head of Lake Superior. With that great enterprise consummated you could send all your wheat from the head of Lake Superior to Quebec for three cents a bushel. With a six or seven cent rate from the prairies to the lakes the cost of transporting your grain to Liverpool and other British ports would be reduced to the minimum." The root of the matter is that Canada is to be a great country, and Mr. Hill, though tardily, recognizes the fact to the full.

* * *

MUNICIPAL BOOK-KEEPING.

In these days of municipal enterprise and free borrowing by towns and villages for purposes of civic improvement it is of importance that the keeping of accounts by municipal officers should be accurate. Some years have elapsed since the authorities of the Province of Ontario took steps to improve the book-keeping of county and township treasurers. To this end a system of uniform books was introduced, and pains were taken to have officers instructed how to use them. It is agreeable to learn that a result of these steps is a decided improvement in the keeping of municipal accounts throughout the Province. And, as the Provincial Auditor expresses it, "although they are still very far from what they should be, there are good hopes of better things in the near future."

There are other things, however, in municipal circles, that are very far from what they should be. And one or two of them are emphasized by the Municipal Auditor, thus:—

"It is very discouraging to see such small salaries paid to these officers by the municipalities. Salaries of $15, $20, and $25 per annum are very frequent in their recurrence in the accounts. This should not be, unless in the case of a municipality whose revenue does not exceed $2,000 per annum. A treasurer's salary should not be less than $100, and this is far from being the case at present. There is a small class of retired merchants, and occasionally farmers, who take pleasure in doing the treasurer's work for next to nothing in the form of remuneration, and these are a great boon to the thrifty municipalities. But there are very many whose cases are a hardship, and these should be considered, more especially at the present time, when agricultural interests are so prosperous. No one who has had the opportunity of perusing the average collector's roll as it may be seen in any of the rural townships throughout the Province, can doubt the solid wealth and comfort of which it forms the exponent."

Here is what may be termed "the straight tip" by a business man to municipal residents, who have been getting their finances looked after by competent people at starvation wages, calling upon taxpayers to open their hearts and their pockets. There are few things harder than to get the average farmer, for instance, to consent to pay a decent salary to any municipal employee, whether it be a clerk, a treasurer, or a school-teacher. Looking through this volume we have found $20 the yearly salary paid to a certain township treasurer who had received $4,414 and disbursed $4,137 in a single year, the assessment amounting to $135,000. In a village with a collector's roll of $5,256, and an assessment exceeding a quarter million, the treasurer's compensation was only $45. And in a township near Lake Erie assessed for $403,000, the treasurer has done his work for six or eight years at $35 per annum.

We wonder if the present or the former treasurer of the Province has ever looked into the report of this official. If he did he must often have wondered at what it discovers. In the twelvemonths of 1905 there were 183 investigations made by Mr. Laing, ranging in number from ten in February to twenty-seven in October. In comparatively few of these audits or inspections, so he reports, was any evidence found of dishonesty on the part of the township officials, although there were numerous cases of bad book-keeping. Some of the incidents hidden away in the forty-three pages describing the investigations are worthy of being unearthed. We shall copy a few:—

> The treasurer of a certain village in the county of Wentworth, receives $20 per annum. "It is lucky for him that he has some other occupations or he would fare badly. He is a good man and deserving." "There is no municipal bank account kept by the treasurer in the township of———, county of Wentworth, which is a pity, as his accounts are otherwise a credit to him." "In the township of———, county of Simcoe, the books are poorly kept and there is no bank account. The treasurer's salary is $75 per annum, and he has been in office for three years." The assessment is $847,000 and the collector's roll $10,394.
>
> The treasurer of———, township (page 9) is one of the few who have so far declined to keep the Government form of cash-book. "His accounts might be better kept if he had tried harder." In the township of Sunnidale (assessment $814,356)) "the treasurer has been in office forty-two years and receives $100 per annum for his services, which are worth considerably more." The treasurer of the village of Bradford, a quarter million assessment, has been in office for six years and gets a salary of $45 per annum, which ought to be increased. The village of Creemore has "a poorly paid but efficient officer," whose duties now paid for at $20 a year, are shortly to be widened. In Tottenham the authorities give their man five dollars more.
>
> In the village of Ottawa East the treasurer receives a salary of $50 per annum, and "has served the municipality for seven years. He keeps the books fairly well and certainly deserves $100 at least." In the township of Dunn, county of Haldimand, the treasurer "has been in office six years and keeps the books as well as can be expected for $35, which is his annual salary." The township of Sherbrooke: "I cannot say much in favor of the treasurer's book-keeping, but as he acts as clerk also, and for the dual position only receives $45 per annum, and that for four years, he can scarcely be blamed if he does not come up to the mark."
>
> Two cases in the county of Haldimand are thus mentioned. Of one, "I cannot say much in favor of his book-keeping qualifications." Of another, "he is a careful man; I cannot say much in favor of his book-keeping, but his accounts appear to be correct." Two more cases, this time in Stormont county; of the first, a township treasurer, the auditor says:—"The treasurer is a very worthy man, but knows very little about accounts. Assets and liabilities, I am not in a position to give from information at my command." He says the like about an adjoining treasurer, adding, pawkily. "An audit here would do no harm."
>
> Respecting the county of Peterborough he has the following strong statement to make:—"For years the books of this county have been badly kept, but this fact did not appear to worry the County Council at all." Village of Norwood:—"The treasurer's salary is $25 per annum, which seems too small, considering he has given $3,000 security." In the township of Hollowell the treasurer's "books are well kept. He gets a salary of $50 per annum, and has been in office sixteen years." Tiverton, in Bruce county, gets this breeze: "Treasurer keeps the books very well; in office fifteen years; salary $45 per annum, which would stand an increase in such a thriving community." "Township of South Monaghan: Treasurer has been in office 35 years and receives $25 per annum." The treasurer of the village of Arkona "does not appear to get any salary. So far as I can judge, these are the poorest kept books in the county."

* * *

THE STOCK MARKET.

The effect of the San Francisco disaster, so far as stock market prices are concerned, seems to be wearing off, both in New York and in Canadian exchanges. In the two or three days immediately following the devastating fire, when the results on insurance companies could only be guessed at, and when there was a regular slump on Wall Street, prices for many kinds of securities in Montreal and Toronto declined two to three or more points, but this has since proved to have been caused, not so much by actual selling needs as by the indirect influence of a coming call for capital, and its transference from existing reproductive undertakings. Since then there have been distinct signs of recovery. The most tangible example of a rising market this week has been in MacKay, but even in this the actual net gain was small, the most important feature being the evidence of increasing firmness. Sao Paulo also rose from 142 to 143 1-4, but it dropped again to 141 1-2. Ontario Electrical Development is firmer again, C.P.R. is once more up to 160. On the whole, trading in general lines of stocks on the Toronto Exchange continues dull.

* * *

INSURANCE COMPANIES AND THE SAN FRANCISCO FIRE.

It is still impossible to ascertain the money worth of the property destroyed last month in San Francisco by earthquake and fire. And it is still too early to learn the amount of the insurance loss. Guesses at the value of property burned vary from 225 millions to 350 millions of dollars, the total valuation of property having been $400,000,000. And estimates of insurance company losses have differed widely. The opinions of well-informed underwriters, however, are at present much more moderate than were the wild statements or rather estimates of a fortnight ago. Mr. Clark, of the Aetna, for example, mentions $150,000,000 as the outside loss probable; and Mr. Evans, of the Continental, apparently without consulting the other, mentions the same figure. Mr. Sheldon, of the Phenix, Brooklyn, calculates that $100,000,000 will cover it.

As the losses of separate groups of companies, Dr. Albert Manes, in the Berlin "Der Tag," makes the statement that six German offices have nearly 50 million dollars insured in California, and nearly 69 millions on the whole Pacific Coast. For 1905, he says the California loss ratio was only 37.5 per cent., and the Pacific 43.1 per cent. He makes no estimate for San Francisco.

British companies were at first supposed to b liable for $70,000,000; later this was reduced to $60 000,000, but on May 14th, the amount was further reduced to $40,505,000. There appears to be no question that every British company will pay its losses in full. This latest figure we derive from a document sent us by the New York Insurance Department, which gives estimates of the San Francisco losses of all home and foreign companies doing business in that state. Sworn statements from these institutions will not be required until 30th June, by which date it is supposed companies will be able to arrive at their losses.

American companies are liable, it is estimated, for $63,771,000 loss in San Francisco; namely thirty-eight companies of New York State for $18,944,000, and thirty-six companies of other States for $44,728,000. These figures are from the same document.

There are eleven Russian, Scandinavian, and German companies whose losses Mr. Hendricks places at $9,165,000 in all, according to their own estimates up to 12th May.

The Canadian companies involved are the Western for $400,000, and the British America for $260,000, according to this compilation. But on enquiry at the offices of these companies yesterday, May 17th, we learn that their latest estimates are about $440,000 and $290,000 respectively.

Six United States companies, whose aggregate losses in San Francisco were $5,258,000, namely, the Traders of Illinois, (loss $3,748,000), the New York Fire, the United States Fire, the American, Mass., the American Pa., and the Mercantile, Mass., have re-insured or gone into liquidation since 18th April. But the other American companies stand bravely up to the disaster. Of the New York State companies the Continental will have to pay $1,900,000; the German-American probably $2,000,000; the Home $1,500,000. Of other States' companies the heaviest losers are the Hartford, which is down for claims of $5,750,000; the Aetna, for $2,700,000; the Connecticut, $1,775,000; the Insurance Company of North America $2,000,000; the Fireman's Fund of California, $2,800,000; the Phoenix, of Connecticut, $1,600,000, and the Pennsylvania for $2,250,000.

American insurance journals are foreshadowing a rise in rates, so generally overwhelming and so unexampled has been this latest disaster, and so essential their beginning to provide adequately, as companies have never done before, for the conflagration hazard. Says the "Insurance Press":—

"A reasoning public understands that fire rates, except for the small margin of 5 per cent., are needed to pay normal losses. A reasoning public knows that the extraordinary combination of occurrences in San Francisco could not have been foreseen by anybody. A reasoning public will not expect fire insurance companies to provide for such losses out of current rates."

❧ ❧ ❧

CANADIAN LIFE ASSURANCE.

A fortnight ago we made reference to the transactions of the life companies doing business in Canada and reporting to the Government at Ottawa. To-day we transfer to our columns (page 1554), a table from the recent Abstract of companies' reports which has been issued by the Superintendent. For convenience of comparison we may here place side by side the figures of the new business done during the last two years by different groups of companies:—

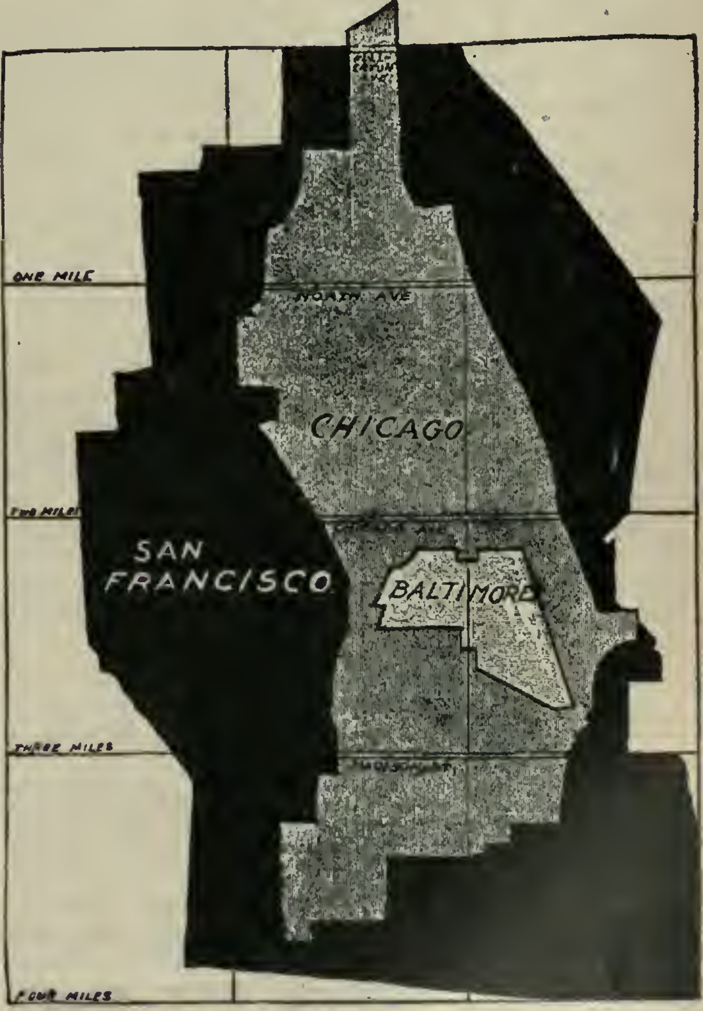
	1905.	1904.
Canadian companies	$67,348,141	$59,051,113
British companies	3,881,980	3,109,778
U. S. companies	34,486,215	36,145,211
Total	$105,716,336	$98,306,102

How the Canadian companies and their British confreres have gained upon their United States competitors in the business of last year appears from this comparison; for where the American companies had written 36 per cent. of the new business of 1904, they wrote only 32 per cent. of the business of 1905. The Canadian gain is from 60 per cent. of the whole to 63 per cent. on the year. In total in force the companies compare as follows:—

	1905.	1904.
Canadian companies	$397,946,902	$364,640,166
British companies	43,809,211	42,608,738
American companies ...	188,578,127	180,631,886
Total	$630,334,240	$587,880,790

The small proportion of the life assurance of Canadians which is done in British companies has often been remarked. Its percentage of only 4.14 which the figures of the new business represent in the table does not, however, hold in respect of total in force. The British companies total in force is nearly nine per cent. of the whole. This discrepancy is accounted for by the fact that out of fourteen British companies whose figures are given in the Abstract, only six take new insurance; the remaining eight doing no new business in this country.

Three Great Fires



(Reproduced from the News of Indianapolis by the Insurance News)

San Francisco's Burned Area Compared With Other Great Fires.

—It is interesting to recall that the total foreign trade of Canada doubled in the ten years 1895 to 1905. In the year first-mentioned the imports were $105,252,511 in value, and the exports $113,638,803—this being one of our "economic" years, when exports exceeded imports—total, $218,891,000. In the fiscal year 1905 our imports were $261,912,000, our exports $203,316,000; total, $465,228,000. It would not be an extravagant estimate that, with population increasing at its present rate, and with a continuance of the existing activity in production and commerce, we shall have by ten years from the present time, a foreign trade of one thousand millions of dollars. Such an estimate is justified if we multiply the external trade of Canada in 1905 by two.

* * *

HOME TRUTHS.

Sir Thomas Shaughnessy spoke some plain truths to Britishers when, in a speech before the Canada Club in London, at which the Colonial Secretary was present, he commented on the neglect of British ministers and permanent officials to visit and become acquainted with the actual conditions prevailing in the respective sections of the Empire they were charged to govern. He contended that such an official as the permanent head of the Canadian Department of the Colonial Office ought by rights to spend three months of every year in Canada. What is more, this gentleman was present, and heard Sir Thomas' remarks.

Certainly, it is most extraordinary, the manner in which Government officials in the Mother Country apparently look upon their positions. We are not speaking of them as particular individuals, but as types, for neither political party seems better or worse than the other in the production of officers who will take the slightest trouble to come to headquarters to look into the matters they might be supposed to know about at first hand. One might be led to believe that each one looks upon Canada, or the particular part of the Empire the interests of which he is supposed officially to look after, as the place to be particularly shunned, at any rate until such time as he shall hold no governmental connection with it. At least, we believe it to be a fact that no British minister while in office has ever visited Canada. If the King comes here on a visit, however, as he is now pressingly invited to do, he will set the fashion.

If Sir Thomas Shaughnessy's frank words should perchance bring about a little questioning on the part of those in authority at Downing Street as to the exact why and wherefore of this strange aloofness, they will have done good work, for surely the instant such a strange defect in the home Briton's method of dealing with his fellow-Britons' interests is brought to his unobservant eye, he cannot fail to rectify it. The Imperial Government's policy of knowing as little as it can about the colonies is one that has lasted long enough; perhaps Mr. Chamberlain has already punctured it.

* * *

LIVERPOOL MARKET FOR CANADIAN WOODS.

The monthly circular of Farnworth & Jardine, dated 1st May denotes a slight decline in the quantity of Canadian timber and lumber reaching that port since 1st January as compared with the same period in former years. The business of April although quiet has been of a steady character, and values all round have been well maintained. Imports have been on a moderate scale, the deliveries fair, and stocks are light, though quite sufficient, the new import season being almost in sight.

As to Canadian woods, the demand for waney pine has been quiet, but stocks are light, and values firm. For square pine there has been little enquiry, but there is only a small stock, and values are firmer. Red pine: The demand is limited. Oak: The demand shows improvement and the stock is low; prices are strong. Elm: There is no improvement in the demand to report, but stocks are moderate; prices rule high. Pine deals: The import consists of a few small consignments per liners; the consumption has been fairly satisfactory, and stocks are in a more moderate compass; values are firm with an upward tendency. Red pine deals: There is little change to report.

New Brunswick and Nova Scotia spruce and pine deals: The arrivals to the Mersey during the past month by the liners from St. John, N. B., and Halifax, N. S., amount to 2,920 standards, against 3,050 standards during the corresponding month last year; the deliveries have again been satisfactory, stocks are in a fairly moderate compass, and values are steady. Pine deals: Quiet demand.

Birch in the log has arrived more freely, the consumption has been fairly satisfactory but prices are easier; stocks are sufficient. Of planks the import has been heavy, deliveries fair, but stocks are ample; values are slightly weaker.

British Columbian and Oregon pine: No arrivals; the deliveries continue on a more satisfactory scale, but the stock is still heavy; values are firmer. Sequoia (California redwood): Stock is quite sufficient for the limited demand; sales have only been in retail quantities. Kauri pine: The demand is quiet and stocks are ample. The pitch pine market is firm at unchanged values.

A MEMORABLE EXCURSION.

Halifax Merchants Visit Their Customers.

The attention and a good deal of the time of the leading business men of Halifax having been diverted during the past week to the excursion of the Board of Trade of that city that event naturally forms the principal item of news. And, as it is a comparatively new idea in that part of Canada, and comprised a rapid review of conditions on the south shore of this rich Province, perhaps a description of the trip may form, says our correspondent, this week's letter to the "Monetary Times."

This idea of trade excursions was first suggested here by W. J. Clayton, of Clayton & Sons. As put briefly by him, "the object of these excursions is to afford the business men of Halifax an opportunity of becoming better acquainted with the merchants of the districts visited." The matter was brought up before the board some weeks ago, and although some opposition was shown the general sentiment was in favor of the proposal. The first excursion was booked for May 8th, 9th, and 10th, along the towns of the south shore, the itinerary including Hubbards, Chester, Chester Basin, Mahone, Lunenburg, Bridgewater, Liverpool, New Germany, Caledonia, and Springfield. About seventy members of the board went on this trade pilgrimage by a special train supplied by the Halifax and South-Western, and everything possible was done by the railway officials, from Superintendent Sullivan down, to promote the comfort of the passengers and the success of the excursion generally. The stops made varied according to the size and importance of the place visited, a good deal of time being devoted to Lunenburg, Bridgewater and Liverpool as the more important places. At each point the local Board of Trade had prepared a reception, and everywhere the greatest interest was manifested in the idea, so that the excursion was like a triumphal procession all along the line.

Usually the first thing done was to call on all the business people at their own places of business for a few words of greeting. Then the programme of sight-seeing and visiting of local industries arranged by the local board was followed out, and afterwards a public meeting held, at which views and impressions were interchanged: the local boards telling what they were endeavoring to accomplish locally and the Halifax delegates speaking on the work of the board in Halifax. In this way both sides were given a pretty accurate idea of conditions prevailing.

The tourist trade was much discussed, as was natural in a part of the country where the attractions to tourists are probably unsurpassed in this part of Canada. The whole country along the south shore opened up by this Halifax and South-Western Railway cannot fail to become one of the great summer play-grounds of Canada. Trout and salmon fishing abound everywhere. The day after Prince Louis and party left the Midway, unsuccessful, one man caught four salmon with the fly in one pool. Already the Americans have begun to hear of the beauties of this part of the country, and Chester, on Mahone Bay, 45 miles from Halifax, has been practically made by them, many well-known people from different parts of the United States having erected handsome residences at that pretty spot, which they occupy during the summer season. They have also built a large and handsome summer hotel. The attractions of Chester are in no way superior to those of half a dozen other places along the line, and there seems no doubt that this whole section, so rich in fine landscapes and sporting attractions, will soon be revealed to the world through the advertising of its loving friends.

To characterize the main products of the different sections of South-West Nova Scotia in one word for each, we might do so as follows: Lunenburg, fish; Bridgewater, lumber; Liverpool, tourists; Caledonia, mines. Although these attributes are interchangeable and enjoyed by each to a greater or less extent, it is for the species of trade mentioned that they are pre-eminently noted.

The fleet of bank fishing schooners making its home port at Lunenburg was away on the summer voyage during our visit, but everywhere could be observed traces (though not unpleasantly) of that branch of commerce which has brought so much wealth to Lunenburg, Mahone, and other ports. They make and man their own ships in Lunenburg, and everywhere there is this prosperous air which the great codfish lends.

In Bridgewater, again, the air is full of the satisfying smell of wet lumber. In its narrow river-mouth five or six large vessels were crowded together, taking on cargoes of lumber, and others were further down the stream. The magnitude of this lumber trade (which is increasing steadily) may be imagined from the fact that at one of the sources of supply, the Davidson mill at Springfield, we afterwards saw over twenty million feet of lumber maturing and awaiting shipment over the Halifax and South-Western Railroad to the wharves at Bridgewater. And there are many mills along the river.

There was a time when Liverpool, the present end of the line, was a place of much greater importance than it is to-day. That town built wooden ships for creation, and manned them, too. It is regrettable to be told that the last of the old race of sea captains, who retired with their competence, put up a full-rigged flagstaff in their front yard and built a home around it, are disappearing from the earth. The younger generation does not go to sea to fill their places. A few ships are yet built, but the glory of Liverpool as a shipping port has largely departed. The residents have one feature of which they are very proud—the only electrical marine railway in the world. It is a very beautiful town, and very restful. Living is cheap, and fishing plentiful. Could you imagine anything more inviting to the lotos-eaters?

Caledonia, which lies some thirty miles back from the sea, is the centre of the mining section of North Queen's county. There are some rich gold mines there, and some richer forests. It has great water-power—and here I see I have omitted to mention above in connection with Liverpool that the power, developed or potential, of the Mersey River is simply enormous. The engineer whom they engaged to report on it, calculated that 24,000 horse-power could be easily developed, and that 10,000 horse-power runs to waste in certain falls on the river. Liverpool has developed 2,000 horse-power from which they get very cheap electrical power and light the town at a low rate.

Reverting to Caledonia, the North Queen's Board of Trade had been formed a few days before our arrival, and arranged a most interesting meeting. Representatives from different sections gave five-minute addresses, full of pith and information. Their forests contain millions of feet of standing timber, just now being bored into. There are great openings for sheep-raising and fruit-growing. Our last visit as excursionists was to the mill at Hastings, the most modern in Canada. The log-pond is heated in winter time; patent grapplers bring the logs to the log-haul; steam dogs seize them with frightful iron fingers and throw them first down the roll-way to the saws and then dandle them about until they are in proper position before the saw. All through the operation of cutting lumber from logs there is a fascination which was lacking in the old time sawmill—the fascination of machines that are almost human in their ingenuity.

This is necessarily only a running sketch of the excursion. It proved so successful, so interesting and so satisfactory in every particular that others will follow shortly, and a much larger number of members of the Halifax Board of Trade will likely attend.

Halifax, 14th May, 1906.

* * *

RECENT BANK STATEMENTS.

A few days ago was issued the half-yearly statement of the Bank of Montreal. Its showing is a gratifying one, for the net profits for the year ended with April last were $840,562 compared with $781,960 in the like period of 1905. Adding these to the balance of profit and loss brought forward and paying dividend at ten per cent. per annum, there remains $922,418 to carry forward as compared with $665,156 a year ago. The general statement shows that the deposits bearing interest amount to $84,334,592, as compared with $79,125,464 on April 30, 1905, an increase of $5,209,128, while deposits not bearing interest amount to $26,311,390, as against $22,383,013 on April 30 last year, an increase of $3,928,377. The bank's total deposits, therefore, amount to $110,645,982, as against $101,508,477 at the same time last year, an increase of no less than $9,137,505. The rest remains at $10,000,000, while the capital paid is $14,400,000.

We have received the thirty-first annual statement of the Imperial Bank, which is to the end of last month, and we hope to comment on it more fully next week, after the annual meeting on 23rd May. Meanwhile we notice the profit and loss account, which is made up to the end of April, the bank year being changed from its former date of end May. It exhibits for the eleven months a net profit of $535,000 (which if calculated for a full twelve-month would equal $584,000), a very high rate of earning upon the average capital employed during the period. The annual meeting is advertised to be held on Wednesday next, 23rd instant, when some expressions appropriate to the occasion may be expected from the president and general manager.

The annual statement of the Sovereign Bank has been issued, and the tables issued therewith contain some striking comparisons. In four years its paid capital has been increased from $1,293,000 to $3,585,000; its deposits have gone up from $3,250,000 to $11,858,000; its commercial loans and discounts have grown from $2,709,000 to $11,691,000. This is certainly rapid growth. The business of the year closed 30th April last shows some interesting features. To net earnings of $187,467 are to be added the profit on new stock issued at $125 and $130 per share; this amounts to $767,800; and after paying six per cent. dividend $830,000 has been added to reserve, which has already, in four years, reached $1,230,000.

The statement of La Banque Nationale has been published, for the twelve months ended with April last. A creditable gain in earnings is shown over the previous year. The year's profits amounted to $195,753, compared with $140,685 last year. Deposits of the bank have increased from $6,753,109 to $7,662,728, and the reserve fund now amounts to $600,000, which is a gain of a hundred thousand on the year.

* * *

BANKING AND FINANCIAL.

A branch of the Imperial Bank of Canada was opened at Quebec this week under the management of Mr. W. A. Weir, formerly manager at Kenora.

We have received a circular from the Montreal Board of Trade branch of the Bank of Toronto. That bank has also opened a branch at Lynden, Ont.

Belle, in the Stock Exchange gallery.—"What a hubbub! Why don't they sit down and rest?" Maude.—"Oh, it's too expensive. Richard told me that a seat there cost thousands of dollars."

The annual meeting of the Montreal Stock Exchange was held last week, when the following officers were elected: Chairman, A. A. Wilson; vice-chairman, R. Forget, M.P.; secretary, P. McDougall; managers, H. G. Strathy, F. W. Barlow, J. J. Pangman, H. B. McDougall.

The number of branches of chartered Canadian banks at the close of the year 1901 was only 740. By the end of the year 1902 it had risen to 897; by the end of the next year to 1,048; and at the 30th April, 1905, to 1,210. What it is now we cannot state with entire accuracy, but we know of 1,450.

Since the last announcement in this column of the Sterling Bank, further branches have been opened at the following places: Dungannon, Sombra, Port Dalhousie, Bayfield, Shedden, Thornhill, and Lefroy. This bank surpasses any new institution of which we have knowledge in the number of branches it has opened while yet so absolutely new to the business public.

The choice of the directors of the Dominion Bank for the position of general manager in succession to the late Mr. Brough has fallen upon Mr. Clarence A. Bogart. This gentleman, although only 42 years of age, has passed through all the grades of banking routine in his own bank, and has presumably obtained a thorough knowledge of Canadian banking. It is twenty-five years since he began at Uxbridge, and he has occupied various posts since then. In 1891 he was appointed assistant inspector and, as all bank men know, inspection is good training. He was assistant manager at Toronto when chosen in 1898 to open the bank's branch in Montreal where he was a member of the Board of Trade and prominent in other directions as well. The record he has made in the esteem of his board is shown in his appointment to the general managership.

"Old Subscriber" writes from London on Saturday last lamenting the evidences he everywhere sees of extravagance, in the street, in the household, in the council chamber. And he asks whether other counties are showing a like spirit or whether Canada is making too much of her prosperity. We can only say in reply that while Canadians are "going it" rather swiftly in many respects, both public and private, they are not alone in showing a disposition towards prodigality. The same story comes from the United States, whose people can give lessons to almost any other nation in the art of free spending. And it is not many months since the president of the Bankers' Institute, of London, England, felt it his duty to speak out, thus:—"The crying evil of the day is the extravagance of the age, be it imperial, be it municipal, be it personal. On all sides this is increasing by a geometrical progression. Surely it is time and more than time to cry 'halt'! How much are we benefited either as a nation or as individuals by this excessive expenditure? And always with this extravagance comes an increasing desire for less work and more holidays. Has not the time come to take stock of our position, and seriously consider how long we can with prudence venture to go on living at the present rate?"

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, May 17th, 1906, as compared with those of the previous week:

	May 17.	May 10.
Montreal	$28,289,474	$30,486,688
Toronto	$26,427,969	26.319,326
Winnipeg	9,343.100	8,486,179
Halifax	1.687.708	1,758,118
Hamilton	1,449,970	1,380,543
St. John	1,100.214	1,134.794
Vancouver	2.295.487	2,318,485
Victoria	723.605	851.658
Quebec	1,647,523	1,976,716
Ottawa	2,521,147	2,830,232
London	1,109.547	1,340,094
Calgary	869.273	973,257
Total	$77,465,017	$79,856,090

Mercantile Summary

It was prudently decided by the International Waterways Commission to limit the flow of water through the Chicago drainage canal to ten thousand cubic feet of water per second. This is in order to maintain a navigable depth of water in the Great Lakes and their connecting channels. But Chicago objects. It is a very selfish objection. And besides, she stands in her own light.

The passenger agent of the C.P.R. at Chicago, Mr. A. C. Shaw, tells the Montreal "Gazette" that the movement of settlers from the American West to the Canadian West this year is at least 25 per cent. greater than for the corresponding period last year. He adds that the United States for the first four months of this year had contributed about 27,000 settlers to Canada. "Most of the settlers leave for Canada in the spring and fall," said he, "and between seasons the homeseeker is spying out the new agricultural Eldorado. When he has decided where to settle he returns for his family and effects, and thus there is a constant movement of American citizens in both directions—but infinitely greater northbound." Mr. Shaw states that last summer was the largest in the history of the company for tourist business to the Pacific coast.

INSURANCE BUSINESS IN MANITOBA.

The Winnipeg "Free Press" prints a statement of the premiums taken in Manitoba for life assurance for several years. The totals are: $874,546 for 1900; $1,002,306 for 1902; $1,150,884 for 1903; $1,329,138 for 1904; $1,478,059 for 1905.

"There is some change in the position of the companies in regard to individual totals. Last year the Confederation Life held first place, but this year it is occupied by the Great-West Life, which has moved up from the third to the first position. The Equitable shows a slight decrease in the amount of business, but the New York Life has held its own. It does not yet appear that the investigations which created so much comment have materially affected the volume of the business of those companies which were most concerned.

"On the whole the companies have made a splendid record in Manitoba, and it looks as though the prairie province will continue to keep the lead in the high individual insurance carried by its citizens. The following shows the premium receipts of the companies in Manitoba covering a series of years:"

	1905.	1904.	1901.

Universal Life		5,185 00	....
Total	$1,478,059 98	$1,329,138 72	$874,546 22

There are 34 companies in this list, all Canadian but ten. We remark that the total for 1905 is estimated for the return lacks the figures of eight companies in that year. If we allow these eight companies as much premium income in that year as they had in 1904, the total for 1905 will be $1,600,000 instead of $1,478,000. The Canadian companies, as appears from this list, have done seventy per cent. of the business, leaving thirty per cent. for the three British and seven American companies.

---

*Companies combined.

* * *

LONDON AND LANCASHIRE FIRE INSURANCE COMPANY.

The forty-fourth annual general meeting of the shareholders of this company was held on April 25. As the speech of the chairman of directors on that occasion appears to reflect the feeling and attitude of various great British companies in view of the San Francisco disaster we quote the greater part of it. The lesson of the realness of the conflagration hazard is plain.

Said Mr. Harrison:—"Only a short week ago I could have come before you without a cloud on our sky, to report that 1905 had been the most brilliant year in the history of the company. I will not dwell upon this, as you have the figures before you. Our fire account surpassed all previous records, and our accident business was entirely satisfactory. In all we made over £300,000 clear underwriting profit, and at least £130,000 of this came from the North American continent. This profit we placed almost intact to the enhancement of our reserves. These reserves are now altered, and, looking at the matter from the most severe point of view, we shall probbaly revert to the position which we occupied seven years ago. During those seven years we have made over £1,100,000 profit on our underwriting, and have added an equal amount to our funds. It simply means, gentlemen, that, to provide for this great emergency, we now use the money which we have been putting by during those years. We commenced operating in San Francisco in 1879, and have ever since transacted a large and successful business, yielding steady profits. Indeed, I may say that the surplus of our underwriting in that city for the last fifteen years has been nearly 30 per cent. on the premiums. You will understand, therefore, that business was competed for keenly, and we, at the time of this catastrophe, had—chiefly in consequence of this very competition—an appreciably smaller business than we used to have ten or fifteen years ago. That there was a conflagration hazard was recognized by all underwriters, but we have had the most exhaustive reports made from time to time by our best experts, and it was considered that a fire, if it were not nipped in the bud, could, without much difficulty have been confined within reasonable proportions.

"Imagine a town half the size of Liverpool, with almost the whole of the city proper of massive construction, and with two great fire breaks miles long formed by Market Street and Van Ness Avenue, each having a width of approximately 120 feet, and then realize what the fire protection was when I tell you that there were in San Francisco no less than 40 fire brigade stations, all in intimate communication with each other, and having in the aggregate something like 60 fire engines. But it is always the unexpected that happens, and human foresight could scarcely have imagined that a great earthquake could have occurred with the result that the whole system was rendered useless by the instantaneous rupture of the mains and the consequent destruction of the water supply. Nothing in modern history could have made us suppose that such an event, in its awful completeness, was possible. A week ago our reserve stood at the handsome figure of £2.157,735. Half of this is now gone, but we have the other half still untouched, and in addition our goodwill—a goodwill, as you know, of great value."

In response to a resolution of thanks to managers and agents, Mr. Rutter, general manager, said:—"Gentlemen, we are in the throes of a great trial. By the irony of fate the fruits of our seven years' work are swept away through an earthquake. At such a moment of anxiety I would have wished that you and I had been spared this annual resolution to-day, for I felt, and feel, that it is all such a paradox. But I must not forget those who have been assisting me, and were it not for their loyal help my efforts would have been weak, and the results poor. We are all very grateful to you. You have been kind enough year after year to express your approval, and I have said, at least once, that some day we should have to ask for your sympathy. Now we must begin our work over again, and I ask for your patience. We have a laborious task before us. We have to build up what has been destroyed, but this is not a company which can only make money in prosperous times. We have our opportunity to show you that it can wrestle with what is called adversity, and it will not be our fault if the London and Lancashire does not emerge from this test, this supreme ordeal, with a higher reputation and a greater future than could ever have been anticipated. The very fact that we are able to pay a loss of such gigantic proportions is the greatest testimony to our present and potential strength."

CANADIAN PRODUCE IN JAMAICA.

Mr. G. Eustace Burke, Canadian Trade Agent in Jamaica, speaks of complaints having reached him as to the quality of Canadian butter. One brand he refers to in particular as one that had been received on the West Indian market in tins and kegs, and was bidding fair to take its stand as a standard, reliable article, but had since deteriorated very considerably, due probably to the high prices for fine creamery which have been ruling in the Canadian market lately. Mr. Burke remarks, however, that this is no excuse, as it would have been far wiser, and commercially economic, for the shippers to have kept up the usual standard grade adding the additional rise. Such a course would have been more satisfactory both to importers and consumers. These remarks, he explains, refer more especially to a Nova Scotia brand. A creamery butter from Montreal put up in jars calls for no complaint, the standard being retained. The only fault found, however, is, that as a matter of fact the glass jars in question do not contain the full quantity represented, viz., one pound.

A very determined effort is being made to introduce another line of Canadian butter from Montreal, but the sample shipment to hand has proved somewhat too salt for the Jamaican market, and if the butter were more of a canary color it would answer better. With these slight defects rectified, and a disposition to meet the requirements of the trade as to method of packing and description of package called for, the output ought to be satisfactory. The Canadian article is certainly in favor as against United States manufacture, retailers taking particular pains to impress that they can supply "Canadian cheese," and it is not too much to say that such representation is not always in line with fact. This circumstance, however, emphasizes my remarks that the Canadian article has grown much in favor. We cannot, however, too strongly impress the importance of supplying quality as uniform as possible, and complying with request as to sizes of cheese required, packing always in single strong boxes.

With regard to ham and bacon, Mr. Burke claims that, while it is possible that United States packers may be in a position to place a somewhat cheaper article on the market by say a couple of cents per pound, yet with the superior method of curing and the superiority of the Canadian "raw material" there is little doubt that if a serious effort be made, the like result will accrue as in the English market, viz., the Canadian article will easily command the advanced price. Saleable hams are from seven to twelve pounds, and breakfast bacon in slips of from three to six pounds. There is also a lively demand for picnic hams, and also Wiltshire cut mild cured bacon. In all cases the respective articles should be neatly placed in canvas, and it would be advisable to adopt a special trade mark.

The Martin Steam Power Brick Machine

STYLE "B"

Capacity 25 to 30,000 Weight, 8,500

This machine in its original form, as built 20 years ago, has been on the Canadian market during that time made by several parties. Not being satisfied with the old machine, we procured from the patentee the latest improved machine, and it is this machine we offer our customers. Every machine is correctly adjusted before leaving our works.

We have a few of these machines in stock for immediate delivery.

PRICES OF COMMODITIES.

The London "Economist's" Index Number showing the prices of commodities, indicates that while values of various kinds of merchandise are still slightly below the level at which they stood at the end of last year, they have gone up a little during the last month. At the end of April last the Index Number stood at 2,337, compared with 2,306 a month previously. At the end of March 1905 it was 2,153, and at the end of the same month in 1904 at 2,234. The only recessions during the month are in tea and sugar. All kinds of metals have been more than usually firm. Pig-iron fully made up for the slight fall it sustained a month or two ago, while of tin the "Economist" says the present figure is more than double the basis price on which its Index Number is calculated. Copper also is higher than for many years. Textiles have hardened during the month. Wheat moved up a little.

A SEVEN MONTHS' TOWN.

Unless one has seen a new village in the latest settling Canadian North-West he cannot realize how quickly one of these astonishing communities grows. An experience, related by a citizen of Winnipeg, of a short business trip over the Canadian Northern Railway in Saskatchewan and northern Alberta is given by the "Free Press" of that city. Mr. Hawkins states that the progress being made in the new Province this year is something unparalleled, and to be thoroughly realized should be seen at first hand. Almost every siding from Grandview to Edmonton contains one or more cars of settlers' effects in the process of unloading. Hotel accommodation at every point is taxed to its utmost. Land seekers and homesteaders are to be met with all over the prairie. It is, however, in the small villages and towns that are springing up that the growth is most noticeable.

He instances Vermilion, situated in the fertile valley of the Vermilion River, a place which could not boast a single building seven months ago. To-day its business section contains eight general stores, two lumber yards, three restaurants, three barber shops, two livery stables, three hotels, five real estate offices, a butcher, a baker, a tailor, a wholesale liquor store, steam laundry, fruit store, furniture, a bank, stationery store, tinshop, jewelry store, flour and feed, two implement stores, hardware, two pool rooms, a bowling alley, a drug store. The professions are represented by a barrister, two doctors, a dentist and two preachers. One newspaper, the "Signal," edited by W. B. Cameron, keeps the interest of Vermilion to the front. Vermilion is a divisional point on the Canadian Northern Railway, and promises to be one of the largest and most progressive points in Alberta.

Mr. Hawkins states respecting the progress of the year's farming that seeding is well under way in the new districts which he visited, and the increased acreage and splendid weather conditions promise another bountiful year for the Western farmer.

* * *

MOTOR ACCIDENTS.

A statement has been made, in answer to a question asked in the British House of Commons regarding the number of motor car and motor omnibus accidents coming under the notice of the police within the Metropolitan area only during the past quarter. It appears that motors caused in one way and another 949 accidents, and motor omnibuses 777; and, it is added, that, "considering the great disparity at present in the numbers of the two classes of motors, it is very evident that the motor omnibus, so far, is proving even more dangerous than the ordinary motor. What is worse is that in both cases the number of accidents has steadily risen during the three months under notice." Commenting on the figures an English insurance exchange says: "In regard to motor omnibuses there can be little room for doubting that these vehicles as they multiply will be answerable for a great deal of mischief."

We think, on the contrary, that as the motors grow mo common the result will be a relative lessening of acciden through them. It will be remembered that when bicycl first came into active use accidents by reason of their u were frequent—many of the riders were "green," the foo passenger public disliked and feared the uncanny lookir machines, and regulations by municipalities or conventio by riders had not been established. To-day, when the peop who use bicycles have as a rule learned how to ride the without colliding with each other or running over foot-pa sengers and dogs accidents are much more rare. So, in o opinion, will it be with motors. The thing that motoris have to overcome is the contemptuous dislike people wh live on country roads have of the "snorting, smell machines."

THE MONETARY POSITION IN THE UNITED STATES.

In a lengthy analytical article on the monetary positio in the United States and its effect upon internationa markets, the London "Economist" points out, in its issue c 5th May, that in the month then just past the United State has taken something like six millions sterling in gold fror Europe, of which nearly £5,000,000 was from the Bank o England, and the open market in London. This is th heaviest drain of gold to New York for about a decade. I

The Traders Bank of Canada

Dividend No. 41.

Notice is hereby given that a Dividend of Three and One-half per Cent. upon the Capital Stock of this Bank has been declared for the current half-year, being at the rate of Seven per Cent. per annum, and that the same will be payable at the Bank and its Branches, on and after

Friday, the First Day of June next.

The Transfer Books will be closed from the 17th to the 31st of May, both days inclusive.

The Annual General Meeting of Shareholders will be held at the Banking House, 10 Front Street West, on Tuesday, the 19th of June, 1906, the chair to be taken at 12 o'clock noon.

By order of the Board,

The Traders Bank of Canada.
Toronto, 17th April, 1906.

H. S. STRATHY,
General Manager.

is exactly ten years since the United States drew heavily upon European gold supplies, her demands for the metal in 1896 having been due to one of the periodical currency scares in America. "Until these gold exports actually commence," the "Economist" goes on, "it would seem impossible to convince some people that the effect upon genuine prosperity, even of phenomenal trade activity such as that which has characterized the United States for many years past, may be neutralized by the results of extensive speculations. Those who during recent months have been inclined to question the soundness of the financial position in the States have been usually met with the remark that on this side of the Atlantic we can 'form no conception of the extraordinary prosperity of a country like the United States.' Vague generalizations of this kind are usually untrustworthy, and oft-times dangerous. No one who has studied the matter at all doubts for one moment the prosperity in America nor questions the wonderful natural resources and recuperative power of that country, even when afflicted by some great national disaster such as that which has just occurred at San Francisco. Past experience of financial events in America, however, has shown again and again that in between these bursts of prosperity come some very awkward times, when the financial strain, which almost inevitably follows periods of excessive trading and speculation is rendered all the greater in the United States by reason of the imperfect currency system."

* * *

TRADE ENQUIRIES.

Enquiries were received at the Canadian office in London (City Trade Branch) during the week ending 4th May, 1906. First, from a Midlands maker of yarns who wishes to get into touch with actual Canadian manufacturers of hosiery, sweaters, and fabrics made on hosiery machinery; a Midlands Company making a special line of pepper would like to do business in Canada; a London company making refined bitumen, insulated box compounds and other lines used by the electrical trade is open to appoint Canadian resident agent; a London firm of importers wishes to hear from Canadian packers of high grade lobsters who seek export trade.

At the Canadian Government office, 17 Victoria St., London, recent enquiry was made by one English firm of boot polish, harness compo. and furniture cream manufacturers to open up business with Canada, by agent. The British patentee of a new system of fire appliances is desirous of arranging with Canadian firms for the manufacture of these goods in the Dominion. A London firm of salesmen taking consignments of frozen poultry, rabbits, etc., is anxious to correspond with Canadian exporters. At the city trade branch, 73 Basinghall Street, E. C., a firm of importers in Copenhagen, Denmark, applies to get into touch with Canadian packers of canned lobsters who wish to do business in their markets. A London manufacturing company seeks supplies from Canada of five-ply veneer, suitable for the production of trouser presses and similar goods. A Midlands company making tool bags, food baskets and similar lines wish to be placed in communication with Canadian importers of these goods.

* * *

ANSWERS TO CORRESPONDENCE.

E. D. K., Berlin.—The fault in spelling lies with our printer and proof-reader; "supersede" is the correct spelling. But the Hamilton "Times," from which we took the item on page 1492, gave only the twelve words reproduced; we do not know what the other one was. Surely our Ontario school-teachers could do better than those Pennsylvania ones.

Holder, Montreal.—The evidence has not appeared in full in any daily paper we have seen, but one of our staff was present in court and heard the man testify. The current prices for the stocks mentioned have been, within the past few months: Sun & Hastings Loan, 80 to 82; Dominion Permanent, 78 to 80; Trusts & Guarantee, 74; Reliance Loan Class B. C., about 90, and Class A, say 100 to 105; Colonial Investment, 75

S. S. Kenora.—Not having at hand complete statistics we cannot answer your question fully. But it may help you if we say that, according to the "Engineering and Mining Journal" the production of copper in Mexico during 1905 reached 144,350,962 pounds, and the importation of copper from that country into the United States last year was 121,536,582 pounds. Copper production in Canada in the year 1905 amounted to 47,597,502 pounds, as compared with 42,970,594 pounds in 1904, most of it from the Boundary district of British Columbia, but a fair share around Sudbury, Ontario.

Bank Clerk, London, writes:—"I wish you could send me two copies of your paper with a banking article in it about 'Manager and Customer.' I don't know the date, but it was last year some time. It must have been a bank man that wrote it. The story told about the coal man who was $150 short, etc., etc., is so like what happened lately to a bank acountant I know, that I would like to send him a paper so he could get the lesson off by heart." [We reply that the issue of the "Monetary Times" described was that of 12th May last year. It is out of print. The stories it contained were true, as we were informed. One of our staff wrote the article, but derived the incidents from two different sources—one a bank man, the other a disgruntled customer of a bank.—Ed. M. T.]

* * *

RIVERDALE BUSINESS MEN'S ASSOCIATION.

Practical good has already come to the East End of Toronto through the efforts of this body. Some weks ago, the authorities of the city approached the Private Bills Committee of the Ontario Legislature with a request for power to build a spur line of railway along Ashbridges Bay for the use of East End manufacturers. But they met with the cold shoulder. However, the vigilance committee of the Association secured a hearing last week before the Railway Committee with the result that the city is now empowered to build the spur, or to enter into negotiations with any railway company to do so. The mayor has written to Mr. Barker, the secretary of the Association, a letter of congratulation upon the good work it has accomplished for the city in this matter. "It must be a source of gratification to you (as it certainly is to me) that your Association has been so successful in its efforts in behalf of the Riverdale district especially, and the city generally; and I congratulate you heartily upon the result. It will now be in order," adds his worship, " for us to have the switch built ourselves, or to arrange with one of the railways to build it for us."

* * *

—The Railway Committee of the Dominion Parliament has reported the Grand Trunk Pacific Railway bill authorizing the issue of debenture stock to the amount of $25,000,000 for the equipment of the road. This legislation, it is understood, will not interfere with the Government mortgage, as the issue provides for ranks after the Government lien. Clause six of the bill authorizes the company to guarantee bonds, debentures, and other securities issued by the Grand Trunk Pacific Branch Line Company. Another bill taken up was that for the incorporation of the Grand Trunk Pacific Branch Line Company, with power to build some twenty-two named connecting with the new transcontinental line and such other branches as the Governor-in-Council may approve. The capital of this company is fixed at $50,000,000. A separate company is needed to build the branch lines, as in view of the securities already issued to provide for the construction of the G. T. P. main line, the money to construct the proposed branches to the Nova Scotia seaboard, to St. John, N.B., to Montreal, Ottawa, North Bay, Brandon, Yorkton, Regina, Prince Albert, Battleford, Calgary, Vancouver, Victoria, Dawson City, to Hudson Bay, and to connect with Toronto, cannot be secured without the organization of a separate company.

The Merchants Bank of Canada

Notice is hereby given that a dividend of 3½ per cent. for the current half-year, being at the rate of 7 per cent. per annum upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city, on and after

Friday the 1st day of June Next.

The Transfer Books will be closed from the 17th to the 31st day of May next, both days inclusive.

The Annual General meeting of Shareholders will be held at the Banking House, in the City of Montreal, on

Wednesday the 20th day of June

next. The Chair will be taken at 12 o'clock, noon.

By order of the Board,
E. F. HEBDEN,
General Manager.

Debentures for Sale.

Sealed tenders will be received by the undersigned up to noon on **Wednesday 23rd of May 1906**, for the purchase of $8,500 00 High School Debentures of the Town of Kincardine, dated the 31st December 1905, bearing interest at the rate of 4% per annum, a portion of the principal, together with the interest to be paid yearly on the 31st day of December in each of the 30 years during the currency of the said Debentures.

JOHN H. SCOUGALL.
Town Clerk.

On one day last week no fewer than twenty-five persons were admitted as members of the Chambre de Commerce, of Montreal, by the council of that organization.

Mercantile Summary.

Formerly a journeyman in the employ of the Dominion Bridge Works, Joseph Ouimet bought out a grocery business in Maisonneuve suburbs, Montreal, about eighteen months ago, has turned over his estate to the assignee.

Carmichael Bros., a firm of pump makers in Montreal, also making use of the style of the National Pump Co., have made an assignment. They have been found very slow pay during the past year, frequent suits having been recorded against them.

Whether it be an Indian or a French name, Nominingue is tolerably foreign-looking. It is the name of a place in Labelle county, Que., 100 miles or more north of Ottawa. There, for twelve months or more a man named Odilon Sabourin has been keeping a small grocery, buying in Montreal and elsewhere. We now hear of his assignment after being repeatedly sued.

E. Mills & Co., grist millers and dealers in flour and feed at Knowlton, Que., have assigned on the demand of a local creditor, and a meeting of all creditors is called for the 18th inst. The liabilities are reported at about $8,000. The business is an old-established one, having been started by the late Erastus Mills in the early sixties. Of late years his son, Ernest E. Mills, has been the sole proprietor.

Bell Bros., in a fairly large general store way at Kazabazua, which is in Wright county, Que., north of Hull, were burned out last month, with only partial insurance, loss being stated at $12,000, and insurance at $7,500. An offer of compromise is now submitted by the firm at the rate of 40 cents on the dollar. The present sole proprietor of the business is James H. Bell, by profession an Anglican clergyman.

A demand of assignment has been made upon J. A. Berthiaume & Co., sash and door manufacturers, of Terrebonne, Que., and a statement of affairs is being prepared by Lamarche & Benoit, accountants, Montreal.—Honoré Huard, a contracting builder, of St. Romuald, Que., has assigned, with liabilities of about $2,000.—Ash & Swan, a Montreal firm of builders, have consented to assign on demand.

Many evidences have been given that the city of St. John, N.B., is in earnest in the march of modern improvement. Our correspondent in that city has told us from time to time of various proposed enterprises. The winter business of the port is growing, and arrangements have to be made for its accommodation. On 14th April we learned that the city authorities had arranged to issue $700,000 in debentures, the bulk of which is to retire a bank loan and the remainder for wharf and other marine accommodation. We now learn that tenders are asked for these debentures at four per cent., half-yearly, payable in forty years. An advertisement gives particulars.

BONDS

DOMINION
SECURITIES
CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

An offer of compromise at the rate of 25 cents on the dollar is made by C. B. Blackie, dealer in men's furnishings, at Sydney, N.S. In September last he was reported asking an extension of time on liabilities of $4,200, and he has since been frequently sued.

A paragraph from Three Rivers last week said that rails have been laid for about one mile along the line of the new St. Maurice Valley Railway. Grading and other work is going on well, and it is said that trains will be running through to Shawinigan this fall.

Owen Sound has been growing steadily for years. The town—why not city?—has a population of 10,765, compared with 10,192 twelve months ago. The assessors' returns, compiled this week, show that the total valuation of the property in the town is $5,338,396, which is a pretty handsome total.

Upon the demand of the Canadian Rubber Co. an assignment has been made by Robert Wall & Co., manufacturers' agents and shoe jobbers in Montreal, liabilities being stated at close upon $25,000. Mr. Wall was formerly interested as partner in a retail shoe business carried on under the name of F. W. Slater, which proved unsuccessful in 1903, and owing to this he has latterly been doing business under cover of his wife's name.

The strike of longshoremen at Lake Michigan and Lake Erie ports, which has kept some 20,000 men out of work for several days, and been a great disturber of business, seems to be over so far as the Soo line of vessels is concerned. Word comes from Buffalo to the effect that the men have declared it off. Since the trouble began the Canadian Pacific Railway Company has been obliged to bill freight offering in the New England States and Eastern Canada for St. Paul and Minneapolis by the all-rail route. Now the former arrangement of shipping by rail to Windsor and thence by the Buffalo, Minneapolis and St. Paul Steamship Company, known as the "Soo Line," will be resumed.

"The demands of the Canadian West" is a phrase heard very often of late in railway and other transportation circles. A recent despatch from Fort William states that if no strike or other conditions interrupt the coal movement to the twin ports of Fort William and Port Arthur this season, all records of quantity will be broken. Fourteen large cargoes have arrived at those ports since the opening of navigation, a total of 97,000 tons. The demands of the Canadian West have made it necessary for the Canadian Northern Railway to erect a new 3,000 ton-a-day coal dock, which has just been completed at Port Arthur. It is in every way probable that before the close of navigation 300,000 tons of steel rails will be delivered here for the Grand Trunk Pacific, 100,000 tons for the Canadian Pacific, and 25,000 tons for the Canadian Northern.

Mercantile Summary.

The Pacific Coal Co. has ordered two 150 horse-power boilers from the Robb Engineering Co. for their mine at Bankhead, Alberta.

Half a dozen brokers were discussing Russell Sage and his peculiarities when one of them told this story: The aged financier was once asked: "When does a man get enough money, Mr. Sage?" "When he gets $10,000 more," said "Uncle Russell," as he stopped at an apple stand for a moment. Then he passed on without buying.—Unidentified.

We have been told that the Canadian White Company, Limited, Montreal, have in hand contracts which amount to over two million and a half dollars. This includes building construction, electric railway work, power development and work for the Grand Trunk Pacific in the North-West. The new Federal Life Building in Hamilton, being erected by this company, is progressing very satisfactorily. All the floors are now in and a large portion of the exterior material is in place.

The estate of J. E. Morrisette, dry goods retailer at Three Rivers, Que., who died about a month ago, has been placed in the hands of Kent & Turcotte, accountants, in Montreal, for liquidation, and the assets are to be sold on the 21st inst. It is not expected that creditors will realize in full on their claims.—The estate of the late E. J. Paradis, a manufacturer of threshing machines at Beauport, Que., who died last December, has also been placed in insolvency, and Edmond Giroux, of Beauport, has been appointed assignee.

With these strenuous spring days and so much adoing, everything calls for money, and the more shopping the more frequent become the visits to the bank, and then one sensibly appreciates the advantages and facilities afforded one in the woman's department in the Crown Bank. A woman's department in a banking institution is something new, and something very much worth while talking about. The Crown Bank of Canada was the first to open a woman's room, and, besides being a most comfortable place, where women may meet their friends and make use of when down town, everything pertaining to banking methods is lucidly explained, and financial matters adjusted in a most satisfactory manner.

—The ten engines of the Temiskaming and Northern Ontario Railway are to be increased by four, which are to be delivered by the Kingston Locomotive Works at the end of this month. Tenders for two switching engines have been called for, one to be stationed at North Bay, and the other at the division point, Englehart. Four passenger coaches will be delivered in a few days from Cobourg, and four more are being bought from another road.

UNITED STATES FINANCE.

Last week's circular of Henry Clews & Co., New York, says:

A more hopeful feeling now prevails in financial circles. This may be attributed partly to improved monetary conditions, and partly to the fact that all known unfavorable circumstances appear to have been discounted by the decline which culminated a week ago, and which resulted in a depreciation estimated at nearly $1,000,000,000. After such a prolonged and radical decline, recovery was perfectly natural. A large short interest has been created, and buying on this account not only induced a rally but satisfied temporarily, at least, the bear operators who had made very considerable profits. The fact, too, that the market could withstand such a series of shocks as have been encountered during the last few weeks, some of them of a rather violent nature, gave confidence to the undertone of the market.

Liquidation has been very severe, and the technical situation considerably improved thereby. A year ago it would have been impossible to have made anybody believe that such a depreciation as has just been experienced could take place without precipitating serious trouble, if not actual panic. That the market has withstood these extraordinary shocks without a single failure of importance, is remarkable testimony of general financial strength and soundness.

Another element of strength in the stock market was the cessation of the coal strike. For the miners this proved a most unfortunate affair, inasmuch as they lost about a month's wages, aggregating nearly $8,000,000, to say nothing of the loss of prestige to Mr. Mitchell and his immediate followers. The public at large will probably thank Mr. Mitchell for averting the struggle, which would have involved widespread disaster and possible defeat to his own men, as well as an increase of several millions in the cost of coal to consumers. Amongst his own followers, however, Mr. Mitchell is quite likely to lose confidence; and his unfriendly rivals within the union will certainly use this defeat to his detriment as much as possible. For the coal operators the occasion has been one of increased advantage, not merely in holding in check aggressive union demands, but also by enabling the companies to dispose of a surplus stock at better prices than would have prevailed had no strike been threatened. The companies had a surplus of about 10,000,000 tons on hand, much of which they sold at an increased profit.

"EVERYBODY WORKS ROUND OUR HOUSE."

How they sing it in Boston is thus:

Every one labors except our distinguished progenitor.
He reposes in a recumbent position within our residence through the day,
His pedal extremities idling upon the bronze of the steam radiator,
Serenely engaged in extracting nebulous atmosphere from a tobacco receptacle of mundane matter.
Our maternal mentor receives soiled linen for the purpose of cleansing it,
And in this connection I should include filial Ann.
Indeed, everybody is engaged in some variety of occupation in our domestic habitat—
Excluding, as primarily suggested, our distinguished progenitor.—Springfield Republican.

AN INSURANCE TANGLE.

A New York despatch of last week says that efforts to adjust the losses and protect the reserves of the various insurance companies as a result of the San Francisco disaster have not only resulted in a split in the New York Insurance Exchange, but seems likely to bring about a tangle in the insurance world that will not be straightened out for a long time.

The Continental Insurance Company, through Henry Evans, its president, has served notice of its withdrawal from the Exchange. Further withdrawals are likely, and may result in the entire disruption of the Exchange, which has maintained an agreement as to rates and commissions, which all the companies doing business in this city pledged themselves not to violate.

TENDERS FOR

DEBENTURES.

City of Saint John, N.B.

TENDERS, addressed Treasury Department, City of Saint John, Province of New Brunswick, and marked "Tenders for Debentures", will be received by the undersigned, up to 12 o'clock, noon, on the Twenty-eighth day of June, 1906, for the purchase of Seven hundred and Twenty-one Thousand ($721,000.) Dollars, "Saint John City Debentures", to be issued by the City of Saint John, payable at the expiration of forty years, with interest at four (4) per cent. per annum, payable half yearly, from the First day of May, 1906. Principal and interest may be payable at Chamberlain's Office, in Saint John, New Brunswick, or in Great Britain, or elsewhere.

The Debentures may be expressed in sterling money of Great Britain, in currency of Dominion of Canada, or in the currency of any Foreign Country, and in sums not less than Five Hundred Dollars each as purchaser may desire.

Resolutions passed by the Common Council of the City of Saint John provide for the formation of a Sinking Fund for the redemption of these Debentures at maturity.

Parties tendering must state in their tender in what currency, in what sums and where they desire the Debentures and Interest to be made payable.

The highest or any tender not necessarily accepted.

By Order of the Treasury Department of Common Council.

HERBERT E. WARDROPER,
Common Clerk
CITY OF ST. JOHN, N.B.

Prospectus in connection with above Loan may be obtained on application.

—The Elder-Dempster Steamship Company has been operating a monthly steamship service between Canada and Cuba and Mexico. To the last-named country it states that export trade has expanded considerably since the inauguration of the service, but the shipping company labors under the difficulty of having no return cargo. At present Canada does not consume much of what Mexico produces, except raw sugar. But in this item it cannot compete with the West Indies, which have a preference of 33 1-3 per cent. The company is asking the Dominion Government, therefore that Mexico should be granted a similar preference, in order to develop Canadian trade with that republic. The Montreal Board of Trade, to whom a request for assistance along these lines was lodged, state that they cannot second the company's efforts along those lines, the whole idea of the preference being that it shall favor Great Britain or parts of the British Empire.

HYSTERICAL INSURANCE LEGISLATION.

Nine out of ten life insurance policyholders think that the insurance reform legislation put through the New York Legislature this spring has renovated and purged life insurance and accomplished great good for them. It is not surprising that they should have reached this conclusion. They followed, more or less closely, the thorough investigation made by the Armstrong Committee, guided by that able inquisitor, Charles E. Hughes. They placed great confidence in the ability and sincerity of this committee and its learned counsel. Quite naturally they assumed that its recommendations, many of which, in some form, are now on the statute books of New York State, were entirely safe, sane and wholesome, and that life insurance in New York, at least, would, in future, be conducted honorably, wisely, conservatively and economically in the interest of policyholders. Their opinions were confirmed by what they read in the newspapers and magazines.

But the average newspaper correspondent or editor is no more an insurance expert than is the average policyholder. All have assumed that good, and only good, could come from the honest and thorough-going Armstrong Committee. All took it for granted that a committee that could wield the muck-rake so effectively and could uncover so much corruption, would recommend proper remedial measures. The fact that neither the committee nor its counsel were insurance experts; that it dealt only with the bad side of insurance; that it did not pretend to recommend legislation, except to cure the specific evils uncovered; that medicine was given for these evils without much considering its possible effects upon the insurance patient's general constitution; these facts have been overlooked by the public.

But a day of disillusionment is dawning for these policyholders. Now that the investigation and the legislation have passed over, we can, in the calm following the period of stress and storm and hysteria, view the results of it all tranquilly and seriously. The people are now quiet and ready to listen to reason and logic from those best qualified to pass judgment in insurance matters. Hon. William A. Fricke, ex-Commissioner of Insurance in Wisconsin, in "Moody's Magazine" for May, analyzes the result of the legislative investigation in New York. His article's most important conclusion is that policyholders will be injured, rather than benefited, by the new legislation. He shows that the real evil in life insurance was the unaccountability of officials for the immense surpluses that have come from deferred dividend policies. This evil remains untouched, so far as present policyholders and present surpluses are concerned. Mr. Fricke decides not only that the new voting plan will prove to be cumbersome, expensive, and ineffective, but that the new laws will discourage mutual and encourage stock companies—just what was not desired.—Moody's Magazine.

Town of Wapella Debentures

Sealed tenders will be received by the undersigned until 6 o'clock p.m. on Friday, the 18th day of May, 1906, for the purchase of $10,000 of the Town of Wapella debentures, bearing interest at the rate of five per centum per annum, payable in twenty equal instalments, at the Union Bank of Canada, Saskatchewan, on the 1st day of December in each year.

THOS. F. TERRY,
Secy.-Treas.,
Dated at Wapella, Town of Wapella.
this 3rd day of March, 1906.

Debentures for Sale

The undersigned is prepared to receive tenders for the purchase of debentures of Drainage District No. 5 in the Province of Manitoba to the amount of $162,000.00 and of Drainage District No. 15 in the said Province to the amount of $22,000.00, said debentures being in denominations of $1,000.00 each, dated July 1st, 1906, payable in thirty years from the date thereof at the Union Bank of Canada, in the City of Montreal, and bearing interest at the rate of 4% per annum, payable half-yearly. These debentures are issued under the provisions of "The Land Drainage Act," and are guaranteed by the Province of Manitoba.

Tenders will also be received for debentures of the Central Judicial District in the said Province to the amount of $22,000.00, dated July 1st, 1906, payable on January 1st, 1924, at the Union Bank of Canada in the City of Montreal, and bearing interest at the rate of 4% per annum payable half-yearly.

All offers must be addresed to the undersigned, and marked "Tender for Debentures," and must reach this office not later than the 1st day of June, 1906.

Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.
Provincial Treasurer's Office,
Winnipeg, Man.

CANADA AND THE WEST INDIES.

At a meeting of the West India Club in London a short time ago, at which Lord Strathcona, we are told, acted as chairman, Sir Neville Lubbock delivered an address on the relations which exist and which might exist between Canada and the West Indies, from which we make some extracts.

After referring to the great natural difficulties in the way of federating or unifying these southern colonies, he pointed out that exactly the same difficulties would exist in regard to their unification in such a way as to enable them to become a Province of Canada. "Then," he continued, "I can hardly imagine that it could be seriously proposed to admit each separate colony as a Province of Canada, and we may perhaps postpone the serious consideration of such a proposition until there is some evidence that it would be welcomed in Canada.

"It has been suggested that the meaning of recent resolutions is that Canada should be substituted for the Colonial Office in its relation with the West Indies. Now, whilst I am afraid that I cannot go so far as to say that the relationship between the West Indies and the Colonial Office has at all times been entirely ideal, still, if Canada is to step into their shoes, one would like to have some evidence that the change is likely to be an advantageous one for the West Indies. It is difficult at present to see where the advantage would come in.

"We have already seen that Canada gives British colonial sugar a preference, and the result of this has been that her imports of West Indian sugars are increasing; and in view of the fact that the Canadian consumption is rapidly increasing there seems every likelihood that before many years she may be able to take the whole of the West Indian production of sugar, in which case her preferential treatment of British colonial sugar would undoubtedly be of considerable advantage to the West Indies. Whilst the United States market is a shrinking one for West Indian products, the Canadian market, on the contrary, is an expanding one, and these circumstances seem to indicate that the day is not far distant when some mutually satisfactory commercial arrangement will be possible between Canada and the West Indies."

Lord Strathcona is reported to have said that with regard to the relations between the West Indies and Canada it was often wise to make haste slowly, and it was not to be expected that they could rush into federation immediately, as there were a great many things to be considered. Canada already took two-thirds at least of the whole of the sugar produced by the West Indies, and with her ever-increasing population it was to be hoped that she might before long be able to take the whole. Canada had been taking a very considerable and substantial interest in the West Indies, and would be glad to get into still closer relations with those colonies, to which he hoped their old prosperity would return before long.

* * *

TORONTO MARKETS.

Toronto, May 17, 1906.

Drugs, Chemicals, etc.—Little need be added under this heading to what was said last week as to prices of staple lines of drugs, etc. Values keep fairly steady, and features are scarce. An average volume of trade is passing. New York advices say trade is rather on the dull side, with no changes in the situation of importance. Old Country reports speak of good business being done in heavy alkalies. Chlorate of potash and soda are selling quickly. Crude carbolic acid is weaker.

Dry Goods.—All the wholesale houses visited speak of a good turn-over of orders and bright prospects for a large season's business. Woolen goods tend to become higher in some branches, particularly in dress goods. Cotton staples are fully as firm as they were. Linens also are exceedingly firm. Payments have been very fair.

Flour and Grain.—Greater firmness is to be noted in flour, and ninety per cent. patents sell for $3.15. Bran and shorts continue very strong, and the latter has been somewhat scarce. In wheat there have been some changes, as will be noted in our prices-current page, but no great volume of business is going on. Other grains remain much as before.

Groceries.—Sugar has made no further change. The movement is not particularly brisk. Canned tomatoes continue to be a feature. The demand is greater than the supply. Other canned vegetables also are on the dear and firm side. Dried fruits are in seasonable demand. On the whole, the course of trade is looked upon with satisfaction, and travellers in country districts speak encouragingly.

Live Stock.—Cattle on the market this week were bought more speedily than was the case last week, but this was owing, not to the fact that the demand was especially brisk, but that the run was more moderate. A good many Western cattle were offered, and many were of good quality. Not much keenness was manifested for exporters, the news from England being not of a nature to encourage much buying. There is a fair market for stockers and feeders. Sheep and lambs were steady.

Hides and Skins.—The demand for hides continues normal. Prices are quite steady. In leather a fair trade is passing.

Provisions.—There is a good enquiry for Canadian butter from Britain, and this helps to keep up prices in the home market. Choice grades are especially sought after. Eggs are very firm, and picklers are finding difficulty in meeting their requirements. Extra good chickens are wanted, but on the whole the poultry trade is very quiet.

Seeds.—This week has not been a very busy one in clover and alsike seeds, farmers having planted their main crops earlier, owing to the admirable spring weather. Field corn is moving with some freedom.

Now that public opinion fully endorses the position always taken by the Great-West Life Assurance Company as to the best form of investment for a Life Company's funds (in first Mortgages on approval Real Estate) it is of the utmost importance to those requiring Life Insurance that they enquire into the terms of the Great-West Policies.

Full information on request.

MONTREAL MARKETS.

Montreal, May 17, 1906.

Ashes.—The market is firm at the advanced prices of last week, and probably something more than $5.40 could be realized for a fair lot of No. 1 pots, as offerings are light and the demand fair. The last reported business in pearls was at $6.75 per cental.

Cements and Firebricks.—A good volume of jobbing business is reported in cements. We quote Belgian at $1.70 to $1.90; English, $1.90 to $2.05; Canadian, $1.90; firebricks, $17 to $21 per thousand.

Dairy Products.—Owing to good export demand and a reported short make of early fodder cheese, the market took a very decided upward turn on Saturday last, and values have since then continued to stiffen. White cheese is quoted at from 11¼ to 11½c., and colored at 11 to 11⅛c. per lb. Butter is also much firmer than a week ago, and there appears to be much competition among buyers in the country. The best grades of creamery are held to-day at 20 to 21c. The exports of cheese last week were comparatively small, aggregating only 22,117 boxes; butter shipments were 2,718 packages.

Dry Goods.—Again this week a number of out-of-town buyers are noticed among the warehouses, looking for jobs which wholesalers are desirous of closing out before the half-yearly stocktaking, and they nearly all report large stocks of heavy winter goods carried over. Collections as a whole, however, are fairly good. The Canadian Colored Cotton Goods Co. advises an advance in denims, saxonies, flannelettes, etc., of about 5 per cent., and quotations for cotton blankets are temporarily withdrawn.

Groceries.—The molasses market is reported in a rather excited state, and brokers offering 27c. per gallon for round lots have been unable to effect any purchases from local holders. The present cabled quotation from the Island is 18c., which means a laid-down cost of about 29c. and jobbers have advanced their quotation to 30c. per gallon for single puncheons, with the usual advance for barrels and half-barrels. The sugar market is about steady at $4.10 for standard granulated, and $3.70 the lowest in yellows. Refiners report a fair enquiry. As far as can be judged, the market in Japan has opened slightly higher than a year ago for new teas, but the leaf is said to be showing quality not quite equal to last year's crop. The overland rail rate on teas is advanced from 1¼ to 1½c. per pound. Canned goods and evaporated fruits continue to show strong advance; tomatoes are held at $1.30 in a jobbing way, and it is said $1.17½ has been declined for round lots between houses. Evaporated apples are held at 13c. per pound in round lots.

Hides.—There has been a further decided stiffening in the market for hides and skins, and buyers are now quoting up to 12c. per lb. for No. 1 beef hides. Calfskins are also advanced again, 15c. per lb. being now quoted for No. 1, and 13c. for No. 2. Lambskins continue to be quoted at 15c. each.

Metals and Hardware.—Houses handling these lines of merchandise report a well-sustained activity, and values generally are of a firm or advancing character. Ingot tin has reached the abnormally high figure of 52c. on spot, even exceeding the figure prophesied for it. Tinned iron and tinplates are expected momentarily to advance; and a meeting of the metal trade was held last week to consider this question and other matters, but no definite decision was arrived at. It is reported that British makers of these goods are disinclined to make quotations for future delivery. Lead is again advancing, and a revision of lead pipe quotations is probable in the near future. Copper is stronger at 21 to 21½c., and antimony is very firm at 27½c.; zinc remains at 6¾ to 7c. Canada plates, ternes, and other sheets remain as last quoted. Boiler plate is now quoted at $2.30; bars, $2 to $2.05. A cut has been made in wire nails to $2; cut nails remain at $2.10.

Wool.—Sales are reported as being of very limited extent, and, as one salesman puts it, millmen must be using only shoddy and cotton. The London sales now on show an advance of 5 per cent. on coarse wools, and 7½ per cent. on coarse grades. We quote: Capes at 19 to 23c.; fine B.A., washed, 45c.; scoured ditto, 50 to 55c.; pulled domestic, 30c. There are no receipts of new fleece yet.

TEXTILES.

In cloth for export, says a report from Manchester, Eng., the sales during the past week have not been very important, but from day to day a steady trade has been done for different markets. Most of the outlets abroad are well supplied with goods, but there are still orders to be given out. The difficulty of arranging transactions seems to be increasing. Prices all round show a tendency to harden. Raw American cotton has very little influence on values in either cotton piece goods or yarn. A miscellaneous enquiry has come through from India, Bombay offers being pretty prominent. For business to be put through, however, limits have to be raised, as makers are in no mood to make concessions. The turnover for China has not been of an extensive character, staples being rather quiet; but a fair demand has been met in fancy goods, long delivery being given. The difficulty of arranging the time for the completion of orders now being booked is considerable in doing business with the smaller markets of the Continent and the outlets of South America. All round the tone has been distinctly healthy, but the total sales have not reached large dimensions. In America yarns for home use spinners have held very firmly to quotations. Producers seem to be gaining strength, and rates have hardened on the whole. Spinners of the better makes are in a strong position, and here and there extreme rates have been paid for quick delivery. Users have found sellers difficult to deal with. Coarse weft shows scarcely any alteration, and does not move off very well.

In spite of an inactive piece goods market the raw silk situation remains very firm and without the prospect of showing any weakness of moment for some time to come. Buyers are beginning to appreciate the fact that the producing markets of the world are very much depleted, and were there the slightest indication that they would not have abnormal difficulties disposing of their purchases there would undoubtedly be more or less speculation. This, however, is a factor which does not enter into the problem in any way, and as long as the manufacturer is adopting the policy of shutting down a part or all of his machinery, instead of accumulating stock, that might have to be sacrificed at considerable loss, there is prospect of healthy and fairly active business in the not far distant future. While no large business is reported in Yokohama, it is only natural that such should be the case, as that market has little or nothing to offer that is available for export. The amount of good-quality silk remaining in Yokohama at this time of year is surprisingly small, and speaks volumes for the purchasing power of European and native manufacturers.—Dry Goods Economist.

Mercantile Summary.

The Perth correspondent of the "Evening News" states the population of that town, as discovered by the assesors, at 3,487, which is an increase of 144 over the previous year. The assessment of Perth for 1906 totals as follows: Land values, $427,310; buildings, $725,125; property only liable to school rate, $50,000; business assessment, $125,600; income, $76,664; total, $1,354,699. Compared with 1905, the total was $1,325,580, as revised by Court of Revision.

A Montreal exchange gives the time of the "Empress of Britain" on her maiden voyage, thus: The time of the "Empress" was, from 5.30 a.m., English time, Sunday, May 6th, to 10 p.m., Canadian time, Saturday, May 12th. The course she travelled, according to the log, was 2,810 knots. The actual time, therefore, between Liverpool bar and Quebec was 6 days, 21 hours, 30 minutes. The average speed all the way across is 16.95 knots per hour. The "Empress of Britain" broke the record for the single day's run by steaming 452 knots.

A feature of the London and New York metal markets has been a somewhat sensational advance in copper. In London it rose seven points, which was followed on the New York stock market by a seven point advance in Anaconda. The chief reason attributed for the rise of the metal in London was the neglect of American operators to cover in time. It is stated that they are now cornered for material, and that it is impossible to execute the orders cabled there, owing to the insufficiency of supplies. London quotations stand at £86 10s., according to last reports.

An appointment that will be welcomed in various parts of Ontario is that of a Superintendent of Mines, a new post. The occupant selected is Mr. Samuel Price, barrister, of St. Thomas. He was last year engaged by the Government to investigate a number of mining disputes, and showed capacity in the work. His salary is to be $3,000. While a commissioner he will have the authority of a judge of the High Court of Justice, and may travel about from place to place where disputes arise. The sole appeal from his decisions, we are told, will be to a Divisional Court judge.

It is learned by the Montreal "Gazette" that the British Post Office authorities have not yet consented to the mail day from Liverpool to Canada being changed from Thursday to Saturday, and they intimate that while they have no objection to the "Virginian" and the "Victorian" sailing on Saturday, it will not be possible to make up the mails on that date, via the Canadian route, and they will, therefore, have to come by the Cunard boats to New York. "While the decision of the Postmaster-General is not yet a final one, the obstacle would appear to be insurmountable, and the sailing date of the "Empresses" from Liverpool may have to be changed from Saturday to Thursday in order to meet the wishes of the British authorities."

CURIOSITY ABOUT CANADA IN FRANCE.

It is not alone in Great Britain that people are interested in Canada. The Scandinavian countries are awake to her attractions, and the French and Germans are curious. Senator Forget, who has spent some months in Europe, stated the other day, on his arrival home, that "a good deal of French money has already been sent to Canada, and there is a growing tendency to seek investment in a country that is daily becoming better known to the capitalists of France and the people generally."

In an interview the Senator talked on the French money situation, and the financiers, and methods of doing business, and said that he could not shut his eyes to the fact that the political and social conditions of the French Republic had been, and were yet, of a very grave character. He confirmed the statement that the greatest apprehension was felt in financial circles prior to May 1st, and, although the trouble was tided over, the belief was general that the acute stage is fast approaching, and that a crisis in France has only been delayed.

There is, however, any quantity of money in the country, and Senator Forget said that men whom he only met by chance were most anxious in their enquiries about Canada. But they cannot realize the rapidity with which things advance on this side of the Atlantic, though all are pretty well acquainted with the country's resources and the different great railways. French capitalists are anxious to get money invested in the Dominion, because they realize that their loans to Russia are already heavy enough, and as a matter of fact money on deposit in the Paris banks only draws one-half of 1 per cent. interest. Their Paris municipal bonds pay 2¾ per cent., but as there is a Government and municipal tax, the investor does not receive more than 2½ per cent. for his money.

"I suppose," he said, "that the French way of doing business is all right, but to us who have been trained to English and American methods it appears very slow. They are, however, conservative in their dealings. I do not think there are many American securities quoted on the Paris Bourse, and, although French people deal in them at times quite extensively, all the transactions are done through London. In fact, there is a very close connection between London and Paris in matters of finance. There is also a very interesting chapter of late anent the respective relations of the Paris and provincial banks, the latter numbering about 500."

* * *

—Two commercial travellers, one from London and one from New York, were discussing the weather in their respective countries. The Englishman said that English weather had one great fault—its sudden changes. "A person may take a walk one day," he said, "attired in a light summer suit, and still feel quite warm; next day he needs an overcoat." "That's nothing," said the American. "My two friends, Johnson and Jones, were once having an argument. There were eight or nine inches of snow on the ground. The argument got heated, and Johnson picked up a snowball and threw it at Jones. During the transit the weather became hot and summerlike, and Jones, instead of being hit with a snowball, was—er scalded with hot water."

Reports received at Lethbridge, Alberta, from the Mounted Police indicate that over 600 square miles of prairie sod has been scorched by fire in this and the Calgary district this spring. Reports from the south country show that at least 300 square miles have been ignited and burned off in the Crow's Nest section. The damage is very great.

SCOTT & WALMSLEY,
ESTABLISHED 1858
Managers and Underwriters

The stockholders of the Canadian Rubber Company held a meeting on Tuesday last and authorized the issue of new stock to the amount of $500,000, increasing the total issue to $2,000,000. The present shareholders are to be offered the new issue at par, pro rata, according to their respective holdings.

HOW THE BOY FOOLED THEM.

There is a good story told of a man who has become a most successful merchant. A few years ago he was employed as an office boy and messenger for a large firm. He was sent to collect an account from a firm which was considered very "shaky," and was told to get the money at all hazards. The debtors gave the lad a cheque for $250. He went to the bank at once to cash it, and was told by the cashier that there was not enough funds in to meet it.

"How much short?" asked the lad.

"Seven dollars," was the answer.

It lacked but a minute or two of the time for the bank to close. The boy felt in his pockets, took out $7, and, pushing it through the window, said. "Put that to the credit of Blank & Co."

The cashier did so, whereupon the boy presented the cheque and got the money. Blank & Co. failed the next day.—Bamberg Herald.

The Crown Life Insurance Company
Head Office: Toronto, Canada.

Offers These Advantages to Insurers:

Lower Premium Rates than those charged by most other Companies.
Policies Indisputable from Date of Issue.
Loan Values Guaranteed after Two Years.

CAUSES OF FAILURE.

Everyone knows men whose failure to rise in the world is plainly due to their inability to take the other man's point of view. I have in mind a salesman in a great mercantile establishment who is a genuine hustler, a persistent worker. He has a high forehead, a strong nose and chin; his general appearance is agreeable. What is the matter with him? Why can one so surely predict that he will never rise to the lucrative positions in his business he might legitimately aim at? Because he is always complaining of the exactions of his superiors, the long hours, insufficient pay, the use of the time clock, the necessity of caring for his stock, and a hundred other things that prove how far he is from comprehending or trying to comprehend his employer's point of view. He never in all his thirty years has caught even a glimpse of himself from anybody's point of view but his own.

How can you gain another man's point of view? First, by posting yourself on his business; then by the use of whatever reason and imagination you possess trying to think his thoughts after him. Every ambitious worker, then, should post himself on his employer's business. Let your curiosity and your observation eat it up bit by bit. Ask questions of everyone whenever you can do so without becoming offensive. Let no process that comes to your notice as a subordinate escape your complete understanding. Never be satisfied with simply obeying orders; obey certainly, but as quickly as possible learn the full significance of the order you have obeyed. If your employer insists on a certain routine that you as a subordinate find inconvenient, comply with it, not only because that is your simple duty, but because as an ambitious man you should put yourself in his place.—Exchange.

The Metropolitan Life Insurance Co.

(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policyholders and addition to Reserve.
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,0000,00.00

More Than $7,000,000.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

THE BUDGET SPEECH.

The Hon. Mr. Fielding's tenth budget speech was no exception to the rule of optimism which has characterized those in previous years. He was able to announce a very gratifying increase of $515,955 in the aggregate revenue, for the fiscal year which has intervened since the last budget. For example, customs dues increased by $731,000 compared with the previous year, and were double the amount derived from that source eight years ago. Increases are also recorded in the post-office revenue, to the extent of $473,000, and in railways, $423,000. To be placed against these, however, are a decrease of $373,000 in excise, and $150,000 in Dominion lands, chiefly due to a falling off in the Yukon. However, while the revenue was thus satisfactorily buoyant, expenditures also kept full pace. Indeed, they were so materially larger than anticipated, owing, as the Hon. gentleman explained, to the receipt of accounts subsequent to the presentation of the previous budget, that the surplus, instead of being $9,000,000, as had been hoped, was reduced to $7,863,089. This, it may be said, however, is a credit by no means to be cavilled at.

For the fiscal year ending June 30th next, the revenue of Canada is estimated at $79,000,000, or an increase over last year of $7,800,000, while the expenditure is estimated at $66,500,000, this result increasing the amount chargeable to consolidated revenue by $3,180,000.

Mr. Fielding referred briefly to the proposed revision of the tariff which would take place, he informed the House, during the coming fiscal period. He did not anticipate, however, any disturbing effect on the public revenue, for practically the only changes probable, were merely such as would meet such new conditions as had arisen since this present tariff was framed.

After making reference to the post-office accounts which he claimed promised a surplus of something like $900,000 for the year, and to the returns of the country's trade, which while they showed a slight falling off in 1904-5, seemed, so far as a ten months' record ran, to have fully regained their previous tendency to swell, he went on to explain, the enormous increase in the Government's expense account. And he justified it, not only on the ground of the expansion of the country, and of its growth in population, but claimed that this increase of expenditure had had something to do with that expansion. In other words, while expenses had grown, the country's resources have grown in an even quicker ratio. There is, of course, a good deal in this argument. At the same time many moderate people believe that better provision should be made for the inevitable rainy day, than apparently is being made by the present Government.

* * *

CANADA'S FOREIGN TRADE.

The growth of our foreign trade continues. Figures for the complete fiscal year cannot be given until July at the earliest, but the statistics for ten months beginning with July last and ending with April, issued at Ottawa last week, exhibit a remarkable growth, and that principally in exports. The aggregate inward and outward trade for this ten months exceeds that of any similar period in the history of the country, for it reaches the large sum of $435,000,000. This is at the rate of $522,000,000 for the twelve months. The lesser figure represents a gain of $69,000,000 over the similar part of a preceding year, which is at the rate of nearly sixteen per cent.

The value of exports, (domestic products), was $189,000,000 as compared with $153,000,000 in the ten months of 1904-5, a gain of nearly twenty per cent., while the value of imports was $225,000,000 as compared with $200,000,000 or less than twelve per cent. It is thus agreeable to find that our sales abroad have exceeded our foreign purchases.

The items among exports which show the greatest increase for the period are agricultural products, $18,600,000, and fishery products, $4,280,000. Other increases were forest products, $3,700,000; animals and their produce, $3,500,000; minerals, $2,800,000; manufactures, $2,900,000. These are all products of Canada. All the items in the table show increases, thus:—

Domestic exports, ten months:—

	1905.	1906.
The mine	$24,622,986	$27,490,993
The fisheries	8,882,788	13,168,905
The forest	24,802,682	28,537,996
Animals and their produce	53,082,323	56,645,364
Agricultural products	25,709,620	44,102,260
Manufactures	16,811,351	19,748,497
Miscellaneous	29,653	63,142
Totals	$153,941,403	$189,757,157

Now to take the imports for consumption, both the purchases of dutiable and free goods, (mostly raw materials of manufacture), are larger, thus:—

Imports for consumption, ten months:—

	1905.	1906.
Dutiable goods	$120,673,298	$138,344,074
Free goods	79,304,078	86,913,502
Total	$199,977,376	$225,257,576

The amount of duty collected was, in the ten months of last year, $34,035,280, and in the ten months of the current fiscal year, $37,708,663. Increase this year about ten per cent.

* * *

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian banks for March, 1906. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.

Loans to directors or their firms	9,047,819	9,081,162

A new bank makes its appearance in the Return this month—the Sterling Bank of Canada, with a subscribed capital of $740,000, and a paid-up capital of $399,000. It opened for business on 1st May, with fifteen branches, all in the Province of Ontario, and nearly all in small villages. Those who know something of the expense which attends the opening of new branches will wonder how many of the fifteen branches will show a net profit in either of the first two years.

Paid-up capital of the thirty-five banks has increased during the month by $2,027,000, for $1,227,000 of which the Sovereign Bank of Canada is responsible. The total paid-up capital of all the banks now stands at $89,331,000, as compared with $81,613,000 in April, 1905, and $78,738,000 in April, 1903. The aggregate rest is now $62,004,000, being an increase of $750,000 in the month. A year ago the total rest was $54,908,000, and two years ago $50,971,000. In the last two years, therefore, paid-up capital has increased by $10,593,000, and the reserves by $11,033,000.

During the month two of the banks have increased their rate of dividend,—the Ontario Bank from 6 per cent. to 7 per cent., and the Standard Bank of Canada from 10 per cent. to 12 per cent. Notes in circulation have increased by $539,000, the chief increases being in the figures of the Bank of Montreal and the Canadian Bank of Commerce. In 1905 there was also an increase during April, but in each of the four previous years the figures showed a decrease. During each of the last five years the circulation has been:—

April	30th,	1902	$50,691,000
"	"	1903	55,877,000
"	"	1904	58,649,000
"	"	1905	59,941,000
"	"	1906	66,530,000

An increase of about 31 per cent. in circulation in four years is a striking indication of the growth of the country's business.

Provincial Government deposits, which last month increased by about $6,000,000, have this month decreased by about the same amount, the change in each case being in the deposits held by the Bank of Montreal. Public deposits payable on demand have grown by $4,627,000, and those payable after notice by $6,080,000, a total increase in public deposits of $10,707,000. In demand deposits the principal changes are:—Decreases, Quebec Bank, $2,973,000; Dominion Bank, $525,000. Increases, Merchants Bank of Canada, $500,000; Molsons Bank, $980,000; the Canadian Bank of Commerce, $1,691,000; Imperial Bank of Canada, $962,000; Traders Bank of Canada, $557,000; Sovereign Bank of Canada, $658,000.

In deposits payable after notice the Bank of Montreal shows an increase of $1,268,000, and the Quebec Bank of $3,287,000. The latter bank has apparently made a fresh classification of its deposits, so that the increase in notice deposits may be set off against the decrease in those payable on demand.

Balances due to banks or agencies in the United Kingdom and elsewhere show little change during the month, while total liabilities to the public have increased by $6,004,000, the principal changes being a decrease in the liabilities of the Bank of Montreal of $7,093,000, and increases in those of the Bank of British North America, the Molsons Bank, the Canadian Bank of Commerce, and the Royal Bank of Canada of $2,127,000, $1,025,000, $2,328,000, and $1,078,000 respectively.

In view of the rapidity with which new banks are being organized and new banking capital created, it may not be amiss to compare the figures for paid-up capital in each of the last five years with the total liabilities to the public at each of the dates quoted.

The comparison will be:—

Date.	Paid-up capital.	Total liabilities.	Ratio of liabilities to capital.
30th April, 1902	$68,474,000	$448,326,000	6.5
" " 1903	75,448,000	502,387,000	6.6
" " 1904	78,738,000	529,019,000	6.7
" " 1905	81,613,000	591,557,000	7.2
" " 1906	89,331,000	681,700,000	7.6

It will be seen that there has been only a very small increase in the ratio of liabilities to capital and that the amount of banking capital has at least kept pace with the requirements of the country. Within reasonable and prudent limits, the larger the business of the banks in proportion to the capital on which dividends have to be earned, the more cheaply they can afford to do the business, and in these days of competition run wild, the more cheaply the business will certainly be done.

Turning now to the assets, we find that specie and legal tenders show a net increase of $522,000, a partial recovery from the somewhat noteworthy decrease chronicled last month. Notes of and cheques on other banks stand at a higher figure than usual:—$29,215,000, as compared with $20,732,000 in March. Most of the increase is doubtless explained by the fact that the 30th April fell on a Monday, on which day the banks always have more cash and cheques on hand than on any other day in the week. Saturday being a half holiday, less cash is sorted ready for the clearings on Monday, and a larger proportion has therefore to be held over until Tuesday. In addition, Monday brings heavier deposits than any other day, so that the amount of notes and cheques on hand on the evening of that day is naturally larger than usual.

Balances due from the United Kingdom have fallen off by $5,133,000, the total at the end of April being only $7,372,000 as compared with $12,505,000 in March, and $10,362,000 in February. Balances due by foreign countries show an increase of $928,000. Call and short loans in Canada show little change, while those elsewhere have decreased by $3,575,000.

The point of greatest interest in the return is perhaps the large increase which is again shown in current loans in Canada, the figures having grown during the month by $11,651,000. This is on the top of an increase in March of $16,326,000, and in February of $7,499,000, a total increase for the three months of $35,476,000. During the same three months in 1905 the total increase was only $18,504,000, while in 1904 it was $24,442,000. While there is no apparent indication that the present rapid growth is at all unhealthy, it may certainly be said that the conditions now prevailing demand more than the usual caution in making banking advances. With the new banks and the new branches, all eager for business, it seems a little doubtful whether borrowing is not being made too easy, or rather whether it is not sometimes hard for a merchant or manufacturer to refrain from borrowing. On 31st December, 1901, a date on which statistics for branches are available, the number of bank branches in Canada is given as 747, while current loans in Canada stood at $289,158,000, or $387,000 per branch. On 31st December, 1903, the branches had increased to 1,049, and current loans in Canada to $384,419,000, being $366,000 per branch. Current loans are to-day $489,683,000, while the number of branches on 30th April was apparently 1,439, thus allowing an average of $338,000 of current loans for each branch. With the advent on 1st May of the Sterling Bank of Canada, the number of branches is increased to 1,454, and the average of loans per branch reduced to $334,000. An examination of the deposits would show similar results. With new branches being opened almost every day, and with the average amount of business done at each branch being steadily reduced, it should not, perhaps, cause much surprise that business of almost any kind is eagerly accepted, that loans are not infrequently pressed on prospective borrowers, and that the usual requirements as to security are often relaxed. To some extent, the rush to open new branches is natural and inevitable. We have in the West an immense country which is only now being opened up. The possibilities for future business there are very great, and those banks which can afford it are perhaps only showing ordinary business foresight in establishing themselves at the most promising points. So that in Manitoba, Saskatchewan and Alberta an increase from eighty-two branches as on 1st January, 1902, to 277 at the present time is perhaps not out of reason, although even in the West there are some points at which banking is undoubtedly overdone. But what justification can there possibly be for increasing branches in Ontario from 349 at the beginning of 1902 to 701 in May, 1906. Neither the population nor the business is increasing to any considerable extent except in the larger centres. In the small country towns the population is practically stationary, whilst in many parts of the rural districts it has shown some falling off, and it is in the country that the greater number of the new branches are being opened. That they can all obtain enough business to pay expenses seems quite out of the question, and we imagine it is only a question of time before the banks will reverse their policy of expansion, at any rate in Ontario, and that they will close many of the new branches which are now being opened so gaily. In the meantime these new branches are a source of expense, not only to their own institutions, but to other banks, from whom they must take the greater part of any business they are able to obtain.

In current loans elsewhere than in Canada a reduction of about $3,500,000 is shown during the month, some of these advances having doubtless been called in to help to provide for the expansion in current loans in Canada.

The other figures of the return need little comment. As a whole the figures indicate continued activity of business and continued growth throughout the country. The expansion in the figures is large, but apparently not unduly so, and as yet no signs of inflation are to be detected. It is certain, however, that it is in times like these that the seeds of future trouble are sown,—trouble which can only be prevented by ceaseless watchfulness on the part of those charged with the administration of our banks.

* * *

MINERAL PRODUCTION OF B.C.

From the report of the Minister of Mines for British Columbia for the year 1905, which is just to hand, we learn that the total production of minerals in that province since records were first kept, up to and including now, aggregates to the value of $248,663,176. Of this, $22,461,325 is to the credit of last year, which tops the list in amount. For the year 1904, the production was $18,977,359, and for 1903, it was $17,495,954, so that there have been increases of 18½ and 28 per cent. respectively. By districts, the yield for the last three years was as follows:—

	1903.	1904.	1905.
Cariboo District ..	$ 475,200	$ 474,600	$ 406,000
Cassiar District ...	480,368	558,573	504,372
Kootenay, East, District	1,951,128	3,210,573	5,339,154
Kootenay, West, District	6,603,981	5,806,070	5,421,859
Lillocet District ..	31,283	34,583	32,584
Yale District	3,714,422	4,190,281	6,483,504
Coast Districts (Nanaimo, Alberni, W. Coast V. I. Victoria)	4,239,572	4,702,679	4,273,852
	$17,495,954	$18,977,359	$22,461,325

The chief minerals produced were as stated below:—

	1903.	1904.	1905.
Gold, placer ...	$ 1,060,420	$ 1,115,300	$ 969,300
Gold, lode	4,812,616	4,589,608	4,933,102
Silver	1,521,472	1,719,516	1,971,818
Lead	689,744	1,421,874	2,399,022
Copper	4,547,535	4,578,037	5,876,222
Coal	3,504,582	3,760,884	4,152,936
Coke	827,715	1,192,140	1,358,925
Other materials.	531,870	600,000	800,000
	$17,495,954	$18,977,359	$22,461,325

Analysis of the figures given shows that the increase in production has been confined mainly to certain districts, such as South-East Kootenay, Boundary, Nelson, and Yale, while other sections show a more or less marked decrease. In South-East Kootenay, we are told, the quantity of ore mined increased 121 per cent., and its value 135 per cent. over the preceding year, while in the Boundary the tonnage mined has increased by 20 per cent., and the value 53.6 per cent. A very pronounced decrease is recorded in the Slocan, the output being little more than half of that of the preceding year. The Rossland camp just held its own. For the whole province, the quantity of ore mined, exclusive of coal, was sixteen per cent. greater than in 1904, and 85 per cent. greater than was mined in 1901.

The gross output of coal for the year was 1,825,832 tons (of 2,240 lbs.), which, with 314 tons taken from stock, makes a total production of 1,826,146 tons. Of this total amount, 1,202,971 tons were sold as coal, 441,520 tons were used in making coke, and 181,655 tons were consumed under the companies' boilers and sold locally. The coke produced amounted to 271,785 tons, of which some 268,091 tons were sold and 3,694 tons were added to stock.

The production of placer gold was valued at $969,300, a decrease of some $146,000, or 13 per cent., as compared with that of 1904, and is the smallest output made any year since 1901. This is attributable to a very dry summer, preceded by a winter with little snow, with a resulting decreased supply of water for hydraulicing.

The total production of silver was 3,439,417 ounces, valued at $1,971,818, which is larger than in any year since 1901, a fact attributable to the extensive working of low-grade galenas in Fort Steele district, and to the increased tonnage of large copper-silver mines in the Boundary. Last year's production of lead was the greatest ever made by British Columbia being 56,580,000 pounds, or an increase of 54 per cent. over the preceding year. Copper production also was the largest on record, being 37,692,251 pounds, valued at $5,876,222, the increase being chiefly attributable to the Boundary district. Last year was the first time that any important sales were made of zinc ore. Concentrators have been established at Kaslo, Rosebery, and Pilot Bay. Most of the ore comes from the Slocan.

On the whole, there have been few new developments in the mining operations of the Province of British Columbia during the year 1905. The possibilities have always been great and encouraging; but the country has suffered from more than questionable legislation and from injudicious strikes of miners, all of which discouraged capital and dampened enterprise. Let us hope that legislators as well as workers in mines have learned better sense; and that the immediate future may show British Columbia in her true colors as one of the important mineral producing districts of the world.

* * *

THE QUEBEC JUBILATION.

The splendid banquet given to Sir Thomas Shaughnessy in Quebec on Saturday last is memorable for several reasons. It marked the advent at that city of the largest steamer to reach a St. Lawrence port; it indicated a selection of that port for the C.P.R. steamers in preference to Montreal; it gave opportunity for the expression of opinions and experiences upon transportation interests in Canada which are valuable. The speeches were animated and satisfying; the chairman, Mr. Amyot, president of the Board of Trade, had the good taste to be brief in his remarks, Mr. Power was eloquent, Mr. Borden sedate, Mr. Molson Macpherson modestly statistical, Mr. Fitzpatrick attractive and flowing as usual. But none of these uttered more practical words than the guest of the evening. These steamers, he said, the advent of one of which was the occasion of this demonstration, would determine whether Atlantic passenger traffic can be diverted to our shores in such volume as to warrant larger and swifter ones. And he added, no Government subvention would suffice to secure a fast mail service unless it possessed commercial stability as well. His views of the passenger possibilities of the St. Lawrence route are buoyant. He thinks they are infinitely greater than any one is inclined to believe. But, he says, emphatically:—

> If we are to accomplish all that was anticipated, there are many things to be done. The mere providing of the right type of vessels will not be sufficient. We must have the waterway from the ocean so lighted and buoyed and so free from obstructions as to practically remove the last element of danger. We must have wharves and facilities that will enable the traffic to and from the ships to be handled with economy and despatch. . . . We have done much to improve the St. Lawrence route, but much remains to be done. The United States Government spends many millions a year in deepening the harbors of New York, Boston, Portland, Philadelphia, Baltimore, Galveston, New Orleans, etc., and millions more on its harbors on the Great Lakes. If we are not to be rendered dependent on American ports we must do our utmost regardless of expense, I might also say, to improve the St. Lawrence route.

* * *

—Mr. James Conmee, M.P., for Rainy River district, made a strong plea in the House of Commons for the maintenance of the bounties on iron and steel produced from Canadian ore, and for the remission of the duty on coal imported for coking, when used for smelting purposes. The bounties provided by present laws are on a sliding scale, gradually lessening to the vanishing point, the intention being to nurse the infant industry into vigorous life, which, it is supposed, will enable it to stand unaided. Owing to the delay in getting the Canadian furnaces at work, they have not fully benefited from the bounty. Mr. Conmee desires to allow the bounty on products of foreign ore to continue on a diminishing scale, but wishes to arrest for a period the diminution of the bounty on the products of Canadian ore. That this big country has interests widely apart and opinion as widely differing is proved by the fact that during the discussion, Mr. Alex. Johnston pointed out that the iron and steel industry of Nova Scotia depends upon Newfoundland ore, and that the remission of the duty upon coal converted into coke for smelting furnaces would work a serious injustice to Nova Scotia coal.

* * *

NIAGARA POWER.

To the Editor of "The Monetary Times":

Sir,—In your editorial on the "Power Bill," published in your issue of the 11th of May, reference was made to the difference of opinion existing between the Hydro-Electric Power Commission and myself in regard to the cost for which power hydro-electrically generated at Niagara could be transmitted to and delivered to consumers in Toronto.

I take it that your readers are accustomed to figures, and so submit a few remarks and calculations for their consideration. To commence, the following will be found in the 1906 pocket diary, published and issued by the Westinghouse Company:

"An approximate rule for the cost of copper, based on 10 per cent. line loss, three-phase transmission, 100 per cent. power factor, and copper at 15 cents a pound:

> **If the voltage of line in thousands of volts is equal to miles of distance, the cost will be $4 per kw., delivered.**

"The per cent. line loss is the actual power lost in line in per cent. of true power delivered. For a per cent. loss other than 10 per cent. the cost will be increased or decreased in inverse proportion. For example, a 5 per cent. loss under same conditions means a cost of $8 per kw. For other power factors the increase in cost is inversely proportional to the square of the power factor. For example, if the power factor is 85 per cent., the cost will be 1.4 times that given by the foregoing rule. For other price of copper the cost is in direct proportion." To the foregoing may be added the rule well known to electrical engineers, that, all other factors accounted for, the cost for copper, in so far as distance is concerned, is directly proportional to the squares of the distances—with direct current anyway, but somewhat higher with three-phase current, owing to what is known as capacity trouble. For convenience and to favor the findings of the Commission, allow that the rule holds good for three-phase transmission.

Now, taking the Commission's report, the first move necessary is to find out from its details what total loss has been assumed and what proportion of this loss occurs in the line. Then it will be possible to estimate on the basis of their figures—not mine, mark you—what the cost for copper alone would be in order to compare such cost with their cost for all equipment.

Turning to "Table XVII., First Report, Niagara District," it will be found that, allowing $12 per 24-hour horse-power per year at Niagara, the Commission has stated that it would be necessary to buy $13.08 worth of power at Niagara in order to deliver one horse-power in Toronto; that is, out of every 13.08 horse-power purchased at Niagara only 12 horse-power would be available at the low-tension bus-bars in Toronto, or 1.08 horse-power out of every 13.08 horse-power would be lost in transmission and owing to transformation. This is equivalent to 8¼ per cent. loss of power purchased, or to a 9 per cent. greater amount of power required than the amount of power which would have to be delivered. To again favor the findings of the Commission, let us assume that they have allowed the higher percentage, that is, 9 per cent.

The next move is to find out what the losses due to transformation would be. Power at Niagara is generated at approximately 10,000 volts. After its purchase, therefore, step-up transformers would be required to raise the voltage to 60,000 volts. In my letter of the 18th of April to the editor of the "Globe" I allowed 5 per cent. loss for each transformation. The highest efficiency claimed by any manufacturer of transformers for their apparatus is about 97½ per cent.; that is, 2½ per cent. loss. The next loss would take place in the line; and, in my letter before referred to, I allowed 10 per cent. With long-distance transmission, from 10 to 20 per cent. line loss is generally allowed, the actual loss allowed being obtained by a series of trial calculations based somewhat on Lord Kelvin's law:

> **That the most economical expenditure for copper is that which results in the annual charges not being greater than the annual value of the power lost.**

For the time being, however, let us ignore the line loss and travel further. At the outskirts of Toronto, the power would be received at high voltage—somewhat under 60,000 volts. This would require another set of transformers, step-down in this case, and another 2½ per cent. loss would result—I allowed 5 per cent. Power would then be available at about 10,000 volts, which would still be high-tension current, and require another set of step-down transformers to reduce it to—say, for convenience—1,000 volts. This would deliver the power in a suitable state for motors, and involve another 2½ per cent loss. For lighting purposes another set of step-down transformers would be required in order to have low-tension current available. To favor the findings of the Commission again, however, allow that they referred to power at 1,000 volts when they compiled "Table XVII.", vide top of sheet, which reads, "At sub-station, low-tension bus-bars." This, then, would give three losses beside the line loss up to this point, each one of 2½ per cent., or a total for these three items of 7½ per cent. But, as it has been shown, they have only allowed for these three items and the line loss either 8¼ or 9 per cent., the latter having been chosen to favor their findings. Now, 9 per cent. less 7½ per cent. only leaves 1½ per cent. loss allowed for the high-voltage transmission line.

The next move is to calculate what would be the cost for copper to transmit 50,000 horse-power at a commencing voltage of 60,000 volts from Niagara to Toronto, a distance, according to the report of the Commission, of 88 miles—Toronto to Hamilton, 42 miles, and Hamilton to Niagara, 46 miles—the line loss being 1½ per cent., the base price of copper in the Canadian market being at present 20 cents or somewhat higher per pound, and one K.W. (one kilowatt) being equal to 1.34 horse-power. Before making the estimate, it is advisable for the reader to turn back to Westinghouse figures, before quoted.

Four dollars ($4) multiplied by $\frac{1\text{ K.W.}}{1.34\text{ H.P.}}$ multiplied by $\frac{100^2}{80^2}$ (power factors—80 per cent. power factor is a high allowance) multiplied by $\frac{88^2}{60^2}$ (distances in miles—instead of the distance in miles being equal to the voltage in thousands of volts, that is 60 miles, it is 88 miles) multiplied by $\frac{20\text{ cents}}{15\text{ cents}}$ (price of copper) multiplied by $\frac{10\%}{1\frac{1}{2}\%}$ (losses allowed on line) gives the resulting equation as simply as it is possible to give it in letter form. Simplified, this equation becames $4 \times \frac{100}{134} \times \frac{10000}{6400} \times \frac{7744}{3600} \times \frac{20}{15} \times \frac{20}{3}$ or $89.183711. The cost for copper alone, according to the figures of the Commission, therefore, would be over $89 per horse-power to be delivered, or 89.183711 multiplied by 50,000, that is, $4,459,185.80 for 50,000 h.p. to be delivered.

But, turning to page 19 of the report before mentioned, it will be found that the Commission has stated that the *total* investment which would be required for copper, steel towers, right of way, transformer stations and equipment, interswitching devices, etc., would only be $2,117,978.

Am I to understand, therefore, that the engineer of the Commission has made a mistake in regard to his allowances for losses, or am I to understand that he has made a mistake in his calculations?

J. STANLEY RICHMOND.

Wellman House, Wellington, Ont., May 15, 1906.

* * *

"THE WEST" ON "THE EAST."

No one who has gone from the Eastern Provinces of Canada to the prairie country or British Columbia can have failed to notice the impatient and contemptuous way in which the Western men generally speak of the business people and the institutions of the East. They rebel at "Eastern" banks, which they say squeeze them; at "Eastern" fire insurance companies, which they say rob them; at "Eastern" capitalists, when that capital's interest goes in part down "East"; at "Eastern" manufacturers, because they dare to make goods which the Western man ought to make for himself, but cannot. And yet these same Western men, unreasoning grumblers as they are in this respect, are delightfully hospitable people to spend a week or two amongst.

A man, recently from the British Islands, writes to us marvelling at this illogical disposition. He dates from Victoria, which is a very English place, and very pretty, but he hardly seems to like it. "The same feeling exists here," he says, "as in Vancouver, against putting money in Eastern pockets, and the place seems to be characterized by a lot of petty jealousy and small-minded sentiment. Some of the people seem to spend their time grumbling and growling about what other people *have not done* for them. Why don't they wake up and help themselves, and 'boost' their own good things. It is a pretty but a dull place—even *more* than typically English. Its commercial drowsiness exceeds that of the English village or the 'great tired young man' of Snobland. To my thinking the city is submerged by shabby gentility. The Yankee, with all his faults, is badly wanted to stir them up, if the place is to become of any commercial importance."

* * *

SASKATOON.

It is not for lack of self-reliance that Western towns fail to progress. Saskatoon is no exception to the rule of confidence. For example, we learn from the first number of a new paper, the "Tri-Weekly Capital," published there, that Saskatoon is the "hub of the hard wheat belt, the youngest and most progressive city in Saskatchewan, beautifully situated on the South Saskatchewan River." And, indeed, we believe that this brief reference to its situation is not unwarrantable. All speak of it as beautiful and inspiring. An advertisement in the same number goes to the point in an even more trenchant manner. Saskatoon, it tells us, "is the hub, the distributing point, the commercial centre of the world's future bread-basket, where fortunes will be made," etc. . . . And further, "that it is the most advantageously situated of any of the prospective towns of the farthest and last West. In ten years from to-day Saskatoon will be to this country what Kansas City and Chicago are to the Middle West."

But Saskatoon may be proud of itself even from the view, not of what it will do or will be, but of what its citizens have already actually achieved. Three years ago it possessed a scattered population of about one hundred; now it is a city of nearly 5,000, and strangers are arriving from all parts of the world daily. Much of this phenomenal growth is due to the activity of its city council and of its very live Board of Trade. But these are features which usually distinguish Western towns and cities—the unity with which all classes work together for the one aim—the advancement of their own locality. The council, under its energetic mayor, Mr. Clinkskill, is now figuring on putting in waterworks and sewerage, for which the city's situation on an elevation overlooking the banks of the Saskatchewan admirably adapts it. The city's indebtedness at the present time we are told, amounts only to $24,000, a very small item when it is considered that its assessed valuation for next year is estimated to reach considerably over a million. Electric lighting also is now under consideration, and a plant is likely to be established by the municipality.

Perhaps one of the main factors in the progress of Saskatoon is its admirable position so far as transportation is concerned. Placed on the South Saskatchewan River, it is the divisional point on the Prince Albert line of the C.P.R., and it will be an important point on the C.P.R. branch to Edmonton. Besides this, the Grand Trunk Pacific has already bought the right of way for its main line through the city, and contracts are let for its immediate construction from Portage la Prairie to Saskatoon and on to Edmonton. Finally, we cannot do better than make an extract from the "Capital's" admirable, even if glowing, account of Saskatoon and its prospects:

"Saskatoon is worthy of having its history written. In the generation of its existence it has not been an ideal paradise, free from rivalries, divisions, depressions, and discouragements; it is unexampled in Canada as the arena of great physical and material energy; it is the theatre of great hopes and sanguine anticipations; it has gathered a large population, speaking various languages; it has the character of a busy metropolis, conscious of the fact that it commands the backing of thousands of miles of fertile prairie, the home of comng millions, regarding merit rather than history, and free from fierce distinction of class, rank or creed."

IMPERIAL BANK OF CANADA.

As we have already stated, the fiscal year of the Imperial Bank has been altered from the end of May to the end of April, making the period under review eleven months instead of twelve. It is to be remembered in considering the report and statement submitted to shareholders on Wednesday last that an issue of $1,000,000 new stock has been made since the previous annual meeting; and that $927,741 of this has been paid up, the premium at the rate of 100 per cent. being added to the reserve, which is thus made equal to the paid-up capital. This added capital and the addition of $4,500,000 fresh deposits afforded space for a greater business during the year, so that we find loans and discounts increased from $22,500,000 to $26,200,000.

A further addition of one million to capital is foreshadowed, and this is not surprising where we find the total assets of this prominent bank already close upon $40,000,000. Other features mentioned in the report are the placing of $100,000 of the year's profits to bank premises and furniture account, of $100,000 to profit and loss, and the opening of no fewer than nine additional branches during the year. Of these new branches we think it will be found that the majority are placed in new districts, either of the North-West or New Ontario.

The president of the bank in his address when moving the adoption of the report made reference to the desirability, nay, the absolute need on the part of any bank, of having a very considerable sum in hand by way of contingent fund to provide against contingencies in the nature of losses or expenses. This, he contended, should be apart from and in addition to the rest. We are disposed to agree with him, for there is no denying the comfort it must be to any banker to have a fund of the kind to fall back upon in case of need without reducing his reserve. The additions made to the board, which now numbers eleven members in all, are noteworthy.

* * *

BANKING AND FINANCIAL.

The Royal Bank of Canada has opened an office at Kensington, Prince Edward Island, which is in Prince county, not far from Summerside.

Branches of the Union Bank of Canada have been opened at Roblin, Manitoba; Craik, Saskatchewan, and Maple Creek, Saskatchewan.

We are informed by the general manager that the Hochelaga Bank has made arrangements to open a branch office in St. Hyacinthe, Que., in a few weeks.

The annual report of the Anaconda Mining Company showed that its average price received for copper during the year was 15.82, its profits having been $5,718,828. Total gross receipts were $23,734,203, and expenditures $18,146,481.

The paid-up capital of the Union Bank of Halifax has been increased from $1,336,150 to $1,500,000. The increased capital stock is part of an allotment to shareholders, which was not taken up by the latter, a few months ago, and for which tenders were advertised from May 9th to 16th inst.

The people of the comparatively new Ontario town of New Liskeard, in the Cobalt neighborhood, are to provide themselves with water pressure soon. At a special meeting of the town council last week the plans submitted by Mr. Sinclair for a waterworks system were approved by the aldermen, and a by-law was passed authorizing the issue of $60,000 in debentures to raise the amount required for the construction.

The Union Trust Company, Toronto, has been reorganized, the Independent Order of Foresters having disposed of its interest in the company, amounting to $1,500,000. Dr. Oronhyatekha and Col. J. A. McGillivray have resigned from the directorate of the Union Trust, and their places will be taken by Mr. Chas. Magee, Mr. Edward Gurney and Mr. E. A. DuVernet. Their new step is stated to be in line with the determination of the Independent Foresters to eliminate connection with subsidiary companies as a result of the disclosure in regard to the insurance companies in the New York investigation. Mr. C. Magee, of Ottawa, has been chosen to be president of the company, and Mr. Matthew Wilson, who has acted as a member of the Inspection Committee, now becomes first vice-president in succession to the Hon. G. E. Foster. The Hon. E. G. Stevenson continues as second vice-president. The company has a paid-up capital of $2,500,000 and a Reserve Fund of $370,000. It is fitting up a new and handsomely appointed suite of offices on the first floor of the Temple Building, which were formerly used as the historical rooms, and expects to enter into possession of the same within a few days.

* * *

FIRE INSURANCE ITEMS.

To mark his disapproval of an unfavorable vote of the council of the town of Richmond, in Richmond county, Quebec, on the question of providing the town with waterworks, Mr. Bernard, a member of the council, has resigned.

The West Shefford, Que., by-law to raise $1,200 with which to put in water mains and hydrants for fire protection was defeated on a vote of the ratepayers. When some of those people who voted nay are burned out they will change their tune.

Great fires continue to occur in the United States. On Sunday last the plant of the Sanitary Utilization Company, covering two acres at the east end of the Barren Island, in Jamaica Bay, was totally destroyed by fire. The loss is estimated at a million dollars.

A man in Lachine, Que, named Presseau, whose house was recently burned down, has brought an action against the town to recover $1,368, a portion of a loss which he claims was caused through its negligence in not supplying sufficient equipment to protect property against fire. He alleges that at the time of the fire by which he lost his house one of the hose plugs was frozen, another was choked, while a third was operated so vigorously as to burst the hose.

A devastating fire, which spent itself on Saturday last, caused to the Escanaba district of Northern Michigan vast loss. According to the Milwaukee "Sentinel" four persons are known to be killed, a score or more persons missing, hundreds of families homeless, several million dollars' worth of property burned, four towns wiped out and a dozen more partly burned, five counties partly devastated, and 100 square miles of territory fire-swept. A fierce wind at last kindled into flame a thousand small fires which had been smouldering for weeks.

We are informed that the plan adopted by the board of directors of the Rochester German Insurance Co. for the immediate addition of one million dollars ($1,000,000) to its capital and surplus has been successfully carried out. After setting aside approximately $700,000 for the payment of the company's losses in California—and it is now believed that these losses will fall considerably short of that amount—the company will thus have a capital of $500,000 and a surplus of an equal amount. This prompt and resolute mode of meeting the disastrous loss at San Francisco is one that will give satisfaction to all policy-holders of the company.

* * *

LIFE ASSURANCE NOTES.

"Out of the many causes responsible for fire on your continent, which are so regularly noted in the "Monetary Times,'" writes our English correspondent, "one never remembers to have seen a case due to a bird's nest. More accurately, a fire in the North Country here might be attributed to a locomotive. A flying spark ignited the bird's nest, the nest set fire to the eaves and timbers of the roof, and with a little less luck a whole row of cottages fronting on the Midland line would have been reduced to ashes."

In the year 1859 the old line American life insurance companies had, says the "Insurance Times," 140 millions of insurance in force. Now they have 13,000 millions. On January 1st, 1905, there was in force in other countries—Great Britain, $4,344,523,000; Germany, $1,320,164,000;

France, $720,000,000; Austria, $370,622,000; Russia, $47,926,000. Much of the foreign business is in the "Three Giants," which is the name given to the group consisting of the Mutual Life of New York, the Equitable Life, and the New York Life.

According to the report of the Registrar General of the United Kingdom for 1904 the birth rate in the British Islands has distinctly fallen off of late years. During the year 1904 the births of 945,389 infants were registered. In proportion to the total population of both sexes and all ages these births were equal to a rate of 27.9 per 1,000. The birth rate in 1904, calculated in this way, was 0.5 per 1,000 below that in 1903, and was 1.3 per 1,000 below the average in the ten years 1894-1903. In 1905 the rate was 30.3. Many causes, of course, are assigned for this change. Some of our daily contemporaries appear greatly surprised at the fact, and others give utterance to lamentations—quite premature—as to the coming decay of the race. Is it not obvious, with so much competition as that now existing, and, moreover, with such a vast mass of prudential thrift in evidence, that increasing numbers of decent-minded, intelligent persons must perceive the folly of marrying and being burdened with a family for whom in many instances no adequate provision can be made.—London "Spectator."

A matter of importance to the Canadian life offices doing business in England is raised by the action of the House of Lords. A Select Committee has been appointed to enquire and report what steps should be taken, by the deposit of funds or otherwise, to provide adequate security for British policy-holders in companies whose head offices are outside the United Kingdom. It may readily be believed that our legislators, unsettled by what they have seen happening in America, will make some substantial guarantee a condition of trade. Perhaps it would be judicious on the part of companies concerned, suggests our Manchester correspondent, to forestall compulsion and make arrangement voluntarily. It is recalled that one of the German marine companies used to advertise the fact that a strong financial house in London guaranteed payments up to a very large amount. Voluntary action may be recommended further on the general principle that our law-makers are loth to interfere with those who manage their own affairs well. Timely action will tend to destroy the case of those who might seek to be too restrictive.

* * *

TRADE NOTES.

R. J. Strauss, of Brantford, proposes to organize a company for the purpose of manufacturing high-grade cotton and cashmere hosiery in Guelph.

R. V. Sinclair, A. F. May, and other Ottawa gentlemen have been granted a charter to construct or purchase or otherwise acquire the tramway in the city of Camaguay, Cuba. The capital stock is $200,000.

The annual meeting of the Western Stock Growers' Association was held at Macleod, Alta., on the 14th inst. Reports from various inspectors for the Provincial Government showed that disease has been practically stamped out through compulsory dipping. W. Huckvale was re-elected president of the association.

At the last wool auction sales in London last week the offerings amounted to 15,429 bales, including a large selection of fine and medium greasers. There was a good general demand, and prices advanced to the highest point of the series. Scoured and medium merinos were in strong request for the Continent. Medium and coarse cross-breds were taken mainly by home buyers at full rates.

Walter Blue and Company, Limited, is the name of a concern which has just obtained a charter from the Federal Government for the purpose of taking over as a going concern the property and business of W. Blue & Co., wholesale clothiers, Sherbrooke, Que., and of acquiring by lease or purchase or otherwise such property as may be considered necessary to its interests, and to carry on stores, etc. The captial stock is placed at $250,000.

Montreal advices speak of a merger between four prominent cottonwear concerns in that city, namely, the Standard Shirt Co., the J. P. Back Co., A. H. Sims Co. and G. H. Harrower Co. The capital on which it is intended to amalgamate is said to be $3,000,000, of which $2,000,000 will be issued shortly, with $500,000 as bonds.

A Minneapolis grocer has spent some time and pains in figuring out what it costs to do business there and he has come to the conclusion that one of the chief reasons why so many business men fail is that they do not find out the things they have been looking for. He believes it costs 15 per cent. of the gross sales to do business. This 15 per cent. is for actual expenses, and leaves no margin of profit whatever. By taking the ruling price on staples he learns that most of the grocers are selling at actual cost the goods which comprise fully 75 per cent. of the sales. It is easy to buy and sell goods but it is not so easy to buy and sell so as to treat customers and yourselves fairly. It is not so easy to be a successful merchant, and those who do succeed must be considerably in advance of those who have succeeded in the past, for the way is harder than it used to be, the competition is keener, the expenses are heavier and the road is rougher and harder to follow than it has ever been before.—Exchange.

* * *

—A find of iron ore of some importance is reported from Oakley township, in Muskoka, Ont. A test made at a Bracebridge foundry is said to show that it makes excellent pig iron. The deposit is of bog iron, and extends over an area of eight or nine hundred acres. It is declared to be easy to treat. Transportation is somewhat difficult at present, but this is an obstacle which is to be overcome shortly by the building of the Bracebridge and Trading Lake Railway.

* * *

—These Western communities of ours are showing us how to do things. Here is the city council of Edmonton voting five thousand dollars towards the year's work of the Edmonton Board of Trade. These people perceive how much the united efforts of a group of business men can do to further the growth of a community. We observe the organization of a Board of Trade by the business men of Langham, one of the new towns of Saskatchewan, situate on the Canadian Northern Railway, some twenty miles from Saskatoon.

* * *

—It is news of no small moment, in the present state of experience and opinion on the subject of the price of electric power in Canada, to learn that the city of Winnipeg has made a contract with the Winnipeg Electric Railway Company to supply electric power at a cost varying from $30 to $50 per horse-power per annum, according to the amount used. Power has heretofore cost from $75 to $80 up there. It will be used at once, it is said, for operating the street lighting system, which requires about 150 horse-power per year.

* * *

—Judge Clute gave a decision the other day which would appear to be of the greatest importance as affecting the relations of wholesale and retail sellers. Wampole & Co., wholesale druggists, Perth, had brought action against the F. E. Karn Company, Limited, Toronto, to restrain the latter from selling certain chemical preparations at rates lower than those defined in agreements signed by them, raising a number of interesting questions. The judge dismissed the action with costs on the ground that the agreements were procured by an unlawful conspiracy, and that they are contrary to the provisions of the Criminal Code. We believe that the trade is very decidedly surprised at the result of the action, having deemed the form of agreement invulnerable, which they cite precedent to show.

IMPERIAL BANK OF CANADA.

The thirty-first annual general meeting of the Imperial Bank of Canada was held in pursuance of the terms of the charter at the banking house of the institution, Toronto, 23rd May, 1906.

There were present:—

Wm. Ramsay of Bowland, Honorable Robert Jaffray, D. R. Wilkie, Elias Rogers, J. Kerr Osborne, Charles Cockshutt, Peleg Howland, Cawthra Mulock, Honorable Richard Turner (Quebec), Miss Hannah Robinson, E. B. Osler, M.P., Clarkson Jones, Ralph K. Burgess, Honorable Richard Harcourt, J. F. Junkin, A. E. Webb, Major Napier Keefer, W. Gordon Jones, T. R. Boys, A. A. McFall (Bolton), William Black (Cobourg), W. C. Crowther, A. Foulds, Frank Beemer, M.D. (Hamilton), Rev. T. W. Paterson (Deer Park), Henry Gooderham, Alexander Nairn, Charles A. Pipon, David Wheelihan (Campbellville), Richard Foster (Bowmanville), C. B. Bingham, Cecil Merritt (London, England), Wm. Glenney (Oshawa), A. C. Morris, A. P. Burritt, Prof. Andrew Smith, F.R.C.V.S., James Bicknell, K.C., Edward Hay, R. H. Temple, John Stark, Edward Archer, H. C. Boomer, Stuart Playfair, J. G. Ramsey, John W. Beaty, Andrew Semple, W. W. Vickers, F. G. Logan, Lyndhurst Ogden, R. N. Gooch, Thomas Walmsley, Charles O'Reilly, M.D., George R. R. Cockburn, C. C. Ross, Harry Vigeon, R. D. Perry, W.T. Jenning, H. S. Mara, C. H. Wethey, Ira Standish, W. Cecil Lee, W. Gibson Cassels, O. F. Rice, E. Chantler, John Flett, E. S. Ball, R. W. Thompson, Wm. Jephcott, J. J. Bell, T. Mortimer, J. H. Eddis, and others.

The chair was taken by the president, Mr. D. R. Wilkie, and the assistant general manager, Mr. E. Hay, was requested to act as secretary.

Moved by Prof. Andrew Smith, F.R.C.V.S., seconded by Andrew Semple,—

That Mr. Lyndhurst Ogden, Mr. R. H. Temple and Mr. W. Gibson Cassels be and are hereby appointed scrutineers. Carried.

The assistant general manager, at the request of the chairman, read the report of the directors and the statement of affairs.

The Report.

The directors have pleasure in submitting to the shareholders their thirty-first annual report and balance sheet of the affairs of the bank as on 30th April, 1906, giving the result of the business of the bank for the financial year (eleven months) which ended that day.

The net profits of the year after making full provision for all bad and doubtful debts, for interest on unmatured bills under discount, for the usual contributions to the pension and guarantee funds and providing for provincial and other taxation, amount to $535,786.20, which has been applied as follows:—

(a) Dividends at the rate of 10 per cent. per annum have been paid amounting to	$335,406 23
(b) Bank premises and furniture acount has been credited with	100,000 00
(c) Profit and loss account has been increased by	100,379 97

The premium amounting to $927,741.50 received on new capital stock, the issue of which was authorized on the 18th June, 1902, and which was allotted to shareholders on 30th June, 1905, has been transferred in bulk to rest account, which now amounts to $3,927,741.50, and will be further increased to $4,000,000 when the balance due upon the subscribed shares has been paid in.

Branches of the bank have been opened during the year at Cobalt, Fonthill, London, and Ridgeway, in the Province of Ontario, also in the city of Quebec, in North Battleford in the Province of Saskatchewan, and in Banff, Calgary East and Red Deer in the Province of Alberta. Suitable premises are now under construction in Winnipeg and in Edmonton to replace existing structures, which have been found insufficient for our requirements.

Since our last meeting the bank has suffered a great loss in the death of its president, Mr. T. R. Merritt, who was one of the founders of the bank, and a director since its start in business. Mr. Merritt became vice-president at the first meeting of shareholders in 1875, and continued in that office until he succeeded the late Mr. H. S. Howland as president in the year 1902. Throughout this long term he was devoted to the welfare of the bank, whose success is largely due to his watchfulness and care. The vacancy on the board created by Mr. Merritt's death has been filled by the appointment of Mr. Peleg Howland, a son of our first president. Mr. D. R. Wilkie, vice-president, was elected to the office of president, and the Honorable Robert Jaffray to that of vice-president.

The policy of the board in appropriating a considerable portion of the profits of the year in reduction of bank premises account is one which they hope will be appreciated and approved of by the shareholders.

The capital of the bank was increased in 1902 by $1,500,000, making it as at present $4,000,000. The development of the Dominion since then has been phenomenal, calling for increased banking facilities. Your directors hold the same opinion to-day as they held in 1902 and believe that any additional capital required can be most readily and most economically furnished by the Institutions which are already firmly established. Your directors have, therefore, decided that a further addition to the capital of the bank is advisable and a by-law will be submitted to you for your approval authorizing an increase in the capital by the sum of $1,000,000 to be used in such amounts and at such periods as the directors may determine.

The change from semi-annual to quarterly dividends which has been adopted during the past year, will we trust, also meet with the approval of the shareholders.

A by-law will be submitted for your approval providing for the remuneration of the president and directors, and increasing their number from eight to eleven.

The head office and branches of the bank have all been carefully inspected during the year, and your directors have pleasure in bearing testimony to the faithful and efficient manner in which the staff have performed their duties.

D. R. WILKIE, President.

31st ANNUAL STATEMENT. 30th APRIL, 1906.

Profit and Loss Account.

Dividend No. 61, for six months at the rate of 10 per cent. per annum (paid 1st of December, 1905)	$173,772 63	
Dividend No. 62, for three months at the rate of 10 per cent. per annum (paid 1st of March, 1906)	96,321 66	
Dividend No. 63, for two months, at the rate of 10 per cent. per annum (paid 1st of May, 1906)	65,311 94

D. R. WILKIE,
General Manager.

E. HAY,
Assistant General Manager.

The several motions submitted were carried unanimously.

The scrutineers appointed at the meeting reported the following gentlemen duly elected directors for the ensuing year: Messrs. D. R. Wilkie, Honorable Robert Jaffray, Wm. Ramsay, of Bowland, Elias Rogers, Wm. Hendrie (Hamilton), J. Kerr, Osborne, Charles Cockshutt, Peleg Howland, Wm. Whyte (Winnipeg), Cawthra Mulock, Honorable Richard Turner (Quebec).

At a subsequent meeting of the directors, Mr. D. R. Wilkie was elected president and the Honorable Robert Jaffray vice-president for the ensuing year.

Toronto, 23rd May, 1906.

Total	....	$77,465,017

Vault doors in Bank of Montreal and Royal Trust Company, Montreal
Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons.** Total weight of lining and doors **260 tons**.
Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

HOW TO FIGURE PROFITS.

A business writer has added another article to the list of those recently published of how to figure a profit in the retail business, and as a practical method of figuring he suggests the following methods:—

Subtract the cost from the selling price, the difference, of course, being the profit. Divide the latter (decimally) by the selling price, and the result will be the true profit, thus:—Cost, $5; selling price, $8; profit, $3, and $8 is contained in $3 .375 times, showing the profit in this instance to be 37 1-2 per cent.

Below will be found a table that may be helpful to the man in a hurry.

To make a profit of 16 2-3 per cent., add 20 per cent. to cost.

To make a profit of 20 per cent., add 25 per cent. to cost.

* * *

The Canadian Westinghouse Company has the contract for the entire electrical equipment of the Windsor, Essex, and Lake Shore railroad. This road is known as the single phase system, it being an alternating current instead of direct. The contract calls for all the electrical generating, overhead construction and car equipment. The cost will be over $100,000. The road will run between Windsor and Lake Erie.

LA BANQUE NATIONALE.

Forty-Sixth Annual Statement.
1906

The forty-sixth annual general meeting of the shareholders of this institution was held at the office of the bank, in the city of Quebec, on Wednesday, the 16th of May, 1906, at three o'clock p.m.

There were present: Messrs. Rodolphe Audette, Hon. Judge A. Chauveau, Narcisse Rioux, Victor Châteauvert, Nazaire Fortier, Victor Lemieux, J. B. Laliberté, Rev. Canon P. N. Thivierge, Rev. J. Tancrède Paquet, Rev. F. Cléophas Gagnon, Rev. S. I. Lecours, Geo. Demers, E. Thomas Couillard, Charles Jobin, Joseph Huard, Joseph Garneau, Joseph H. Simons, Elzéar Labrecque, M.D., J. Ernest L'Arrivée, N.P., Marcelin J. Pettigrew, Ferd. Nadeau, Thomas Breen, Charles A. Chauveau, N.P., Charles Grenier, N.P., H. Octave Roy, Joseph Chapleau, Chas. A. Lefèvre, Jas. McCone, C. Narcisse Hamel, Frs. Delisle, Cyrille LeChasseur, Hon. Amedée Robitaille, Cyprien Labrèque, N.P., Neuville, etc., etc.

Mr. Rodolphe Audette, the president of the bank, was called to the chair and Mr. P. Lafrance, was requested to act as secretary.

Before proceeding to the reading of the annual report, the following gentlemen were elected scrutineers, viz.: Charles Grenier, N.P., Charles A. Chauveau, N.P., Marcelin J. Pettigrew.

The president read the following report of the affairs of the bank:—

Report.

Your directors have the honor of submitting you the forty-sixth annual report of the operations of La Banque Nationale for the year ending 30th April, 1906, with usual statement of assets and liabilities.

The profit and loss account stands as follows, say:—

By balance to credit of profit and loss, on 29th April, 1905		$ 83,166 26
By profits of the year, after providing for accrued interest on deposits, and for bad and doubtful debts		195,753 80
Forming a total of		$278,920 06
Which was appropriated as follows:—		
Dividend No. 82, 3 per cent., payable 2nd November, 1905	$45,000 00	
Dividend No. 83, 3 per cent., payable 1st May, 1906	45,000 00	
Rebate of interest on bills discounted	40,000 00	
Transferred to rest account	100,000 00	
		$230,000 00
Leaving a balance at credit of profit and loss account of		$ 48,920 06

During the year branches have been opened at St. François du Lac and at Rivière-du-Loup Station.

All the branches have been carefully inspected in the course of the year, and we have remarked everywhere a satisfactory increasing amount of business.

Your employees have fulfilled their duties with efficiency and zeal.

All of which is respectfully submitted.

R. Audette,
President.

GENERAL STATEMENT, 30th APRIL, 1906.

Liabilities.

Notes in circulation		$ 1,477,140 00

Bank premises, furniture and stationery		297,907 74
Total assets		$11,496,600 93

N. Lavoie,
Inspector.

P. Lafrance,
Manager.

The chairman then said:—

You have heard the reading of the report; it speaks for itself. After eleven years of management, your directors are pleased to put before you the results of their endeavours.

The following comparative statement will show with advantage the progress achieved during this lapse of time:—

	1895.	1906.
Capital	$1,200,000	$1,500,000
Reserve	none	600,000
Dividend	none	6 per cent.
Profit and loss rebate of interest or contingent fund	49,164	88,920
Circulation	711,749	1,477,140
Deposits from all sources	2,382,167	7,662,728
Discounts	3,645,293	9,377,167
Number of branches	12	31

We can certainly rejoice upon the financial condition of our old Quebec French-Canadian institution. Considering the amount of our reserve fund, we expect, unless some unforeseen circumstances should prevent it, to pay in the future a dividend of 7 per cent., which we propose, for the convenience of our shareholders, to distribute quarterly, beginning 1st of August next.

The increasing demands of capital required by the industry, the commerce, and the agriculture of our province, with which our progress is so closely connected, will necessitate before long the emission of a part or the balance of the authorized capital; but this will be the subject of further consideration by the board, which you will elect.

You may perhaps ask us why, with the report submitted, a dividend of 7 per cent. has not been paid for the last six months. We have thought it best to end the fiscal year on the same basis as it was begun, and thus find ourselves in a position to easily fulfill the programme set forth in what I have just said of our future intentions.

I move, seconded by Mr. N. Rioux, that the report of the directors and the statement now read be adopted, printed and published for distribution among the shareholders. The motion was adopted.

It was moved by Mr. Geo. Demers, seconded by Mr. Chs. A. Lefèvre:

"Resolved that the directors of La Banque Nationale are authorized to take the necessary proceedings to amend the charter of this bank in order that the shares be raised from thirty dollars to fifty or one hundred dollars, as they will deem advisable, and to take in consequence such necessary measure to that end."—Adopted.

Moved by Mr. Chs. Grenier, N.P., and Mr. Cyr. F. Delâge, M.P., seconded by Messrs. Cyprien Labrèque and Joseph Huard:

"That the erection of the Laval Monument being a work of national character the shareholders of La Banque Nationale would see with pleasure the subscription, by the board of directors of this bank of a sum of five hundred dollars in aid towards the realization of this project."—Adopted.

The election being then proceeded with, the following gentlemen obtained the largest number of votes and were consequently duly elected directors for the ensuing year:

Mr. Rodolphe Audette, Hon. Judge A. Chauveau, Messrs. Victor Châteauvert, J. B. Laliberté, Narcisse Rioux, Naz Fortier and Victor Lemieux.

The president left the chair and Rev. Canon P. N. Thivierge being called thereto it was moved by Mr. Chas. Jobin, seconded by Mr. Thomas Breen:

"That the thanks of this meeting are due and tendered to Mr. Rodolphe Audette for his services in the chair, as also to the scrutineers and secretary for the fulfilment of their respective duties."—Adopted.

Moved by Mr. Jos. Huard, seconded by Mr. Ferdinand Nadeau:

"That thanks be tendered to the president and directors for the services they have rendered to the shareholders during the past year."

The motion was adopted and the meeting adjourned.

R. Audette,
President.

P. Lafrance,
Secretary.

Quebec, 16th May, 1906.

At a meeting of the directors, held on the same day, Mr. Rodolphe Audette was re-elected president and Hon. Judge Chauveau, vice-president of the bank for the ensuing year.

P. Lafrance,
Manager.

TRADE ENQUIRIES.

Among trade enquiries received lately at the Canadian Government Office, 17 Victoria Street, London, S.W., are the following:

The Board of Trade of an Ontario town where water power is available at a cheap rate desires to direct the attention of English manufacturers to advantages they can offer for the establishment of branch factories. An English maker of roller composition, roller casting, typewash, and other printers' requisites, would correspond with wholesale dealers in Canada. The publishers in Holland of a weekly import and export gazette are desirous of bringing the facilities they offer for the promotion of trade to the notice of importers and exporters in Canada, and to exchange with Canadian publishers.

At the City Trade Branch, 73 Basinghall Street, London, E.C., a London firm wishes to hear from Canadian manufacturers wishing to develop trade in New Zealand. Catalogues asked for, particularly of hardware lines. A Dutch company, cocoa powder, chocolate, and chocolate confectionery, wishes to be introduced to a reliable firm of buying agents and commission agents in Canada. 29 Fenchurch Street, London, E.C. A North Country company of wholesale clothiers wishes to obtain a share of Canadian trade, and is prepared to arrange with suitable Canadian importing house or agent to represent them.

PHOENIX ASSURANCE CO. OF LONDON.

As one of the enterprising fire underwriting companies which, more than a hundred years ago, set about planting its agencies in all parts of the world, the Phœnix commands attention. It is interesting to Canadians too, for it was doing business "in Upper and Lower Canada" as long ago as 1804, and has continued in business ever since. And it is one of the strong British companies, having assets of two millions of pounds sterling, besides £2,419,000 capital subscribed but not paid up, and a general reserve of £750,000 sterling.

The annual meeting was held recently, and the report upon the business of 1905 submitted was of a kind to please shareholders, who received thirty-five shillings per share dividend for the year. The premium receipts were, translated into dollars, $7,119,935; the losses and expenses, $5,903,110, so that the margin for profit was unmistakable. The losses alone absorbed only 41.48 per cent. of the premiums and the commissions and expenses 34.40. A sum of £30,000 was added to investment reserve and £101,209 to general reserve out of the profits of the year.

It is estimated by the representatives of the company in New York that the loss of the Phœnix at San Francisco will be about $1,600,000. It may be more, it may be less; possibly another month will be required to enable the management to know just how much has been lost. But we may be sure that all obligations will be met by this high-mettled institution. Its Canadian managers, Messrs. Paterson & Son, of Montreal, calmly say: "While this serious loss is to be deplored, it still leaves the company in an exceptionally strong position."

❧ ❧ ❧

BOOKS AND PAMPHLETS RECEIVED.

We have received from London the quarterly "Bulletin of the Imperial Institute," Vol. IV., No. 1. Its 96 pages contain a lot about India, Ceylon, Queensland, East Africa, Egypt, California, and an article on "Mica in Canada." The Dominion also receives reflected notice in a paper on "Maple Sugar," based upon a forestry bulletin of the United States. We quote from this as under: Primitive methods of extracting the sap have been practised among the Red Indians from time immemorial, and from them the early white settlers first learned the art of making maple sugar, now a home industry well known to Americans and Canadians. (Then ensues a description of the process.) The competition of cane and beet sugar, bad seasons, attacks on the trees by the maple worm, destruction of the forests by lumbermen, and adulteration with glucose by the mixers, who now control the trade, have caused a great shrinkage of the producing area, the effect being greater in some parts than in others. In the cane-sugar-growing States of the South the industry has died out to a greater extent than in the north-eastern States. Taking the United States as a whole, the maple sugar industry was at its height in 1860, fell heavily in 1870, rose again to large proportions in 1880, remained stationary in 1890, and then suddenly fell off almost 50 per cent. in 1900, when the total amount produced was almost a third less than in 1850. The output in the year 1900 was 11,928,770 pounds of maple sugar, valued at $1,074,260, and 2,056,611 gallons of maple syrup, valued at $1,562,451. The Oregon maple, Acer macrophyllum, is the only species west of the Rocky Mountains which can be considered as a producer of sugar and syrup. It extends from the Canadian border to California.

From the office of the Niagara Publishing Co. we receive a notice that the Buffalo publication, entitled "American Investments," has been merged with "Moody's Magazine," of New York, City, the two being known as "Moody's Magazine and American Investments." This occurred with the May issue. The circular adds: "Our Mr. A. B. Kellogg, who from the beginning, over sixteen years ago, has been the editor of "American Investments," will be the associate editor of the combined journals. His work has spoken and will continue to speak for itself." Assuredly, Mr. Kellogg's work has been of the out-spoken kind. Before we learned his name from this circular we thought he was a recently-arrived Irishman, by both habit and temperament "agin the Government," so constantly was he making onslaughts upon loan associations, big insurance companies, any sort of associated capital, "the bigger, the worser." He was often humorous and adroit, but oftener bitter.

❧ ❧ ❧

A NEW BRITISH COLUMBIA TOWN.

Among the newest of the mining towns in British Columbia is Coleman, in the Crow's Nest Pass. It is described as a thriving little burg, with many neat residences and up-to-date business concerns. It has but two hotels, and the company, which owns the town site, does not intend to have any more than that for years to come. The origin of the place is described by the Phœnix, B.C., "Pioneer," which says:

"A couple of years ago Mr. S. H. C. Miner sold out a large part of his interest in the Granby Consolidated, and with his assistant, Mr. A. C. Flummerfelt, has since devoted most of his attention, as far as mining was concerned, to the getting out of coal, and building a town called Coleman at their collieries in the Crow's Nest Pass. Here the International Coal and Coke Co. has been steadily working for two or three years past, and to-day probably has one of the best propositions of its kind in Alberta."

PHOENIX ASSURANCE COMPANY, LIMITED

19 Lombard Street, London, E.C.

Extracts from Report of the Directors for the Year Ending 31st Dec., 1905.

The Directors beg to forward to the Members the following Report, together with the Accounts and Balance Sheet of the Company.

The Premiums received during the year, less Re-insurances, amount to $7,119,935.

The Losses (paid and outstanding) and Expenses amount to $5,903,110, a decrease of $1,310,115.

The result of the year's working, after making provision for Unexpired Risks, additions to General Reserve and Investment Reserve, including Balance brought forward from the last Account, and allowing for Interim Dividend, leaves a Balance at the Credit of Profit and Loss of $1,369,395, out of which the Directors propose to declare a final Dividend of $5.75 per share, to be paid on the 30th April. This with the Interim Dividend of $3 per share paid the 31st October last, makes the total of $8.75 per share for the year.

REVENUE ACCOUNT FOR THE YEAR ENDING 31st DECEMBER, 1905.

Reserve for unexpired risks from 1904	$ 2,897,140
Premiums (less re-insurances)	7,119,935
Income from investments (less income tax)	267,360
	$10,284,435

Losses (less re-insurances) paid and outstanding		$ 3,453,605
Commissions	$1,409,575	
General expenses	1,039,930	
		2,449,505
Reserve for unexpired risks at 31st December, 1905		3,000,000
Balance carried to profit and loss account		1,381,325
		$10,284,435

PROFIT AND LOSS ACCOUNT.

Balance from last account	$1,148,040	
Less final dividend at $5.75 a share on 53,776 shares for 1904	309,210	
		$ 838,830
Balance from revenue account		1,381,325
		$2,220,155

Income tax on profits	$ 25,290
Bad debts	8,090
Interim dividend at $3 a share on account of 1905	161,330
Carried to investment reserve	150,000
Carried to general reserve	506,050
Balance	1,369,395
	$2,220,155

BALANCE SHEET AT 31st DECEMBER, 1905.

Liabilities.		
Capital.—$13,444,000.		
53,776 shares of $250 each, $25 paid		$ 1,344,400
Reserve for unexpired risks	$3,000,000	
General reserve	3,750,000	
Investment reserve	225,170	
Balance of profit and loss account	1,369,395	
		8,344,565
		$ 9,688,965
Unpaid dividends		1,790
Outstanding losses		768,360
		$10,459,115

Assets.	
British Government securities	$ 1,268,035
British municipal securities	165,000
Colonial Government and State securities	534,345
Colonial municipal securities	32,145
United States Government and State securities	1,045,770
United States municipal securities	709,610
Other foreign Government and State securities	441,255

The company's offices in London, and other property in London and the Provinces, also the company's branch offices at Birmingham, Bristol, Hamburg, Leeds, Liverpool and Manchester	1,838,485
The company's share in salvage corps premises	89,395
Cash at bankers and petty cash in hand	330,310
Bills receivable	77,105
Branch and agency balances at home and abroad	1,221,285
Interest and dividends due	30,665
	$10,459,115

$5.00 taken as equivalent to £1 sterling.

In compliance with Clause 23 of the Companies Act, 1900, we certify that all our requirements as auditors have been complied with. We report to the shareholders that we have audited the company's books and accounts for the year ending December 31st, 1905; examined the securities representing the investments and seen certificates verifying the stocks and shares deposited abroad. The bank balances have been verified. We are of opinion that the balance sheet is drawn up so as to exhibit a true and correct view of the state of the company's affairs as shown by the books of the company.

H. S. STRATHY,
General Manager.

Mr. Flummerfelt,, the president of that company, tells what has been done in Coleman in a short two years or less. The town now has a population of 700 or 800 souls, the company's mines employing between 350 and 400 men. At present the output is in the neighborhood of 1,100 tons of coal daily, the run of the mines being supplied to the C.P.R. and to the Canadian Northern, while the 105 coke ovens are busily engaged in turning out that commodity, which is sold to the Dominion Copper Co. at Boundary Falls. About 100 tons of coke are manufactured daily. The monthly pay roll at Coleman runs above $30,000.

The company probably produces its coal as cheap or cheaper than any other company in the Pass, the mine being operated almost entirely by tunnels, haulage being done by compressed air. A splendid machinery plant was installed at the outset, and is doing the best of service. Mr. G. L. Fraser, formerly of Phœnix, who went to the Coleman mines as master mechanic, has been made superintendent, and is doing good work. The company gets along well with the Miners' Union, which has a branch at Coleman.

* * *

LA BANQUE NATIONALE.

The tenor of the report of this bank for the latest year, and especially the address of its president, indicate complacency and a bright hopefulness. And not without reason, for the achievements of the last twelve month are such as to justify some self-congratulation on the part of its authorities. An enlarged business has been done, resulting in the addition of nearly a million dollars to assets. And we are pleased to observe that the three items of overdue bills, real estate, and mortgages, upon which we had last year to comment as being in increased ratio over the increase in loans and discounts, are all lessened in the current statement. While circulation shows no increase—indeed, it could not, being already in 1904-05 almost up to the limit—deposits are $900,000 greater; and net earnings are 13.05 per cent. on paid capital, where in the preceding year they were only 9.384 per cent.

The result of the year's business has been an addition of $100,000 to reserve after paying the customary dividend, and the carrying of $48,920 to the credit of profit and loss account. The earnings would have justified an increase of dividend to seven per cent., but it has been determined to wait for three months before beginning to distribute dividend quarterly at the increased rate. The comparison submitted by the president between the condition of the bank in 1895 and in 1906 makes agreeable reading for the shareholders. In the intervening period circulation has doubled, deposits have trebled, a reserve of $600,000 has been created, and the number of branches has been increased from 12 to 31. The authorized capital of the bank is $2,000,000, and the emission of a further part of this before long is foreshadowed, the amount subscribed and paid being now $1,500,000. The former board of directors has been re-elected. They are the same gentlemen with one exception as in 1895-96.

* * *

AN AUSTRALIAN INCIDENT.

The following is a paragraph from our Sydney, N. S. W., correspondent under date 9th April:

For nearly twelve months a Royal Commission has been investigating the conduct of the Lands Department of the Government of New South Wales. Evidence, most of it compulsory, went to show that some members of Parliament and others received large commissions for getting concessions from the Lands Department in the shape of low rentals, or advantageous exchanges, or for securing the purchase by the Government of properties which the owners wished to sell. These commissions in some cases ran into several thousand pounds each. It appeared that a recent Minister of Lands, P. J. Crick, was an interested party to these transactions. At last, upon receiving an assurance that he would not be prosecuted, a witness named Close swore that Crick had suggested that he should go into the business as there was money in it, that he did go into it and gave Crick half of his receipts from each transaction as it was concluded, and that he had paid him in connection with this understanding, over £5,000 in two years. Crick was placed upon his trial last week for this alleged breach of trust as a Minister of the Crown. One witness was out of the country, a second was sick and the third, Close, went into the witness box and swore that; he could not remember the nature of the transactions, whereupon the Crown stated that it had no further evidence to submit and Crick was discharged. The result has not surprised many people. Since the trial, Crick has sworn that Close's evidence was absolutely false, and that while it is true that he has received considerable sums of money from him, yet it was all paid to him in connection with racing transactions or money lent. There is some interest in Canada in connection with Mr. Crick, as he was the member of the Government who signed the contract with the Eastern Extension Company, that has fortified its position against the Pacific Cable, and which was described by the present Premier of the Commonwealth as the most extraordinary agreement he had ever seen signed by a public man. The facts elicited by the investigation show how difficult it would be to carry on an honest Government upon socialistic lines.

* * *

THE SAVINGS OF THE BRITISH PEOPLE.

It will surprise some people to know what large sums are invested by the thrifty British workman in friendly societies and such associations for the accumulation of savings. A recent report by the Chief Registrar of Friendly Societies in the United Kingdom shows that these institutions have grown from a membership of 5,300,000 in 1877 with $71,500,000 on deposit, to a membership of 14,000,000 in 1904, with $252,500,000 on deposit. The population in that interval increased barely by one-third; yet the membership has increased nearly three-fold, and the funds on deposit considerably more than three-fold. And friendly societies by no means exhaust the list of care-takers for the funds of saving people. They do not include the trades unions, which make various benefit provisions for their members. Unions which made returns, to the number of 646, showed a membership of 1,544,461, and funds on hand amounting to $26,926,620. Also, there has been a vast increase in the share capital of co-operative productive and distributive societies as well as in building societies and savings banks.

From 1876 to 1904 the membership of the co-operative societies increased from half a million to two and a half millions, and the share capital from $26,750,000 to $135,000,000. The progress of the building societies has been less uniform, owing to serious frauds which have taken place. At the end of 1904 the incorporated societies had a membership of half a million, and funds amounting to nearly $265,000,000. A large share of this amount must certainly be credited to the wage-earning population. The same remark applies to the amount deposited in savings banks. The $1,000,000,000 on deposit with these banks represents very largely the savings of the workers of Great Britain, and if this total be added to the figures for other institutions, the amount represented by the savings of British working men and working women reaches a stupendous sum beyond the dreams of those who believe the Mother Country is irreparably on the down-grade.

* * *

—The Dominion Government has passed an order-in-council making the Grand Trunk Pacific a free right of way across public lands from Winnipeg westward. The grant includes such lands as may be required for all stations, station yards, workshops, buildings, yards and appurtenances required for the construction and working thereof. The company believes it to be important that it should not be embarrassed, when constructing its line of railway, by others being permitted to acquire the mining rights underlying the lands they have thus acquired, and they are asking accordingly to be considered first applicants for the mining rights under all such lands.

The Village of Fenelon Falls, Ontario, is prepared to offer electric power at $10.00 per h. p., 24-hour service, to manufacturers to locate in the village.
The Village is also prepared to offer other special inducements.
Splendid shipping facilities; close proximity to all Hardwoods.
Firms looking for locations for factories will do well to correspond with
R. J. MOORE,
Municipal Clerk,
Fenelon Falls, Ont.

Shipments of ore from Rossland last week were as follows: Centre Star, 1,650 tons; Le Roi, 3,180 tons; Le Roi No. 2, 510 tons; Jumbo, 90 tons. Total for the week, 5,430 tons, and for the year up to date, 125,615 tons.

Mercantile Summary.

A discovery is just reported of free gold in large quantities on Woodbury Creek, near Nelson, B.C.

It is stated that the Toronto and Hamilton Sewer Pipe Company are about to rebuild their works in Hamilton, which were recently destroyed by fire.

Some extraordinary copper discoveries are reported from the Sovereign group of mines at Aspen Grove, Atlin district, and much activity in that neighborhood is the consequence. Other finds are expected of equal magnitude near by.

The Temiskaming and Northern Ontario Railway Commission held a sale of town lots last week at Englehart. A hundred and twenty-five lots were sold, the aggregate receipts being $25,000. This place is in the "agricultural belt," which is believed to be free from minerals, so that the price realized is deemed very satisfactory.

The Hamilton, Caledonia and Lake Erie Railway Co. held a meeting two or three days ago and elected the following directors: Wm. Southam, W. G. Walton, John Milne, William Magee, George Lynch-Staunton, Alfred Ward and A. W. Peene. The shareholders approved the contract with the Hamilton Steel and Iron Co. for the supply of natural gas.

A great deal of damage has been done of late on the Pacific coast by fire. Near the McNair shingle mill, North Vancouver, between three and four thousand cords of shingle bolts and long cedar bolts were burned. News has arrived also of a serious fire on the Vancouver Island shore, between Chatham Point and Elk Bay. There have been many fires in the neighborhood of Nelson as before reported.

The Monterey Waterworks and Sewer Company, Limited, has been incorporated under Dominion charter with a capital stock of $2,000,000 for the purpose of constructing and operating waterworks, drainage and sewerage systems, generate and sell electric power, and acquire, by purchase or otherwise, water rights, etc. The names mentioned in the "Gazette" as being connected with the enterprise are J. S. Lovell, accountant; Robert Gowans, solicitors' clerk, etc., Toronto.

The Western Elevator Company are arranging with Fort Wiliam council for the purchase of a site on Kaministiquia River for the erection of an elevator with 650,000 bushels capacity. The company will be exempt from taxes for ten years, and if at any future time the company build more elevators the same are to be erected within the corporation limits. Representatives had an option on a site in Port Arthur at a low figure, but decided to locate at Fort William on account of more natural facilities there. Altogether, the company have eighty elevators in the West.

Mercantile Summary.

Work on the new electric railway, to be built by a Toronto syndicate, between Rochester and Lockport, N.Y., is to be started, we understand, within a few days.

The Contractors' Supply Company, Limited, capital $100,000, has been granted a charter by the Ontario Government, having an authorized capital of $100,000. It will buy, sell and manufacture builders' and structural material.

The workshops of the Co-operative Funeral Expense Society in Montreal were on Sunday last destroyed by fire at a total loss estimated at $30,000, with insurance of $23,000. On the same day the Northern Elevator at Emerson, Man., was destroyed with a loss of about $20,000.

We hear from Sydney that the Dominion Iron and Steel Company has started on its 6,000 iron rails order for the Canadian Northern Railway. The rails are seventy pounds to the yard, and are to be shipped around Cape Horn to Vancouver on the steamer "Boveric."

A surprising feature of the year's building operations in Winnipeg is, we hear, the large number of new apartment houses which are being constructed. As a rule, these buildings contain between twenty and thirty suites of rooms of from three to six rooms each.

The Toronto and Belleville Rolling Mills, Limited, has been incorporated with a capital of $599,000. The chief offices will be at Belleville. They will own and operate rolling mills, machinery and plants for the manufacture of iron and steel, or products of the same, and to construct, convey and use steam, electrical and water powers for the purposes of its business.

The town of Lachine has entered an action against H. J. Fisk & Co. to recover from them the sum of $25,000 which the former alleges was paid to them as a bonus for their tanning industry on the understanding that they would employ a certain number of employees and pay them a certain sum for wages each year, which conditions the town claims have not been complied with.

We observe with interest that the busy town of Saskatoon has another newspaper, a tri-weekly, the "Capital," of which Mr G. M. Thompson is managing editor, and Mr. Chas. E. Tryon business manager. It is a supporter of Mr. Haultain, and gives promise of being an interesting journal. The first number, although consisting of twelve pages, is crowded, and the manager apologizes for not being able to give adequate room to all his patrons. One of these, a real estate firm, as might be supposed, describes Saskatoon in glowing terms as "The Hub, the Distributing Point, and the Commercial Centre of the World's Bread Basket."

The Toronto General Trusts Corporation

Mercantile Summary.

The granite quarries at Stanstead, Que., are now running full blast again, the places of the striking granite cutters having been filled with non-union men.

The Reinforced Cement Block Company will shortly begin operations in Vancouver, manufacturing a new style of cement block for building purposes. It is now looking for a factory site.

A despatch from Gretna, near the United States boundary of Manitoba, states that the first steel on a new branch of the Great Northern Railway in the south of the Province, to be called the Midland, was laid last week.

The Western Hardware Company's premises at Regina, Sask., were destroyed last week by fire, causing a loss of nearly $50,000. The law offices of Hon. F. W. G. Haultain, which were situate in the same building, also suffered heavily.

Major Gordon, C.E., who has been prospecting with a diamond drill for some time past in the neighborhood of Clear Lake, Cobalt, Northern Ontario, is reported to have made a good strike, one vein showing nuggets of native silver an ounce in weight.

The International Electric Company, Limited, London, Ont., has been granted an Ontario charter. It will erect, operate and lease works for the making, generation, accumulation and distribution of electrical machinery. F. H. Potts and Ewen MacKenzie are among those interested.

The Brethour Milling Company, Limited, has been incorporated with the object of carrying on the business of a lumberer, dealer in timber and logs, saw-miller, etc. The share capital is placed at $250,000. The head office is at London, Ont. Messrs. B. V. Hole and G. E. Coleman, of London, are among the provisional directors.

Mr. Louis Bouchard, proprietor of the Waterloo Wood Manufacturing Company, of Waterloo, Quebec, is considering an offer from Fraserville to remove his factory to that place. Voting on the by-law at Waterloo to grant Mr. A. F. Savaria $30,000 to aid him in the construction of additional buildings and an exemption from taxes for twenty years took place last week and was carried by a majority of twenty-three votes.

LEGAL TERMINOLOGY.

According to a newspaper story, a prisoner was once brought before Judge Sherman of the Massachusetts Superior Court for sentence, and as the clerk happened to be away from his desk for a moment Judge Sherman enquired of the officer in charge of the prisoner what the offence was. "Bigotry, yer Honor," replied the officer; "he married three women." "Why, officer, that's not bigotry," said the judge, reproachfully; "that's trigonometry."—Law Notes.

THE IRON AND STEEL MARKETS.

The railroads are said to have bought more than a million tons of steel rails for 1907 delivery, says "Iron and Machinery World." Of that total, the Chicago mills have been the recipients of 600,000 tons, Birmingham, Ala., 200,000 tons; other mills, including the entire output of the Colorado mill, 200,000 tons. Perhaps the total is considerably in excess of that amount and not unlikely before the expiration of the week more than 1,500,000 tons will be booked for next year's delivery. This is the most magnificent showing that has yet appeared in the history of the trade. Never before have the American railroad companies placed orders for rails so far in the future as they have just done. It has become by long practice the policy of the railroad companies to buy heavily and to make various kinds of investments and improvements on an elaborate basis when the transportation business is active, and to refrain to the greatest degree consistent with the safety of transportation when business is dull. The inference from that policy is obvious. The conditions of traffic in America are superb, better than ever before, and with a promise of indefinite continuance. The buying of iron and steel material by the car works is better defined than that of most other large consumers of the metals. Hence the condition of the car industry is similar to that of steel rails. The curious report came from Toronto this week that a car manufacturer in Canada has just received an inquiry from a railroad company in the United States for cars. The only explanation is that none of the car shops in this country are in a position to deliver the cars when wanted; another evidence of the remarkable active state of traffic, which is the index of general industrial and commercial conditions. While commerce plays many pranks with statisticians and forecasters, even with the best of facilities for outlining the future, yet the resources of the railroad companies for prognosticating the future excel greatly those of business men in most other branches of industry and commerce, so that the almost lavish manner in which the great transportation companies are providing for the future can be accepted in no other way than that prospects for trade continue at their brightest.

* * *

A CIVIC TRAVELLING SALESMAN.

The "Maritime Merchant" is publishing some articles on "attracting capital by publicity," in which they compare a community with industrial opportunities, to a merchant who has goods to sell—both needing to advertise. Since that time the idea of taking some definite step looking to the extension of manufacturing industry in Halifax has proceeded a step further, and we understand that the majority report of the committee to investigate the merits of Mr. Regan's scheme, will recommend the subscription by citizens of Halifax of a sum of $5,000 or $6,000, with which to pay the salary and expenses of an expert, who would devote his time to the study and elaboration of a scheme, visiting points in Canada and the United States, where there are people who can be interested in Halifax as a manufacturing point, and endeavoring to establish industries by the method of soliciting personal interest.

There will hardly be a dissenting voice as to the usefulness of work of this kind if we can get the right man. It is not a new idea. It has been tried elsewhere and with marked success. We know of one city in the United States where they pay a man a salary of $15,000 a year to do such work as this, and find that the results amply justify the expenditure. Such a man in Halifax might make himself the most valuable person who ever set foot in the city.

If the day comes when the city will have a salesman to dispose of its industrial opportunities as wholesale houses have salesmen to dispose of their wares, that official may find himself in negotiation with a manufacturer who would like shipping facilities alongside both rail and water, and who would like to buy the same more reasonably than they can be had in Halifax. What would be done in such a case? Across the harbor such sites abound, and if he were to follow precedent he might find in the offer of Halifax to bonus a steel shipbuilding plant anywhere "on the shores of Halifax Harbor," sufficient argument for directing his prospect's attention to Dartmouth. And we are bound to say that we think he would be perfectly right. Nevertheless this involves a question on which some people would feel a little bit touchy, as there is a very common superstition that business is and should be supremely selfish. If Halifax and Dartmouth were under one common civic government there would be no objection, and if Halifax goes ahead with a great scheme such as this, would it not be right and advantageous for Dartmouth to cast in her lot with Halifax?

TENDERS FOR

DEBENTURES.

City of Saint John, N.B.

TENDERS, addressed Treasury Department, City of Saint John, Province of New Brunswick, and marked "Tenders for Debentures", will be received by the undersigned, up to 12 o'clock, noon, on the Twenty-eighth day of June, 1906, for the purchase of Seven hundred and Twenty-one Thousand ($721,000.) Dollars, "Saint John City Debentures", to be issued by the City of Saint John, payable at the expiration of forty years, with interest at four (4) per cent. per annum, payable half yearly, from the First day of May, 1906. Principal and interest may be payable at Chamberlain's Office, in Saint John, New Brunswick, or in Great Britain, or elsewhere.

The Debentures may be expressed in sterling money of Great Britain, in currency of Dominion of Canada, or in the currency of any Foreign Country, and in sums not less than Five Hundred Dollars each as purchaser may desire.

Resolutions passed by the Common Council of the City of Saint John provide for the formation of a Sinking Fund for the redemption of these Debentures at maturity.

Parties tendering must state in their tender in what currency, in what sums and where they desire the Debentures and Interest to be made payable.

The highest or any tender not necessarily accepted.

By Order of the Treasury Department of Common Council.

HERBERT E. WARDROPER,
Common Clerk
CITY OF ST. JOHN, N.B.

Prospectus in connection with above Loan may be obtained on application.

72 York Street

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their circular dated May 19th, 1906, said:—

An improvement in the monetary situation imparted a better feeling in the stock market. Very considerable recovery has already taken place from the low level reached after the San Francisco catastrophe, and at times indications pointed to a still further recovery. The short interest has, however, been considerably reduced, and profit-taking is more or less in order after so substantial a recovery. The immediate future, therefore, promises no continuous movement in either direction, or nothing more than a reasonably good trading market; operations still being largely of a professional character. Lower rates are quoted for time money, with freer offerings, which makes a more satisfactory money situation. It is quite evident that there will be money enough for all legitimate requirements until the autumn demands assert themselves. Our gold importations during the last month have been unusually heavy—among the largest during the last decade—and further shipments may be made in settlement of the San Francisco losses by foreign insurance companies. Just here, however, the conditions of the foreign exchange market and our international trade must exert an important influence. Before very long future cotton and grain bills will be available in the exchange market. Our foreign trade is growing at an almost record-breaking pace. Our gold imports in April were $15,000,000, compared with $2,500,000 a year ago; and for the ten months of the fiscal year ending April total gold imports have been $59,000,000, or $10,000,000 in excess of the same time last year. These returns demonstrate that the international movements are entirely in our favor—a factor of supreme importance at a time when our domestic money market not only has before it all the demands which it can possibly meet, but would be obliged to seek assistance from abroad in case of further expansion. Much temporary relief has been given to the situation by Secretary Shaw's expedient of making gold imports immediately available.

The general situation continues satisfactory. In spite of occasional hesitation the volume of business continues upon a large and increasing scale. Clearing House returns at leading cities demonstrate this, showing a gain of 16 per cent. last week and 17 per cent. the week before over the preceding year. Railroad earnings also continue very encouraging. Fifty-six roads in the month of April reported gross earnings of $52,400,000, an increase of nearly 12 per cent. over last year. These are surprising figures in view of the disturbance caused by the coal strike, which, however, may be more seriously reflected in later returns. Industrial activity continues unabated. Enormous orders have been placed for steel rails, some of them for delivery as far ahead as 1907. There are 730,000 tons already on the order books of American rail mills, and other important contracts are pending, which will soon bring the total up to 1,000,000 tons. This means continued prosperity for the steel mills for months to come. The railroads are certain to consume large quantities of material not merely for improvements but also for new mileage. The extensive

Town of Wapella Debentures

Sealed tenders will be received by the undersigned until 6 o'clock p.m. on Friday, the 18th day of May, 1906, for the purchase of $10,000 of the Town of Wapella debentures, bearing interest at the rate of five per centum per annum, payable in twenty equal instalments, at the Union Bank of Canada, Saskatchewan, on the 1st day of December in each year.

THOS. F. TERRY,
Secy.-Treas.,
Dated at Wapella, Town of Wapella.
this 3rd day of March, 1906.

Debentures for Sale

The undersigned is prepared to receive tenders for the purchase of debentures of Drainage District No. 5 in the Province of Manitoba to the amount of $162,000.00 and of Drainage District No. 15 in the said Province to the amount of $22,000.00, said debentures being in denominations of $1,000.00 each, dated July 1st, 1906, payable in thirty years from the date thereof at the Union Bank of Canada, in the City of Montreal, and bearing interest at the rate of 4% per annum, payable half-yearly. These debentures are issued under the provisions of "The Land Drainage Act," and are guaranteed by the Province of Manitoba.

Tenders will also be received for debentures of the Central Judicial District in the said Province to the amount of $22,000.00, dated July 1st, 1906, payable on January 1st, 1924, at the Union Bank of Canada in the City of Montreal, and bearing interest at the rate of 4% per annum payable half-yearly.

All offers must be addresed to the undersigned, and marked "Tender for Debentures," and must reach this office not later than the 1st day of June, 1906.

Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.
Provincial Treasurer's Office,
Winnipeg, Man.

outlays by the Pennsylvania and New York Central for accommodation of New York traffic give some idea of what is being done in this direction. Evidently these gigantic corporations have unlimited faith in the future of New York city, or such vast outlays which cannot be immediately profitable would not be undertaken.

* * *

FRAUD IN REAL ESTATE SALES.

An important bill of wide public interest passed its third reading in the Alberta Legislature last week. The bill is entitled "An act to prevent frauds and perjuries in relation to real property in the province," and was introduced by Mr. Simpson, (Innisfail). Its effect will be to prevent real estate dealers from selling land on verbal authority, and then demanding commission. Cases have been cited of men verbally consenting to "list" their land with several individual dealers, who have, after a sale has been made by one of their number, sued for their commission, causing trouble and expense even when the land sharks lost their case and often bluffing the owner into paying "peace money" to save litigation. By the provisions of the bill written and signed authority must be given by the owner before the sale can be collected by the real estate agent. The Attorney-General expressed a wish that in passing this legislation the public should be warned of the danger of placing their signatures to any written or printed paper presented to them pertaining to be a form of permission to sell, which might afterwards be found to contain dangerous clauses.—Saskatoon "Capital," May 12th.

* * *

A WESTERN PIC-NIC.

Nearly a column of a Saskatoon newspaper is taken up in describing the advent at that very enterprising town of a party of Bostonians, some thirty in number, who had become interested enquirers about the Canadian North-West last year, held meetings during the winter about removing to it, and were finally persuaded to come to Saskatoon, through thte influence of W. E. Lawton, of Alameda, Sask., who was in Boston all winter. The party received a grand send-off when leaving Boston, about 1,000 friends and a brass band joining in the farewell. In characteristic American style they paraded through the depot to the train with a banner inscribed, "Saskatoon or Bust." The trip to their new home was made in a special tourist car. The party, or some of them, claim to be descendants of the Pilgrim Fathers, and they will call their town "Nowcomal." A committee was chosen to look for homesteads, and after seven and a half days' search, found a whole town site, about 130 miles south-west, which was open for entries. While waiting for returns from Regina, the party spent their time in purchasing cattle and implements. Some thirty more persons are coming up from Boston in June to join these colonizers, and they will be welcome, too.

TORONTO MARKETS.

Toronto, May 23rd, 1906.

Chemicals, Drugs, etc.—Opium and quinine, and the other staples remain unchanged as to price, while in volume of business it cannot be described as very large. In fact, for the moment, trade is rather dull. Carbolic acid is rather on the easy side. New York advices speak of dullness of trade prevailing during the last few days. The Baltimore chemical market is quite active. English reports say the home trade is being carried on briskly, and that prices are steady.

Dry Goods.—The firmness in staple woolens and cottons, more particularly the former, continues unabated. Nevertheless, the demand is good. Dress goods are selling more than usually briskly for this time of the year. Linens continue very strong. Samples of fall millinery are now arriving from Europe. Ribbons are said to be very prominent among the decorations. Veilings are popular. There was good bidding at the London wool sales, and prices in general were higher, so there seems to be no probability whatever of a fall in woolen prices. Both merinos and crossbreds had an upward tendency. In dress goods, plain and fancy mohairs, also homespuns and grey worsteds are in favor.

Flour and Grain.—While no very large movement is reported either in flour or wheat, the prices of both seem to have taken on a rising tendency. This perhaps is more in sympathy with Chicago conditions than due to anything intrinsically in the Canadian market. In flour, exporters are bidding $3.15 for ninety per cent. patents, but not much is selling at this figure.

Groceries.—The movement in sugar is by no means brisk, but no changes have been made in quotations since our last report. Teas are doing a more satisfactory business this week. No quotable changes can be reported, but in some grades, the tendency is towards higher prices. Canned fruits and vegetables are held very firmly, particularly corn and tomatoes. There has been another advance in Valencia raisins.

Hides and Skins.—While no further change has transpired in hides, they are still rather strong in price. A fair trade is passing. Tallow is normal. Leather is normally active, with an average trade being done at good and steady prices.

Provisions.—Butter is in good demand, especially grades of really choice quality, which are not altogether plentiful just now. There is a good trade passing in cheese, which continues firm. Eggs continue very high-priced for the season, selling at 17c. for new-laid. Nothing is doing in poultry. Hog products and smoked meats are very firm, in sympathy with live hogs.

Seeds.—The demand for clover seeds has passed almost away, and the season is practically over. Farm seeds, however are moving well.

Wool.—No further change has taken place since our last report, and prices remain very firm and steady.

Now that public opinion fully endorses the position always taken by the Great-West Life Assurance Company as to the best form of investment for a Life Company's funds (in first Mortgages on approval Real Estate) it is of the utmost importance to those requiring Life Insurance that they enquire into the terms of the Great-West Policies.

Full information on request.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 23rd May, 1906.

Ashes.—Offerings by makers continue to be extremely light, and $5.40 is readily realized for No. 1 pots; seconds, $4.85 to $4.90; No. 1 pearls, $6.75 to $7 per cental.

Cements and Firebricks.—Receipts of Belgian and English cement are fairly liberal, there is a scarcity of American. The demand is good. We quote Belgian at $1.70 to $1.90; English, $1.90 to $2.05; Canadian, $1.90; bricks, $17 to $21.

Dairy Products.—Prices of butter eased off a little since a week ago, but there is apparently fair export enquiry, and 19½ to 20c. is about the present quotation for good to fine creamery. Shipments to Britain last week were 3,157 packages. Exports of cheese last week were 24,174 boxes, as against 31,512 boxes for the same week of 1905. The market is quite steady at last week's level, and we quote 11¼ to 11⅜c. for fine white, and 11 to 11⅛c. for fine colored.

Dry Goods.—The weather continues altogether too cool to suit the views of retailers, and wholesale dealers report sorting business as being on the slow side. Payments, however, are on the whole fairly met. The only new feature with regard to values is a slight reduction in the quotations for shelf, table and enamelled oilcloths manufactured by the Dominion Oilcloth Co.

Hides.—Business is of a fairly active character, and receipts are readily absorbed. The late advance in price is well sustained, and we quote buyers as paying 12c. per pound for No. 1 beef hides, 15c. for No. 1 calfskins, and 15c. each for lambskins.

Leather.—Travellers in the boot and shoe trade are out with fall samples, but there is not a great deal cutting of leather as yet being done, and dealers in this line report local business rather quiet. But export trade in sole is quite active, with English buyers apparently prepared to pay advanced figures. Local quotations for No. 2 Mfrs' sole are advanced to 26c., and 25c. for No. 3; best grades of slaughter, 30c.

Metals and Hardware.—The most important feature in this trade since last writing has been a break in the high quotations for ingot tin, a drop of £12 a ton in one day having been reported in the British market, but there has been some recovery, and the local quotation is now about steady at 48c. Large sizes of tinned sheets have been advanced half a cent. a pound, but ordinary tinplates are unchanged at $4 for cokes, and $4.25 for charcoals. Galvanized sheets are steady at $4.20 to $4.45; Ternes, $6.85; Canada plates, $2.60 for 52's; black sheets, $2.40; boiler plate, $2.30. The nominal quotation for iron pipe is $4.38 for inch, but for fair lots this figure is shaded. Pig-iron and bars remain at the old figures. Copper is about steady at 20½ to 21c.; lead, $4.35 to $4.45; zinc, 6¾ to 7c.; antimony, 27 to 27½c.

Oils and Paints.—There is a continuation of the active demand in these lines, all the houses reporting good business. Values are mostly steady to firm, turpentine, the only exception, being slightly easier at 92c. Linseed oil is quoted at 54 to 55c. for raw, and 57 to 58c. for boiled; fish oils remain as last quoted, also castor. Leads are strong at $6 to $6.15 for chemically pure; putty, $1.40 in bulk; window glass, $4 per 100 feet for first break.

* * *

REMITTANCES OF IMMIGRANTS.

Twenty-five million dollars a year—the same sum as immigrants brought into the country last year—is sent by post-office remittance from the United States to foreign countries. So says an article in the New York "Sun." Nearly one-quarter of this amount goes to England and Ireland, $3,000,000 each to Germany and Canada, $2,500,000 to Italy, and $2,000,000 each to Sweden and Russia.

The amounts of incoming cash and outgoing remittances balance almost exactly but the distribution varies. Of the Italian newcomers to the United States 15,000 had more than $50, 175,000 had less. Of the Irish immigrants, 7,000 had more than $50, 38,000 less. Of the Hungarians and Slovacs, 3,000 had more than $50, 80,000 less. The same division was found among Bohemians, Finns, Greeks, Lithuanians, Syrians and Scandinavians. Among the Russians there were 600 immigrants with more than $50, and 15,000 with less; 2,500 Poles had more than $50, 82,000 had less.

Of the million immigrants who landed in the United States last year, 36,000 were adults from England. Twenty-one thousand had $50 each; only 15,000, somewhat less than one-half the whole number, had less than $50, a marked evidence of the thrift of English newcomers. The Scotch, proverbially thrifty, did not do so well. The Scotch immigrants who had more than $50 on landing numbered 5,700.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

while 6,200 had less than that amount. Of the French immigrants, 5,000 had more than $50 and 3,300 less. Next to England, the largest number of immigrants having more than $50 were those from Germany. There were 18,000 Germans supplied with $50 each for their battle with life in the New World. The newcomers from Germany, as from England, were neither necessitous nor dependent.

THE STOCK MARKET.

Mackay common continues to be quite a feature on the local stock market, selling as high as a little over 75, and that being the closing price on Wednesday. On Sunday the transactions in this stock comprised sonsiderably more than half of the entire volume of business done. Imperial Bank declined 3¼ on Tuesday. On the whole the Toronto Stock Market is fairly active this week, considering the conditions. New York is still quite dull, and somewhat unsettled, losses of a point or more being quite common among several stocks.

CARBOLITE CARBOLINEUM.

For many years the creosotic oils have been looked on as the best preservatives for timber in positions where it is exposed to the decaying influences of moisture. What seems to be needed for this purpose is a material which is in itself a powerful germicide, and at the same time is of such a fluid, penetrative character as to be easily applied and to permeate the wood speedily, thus preventing the access of bacterial germs which act destructively. Carbolineum is a substance which, according to statements made to us, exactly fills these requirements, having been used, we believe with success in every part of the world, particularly in London, where wood pavements treated with it have given good satisfaction. In Toronto there is a company called the Carbolite Carbolineum Company, Limited, which makes this important preservative, which, while being cheaper than paint, is stated by the Government analyst to possess remarkable powers of penetration and preservation. Not only this, but it is so free from volatility as to make its use economical on a large scale and it so hardens and agglutinates the wood as to increase its wearing qualities and prevent rot or decay. The C. P. R. has treated many of its ties with carbolite carbolineum and the increased length of life given them thereby is a remarkable fact. All descriptions of flooring, joists, telegraph poles, fence posts, etc, also brick and stone work, can likewise be treated with this antiseptic compound with favorable results. Ship hulls and similar spots exposed to the attacks of seaweed, barnacles or leakage are rendered, so it is said, immune against evil consequences. The company is prepared to undertake contracts to apply this preservative to suit all kinds of conditions.

NEWS IN THE TEXTILE TRADES.

Most of readers, says the "Drapers' Record," of London, are familiar by name with the sumptuary laws which were finally repealed in this country in the reign of James I. Those laws were designed to restrain excess in dress, food, and so on. In the "Wealth of Nations" Adam Smith wrote: "It is the highest impertinence and presumption in kings and ministers to pretend to watch over the economy of private people, and to restrain their expense, either by sumptuary laws or by prohibiting the importation of foreign luxuries." What the writer would have said of the recent edict of the Town Council of Nordhausen, prohibiting women from wearing "dresses with trains" within the confines of the municipality one can only surmise. True, the prohibition is not based upon excess in anything except length. The police have received orders to strictly enforce the municipal decree. The new by-law provides that offenders shall be punished by fines not exceeding 30s. It appears, however, that the municipal authorities have the right to prevent women trailing their dresses along the ground, but that they cannot prohibit them from wearing trains which would touch the ground if not carried in the hand. No doubt, dresses that trail on the footpath are a frequent source of contamination; but we cannot believe that the attempt to prevent the practice by law will be successful. For one thing, it has in it a strong touch of the ridiculous; and, as the French say, it is ridicule that kills.

Recent reports from hosiery buyers in Europe do not tend to encourage heavy purchases of foreign hosiery for the spring of 1907. Communications recently received from some buyers state the scarcity will be great and that makers are so independent that they must figuratively go on their knees to the hosiery lords to secure actual necessities. They also state that the advances asked on new goods range as high as 22 per cent. No attempt is made by these buyers to hide their disgust with the whole situation. Nevertheless, they have bought liberally where the goods could be obtained. Through this increase in cost there must, of necessity, be a considerable re-arrangement of selling prices, due to change in customs valuations.—Dry Goods Economist.

The Central Foundry, Limited, capital $200,000, has been granted a charter by the Ontario Government for the object of conducting a general foundry business in Toronto. H. L. Bowers, of Toronto, is among the provisional directors.

—Various are the methods suggested of commemorating the victory of a Canadian, William Sherring, of Hamilton, over competitors from all the world at the Olympian Games at Marathon, Greece. What seems to us the most acceptable was suggested in Hamilton, namely, that a memorial of the event should take the shape of a monument to the spirit of pure athletics. Concerning this the Montreal "Gazette" says: "The figure would be of bronze, representing a runner, reproducing the figure and muscular development of Sherring, and Mr. Philippe Hebert of this city, is suggested as the sculptor. This is a vastly more sensible idea than presenting the young man with a house and lot. Monetary compensation is foreign to the spirit of amateur sport. The idea of a monument is not a new one, for it was practised by the Greeks. Let the monument be chosen, and it will always stand as an encouragement to amateur sport."

The Crown Life Insurance Company

Mercantile Summary.

The contracting firm of Griffin & Desnoyers, Quebec, who were reported several week ago as insolvent, are endeavoring to settle at 50 cents on the dollar. The liabilities are about $23,000.

V. E. Paradis, of Quebec, has been named curator in the matter of J. W. Tremblay, general merchant at Bic, Que., who was burned out on the 24th ult. The liabilities are reported at about $2 500, insurance inadequate, as usual.

For the past eighteen years A. D. Tendeau has been a grocer in a moderate way at Coaticooke, Que. He makes an assignment of his estate to S. Bachaud, a local creditor. His liabilities are estimated to exceed $2,000 or thereabout.

Edouard Turgeon, of Quebec, was formerly a grocery clerk and inheriting a couple of thousand dollars in the spring of 1904 from his late father, a well-to-do farmer of Pointe aux Trembles, he began retail business on his own account. Already he has become insolvent and owes $4,500.

We hear of the assignment of Morris Zimers, doing business for the past three or four years in Montreal as the French Art Embroidery Co., with liabilities of about $25,000. His troubles are said to be largely due to accommodation paper, and to almost indiscriminate granting of credit to weak risks.

W. J. Kee, who had formerly been a drug clerk in Cornwall, and started business for himself in the line indicated at Finch, Ont., in July, 1904, has assigned to his father, Joseph Kee, of Cornwall, who is understood to be a creditor for capital advanced.——W. D. Christie, in the feed business at Kemptville, has assigned to T. K. Allan, of the same place.

According to latest advices from the West crop conditions are considered very favorable. A practically dry seedtime allowed a full acreage to be planted in good condition, and this has been succeeded by abundant rains all over the country, so that an excellent start has been made. Reports from different parts of the country indicate that the condition of the growing grain was never better at this period of the season in any previous year, and the appearance of the various districts is very good generally. Every part of the country has had its share of rain, and in no portion has the precipitation been too great.

The Toronto Bolt & Forging Company's forging shops at Swansea were on Tuesday morning last practically destroyed by fire. The loss is variously estimated at between $100,000 and $200,000, while the insurance carried was $137,500. About three hundred and fifty men are thrown out of work, but it is understood the work of rebuilding will be started at once. The fire had its origin in the threading department.

The Metropolitan Life Insurance Co.

(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve.
$77,275.94	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,0000,00.00

More Than $7,000,000.

Over and above premiums received, more than $7,000,000 has already been paid or credited to its policyholders by the

JOHN MILNE, Managing Director,
LONDON, ONT.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Statement of
Bonds and Debentures owned by

The Royal-Victoria Life Insurance Co.

And Deposited with the Receiver General at Ottawa, in trust for the security of Policyholders.

Province of Nova Scotia Debentures, payable January 1st, 1915	$6,000.00
Province of Quebec 3% Inscribed Stock standing in the name of the Receiver General in trust, payable April 1st, 1937	9,733.33
Province of Manitoba Debentures, payable November 1st, 1930...	60,000.00
Town of Maisonneuve Debentures, payable January 15th, 1942	30,000.00
City of St. Henri Debentures, payable May 1st, 1951	55,000.00
Canadian Northern Railway Debentures, guaranteed by the Province of Manitoba payable June 30th, 1930..................	24,820.00
City of Montreal Debentures, payable May 1st, 1944	50,000.00
City of Ottawa Debentures, payable September, 26th, 1928.............................. ...	15,000.00
Total ....,..	$250,533.33

The above securities have a cash market value of $257,172.60.

DAVID BURKE, A.I.A., F.S.S.,
Montreal, May 15th, 1906. General Manager.

CONSERVATIVE PROGRESSIVE FAITHFUL

Some of the cardinal aims of the Union Mutual management are—to be conservative in the choice of investments—to be progressive in the prosecution of the business—to be faithful to the interests of policyholders.

Agents of like inclination cordially welcomed.

UNION MUTUAL Life Insurance Co.

LESSENING THE FIRE WASTE.

Once more an attempt is being made to secure concerted effort to abate the dreadful loss suffered yearly on this continent by fire. That important and extensive body in the United States, the National Fire Protection Association, departed from its accustomed programme at its Chicago meeting last week, to enter upon the question of the nation's fire-waste in general and conflagration losses in particular. After reciting a number of deplorable conditions which continue to exist, one of the worst of which is that public protection has not kept pace with the growth of buildings and increase of valuation, a resolution was adopted without dissent, as follows:—

> "That an urgent appeal be and is hereby made to all interests to co-operate in bringing about better conditions by adopting improved methods of construction, by safe-guarding hazards of occupancy and by introducing automatic sprinklers and other private protection with private water supplies, quite in addition to the public fire service; and be it further
>
> "Resolved, That we recommend that municipalities pass ordinances involving the adoption of an approved building code along the lines of the building code recommended by the National Board of Fire Underwriters, and requiring the introduction of automatic sprinklers with private water supplies in buildings of special occupancy and in so-called congested districts, to the end that the danger of sweeping conflagrations may be eliminated."

In his address the president, Mr. Hexamer, of Philadelphia, recalled to the memories of his auditors that the conflagration hazard of San Francisco was clearly pointed out to underwriters by the engineers of the Committee of Twenty, whose investigating work with respect to many prominent cities of the United States has proved very valuable. He also pointed out that where six European countries have shown within the last five years a per capita loss by fire of 29 cents, the average per capita loss by fire in the United States and Canada in the like five years has been $2.47, or eight times as much. The total loss of property in the United States by fire for the five years ending with 1905 is stated at $866,617,000—an enormous sum.

A former president, Mr. Uberto C. Crosby, gave what was styled a commemorative address, dealing with conflagrations, special hazards, building construction, cement blocks, reinforced concrete, steam pumps, etc., as reported upon by special committees. It is important to observe what he says about the defects often found in concrete blocks, owing to their being made too often by inexperienced manufacturers. These, he describes, as in some cases, "porous and weak;" some specimens submitted to the concrete block committee for fire test "have actually disintergrated in the course of a few months while waiting for trial." The danger of building with such stuff as this is manifest, and the need of testing alleged "fire-proof" material strongly evident. Mr. Crosby says that the committee does not feel justified in presenting a standard for concrete blocks until investigations now being made are completed, but they hope to do so in another year. On the question of the best method of reinforced concrete for building construction, materials, proportions, values, and methods in making beams or columns are still the subjects of differences among engineers, so that the committee is not yet in a position to specify the entire detail of construction.

However, it ought to be a circumstance full of encouragement to those who, conscious of the national disgrace of such a showing as is contained in the fire-loss figures we have quoted, and earnestly desiring to see them lessened, that the co-operation of so extensive and serviceable a body as this can be secured by any municipality which chooses to address its secretary, whose address can be found in the account given elsewhere in to-day's paper of the Association's meeting. It continues to make intelligent study into hazards, to report on the best forms of construction, the most effective apparatus for protection against fire, and "to join with the property-owner in a determined effort to materially reduce the tremendous draft on our resources caused by fire."

* * *

DAIRY PRODUCTS.

The remarkable feature of the dairy trade of Canada for the last few weeks has been the very high prices for cheese and butter, and dealers are asking themselves how long and to what extent these can continue. It is true that, in the case of cheese particularly, the production in Canada is increasing, and bids fair to do so still more in the future, but the chief factor in the situation so far as this product is concerned is the British market, which is very bare of supplies. Many importers are complaining of the high prices asked, and some indeed are holding back from buying, but there are others, it would seem, who must have cheese, whatever be the price. There is another point which, it seems to us, should be taken into consideration by those interested in this end of the business, particularly in Ontario. While high prices will, no doubt, stimulate production, there is a feature which militates against the largest results along this line. We refer to the probable lack of good pastures, which many farmers have in view. This, in conjunction with the high cost of millfeed will, no doubt, tend to balance matters. Looking at the matter from all points of view, it is difficult to prophesy as to the course of the cheese market during the present season. Prudence and careful observation will evidently be required in large measure. Receipts in Montreal for four weeks of May were 125,548 boxes as against 65,375 boxes for the similar period of last year. The prospects are in favor of high prices for a while, but these will so stimulate the makers to extra exertion, that values may take a sudden drop at any time, especially if the season be a moist and favorable one.

And if it be difficult to speak with any degree of assurance regarding the cheese outlook, that for butter appears even more doubtful. It would appear as though the high prices in England were largely the result of over-competition among the dealers there. Choice Canadian butters are in very good demand. Lord Strathcona has been making complaints to the effect that colonial butter is frequently "watered," or otherwise manipulated on arrival in England. If these practices could be really prohibited, it would doubtless be a good thing for Canadian butter. He contends that a good grade of butter should not contain more than 15 per cent. of water, and less would be better. Most advices from the country districts in Ontario and Quebec are to the effect that the make will this year be large.

The buyers and representatives of the Montreal Produce Merchants' Association, last week, after a quarrel of some dimensions with the Butter and Cheese Board, of Cowansville, decided to leave that body, as a protest against the restrictions recently made as to buying. They had an idea of attempting to form a new board, with rules and regulations similar to those of kindred associations, but later information states that this has been abandoned. The chief sources of difference between the buyers and sellers are on the questions of a guarantee of weight, and of payment before delivery. The sellers declare there is some kind of a combination among the buyers to keep down prices. However, according to latest advices, an understanding of some sort has been arrived at.

The strength of egg values continues unabated; indeed it is becoming a source of constant remark with each recurring year. The quotation of 16 to 17c. at this time of the year is indeed one to be looked at a long time before paying, though apparently there is no help for it, and dealers must pay the price or go without.

* * *

A BRITISH REPRESENTATIVE.

The British Board of Trade has resolved, as our English letter has mentioned, to despatch a representative to Canada to "ascertain and investigate the extent of the competition which British goods have to meet in that market, and also with a view to indicating any further openings which may exist for British trade in that Colony." This looks like a move in the right direction; on the other hand it may mean that Mr. F. C. T. O'Hara's suggestion that the British Government should appoint commercial agents throughout the Dominion, with a view to counteract the influence of the numerous American consuls, has been shelved, for a time at any rate. It appears strange that the British people can fail so persistently to understand the importance of this country as a growing market for their wares, and that British merchants and manufacturers will not take the trouble to go the right way about securing it. Not only this, but they appear to resent the idea of Canadians buying goods (made to suit them), through American commercial travellers or resident agents. As if any John Bull amongst them all had ever lost his chance to buy, anywhere, goods that suited him on account of any paternal sentimentality in favor of Canada or any other colony. Does he expect colonial filial sentiment to accomplish what his fatherly sentiment cannot? Who ever knew loyal or patriotic feeling strong enough to overcome self-interest in matters of commerce. We are not so near the millenium as that.

* * *

THE BRANCH BANKING SYSTEM.

Canadians find so much satisfaction in the working of their banking system, and are so fairly and well served by it at times of the year when financial pressure might elsewhere be expected to develop, that they cannot understand why, when panics and "squeezes" come at intervals to affright the stock market in New York so practical a people as that of the United States does not remodel its banking system, some of whose pedantic and exceptional features, adopted forty odd years ago, remain to hamper and in some cases to paralyze the money market. It is true that many prominent bankers of the United States, especially those of the Eastern and Northern States, are admirers of the Canadian Banking System, and would like to see its elastic features applied to their country. But others, and probably the great majority, are opposed to the branch banking system which they very likely do not understand, of which they have had no experience. And they seem to have persuaded their legislators that something monarchical or otherwise dangerous is concealed about it. And so, in spite of periodical advocacy by eastern bankers and banking writers of a change that will tend to prevent these troublesome and expensive convulsive alarms in Wall Street, the system no longer justifiable is continued by our great neighbor.

Among the prominent journals which have from time to time urged a change in the American banking scheme, and have recognized the advantages of the Canadian, is the "New York Journal of Commerce." That newspaper, in an article of Wednesday last refers to recent statements by Canadian banks, which show their prosperous and growing condition. These statements, and the well-known fact that there has been no trouble in the Dominion over money rates, and that Canadian banks loan freely in the United States market when rates are high, serve, says the "Journal of Commerce," "to call attention to the advantage Canada enjoys in her banking system, which contributes materially to the rapid growth of her business. This advantage lies in the general elasticity of the system, its ready adaptability to the work it has to perform. This is mainly due to two causes, freedom in establishing branches and facility in issuing and redeeming circulating notes."

Another paragraph goes on to explain the easy transfer of capital from congested centres great distances to new districts of the Dominion which need it. "While the settled and developed part of Canada is comparatively narrow from the North to South, it stretches across the continent from East to West over a greater distance than any part of the United States, and rapid development is going on west of the Lake region. While she has less than forty banks, located in the principal cities of the different provinces, there is never any lack of banking facilities, for these can establish branches wherever they are needed, and can be made profitable. Thereby the facilities can be afforded much more economically and safely than by means of small independent banks, and the capital of the central institutions can be availed of wherever there may be use for it. The result is that interest rates are but slightly higher in newly-developed regions than in the older sections, which is an enormous advantage in contributing to their growth and progress. Just as fast as banking facilities are required they are furnished at the lowest cost by strong banks operating through their branch offices."

The article, which is entitled "Canada's Banking Advantage," closes thus:—"No less advantageous is the Canadian bank currency system, which is based entirely upon the credit of the banks and secured only by their resources and reserves, and the liability of stockholders, with a redemption fund to insure the immediate payment of the notes of any bank that may fail. The system has worked with entire success and safety for thirty-five years, with the result that there are no periods of stringency or plethora to disturb the money market of Montreal or Toronto. The currency expands easily to meet the demand of the crop-moving season, and as easily and surely contracts when its requirements are over, and the volume is continually adjusted to the fluctuating needs of business. Having the gold standard but no coinage system of her own, except for subsidiary silver, and using both the pound sterling and the American eagle as legal tender, Canada has all the advantage of a safe and flexible currency through her admirable bank system, and it contributes not a little to her continuous and increasing prosperity. Our statesmen and financiers ought not to be too proud to study and learn from it."

* * *

CANADA'S NICKEL DEPOSITS.

The Bureau of Mines of Ontario has been carrying on extensive field work during the past three summers in the Sudbury nickel region, in order to determine in detail the boundaries of the nickel-bearing rock, and to examine the geological relationships of known ore bodies. Prof. A. P. Coleman, who superintended this work, has given also special attention to mines in actual operation. His discoveries and conclusions are set forth in detail, and with admirable lucidity in Part III of the Report of the Bureau of Mines for 1905, which is just to hand.

The Sudbury nickel deposits are known as perhaps the most important source of that metal in the world, and the last three years' investigation by the Bureau of Mines has brought out still more strikingly the unique character of this interesting region. It is shown by Prof. Coleman that all the important ore deposits are at or near the outer margin of a large laccolithic sheet of eruptive rock, a mile and a quarter thick, and extending over an area of thirty-six by seventeen miles. The mining community and prospectors are accustomed to speak of two nickel ranges, the main or southern one, and the northern one. The recent investigation proves that there is really only one range, which is continuous with the outer edge of the sheet of nickel-bearing rock. "However in a modified sense the two ranges may still be distinguished, since the extreme west and the extreme east of the laccolithic sheet have not yet disclosed ore bodies of importance. In a general way there are more numerous and larger ore bodies, so far as known, on the southern than on the northern range though there is great irregularity in this respect on both ranges."

Incidentally the report alludes to the agricultural aspect of this northern region. The lacustrine clay, we are told, which includes most of the farm land of this district, has almost the flatness if not the extent of the prairies, and covers not alone large tracts in the interior basin, but also to the south of the nickel range. "In the interior basin clay land suitable for farming begins along the shores of Vermilion Lake in the north half of Fairbank Township, fine groves of maples and other deciduous trees occupying a mile or two along the north-west side of the lake on low land of a silty nature." Several other tracts of land good for agricultural purposes are also mentioned.

The only other country in the world which may be said to be a rival of Canada in the production of nickel is New Caledonia, the French penal colony in the Southern Pacific, and an interesting comparison is made between the respective advantages of the two producers. The ores of New Caledonia would appear to possess the advantage in being more amenable to treatment, and in being free from sulphur and copper. The freedom from sulphur, however, is neutralized by the fact that the ore in New Caledonia has to be worked with coke, which contains sulphur. Against that region's advantages must be placed the general industrial prosperity of Canada, which favors important developments in the mining and treatment of minerals.

A very interesting section of the report is that devoted to the uses of nickel. Its value either pure or in alloy with copper, zinc, and other metals depends largely on its white color, and Prof. Coleman makes a strong plea for the use of the pure metal for coinage purposes. It does not tarnish, nor does it change color, but keeps a bright attractive surface, while owing to its hardness the coin imprint wears much better, and it is difficult to counterfeit. Why, he asks, should not Canada, the producer of half the nickel of the world, replace her ugly cents by clean, untarnishable, nickel coins, almost as handsome as silver, and much more durable? "Canada is presently to have a mint, and it should begin its work by coining one-cent and five-cent pieces of pure nickel; making use of a distinctly Canadian metal."

* * *

OUR AUSTRALIAN LETTER.

Mr. Jas. Mills, the managing director of the Canadian-Australian Steamship Company left for England via Canada on the steamer "Maheno" two weeks ago. Before leaving New Zealand he was entertained at dinner, at which the Premier of New Zealand spoke. In his speech he urged Mr. Mills to use every effort to get the Canadian-Australian steamers to touch at a New Zealand port, and asked him to tell the Canadian Government that "it would be to the interests of Canada if these vessels called here."

The first steamer of the Canadian-New Zealand direct service was in Newcastle for about ten days, and then proceeded to Wellington, N. Z., to load for Vancouver. It was advertised that she was to touch at Sydney and Melbourne, but the management learned, what was quite apparent to everybody long before, that there was no cargo offering in these ports, and she, therefore, did not enter them. It is absurd to think that people would ship goods for Vancouver that would require about six weeks to reach there when they could get them to that port in half the time at no higher figure. I have seen a letter from New Zealand, sharply criticising the management of the new line. Nobody over there seems to be in love with it.

A very curious agricultural case is under investigation in Victoria. One of the best known families in that State is the Chirnsides. One of them is the president of the Royal Agricultural Society, and he was very much surprised, while presiding at a meeting of the committee, to have a statement presented to it in which a man asserted that at the instigation of Chirnsides' manager he bought a gallon of cream and a syringe, the purpose being to enrich the milk of Chirnsides' cows who are under test for the production of butter fat at the Exhibition, and that he had been paid directly by a cheque from Chirnside himself. It was admitted the cream had been purchased and paid for, but it was denied that the syringe had been bought with the intention of forcing the cream into the new milk. The object of the cream was, it is alleged, to mix it with bran and feed to the cows sometime before milking, which it was stated was not an unusual proceeding. Even if this last be the truth, it indicates that our rural friends have "ways that are dark and tricks that are vain" that are not commonly known, for it certainly cannot be alleged that feeding cream to a cow would be fair dieting in a test. Possibly there are imitators of this practice in Canada.

Though the Independent Order of Foresters is the only Canadian institution doing life assurance in this country, yet it has become known to some, at least, that an investigation into life assurance matters in Canada is in progress. An insurance man here sometime ago said that the weakness of the United States assurance companies was in their being too intimately associated with politicians and stock-brokers, and that Canada was following in the wake of the United States. His criticism was fairly accurate as far as the United States; it is to be hoped, however, it will fail with respect to Canada. The investigation will b watched with some interest here to know whether the procedure in Canada will be as thorough as in New York an whether British institutions have stood the temptation be ter than those institutions recently investigated in Ne York.

The labor leagues of New Zealand have had under consideration their compulsory arbitration scheme. The members criticized the judges of the court, including their representative, very severely and declared that their recen decisions had been contrary to evidence. It, however, refused to ask for the rescinding of the law, but urged th labor unions to settle difficulties by arbitration. The discussion showed a widespread disappointment and dissatisfaction with a scheme that it was once hoped would settl all industrial troubles.

The two combinations which have controlled the shipping trade of New Zealand with Europe have quarrelled an are cutting rates. It is probable that this cutting will extend to Canada and it may be even to Australia, though th indications are now that it will not. If these combines los money, New Zealand will not regret it, as they have bee unpopular, owing to their charging higher for goods from Britain than from foreign countries. Canadian shipper under present conditions will need to look keenly afte freight rates.

Australia has the immigration fever badly. On every hand advice is being given to follow Canadian methods. This city is particularly active in this direction and has an Immigration League, with a worthy doctor—a member of Parliamen—at its head. Recently a young fellow born in England but living most of his life in Toronto, went to visit friends in England, and hearing glowing accounts of Australia made up his mind to come here instead of going back to Canada. He had some money and was not in a hurry to get employment but thought he would look around. His pocket was picked of most of his money and then he hustled to find the employment which he was assured was so abundant but failed to find it. He was advised to try the Immigration League. The secretary welcomed him warmly and courteously passed him on to the president. The president's welcome was not quite so warm, but he as courteously passed him on to the Intelligence Department of the Government and the Intelligence Department of the Government received him, but less warmly still, and being the court of last resort it showed him into the street as the only thing it could do, and in the street he is yet, looking for employment or how to get back to Canada. And this is how immigration here is done after the manner of Canada! The moral is that Canadians had better stay at home for the present. There are Australians for every job that is open.

The Commerce Bill, of which you were advised some time ago, is likely soon to be put into operation. Lest your readers may have forgotten, they should be reminded that its purpose is to prohibit the importation of goods with an improper trade description, and that improper trade description includes any false statement of the nature, number, quality, purity, weight or grade of the goods; also as to its place of production, its manner of packing or selecting and the material or ingredients of which it is composed. This applies to articles of food or drink, medicines or medicinal preparations, apparel, including boots and shoes, and jewellery.

The population of this State (New South Wales) is estimated to be beyond the million and a half mark and what is better, the rural population is growing faster than the city; but still more than one third of the inhabitants of the State are residents of the city of Sydney. This applies also to Victoria and South Australia, but the rural population there, too, is growing more rapidly than the city. The increase in the city population in the past was due to the extravagant borrowing of the Governments, moneys which directly or indirectly were expended in the city and stimulated a growth that was not healthy. The limitation of borrowing is in more than one respect a great blessing to Australia.

Parties, including a number of Canadians, have for years been sinking bores in the North Island of New Zealand in search of coal-oil. According to a cable, success has at last crowned the work and a flowing well, yielding at the rate of about a barrel per minute, has been struck near New Plymouth.

Mr. Larke, the Canadian agent in New South Wales, has received a number of letters congratulating him upon the change in the Customs regulations respecting overland carriage on exports to Australia, but there is a note which does injustice to Mr. D. H. Ross, the Melbourne Commissioner, who is one of the most zealous officers in the employment of the Canadian Government. It is based upon a report of some Canadian newspaper that as soon as the attention of the Australian Government was called to the effect of its legislation that body at once rescinded it. Thereby the conclusion was arrived at that Mr. Ross either did not see the injury to Canada or did not bring it to the notice of the Australian Government. Neither is correct. When Mr. Larke was in Canada, Mr. Ross promptly called the attention of the Government to it, but while the will of the Government to remedy the measure was always in evidence, the difficulty was to find the way out without complication. Mr. Larke's longer experience was undoubtedly of service here, but Mr. Ross fell in with the scheme as soon as it was proposed and did all that he could to secure success.

F. W.

Sydney, New South Wales,
30th April, 1906.

* * *

MIXED FARMING IN THE WEST.

Very satisfactory testimony as to the advance made of late years in stock-raising in the new Western Provinces of Saskatchewan and Alberta is given by Mr. Robert Ness, the widely-known horse and cattle breeder of Howick, in Quebec. This gentleman acted as judge at Calgary, for the Alberta Association, as well as at Regina, for the Saskatchewan Association, and he returns most enthusiastic about that country. "It would be very hard to find," he repeated, "in all America a finer lot of horses than those now being got together by the breeders of the two new Western Provinces."

To the question whether stock should be imported by individuals or by societies, Mr. Ness answered: "I believe, at all times, in individual effort, and if a man who spends his money to improve stock is encouraged by his neighbors the results will be advantageous to all concerned. I have never favored the improvement of stock by associations. In other words, the syndicate business is all wrong. The more I see of the Western Canadian farmers, the more I am convinced that they are the most progressive and prosperous of their kind on the whole of the American continent. To give you an idea of how they are getting along in life: One of the pioneers of Regina was Robert Sinton, formerly of the county of Beauharnois, Que., whom I knew well. The other day he sold 490 acres, just outside the town limits of Regina, for $125,000. I told them, however, that they must get down to mixed farming, and they admitted that there was wisdom in what I said."

* * *

THE OLD FORT.

If the Board of Control of Toronto have forgotten, its citizens have not, that in the request of the corporation sent to the Militia Department at Ottawa in 1899 it was agreed that the Old Fort and surrounding ordnance lands should be "preserved and maintained in its present condition on account of its association with the early military history of the city." And in 1903 when the Government agreed to transfer these lands to the city it was plainly stipulated by the Minister of Militia that "they are to be used for park purposes only, and that the Old Fort will be preserved." So recently as seven months ago this understanding was reiterated by the Minister, in Toronto. But in the month of May, 1906, the Board of Control of this city appears to consent to a violation, of not only the spirit, but the very letter of this distinct agreement.

We learn with interest that the Board of Trade has set itself against the project that a street railway shall be run east and west through the very centre of this valuable and interesting historical relic. It may strengthen the hands of these gentlemen and of thousands of other Canadians who believe in the keeping of faith and the preservation of landmarks to be reminded that there are two other routes available for a street railway thereabout. One is southward from Bathurst past the south-east angle of the Fort; another is south-westward from Tecumseth Street past its north-east angle. The latter can be built, on the authority of an estimate by the City Engineer, for $1,500 to $1,800 more than the proposed route which is a virtual prolongation of Bathurst Street, and which would involve the destruction of the Old Fort gates and part of the old buildings.

An important suggestion was lately made that historical sites should be placed in the hands of a commission, as in the Old Country. The New Brunswick Historical Society is adopting a resolution of similar tenor. And the Educational Association of Ontario, only the other day, when nearly 1,000 representatives were present, commended the spirit of a public meeting of citizens of Toronto to preserve these historic grounds as a sacred trust, and "trusted to the vigilant patriotism of the capital city of Ontario" to see this done. But vigilant patriotism and precise faith-keeping find no place, apparently, in the plans of our village fathers, who see no harm in the desecration of a hallowed site first by the encroachment of a slaughter-house upon its grounds and now again by the noisy nuisance of a railway.

* * *

CALGARY BOARD OF TRADE.

The latest pamphlet issued by that live body, the Calgary Board of Trade, is entitled "The Famous Calgary District, of Central Alberta, Canada—The Land of Golden Wheat, Fat Steers, Industrial Opportunities and Unrivalled Climate." While its contents can scarcely be called light reading they are undeniably full of interest to people in this favored land of Canada and in other lands; for the subjects of climate, characteristics, products, personal experiences are all given space. The pages 31 to 34, dealing with irrigation in Alberta are especially interesting.

And the portion relating to the city of Calgary contains statistics that compel one to rub his eyes and turn back the pages to re-read them—eleven churches—twelve banks—clearing house—seven newspapers and reviews—two theatres—five bookstores—twenty-one hotels—eight shoe stores—eight dry goods stores—thirty-eight grocer shops—seven drug stores—seven jewellery stores—four clubs—a curling rink—a skating rink—a boys' college—a girls' college—a business college—a commercial travellers' association, with 96 members—nine schools.

The population of the city is 17,500 and its valuation for assessment rose from $1,994,300 in 1896 to $3,221,000 in 1902 and $7,817,400 this year. Calgary is head-quarters of the Western Division of the C. P. R., which railway employs from 900 to 1,000 men in city and district. Of the various industrial establishments, such as abattoirs, flouring mills, planing mills, lumber companies, and other factories we have not room to give a list. Lastly, for the present: the Calgary Board of Trade maintains a free information bureau and reading room. All those visiting the city are requested to make use thereof. The intelligence officer of that body, who is in charge, will render newcomers and others every assistance. For further information regarding the city of Calgary or Central Alberta, intending settlers are cordially invited to apply to the secretary, Board of Trade, Calgary, Alberta, Canada, who modestly withholds his name, but we do not. It is C. W. Peterson.

* * *

KINGSTON BOARD OF TRADE.

A commendable movement has been made by the merchants of Kingston in the re-organization of their Board of Trade. As has been the case in not a few other places, this organ of the mercantile interests had been allowed to become dormant, and although organized in 1872 it had of late years rendered little or no service to the community. But now, the younger business men of the city have taken hold of it, we are pleased to find, and among the officers and council are to be found descendants of merchants whose names made the city of Kingston distinguished in commerce and shipping. At a large meeting held in May the following officers were elected:—

Honorary Presidents, Hon. Wm. Harty, M.P.; E. J. B. Pense, M.P.P.;
President, W. T. Minnes;
Treasurer, W. B. Dalton;
Secretary, J. E. Cunningham.
Council,—C. Bermingham, J. M. Farrell, L. L. Henderson, D. G. Laidlaw, C. A. Macpherson, Hugh Macpherson, J. A. Minnes, E. C. Mitchell, R. J. McKelvey, H. W. Richardson, T. J. Rigney, E. T. Steacy, and J. S. Turner.

The board has now more than 120 members. Suitable rooms and offices will be secured, and an effort made by means of concerted action to secure to the city some of the benefits of the great progress that Canada is now making. Kingston is increasing both in population and wealth; and with the excellent railroad and boat services now in force new industries looking for a point at which to locate would do well to look over the ground there or communicate with the Board of Trade. Nor should the physical attractions of Kingston, or its historical interest be forgotten. It is beautifully situated, having delightful surroundings, and the Board of Trade might well devote some attention to having illustrated folders distributed, which might attract summer visitors to the Limestone City.

* * *

STOCK TRANSACTIONS.

There have been few special features on local 'Changes this week. Mackay has continued strong. Canada Permanent Mortgage went up after brisk buying, as high as 128½. A considerable amount of business has been done in Nova Scotia Steel, but this stock has been very irregular, making several fluctuations. Common fetched on Thursday 68 and 68¼. Some Electrical Development bonds sold in Toronto at 90 and 90½. The unsettlement in the stock market consequent upon the San Francisco catastrophe and the sympathetic slump in New York would appear to have practically passed away. The volume of business now being carried on in Toronto and Montreal is scarcely what can be called large, but it is fairly satisfactory under the conditions and prices preserve on the whole a steady tone.

* * *

THE NORWICH UNION.

The business of the Norwich Union Insurance Society throughout the whole of the Dominion of Canada, and also Newfoundland, is now controlled from the Toronto office, and under the energetic management of Mr. Laidlaw in Canada their business has grown very rapidly, the premium income being now nearly $600,000, with policies in force in Canada amounting to more than $45,000,000.

We understand that the sale has just been made of the building, Nos. 12 and 14 Wellington Street East, now occupied by the wholesale millinery warehouse of D. McCall & Co., to the Norwich Union. The purchase price is not disclosed, but it is understood the company were able to secure the property at a reasonable figure from Mrs. Crooks. We understand the present tenants will continue to occupy the building for a couple of years, when the company are likely to make extensive alterations, and occupy the whole of the ground floor as their general office, renting the remainder of the building for offices. The building has a frontage of 63 feet with a depth of about 75 feet, and is well adapted for office purposes.

The Norwich Union, like other large companies doing a world-wide business, are sufferers from the San Francisco conflagration, although fortunately for a smaller amount than many other companies. Their loss is estimated to be $1,200,000, but they are in the fortunate position of being able to pay this amount, and more if the loss should prove to be greater, out of the "Balance Disposable"
at the end of 1905, without encroaching on their capital or
reserves. The very conservative management has for y rs
kept more than $1,000,000 of the company's funds as c h
in bank, so that they will be able to issue cheques for ll
their San Francisco losses without selling a single secu y.

* * *

CALEDONIAN INSURANCE COMPANY.

This company can point to a history of a hund d
years. And it is interesting to find, as we do by the rep t
submitted at the annual meeting in early May, that e
results of the latest year have been the most prosperous n
its history. If it be assumed that the loss by the n
Francisco disaster is $1,000,000 or $1,250,000, the fire reser s
of the company, including the paid-up capital of $537,
amount to $3,580,000 as at 31st December, 1905, and c -
bined dividend and bonus at $6 per share will be paid.
The fire premiums last year amounted to $2,174,3
the loss and expense ratio combined was 83.34, which l t
a trading profit of $362,195. The directors recommend t t
$250,000 be placed apart to open a special reserve fund
sum of $34,365 has been added to the reserve for unexpi
risks, which left in the profit and loss account a balan
which, taken with the interest earned on fire fun
amounted to $488,195. The company's loss at San Franci
has been estimated by the United States authorities at
million dollars, but it is impossible as yet to state it w
accuracy. The Canadian business of the Caledonian, wh
is managed by Mr. Lansing Lewis, is $23,338,000 at t
close of 1905, the premiums on which were $313,320, eq
to 48.58 per cent., a very creditable showing.

* * *

BANKING AND FINANCIAL.

The Standard Bank of Canada has opened a branch
Woodville, Ontario, under the management of T. E. Bell

The Bank of British North America has opened
branch at North Battleford, Sask., under the temporary ma
agement of Mr. F. J. McEachern.

A dividend at the rate of six per cent. per annum h
been declared by the Canada Landed and National Inve
ment Co., Limited, payable on and after July 3rd, 1906.

We hear that Mr. J. E. Cunningham, until lately
member of the private banking firm of Mills & Cunningha
has been appointed secretary of the Kingston Board
Trade.

The Sovereign Bank of Canada has just opened
agency in New York at 25 Pine Street, in that city.
pleasing feature in connection with the office is a spec
room, tastefully furnished, reserved for the use of Canadia
while in New York. Here one may drop in, write a lett
and feel at home generally. Doubtless this feature w
prove welcome to many.

For nine years or thereabout the liquidation of t
Farmers' Loan Company of Toronto has been going c
It has at last been concluded. All the houses and lands
the company have been sold, it appears, and the liquidato
the Toronto General Trusts Corporation, are preparing
statement to be issued presently. A further dividend
three per cent. will be declared, for the payment of whi
the official referee will fix a date.

The increase of the net earnings of the Canadian Paci
Railway for April, compared with that month last ye
amounted to no less than $810,000. Gross earnings we
$5,490,999, and expenses $3,148,441. Net earnings for the t
months of the fiscal year were $18,847,600, compared wi
$12,584,220 during the corresponding period of last yea
making the enormous increase of $6,263,380. Operati
expenses for the ten-month period accounted for 62 per ce
of gross earnings.

At the meeting of the Royal Society of Canada la
week a committee, consisting of Sir Sandford Fle
ing, Professor Rutherford, Professor McCallum, D
Ellis, Archbishop Bruchesi, Benjamin Sulte, a
Lieut.-Col. Denison, was appointed to consider the Met
System. At another session, the Metallic Currency of t

British Empire was discussed by Mr. Thomas Macfarlane, who advocated its unification by adding a little more gold to the English sovereign, increasing the intrinsic value of the silver coins, and the use of nickel as a coinage metal for all values between five and two cents inclusive.

The gentleman chosen by the directors of the Dominion Bank to succeed Mr. Bogert in the charge of the Montreal branch is Mr. J. H. Horsey, who was presented on Saturday with a gold-headed cane by the staff of the Esther Street branch, in Toronto. Mr. Horsey has been many years with the Dominion Bank, having entered its employ as long ago as 1875. After passing through the usual routine, nearly always in connection with Toronto office in various capacities, he was placed in charge of different branches in succession, among others in the Spadina Avenue and College branch, afterwards in charge of Queen and Esther Streets branch, where he has been manager for eight or nine years. Mr. Horsey is well fitted in many respects for the banking profession, and takes with him to Montreal the good wishes of a host of friends in Toronto.

In the matter of the increase of the capitalization of the Bell Telephone Company from $10,000,000 to $50,000,000 several members of the Parliamentary Committee considered that such a large ratio of increase as $40,000,000 was altogether too much at one time and it was finally decided to allow only $20,000,000 of an increase. A motion to the effect that stock would have to be sold at the prevailing market price was lost. With regard to the vexed question of control by municipalities over their own streets and highways, the Minister of Justice stated the idea of the Government to be in favor of allowing all systems at present in existence, in so far as poles, lines and so forth are concerned, to remain in force, but that in the future, in the event of disagreement between municipalities and the company, the dispute shall be carried to the Railway Committee and decided by that body.

LIFE ASSURANCE MATTERS.

The Mutual Reserve Fund Life Insurance Company, of New York, has ceased taking new business in Great Britain. A cable of Saturday last says that the head office of the company in London, and all the country agencies did not open for business on Friday; but it will continue to carry on the insurance it already has in force in England.

Ontario is not the only Province that boasts an insurance commission. Manitoba has one too. According to a "Globe" special of Wednesday last, evidence was given before the Hail Insurance Commission of very shady transactions by some companies to secure business. The capital reserve had been misrepresented to farmers, and claims had been settled most unsatisfactorily to clients.

It was decided, at the quinquennial meeting of the Standard Life Company, held in Edinburgh last month, to change the mortality tables, which have been in use for many years, to the more modern tables, founded upon the latest experience of mortality among lives assured in British offices and a lower rate of interest. And it was resolved that the profits which have accrued during the last five years shall be applied to the change in these tables, and also that a certain amount should be employed for adjustment on revaluation of assets. Therefore, the customary bonus will not be paid. But as a proof of their confidence in the future the directors announce an intermediate bonus of 1 per cent. per annum will be paid upon claims emerging by death or maturity between the 15th November, 1905, and next division, 1910. The Standard's accumulated funds now amount to $55,500,000. The revenue for the year was reported at $7,150,000.

FIRE INSURANCE MATTERS.

The Hartford Fire Insurance Company advises its agents by circular from Mr. Chase that the new capital stock of the company in its "entire amount has been taken at five hundred dollars per share. By this means, $750,000 has been added to the capital and $3,000,000 to the surplus of the Hartford, which is thus amply equipped for handling present losses and future business." The Hartford is to be congratulated on this remarkable transaction immediately after such a catastrophe as the San Francisco fire.

A new Fireman's Fund Insurance Company will assume the unburned risks of the old, in San Francisco. President W. J. Dutton of the Fireman's Fund Insurance Company has telegraphed his Eastern manager as follows:—"Fireman's Fund Insurance Corporation incorporated and licensed by Insurance Commissioner of California on Saturday, the 19th instant. You are authorized to stamp on all old company's policies, commencing on and after April 18th, the following clause: Liability hereunder is assumed and guaranteed by Fireman's Fund Insurance Corporation. Contract re-insuring all unburned risks of the old company in force previous to April 18th will be executed as soon as possible, and you will be duly advised."

A considerable block of shares in the Montreal-Canada Fire Insurance Company changed hands last week, the same passing into English hands. This was followed by the retirement of Ald. Labrecque, Ald. Lavallee, ex-Ald. Bastien, Ald. C. Robilliard and Mr. Joseph Lamoreux from the company. Mr. J. B. Lafleur, with the company since July, 1889, and manager for a number of years, replaces Mr. A. A. Labrecque as president. The French members of the reconstructed branch of directors are: Mr. J. B. Lafleur, president; Mr. Alphonse Champagne, vice-president; Ald. Lariviere, Mr. Fred. C. Lariviere, and Ald. Noe Leclaire. Mr. J. Reid Hyde, of Messrs. Macintosh and Hyde, is to be one of the English-speaking directors, Mr. Stewart probably another, but the names of the others have not yet been announced. It is stated that the company's business has expanded so largely throughout the sister provinces that it was considered good policy to invite four English-speaking gentlemen to join the directorate.

* * *

—A new waterworks system is being established at Indian Head, Assa., the supply being brought from the Swivel Hills.

—A very rich find of silver ore is reported on the "University" property, adjoining the Foster mine at Cobalt. Its average width is said to be 5 inches. There is the usual excitement in the immediate neighborhood and owners of adjacent claims are getting to work energetically.

—Speaking generally, says our Halifax correspondent, writing on 28th May, business here is extremely good. There is some dullness complained of among flour and produce dealers, but in all other lines trade has not been better for years. Conditions in the lumbering and mining industries are equally satisfactory, and reports from Cape Breton speak of record-breaking outputs at the steel and other works. Collections, too, appear to be good.

—Power has been turned on at the Winnipeg Electric Street Railway Company's new plant at Pinnawa Channel, Winnipeg River. The plant, which is situated about sixty miles from Winnipeg, is capable of developing 10,000 horsepower, which will be used for street railroad, lighting, and manufacturing purposes, and it is expected that its inauguration will mean a great deal for Winnipeg's industrial development.

—Canadian Real Properties, Limited, a company in which there is a good deal of English capital interested, and which owns about 7,000 acres of land near Kamloops, B.C., is spending $150,000 in bringing the tract under irrigation and preparing it for settlers in the shape of small holdings. A good deal of the land is already under cultivation in fruit, and many new residents are said to be coming in every week.

—The Board of Trade at Wingham, Ont., which has, we believe, been practically defunct for some years, has been re-organized with officers as follows:—President, Richard Clegg; vice-presidents, W. J. Greer, Abner Cosens; secretary, Theo. Hall; treasurer, A. E. Smith. A committee has been appointed to revise the by-laws, and it is expected that within a few weeks the new board will be in good working order. Among the matters already taken in hand by the Board is that of securing a better insurance rate for the town.

—Fruit lands are among those which are telling most rapidly now in British Columbia, the Pacific Province having proved itself, particularly within the last few years, admirably adapted, in one section or another, to the growth and successful culture of practically all kinds of fruit which thrive in the temperate zone. We hear of one large sale a few days ago where several thousand acres of land were sold along the Kootenay Lake close to Nelson, to American speculators.

—The names of the persons who will take charge of the quinquennial census in the Western Provinces are given in an extra of the Canada "Gazette." They are as follows:—E. H. St. Denis, assistant Dominion Census Commissioner, for Manitoba; J. R. MacPherson, for Saskatchewan; E. G. McPhail, for Alberta. Mr. St. Denis has been in the Ottawa office for over twenty years, and is thoroughly experienced. Messrs. MacPherson and McPhail have been employed in the Census Office in Ottawa. All three have gone to Winnipeg in the meantime. Several hundred enumerators will have to be appointed.

—The real value of the reputedly immense copper fields of Northern British Columbia will soon be put to the test. We understand that a corps of Heinze's mining engineers have left for Telqua and Bulkley Valley to examine his properties there, which number about forty. Besides copper claims, the properties include twenty-eight square miles of coal land, and it is understood that a smelter will be in operation in connection with these copper mines in about a year's time. Mr. Heinze is the well-known Montana mining man.

—Chicago papers say that Mr. J. B. Laidlaw, of Toronto, afforded great instruction to his auditors in that city last week when he read his paper upon "The Conflagration Hazard" before the National Fire Protection Association. Among the striking things he said were these:—"The lesson of all the great fires of history is that the business of fire fighting is a modern development, which always has gone hand in hand with the advance of mankind toward the higher civilization. Great fires were once classed calamities, which when they had gotten a start were viewed with despair by the afflicted populace, and Providence, or a change in the wind, or a rainstorm was deemed the only hope of fighting or extinguishing them. It is different in our time. The business of fighting fires has now become a science, though it is a science that has not yet reached its highest development. In the statistics of the world's great fires, from that of the days of Nero in Rome to the conflagrations that destroyed London, Chicago, Boston and San Francisco, there is a special lesson for insurance men—a lesson that has been confirmed by the experience of the fire insurance world since the beginning of that business. This special lesson is that in every case when the operations of any fire insurance company are confined to practically one city or field, however large, that concern is bound to come to grief, sooner or later."

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, 31st May, 1906, as compared with those of the previous week:—

	May 31.	May 23.
Montreal	$22,633,097	....
Toronto	18,315,889	18,366,784
Winnipeg	9,420,817	7,375,291
Halifax		1,592,316
Hamilton	1,387,125	1,201,528
St. John	924,411	1,036,530
Vancouver	2,178,079	2,038,638
Victoria		838,271
Quebec	1,687,335	1,451,517
Ottawa	1,903,667	2,010,357
London	1,058,871	....
Calgary	908,163	....
Total	....	....

Mercantile Summary

Gordon & Co.'s planing mills, near North Bay, have been destroyed by fire at a loss of $25,000.

"Sleepy old Niagara-on-the-Lake" is going to be sleepy no more. We see that a by-law to raise fifteen thousand dollars by issuing debentures to run for twenty years for putting down cement sidewalks to replace the present board walks, was voted on last week and carried.

Great excitement has reigned during the last week or so in the tin market, and there have been some heavy declines, about sufficient to offset the previous phenomenal advances. One day last week the net loss was £10, bringing the price down to £184 per ton. The New York market followed suit.

R. A. Alley, president of the new Alley Steamship Company, now operating steamers between Vancouver, B.C. and New Zealand, announces that he and Oscar W. Seligman will open offices in Seattle as representatives of English, French and German capital. They propose to take up large schemes, such as financing railroads and other big operations of the same class. One railroad proposition they have on foot now is said to involve an expenditure of $40,000,000.

OUR NORTH OF ENGLAND LETTER.

As Canada is—from the circumstances of her case and ours—a little off the track of the regular shipping merchant, a home trader has been nominated to represent Manchester on the Commercial Mission being sent forth by our Board of Trade. Mr. Walter Rycroft (of Richardson, Tee & Rycroft, Limited), is the man, and he will not be entirely unknown to the Canadian dry goods trade. If anyone asks what differentiates the British home trade merchant from the shipping merchant one would answer that the most conspicuous difference, in at least the textile trade, is that the former keeps stock. He buys before he sells, and the shipper in most cases does the converse. Home trade houses do much of the export business in dry goods with Australia and South Africa, and for the reason that these markets buy pretty much the same goods as are taken by our own public. The shipper deals especially in such textiles as are sold in India, China, West Africa, the Levant and foreign countries. He sells on patterns, and has to get the goods made for delivery. Home trade houses rely on certain colonial markets to absorb a proportion of their remainder and out-of-season stock.

Curious are the ways of housekeepers. All over the industrial North shopkeepers are awakening to the fact that more money and more business is to be obtained by raising prices. But they must return a dividend; they must copy the "co-ops," and pay out every six months or every twelve a bonus of 10 or 15 per cent. on purchases. Purchasers can see that the goods are dearer, they know well that they have to pay for all that they are, later on, to receive. Yet they flock to the dividend store, and grocers are finding it advisable to run two shops, one on strictly competitive terms and one at the higher prices that a bonus necessitates.

Novelties in banking practice are not so common that the innovation of the Manchester and Salford Savings Bank need be ignored. This bank is lending out home-safes, which in shape are something like grip-sacks, and in size and in form are not dissimilar from laundry irons. The hire of them is one shilling a year, and they are loaned to anybody who deposits five shillings in the bank. Depositors drop in many as they find they can spare it, and take the safe to the bank at leisure.

Returns just published for the year 1903 give particulars of the fire loss and details of other fire matters bearing on England and Wales. The rateable value of property in the two countries figures at $947,000,000, the damage by fire at $11,645,000. A loss of approximately 1¼ per cent seems not excessive, and the 165 deaths were perhaps unavoidable. Municipalities did their duty to the extent of maintaining 1,903 fire brigades, with 25,637 firemen. They attended over 15,000 fires, and their cost to the public was only a trifle more than $2,500,000. As a superfluous detail one proceeds to add that in London all firemen have been sailors, and in the provincial centres many brigade officers and men have had a training at sea.

A Church dignitary in Manchester has been referring to a point that may inspire both Church and insurance men in Canada. Church officers are all too prone to the imprudence of under-estimating the value of the church fabric and the danger of fire. They do not sufficiently insure; and when the inevitable comes they issue piteous appeals to the charitable for rebuilding funds. From all points of view that is wretchedly bad policy. It is the business of insurance offices to provide new churches and the duty of Church officers to see that they undertake to do so.

So far as official figures guide us, it appears that Canada furnishes 7 per cent. of the butter we import. Dealers in the legitimate butter trade are at one with Lord Strathcona, who has been protesting to a committee of the House of Commons that Canadian butter ought to be sold here in the condition in which it is received. Much of it is not. Large quantities go into factories to be doctored in some mysterious way and to reappear in the guise of English butter. That is not ultimately to the advantage of producers in your country any more than it is to the present or future butter-makers in ours. And Lord Strathcona did well to speak against this injurious practice.

Liverpool is in Lancashire, but not of it. The common speech is a fabric of Lancashire sewn on Welsh, stitched with Irish, and stained with Yankee, colonial and what you please. Hence, the intonation of its peculiar brand of English is unique. There the nations meet and mix tolerably happily. Even in its newspapers one can trace the influence of the Hibernian, for in a leading article a daily paper has explained that "many people are so essentially town-birds that they would be fishes out of water in the country."

NORTH COUNTRY.

Manchester, May 15th.

* * *

OUR SAINT JOHN LETTER.

Complete figures for the winter port season now ended show that all previous records were broken, both as to the number of steamers and the value of their cargoes. The total value of the cargoes carried in the 113 steamers visiting the port was $23,615,074, compared with exports to the value of $13,706,877 carried in 102 steamers during the previous winter. There is an indication here of the increased average size of steamers. Of the exports $14,621,279 in value was Canadian goods and $8,943,795 American. Something more than half of the exports were taken away in C. P. R. steamers. The grain shipments exceeded seven million bushels. Owing to the fact that customs entries on imports are made at the point of final destination it is not possible to give a statement of the value of the imports, but that there was equally gratifying increase is seen from the statement issued by the C. P. R. that 76,919 tons of inward freight was handled in comparison with 49,991 tons in the previous winter. The great increase of business gives rise to a hope of a still further increase for next winter, when, if all goes well, an additional deep water berth will be available, and the big new steamers of the C. P. R. come here. The statement made at Quebec by Sir Thomas Shaughnessy that St. John is the only possible winter port will probably stir the people to renewed efforts in pressing on the Federal Government the importance of action in the way of nationalizing the port, and still further equipping it to handle the steadily growing export trade of Canada.

A new wholesale drug company is to be organized here to compete with the National Drug & Chemical Company for the trade in the Maritime Provinces. Mr. David Russell, the Montreal promoter, is said to be the moving spirit in the new enterprise. Mr. Russell was the promotor and a shareholder in the Canadian Drug Company of this city, which sold out its business to the combine. It is said some of the shareholders are dissatisfied with the deal as they only got 50 cents on the dollar for a business that had paid as high as 8 per cent. Local and English capitalists are both said to be associated in the new company, and there is a rumor that the combine will be opposed, not only in the Maritime Provinces, but throughout the Dominion.

Railroads are usually considered pretty expensive affairs to purchase, but one was sold in this Province a few days ago for the sum of $1,500. This included the line, rolling stock, etc. The road was the Hampton & St. Martins, about twenty miles long, and the purchasers were the bondholders. The line runs to a beautiful seaside beach, and some day with the development a summer travel that is yearly taking place, may be an important feeder of the Intercolonial.

A new cornmeal and feed mill was started in this city a few days ago. The mill was built by Messrs. Maynes & Riley, who were burned out about two years ago. It is fitted with all modern machinery and has a capacity of about 300 barrels a day.

A telephone war seems likely in St. John before long. The New Brunswick Telephone Company, an affiliation of the Bell system, now has a monopoly of the business, but the Central, which has important lines throughout the city, is knocking at the door of the city and seeking franchise. An interesting phase of the affair is in connection with the stringing of wires. The New Brunswick company is just now asking the city for permission to lay conduits on a number of the streets. The friends of the Central say, do not give the permission, but let the city lay the conduits and force all companies having wires on the public streets to put them in the city conduits, paying a rental therefor. It is not yet clear what view the aldermen will take.

Lumbermen all over the Province are in a happy frame of mind, as the drives are coming along well, and there seems every reason to expect that all the logs cut during the past winter will get into safe waters, and that with this will come about 40,000,000 feet hung up because of the light freshet last spring.

There is a prospect, however, of some trouble in the mills. Representatives of mills in the neighboring States are said to be in the city, offering high wages to good men to leave their work here and go to Maine. To-day the Cushing Mills had to suspend operations, because two of the band-saw men demanded increases that the management was unwilling to concede. These men are among those who have been approached and they are said to be using the offers made them to hold up their present employers.

Mr. Robert Wisely director of Public Safety for the city of St. John in a report to the City Council has urged that the city secure legislation that will prevent owners of buildings from making alterations in the interiors without first securing the approval of the Board of Safety, so that the firemen will have a knowledge of what has been done. The city has not yet considered the report, so it is not known what view it will take of the suggestion.

In the death of Mr. Samuel Schofield, head of the shipping firm of Samuel Schofield & Co., and the removal to Calgary of Mr. John E. Irvine, of the shipping firm of Troop & Son, St. John, has lost two very valuable citizens. Mr. Schofield was a most active member of the Board of Trade, and was a keen, clear-headed business man who had been very zealous in building up the trade of St. John. Mr. Irvine on the other hand was more active in the church and philanthropic life of the city, and by his removal to the West, where he will associate himself in business with his son, the Y. M. C. A., Home of Incurables, Centenary Church, and other bodies lose one of the best workers.

—The Western Canada Land Company, Limited, held a meeting in London a few days ago, and it was reported that since its incorporation a few months ago the sum of £176,000 had been received for land sold. The company owns a large amount of land round Edmonton, which would be traversed by the Canadian Northern's branch from Edmonton to Vermillion, and also by the projected lines of the C.P.R., Grand Trunk Pacific and Great Northern.

TEACHING ENGLISHMEN ABOUT CANADA.

The London "Financier and Bullionist" devotes a special supplement of eight large pages to Canada as a field for investments, and, from the Britisher's point of view gives a wealth of information respecting its agricultural, industrial, mineral, and commercial resources which surely must do a vast deal to open his eyes. The supplement is embellished by a good portrait of Lord Strathcona, and there is an interesting interview with the "great High Commissioner," in which he told English readers some reasons why the Canadian West had not developed years ago, and why Canadians moved across the United States line, and why Americans are now transporting themselves in the opposite direction. Of course, great attention is devoted in the several articles to immigration and the settlement of lands, the great outstanding feature of the Dominion in the present-day Englishman's eyes. But the portion of the supplement which will create the newest interest, and, indeed, will be of the greatest utility, so far as the development of Canada itself is concerned, is that relating to industries and manufactures. As is stated in the article on this subject, at its very outset, it is desirable to remove the popular but erroneous impression that from a manufacturer's point of view, the Dominion is of little or no account.

The prevalent idea that Canada is mainly, if not wholly, an agricultural country is as antiquated as it is incorrect. It may have been so twenty years ago, but that it is not the case to-day is very emphatically shown in this article. Since the early eighties the industrial development has made enormous strides, and within the past decade especially has proceeded at an accelerating pace. The relation of these facts through the columns of our contemporary, which circulates among the moneyed men of London, together with its lucid statements about water-powers and other advantages possessed by the Dominion, should prove to the satisfaction of the very people whom Canada desires most to interest, that this country possesses unique opportunities for successful enterprise.

FACTS ABOUT JAPANESE TRADE.

From a copy of the monthly report of the Yokohama Chamber of Commerce, just received, we gather some interesting facts regarding the foreign trade of Japan. According to the official statistics of that Empire the exports of that country for last year amounted to 321,533 yen, and the imports to 488,538,017 yen, totalling 810,071,627 yen, an unprecedented figure in the commerce of the Empire. A "yen," we may explain, is equal to a little less than a Canadian dollar. The greatest excess of imports over exports previously recorded was in 1898, when the imports exceeded the exports by some two hundred and eleven million yen. In consequence of the large volume of trade, there was a great increase in the shipping traffic. The total tonnage of the steamers arriving at the ports of Japan was 14,373,083 tons, the revenue from import and tonnage duties amounting to 35,181,134 yen. This revenue again far exceeds the records for past years. The scarcity of available domestic vessels, owing to the Government chartering them for transporting the troops, occasioned an enormous increase in the arrivals from foreign countries. Of the gross tonnage of arrivals before mentioned the British steamers alone stood at the unique figure of 6,764,378 tons, this being about five times as much as the tonnage registered for domestic steamers. With regard to the exports, there was sudden increase in the China trade, the exports amounting to 98,681,998 yen, thus bringing China to the head of the export list. As to imports, there was a general increase all round, especially from Great Britain and the United States, with 115,380,101 and 104,286,528 yen, respectively. These two countries thus did more than one-half of the import trade in 1905.

We also find that two more Japanese ports have been open to foreign trade. In addition to the six large open ports there were only one or two ports opened to foreign trade in Japan until 1899, when Shimizu, of Suruga, and twenty-one other ports were additionally opened. Afterwards, Itozaki, Bingo Province, and Wakamatsu, Chikuzen Province, were also opened, exceeding the original number by thirty in all. The continued improvements in traffic and progress of foreign trade have now necessitated the opening of two more ports. In the "Official Gazette" is contained an ordinance, dated March 28th, declaring the ports of Suminoye, Hizen Province, and Aomori, Mutsu Province, open to foreign trade. The former is opened to export trade only, and the latter to import trade. As in the case of Muroran, goods to be imported at Aomori are limited to sugar, comestibles, rails, agricultural and industrial instruments, and two or three articles, besides articles free from duty. Any of the existing open ports may be closed, if its opening is recognized to be unnecessary in the future when any other port has been newly opened in the neighborhood upon further improvement of traffic.

* * *

—La Chambre de Commerce, of Montreal, has adopted a resolution approving the request which has been made of the Provincial Government by the authorities of the Polytechnic School (L'Ecole Polytechnique de Montreal) for a subsidy towards a higher educational course. And it expresses the hope that the Government "will contribute towards this work of national progress."

* * *

—The Royal Society of Canada held a meeting last week, at which the annual address was delivered by Dr Alexander Johnson. A resolution was submitted and carried that the Society memorialize the Government with a view to securing a grant of $5,000 annually to be expended in the promoting of original research in such ways and under such conditions as may be determined by the Royal Society through a special committee appointed for that purpose.

Toronto, 17th April, 1906.
H. S. STRATHY,
General Manager.

NATIONAL FIRE PROTECTION ASSOCIATION.

This important body, which was formed to promote the science and improve the methods of fire protection, held its tenth annual meeting last week in Chicago. The sessions occupying most of three days, Tuesday, Wednesday and Thursday. The association has more than a thousand members, the active membership including all the insurance boards, bureaus and associations operating in the various states and territories in the United States. It also includes the National Board of Fire Underwriters, the American Institute of Architects, the American Society of Mechanical Engineers, the American Water Works Association, the International Association of Fire Engineers, and the National Electrical Contractors' Association.

This year's programme includes subjects never before dealt with by the association. Among them, besides those we refer to elsewhere, are: factory standards, skylights, areas, chimneys and flues, roofs and roofings, etc.

Much space was given to pumps in the commemorative report of Mr. Crosby. The special committee on the subject say that the general experience during the year with underwriting pumps has been satisfactory. Those who make them are found to be adhering strictly to the specifications, which are, therefore, unchanged. Rotary pumps have been giving good satisfaction with some exceptions; and "the specifications for regulators, auxiliary pumps and electric pumps as they now stand are apparently covering all the needs satisfactorily." Examination of the building of centrifugal pumps has been possible at different shops during the year 1905-6. And there is a good prospect that pumps of this type will prove reliable for fire purposes.

It is interesting to learn more intimately about the new testing station of the National Board of Fire Underwriters at Chicago, of which this body has the charge and the use. It is described as being "erected and furnished with most elaborate and the best apparatus for all kinds of testing coming within the scope of our work. This station is without doubt the most thorough and complete for the work for which it was intended of any in the world. . . . The value of our laboratory work cannot be overestimated. Our examinations include all kinds of fire fighting apparatus, sprinklers, water pipes, hydrants, pumps, valves, hose, chemical extinguishers, water pails, and everything having for its object the putting out of fires. Also structural materials and heating, lighting and hazard devices. Up to the present time we have made over 3,500 laboratory tests."

The association adjourned on Thursday, to meet next year in New York. Mr. H. C. Eddy, Western manager of the Commercial Union, who is in charge of the underwriters' laboratories as chairman of the Union's Committee on Fire Protection and Engineering, was elected an honorary life member of the association, former President Crosby being the only other person similarly honored.

The following officers were elected: President, C. A. Hexamer, Philadelphia; vice-president, William A. Anderson, New York; secretary and treasurer, W. H. Merrill, Chicago.

Executive committee: E. U. Crosby, Philadelphia, Pa., chairman; Albert Blauvelt, Chicago; F. E. Cabot, Boston; C. H. Campbell, Charlotte, N.C.; E. B. Creighton, Philadelphia; H. A. Glidden, Chicago; C. M. Goddard, Boston; H. C. Henley, St. Louis; H. E. Hess, New York; F. E. McKnight, Atlanta; H. K. Miller, New York; H. L. Phillips, Hartford; C. H. Phinney, Boston; Alfred Stone, Providence.

* * *

LIFE ASSURANCE PAYMENTS.

It is not often that statistics so comprehensive or so interesting on the subject of life assurance are brought together at one time as those in last week's issue of the "Insurance Press," of New York. This remarkable issue devotes eighteen pages to lists of amounts paid under policy contracts by life companies during 1905 in every state of the Union and in Canada. The amounts are derived from standard level-premium companies and fraternal insurance orders. "These figures cover death claims settled, all forms of endowment policies, policies written in Europe or other foreign places and paid here, the death claims and benefits paid by fraternal orders and brotherhoods, claims paid in cases of fatal injury by accidents, etc."

The total is made out to be more than four hundred millions of dollars, made up in this way:—

Claims paid in United States, U. S. possessions and Canada	$307,019,972
Payments to foreign policy-holders, annuitants, for dividends and for surrender values (estimated)	100,000,000
Grand total	$407,019,972

Summaries are given by geographical sections, also by states, and by cities. Respecting the share had by different cities, New York, of course, heads the list, getting $26,785,000 of life insurance money last year. Next her are Philadelphia and Brooklyn with nine millions each; Chicago with eight and Boston with seven millions; Buffalo, Cleveland, Detroit and San Francisco nearly equal at say two and a quarter millions each. Among the two hundred North American cities listed which have had $100,000 or more poured into their laps during 1905, we find eight or ten Canadian cities. The total receipts of Canada from the life assurance purse are put down in the list at $17,408,178: her cities rank as under:—

Montreal	$2,266,023	Toronto	$1,450,610
Ottawa	695,519	Quebec	493,788
Hamilton	203,866	Halifax	201,245
Winnipeg	165,127	London	100,287
St. John	408,971	Victoria	59,335
Vancouver . .	34,116	Charlottetown .	40,591

* * *

TRADE ENQUIRIES.

Persons or firms indicated below have applied at the Canadian Government Office, 17 Victoria Street, London, S. W., looking for Canadian connection:—A London firm making electric lighting cables, and insulating wires; a Canadian milling firm desires to get into touch with British firms with a view to the disposal of their output; a Canadian correspondent desires to communicate with English firms using sawdust. And at the City Trade Branch, 73 Basinghall Street, London, E. C.:—A firm in Colombo, Ceylon, handling tea, cocoa, spices, fibres; a London firm making shop fitting hardware and accessories; a London firm producing human hair and manufactures such as nets. Still another firm of Scotch whisky distillers is open to appoint a suitable Canadian resident agent.

* * *

—A Bill has been reported at Ottawa after several amendments for the incorporation of the Canadian Handicrafts' Guild. The purposes of this body are eminently commendable. They are stated to be:—(1) To encourage, retain, revive and develope Canadian handicrafts and art industries throughout the Dominion; (2) to prevent the loss, extinction and deterioration of the same; (3) to encourage and preserve any such crafts and industries possessed by new settlers; (4) to aid people skilled in any such crafts and industries, by providing markets for their products in Canada and abroad; (5) to encourage industry in the homes of the people by making it profitable and honorable; (6) to carry on and take part in exhibitions of home-arts, industries and crafts; (7) to provide instruction in and proper direction for such arts, industries and crafts; (8) to educate the public to the value of such arts, industries and crafts and of good hand work. Some of those connected with the enterprise are: Sir Wm. Hingston, Sir George Drummond, H. Beaugrand, Chas. A. Harwood, Miss Mary M. Phillips, Mrs. Molson, Lady Tait, Miss Mary Muir, Mrs. Mary Peck, all of Montreal. It is stipulated in the Bill that none of its members are to make any personal profit out of its affairs. The intention of the body, therefore, is purely that of inculcating skill and good taste in handicraft.

The Merchants Bank of Canada

Notice is hereby given that a dividend of 3½ per cent. for the current half-year, being at the rate of 7 per cent. per annum upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city, on and after

Friday the 1st day of June Next.

The Transfer Books will be closed from the 17th to the 31st day of May next, both days inclusive.

The Annual General meeting of Shareholders will be held at the Banking House, in the City of Montreal, on

Wednesday the 20th day of June

next. The Chair will be taken at 12 o'clock, noon.

By order of the Board,
E. F. HEBDEN,
General Manager.

The British Columbia Electric Railway Company, Vancouver, is evidently one of those which look ahead, and, even though immediate traffic does not indicate large profits, it goes ahead building new lines, trusting to future development and growth of population to bring in returns. It is about to start work on an extension of line along Saanich Road, and is contemplating several other extensions in the near future, though as a matter of fact we believe one or two recently made have scarcely as yet paid their way. It is doubtless influenced by the idea that public convenience does count for something.

MANUFACTURED BY
THE CANADA SUGAR REFINING CO. Limited,
MONTREAL

The Government of Ontario has accepted the tender of Mr. J. R. Booth, of Ottawa, for a pulp-wood area in the neighborhood of the Montreal River. Mr. Booth agrees to pay a bonus of $300.000, in addition to dues of forty cents a cord for spruce and twenty cents a cord for all other kinds of wood cut; or, in the last-named case, an advance of ten cents a cord on the previous terms. Mr. Booth undertakes to cut 20,000 cords of pulp-wood per year. He will manufacture it at his Ottawa mills, where it is likely he will erect a plant for the making of paper from the pulp-wood of the area named. It is understood that twenty-one years is allowed for the cutting of the pulp-wood, at the end of which time the land reverts to the Crown.

Mercantile Summary.

The business of Jeremie Rhéaume, brass founder and stove dealer, in Montreal, is being converted into a joint stock company, with a capital of $49,000.

The Cache Bay planing mill, owned by George Gordon & Co., was destroyed by fire on the 23rd inst. with its machinery. A large quantity of lumber was destroyed. The loss will exceed $25,000.

A despatch from New Westminster, dated 19th inst., stated that work had been started on the erection of the Great Northern Railway docks on Front Street. The contract for the piling has been let to W. A. Gilley, and the superstructure will be put up by H. M. Marshall.

Electric Heaters, Limited, is the name of a new company just chartered under Dominion laws with an authorized capital of $100,000. It will acquire the patents of A. F. Leggatt, of Ottawa, and will manufacture and supply gas, electricity, etc., for light, heat and power purposes.

A circular has been sent out by Mr. R. Schofield, of Toronto, stating that the firms of A. P. Holden, 105 Adelaide Street West, and R. Schofield, 14 Court Street, will join forces to-day under the firm name of Schofield-Holden Machine Co., Limited, with head office and machine shop at 14 Court Street and machine shop and shipyard at foot of Carlaw Avenue, he has had the shrewdness to indicate the location of each of these shops by a miniature map of the south-east front of the city from Yonge Street to Ashbridge's Bay. The Schofield-Holden Machine Co. are successors to the Canada Launch and Engine Works.

The Vancouver papers contain reports of the completion of a deal by Mr. E. Cowper Thwaite, a mining expert of London, Eng., for the acquisition of the Twentieth Century group of mines on Howe Sound, B.C. Between Mile Creek and the Squamish, near the Britannia. The purchase price is understood to be $250,000. Development work is to be carried on by Mr. T. Gibson, who has had experience in South Africa and in Mexico. A steam plant is to be put in at once, and a waterpower, capable of producing 40,000 horse-power, will be shortly worked on. A five-drill compressor plant is to be installed at once. Within six months the syndicate expects to be in a position to ship three hundred tons of ore daily to the Crofton smelter. Later it intends to erect its own reduction plant near the mine. "The Province' says that there are five distinct ledges on the property, none of them less than fifteen feet in width, and one of them, with perfect walls, actually measures, it is said, sixty feet in width. The ore, owing to the configuration of the ground, can be cheaply mined. It also contains molybdenite in paying quantities. This rare metal is worth $500 per ton.

DEALERS IN

HIGH-GRADE GOVERNMENT MUNICIPAL AND CORPORATION BONDS

DOMINION SECURITIES CORPORATION, LIMITED
26 KING ST. EAST TORONTO

Mercantile Summary.

At Regina, Saskatchewan, the provincial supplementary estimates were brought down on the night of May 24th. They provide for the expenditure of $381,505.

A Montreal boot and shoe retailer, named Bernard Shapiro, also doing business in a second store under the style of B. Cohen & Co., has assigned on demand, and liabilities are shown at $7,630.

A welcome rain is offered as the explanation of the non-observance as a holiday of Victoria Day throughout Alberta, that Province having suffered for weeks for lack of rain. A regular downpour came on that day to rejoice the farmer.

The Victor Wood Works, Limited, has been granted a charter by the Dominion Government, authorizing it to establish at Amherst, N.S., a business as lumbermen and makers of woodenware of all kinds. Harvey L. Hewson, W. B. Murdock and others, of Amherst, are among the charter members of the new company.

The town of Cobalt was startled on Friday last by the explosion of several tons of dynamite in the north-west section. Twenty-five or more houses were wrecked, and most of the buildings in the town more or less damaged by the shock, which was felt, it is said, ten miles away. The cause of the explosion was the ignition of a large store of dynamite through a forest fire.

The Klondike Water Supply Co., Limited, Dawson, Y.T., is being organized with a capital of $6,000,000 for the purpose of installing and operating a system of water works, and bringing water in large quantities to the gold-bearing ground on Bonanza, Hunker, Eldorado, Gold Run, Sulphur and other creeks in Yukon Territory, constructing hydraulic works on a large scale.

The plans of the recently organized Hamilton Steamboat Company have not been definitely disclosed. The "Times," of Hamilton, however, says that the company will build a fine, new steamer, to be ready for next season's service. It will then have five large steamers, and they will make a double circuit, Hamilton to Toronto, to Niagara, to Port Dalhousie, and to Hamilton, and vice versa. For this season the service given by the "Modjeska" and "Macassa" will be the same as heretofore. We understand further that the "Lakeside" is to be taken off the route from Toronto to Port Dalhousie, and run along the north shore of Lake Ontario, from Oshawa to Toronto, calling at intermediate points, in competition with the "City of Owen Sound" and the "Argyle." The three steamers, "Macassa," "Modjeska" and "Garden City," will be started, according to the report, on an entirely new route, taking in Toronto, Hamilton, Port Dalhousie and Niagara Falls and return to Toronto, thus making a circuit.

Mercantile Summary.

Edmonton is about to distinguish itself still further by the building of a new theatre.

High grades of gasoline have been advanced in price from one-half to one cent per gallon. The demand just now is increasing very rapidly, owing to its consumption in automobiles.

A despatch from Cobalt, Northern Ontario, last week, stated that a nugget, the second largest in the district, has been discovered on the Rothschild property, south of Giroux Lake. This claim adjoins the celebrated Nugget claim, an interest in which was recently sold to American capitalists.

The Crandall Cutlery Co., of Bradford, Pa., is contemplating the establishment of a branch factory in London, Ont. It employs some 160 hands at Bradford. The company wants a free site of nearly an acre, free water and exemption from taxation. Petrolea is, it seems, also offering inducements.

Mr. M. C. Sturtevant has been appointed general assistant to Mr. F. W. Morse, vice-president and general manager of the Grand Trunk Pacific. Though a young man, Mr. Sturtevant has seen much railway service. He was until recently car service agent of the Grand Trunk.

The Canadian Pacific Railway is carrying on several improvements in the interior of British Columbia. A new station will be erected at Kelowna. Docks are to be constructed at Okanagan Landing. It also contemplates the building of an extension from Midway to Penticton. A new steamer is being built to ply on Lake Okanagan.

The bill to incorporate the Grand Trunk Pacific Branch Lines Company encountered some opposition at the Railway Committee meeting in Ottawa last week. Some amendments were made. First, it was intended to drop the eastern branches. They were from Moncton to Halifax and from a point on the Transcontinental to St. John. The proposition to build from north-east of Fort William to a junction with the G.T.R. north of Toronto, with a right to pass through or reach by spur line Sault Ste. Marie or Sudbury, was also struck out. The branch from Calgary to the fourth terminal of the G.T.R. was struck out. This left two branches from Calgary, one to boundary line and another to the fifth terminal of the G.T.R. The general clause for construction of other branches was also struck out. A clause allowing the company to build from Winnipeg to the boundary is to be made more definite by confining it to twenty-five miles on either side of the Red River and connect with other lines to the south. A general impression is that the G.T.R. had to eliminate the branches in the Maritime Provinces because of the opposition of the people there to the competition with the Intercolonial over the same routes.

DEBENTURES

The Trustees of the Saskatoon Public School District will shortly offer for sale debentures of $30,000 in two instalments of $15,000 each repayable in twenty instalments with interest at six per cent. Full information on application to the Secretary, William P. Bate, Box 7, Saskatoon.

Debentures for Sale

The undersigned is prepared to receive tenders for the purchase of debentures of Drainage District No. 5 in the Province of Manitoba to the amount of $162,000.00 and of Drainage District No. 15 in the said Province to the amount of $22,000.00, said debentures being in denominations of $1,000 00 each, dated July 1st, 1906, payable in thirty years from the date thereof at the Union Bank of Canada, in the City of Montreal, and bearing interest at the rate of 4% per annum, payable half-yearly. These debentures are issued under the provisions of "The Land Drainage Act," and are guaranteed by the Province of Manitoba.

Tenders will also be received for debentures of the Central Judicial District in the said Province to the amount of $22,000.00, dated July 1st, 1906, payable on January 1st, 1924, at the Union Bank of Canada in the City of Montreal, and bearing interest at the rate of 4% per annum payable half-yearly.

All offers must be addresed to the undersigned, and marked "Tender for Debentures," and must reach this office not later than the 1st day of June, 1906.

Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.
Provincial Treasurer's Office,
Winnipeg, Man.

Mercantile Summary.

The Merritton, Ont., Paper Mill Company, Limited, has been incorporated under Ontario laws with an authorized capital of $300,000.

"Industrial Canada" makes a protest against the law compelling employers to deliver income assessment notices to employees, and also against the requirement that employers make statements as to the wages of employees.

Vancouver business men are trying to get an electric railway to Fort Moody along the shores of the "Inlet," paralleling the C.P.R. track. The British Columbia Electric Railway Company has been contemplating for some time past the building of a line from Fort Moody to New Westminster.

It is stated that the Dominion Iron and Steel Company will this season obtain at least 150,000 tons of limestone and ore per month from their quarries and mines at Marble Mountain and Wabana, a large increase compared with last year. Then, however, they had only two blast furnaces in operation, while this year they will have four. Mr. J. H. Plummer, the president, who had been on a visit to the works lately, returns with the message that everything is in excellent shape there.

The Canadian Pacific Railway has, we understand, completed its experiments on motor cars for suburban traffic, and it is expected one will be put on the line between Montreal and Vaudreuil within the course of a few days. The car in question is 75 feet long, and is practically a first-class Canadian standard car, rather more strongly built than the ordinary type. It contains an ordinary compartment, with seating capacity for forty passengers, and a smoking compartment to accommodate sixteen. The engine is at the front end, and the fuel used is petroleum. It is calculated that the engine will develop sufficient power to pull the car and a trailer at a uniform rate of from thirty-five to forty miles an hour. It is to be hoped, should this form of motor car be found adapted to the requirements, that it will be adopted on suburban lines elsewhere, a want which has been long felt

* * *

TORONTO MARKETS.

Toronto, May 21, 1906.

Chemicals and Drugs.—No change has occurred in the position of these markets. A steady trade is being carried on and prices keep steady. The staples, such as opium and quinine, are rather dull, and so are menthol and carbolic acid. English chemical markets are reported fairly active, especially those immediately connected with the home trade.

Dry Goods.—The sorting trade is active, the demand for all kinds of seasonable goods being very good. Travellers are engaged in showing fall samples, but so far, trade in many sections is scarcely up to expectations.

Debentures for Sale

By the County of Peterborough

Tenders will be received by the undersigned to and including June 20th next for the purchase of $30,000.00 debentures bearing 4% interest per annum payable in twenty equal annual payments.

ED. M. ELLIOTT,
Peterborough, County Clerk,
May 23rd, 1906. Box 1001, Peterborough.

TENDERS FOR

DEBENTURES.

City of Saint John, N.B.

TENDERS, addressed Treasury Department, City of Saint John, Province of New Brunswick, and marked "Tenders for Debentures", will be received by the undersigned, up to 12 o'clock, noon, on the Twenty-eighth day of June, 1906, for the purchase of Seven hundred and Twenty-one Thousand ($721,000.) Dollars, "Saint John City Debentures", to be issued by the City of Saint John, payable at the expiration of forty years, with interest at four (4) per cent. per annum, payable half yearly, from the First day of May, 1906. Principal and interest may be payable at Chamberlain's Office, in Saint John, New Brunswick, or in Great Britain, or elsewhere.

The Debentures may be expressed in sterling money of Great Britain, in currency of Dominion of Canada, or in the currency of any Foreign Country, and in sums not less than Five Hundred Dollars each as purchaser may desire.

Resolutions passed by the Common Council of the City of Saint John provide for the formation of a Sinking Fund for the redemption of these Debentures at maturity.

Parties tendering must state in their tender in what currency, in what sums and where they desire the Debentures and Interest to be made payable.

The highest or any tender not necessarily accepted.

By Order of the Treasury Department of Common Council.

HERBERT E. WARDROPER,
Common Clerk
CITY OF ST. JOHN, N.B.

Prospectus in connection with above Loan may be obtained on application.

John Kay, Son & Co., LIMITED

36 and 38 King Street West, Toronto.

This perhaps may be partially accounted for by the open winter last year and its effects on stocks. The wholesale houses report a brisk demand for carpets and house furnishings, and the quality of the goods favored is a matter for common remark. Wool, linen and cotton staple goods are held very firmly, and prices show no indication of giving way. Linens particularly seem to have a strong inclination toward the upward plane.

Flour and Grain.—Business in wheat is slightly more active. Prices in this market keep fairly steady, but in Chicago they have moved up a little. Deliveries of Ontario grain have been larger this week. Flour is firm, with ninety per cent. patents selling at $3.15. In millfeed shorts keeps its firmness, but bran is a fraction easier. Oats is firm. Other grains are unchanged.

Fruits and Vegetables.—Fruits and vegetables are moving satisfactorily, and are selling at good prices. Oranges particularly are firm, while in lemons, owing to the scarcity, a rise in price is expected, and they are likely to be high

all the summer, judging from reports from the Mediterranean districts. Strawberries are plentiful from the more southerly districts. The following represents average quotations: Strawberries, quart boxes, 10 to 20c.; tomatoes, 6-basket crates, $3.25 to $3.50; asparagus, Canadian, per doz. bunches, 75c. to $1; new potatoes, per barrel, $5; cabbage, new per crate, $2.50 to $3; rhubarb dozen bunches, 30 to 40c.; radish, per dozen bunches, 25 to 30c.; lettuce, per dozen bunches, 30 to 35c.; onions, per large bunch, 12½c.; cucumbers, Boston, per dozen, $1.25 to $1.50; spinach, per hamper, $1; pineapples, Cuban case, $3.25; sweet potatoes, hamper $2; white beans, $1.75 to $1.90; Egyptian onions, sack, 100 lbs., $2; onions, Texas, Bermuda, 50 lb. case, $1.75; Canadian onions, per bag, $1 to $1.10; oranges, extra fancy California navels, 96s., 112s., 126s., 150s., 176s., 200s., 216s., 225s., $4.50; fancy Sorrentos, $4.25 to $4.50; Mexican oranges, 120s., 150s., 176s., 200s., 216s., 250s., $2.75; Valencia oranges, 420s., $4.75; do., large, 420s., $5.75; California blood oranges, 324s., $3.50; lemons, Messinas, $3 to $3.50; bananas, $1.85 to $2.35.

Groceries.—There have been considerable fluctuations in the sugar market the latest being a decline in this market of 10 cents per cwt. in all grades of refined. The movement is not a brisk one. A conspicuous feature of the general grocery trade is the position of canned goods, which are not only at high figures, but are in eager demand. Currants are becoming still firmer, and so are Valencia raisins. Travellers in country districts report, generally speaking, a fairly good prospect for a large volume of business.

Hides and Leather. — No further change has been made in hides, and a good, steady trade is going on. Tallow is unchanged. Not much actual change has occurred in leather, but the prospects are good for a fair season's business at steady to firm figures.

Live Stock.—At last market days, both at the city and Junction yards, the quantity of cattle offering was fairly good, and the quality fair. For exporters $4.75 to $5 were the prices realized, the bulk fetching about $4.80. Choice butchers' animals sold at $4.60 to $4.70. There was not a very great demand for stockers and feeders. Not much enquiry was noted for milch cows. Sheep and lambs were easy, the quality of many of the offerings not being very high-class.

Provisions.—Butter, especially creamery is a little firmer. Cheese continues quite strong in price as before, with a good demand. Eggs are firmer than ever, selling at 16½ to 17c. for new-laid. Breakfast bacon is a cent higher, and all smoked meats are very firm, continue high-priced. Potatoes are growing scarce, and the market is firming up.

Wool.—No special change has taken place in the situation, and prices remain as foreshadowed in previous issues. Supplies are coming into the local market fairly plentifully.

The Best Form of Investment

for a Life Company's funds is agreed to be in first Mortgage on approved Real Estate. This view has always been taken by The Great-West Life Assurance Company. So thoroughly has it been justified that never has a single dollar of principal or interest been lost on investments.

Nor has this security been obtained at the sacrifice of profit. An average of 7% is earned on all investments, permitting low premium rates and high profits to Policyholders.

SWEET CAPORAL CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, May 30, 1906.

Ashes.—Owing to the paucity of supplies quotations are rather higher, from $5.40 to $5.45 being generally quoted for first quality of pots, while a good lot might bring $5.50. Pearls are dull, and quoted at about $6.75 per cental.

Dairy Products.—Since last writing the cheese market has shown quite a pronounced advance, in spite of the fact that receipts for this season, since May 1st, are much ahead of last year's figures being 125,548 boxes, as compared with only 65,375 boxes last year. Finest Western makes are now quoted at 12 to 12¼c. per pound, while fine Easterns are quoted at 2c. There has also been considerable advance in butter, largely due to the keen competition, which has prevailed among several prominent buyers in the country, where it is said as high as 22¼c. has been paid for finest unsalted, but on the spot market the highest quotation is 21 to 22c. for choicest makes. The exports of cheese last week were 48,820 boxes, which is some 15,000 boxes ahead of the corresponding week of 1905. Of butter, 5,018 packages were exported.

Dry Goods.—Continued cool. or rather almost cold weather, checks retail trade very materially, and, though a fair number of country dealers have been in the city this week, their sorting selections are light. Payments of paper, however, do not appear to be affected. and money is said to be coming in well. Travellers are now carrying pretty full lines of fall samples, and report a good proportion of orders for tweeds, underwear, ready-made stuff, etc.

Flour, etc.—A good general demand exists for flour, particularly from the lower ports, and the market has a firm tone. with Manitoba very steady at the late advance. We quote: Manitoba spring wheat flour, $4.60 to $4.70; strong bakers', $4.20; winter wheat patents. $4.30 to $4.40; straight roller, $3.90 to $4.10. Cornmeal is firmer at $1.35 to $1.40; granulated ditto, $1.50; rolled oats, $2.10 to $2.15 a bag.

Groceries.—The sugar market has recovered from the late decline, quotations having been advanced 10c. a cental on Saturday last, and the present factory figure for standard granulated is $4.10 in barrels, and $4.05 in bags, with $3.70 the lowest in yellows. New molasses is now being offered at 30c. per gallon in puncheons, 32½c. in barrels. and 33½c. in half-barrels. Rice has just been advanced 10c. in ordinary grades. and from 12½ to 20c. on fancy grades. Pot barley is up 10c. a bag, and for tapioca 7c. is now being asked, with supplies in very limited compass. Dried fruits are generally firmer. Supplies of Valencia raisins are very low, and it would cost 5½c. to lay down selected. Prunes are scarce, and practically no small sizes are to be had. Evaporated apples are very high, packers now quoting 12c., while 8c. is asked for two-year-old discolored fruit. Shelled almonds are up 3c. per pound, owing to reported frost damage to new crop. Canned tomatoes are firm at $1.30.

Hides.—The price of lambskins is this week advanced to 20c. each. Beef hides are firm at the late advance, with buyers quoting 11½c. per lb. for No. 1. Calfskins are steady at 15c. for No. 1, and 13c. for No. 2. There is no very large movement.

Metals and Hardware.—A considerable degree of activity is still reported in these lines. Iron values show little change, $21.50 being about the figure for best Scotch brands of pig iron, and $21 for domestics; bars are steady at $2.05 in an ordinary way. Boiler plate. iron pipe and sheets of all kinds remain as quoted last week. Lead is firmer again at $4.50; the discount on lead pipe remains at 20 per cent.; zinc and copper are unchanged. Antimony is cabled at the very high price of £124 per ton, a figure which would mean a local quotation of 29c. per pound.

Oils and Paints.—Turpentine and linseed oil are both easier. the former selling at 90c. per gallon, in single barrels, while raw linseed oil is quoted at 53 to 54c. Window glass is now coming in freely, and some lowering of prices is looked for in the course of a week or so. Leads and all pigments are very firm in price.

* * *

FINANCIAL CONDITIONS IN THE UNITED STATES.

Henry Clews & Co., New York, in their weekly circular, dated May 26th, said:

The important feature of the week was the satisfactory working out of money market problems. A most significant event was the placing of a $50,000,000 Pennsylvania loan in Paris. This was the first time in many years that French capital has ventured with any freedom into American securities. It does not seem likely that the San Francisco fire can cause any further serious disturbance to the money market. It may, in fact, ultimately prove a source of ease, since the large sums gathered for the first aid of San Francisco and the large sums held there

The FIVE per cent. Debentures issued by this Company afford the following advantages:

The investment can be converted into cash at any time after two years by giving sixty days' notice.

The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.

The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.

The Debentures issued by the Company will be a first charge upon the assets.

for restarting purposes will eventually find their way back to the New York market. It is a fact of much encouragement that practically all the banks of San Francisco opened and met all their obligations without any signs of a run or scare. The banks there probably hold more cash than ever before, and a good share of it should soon come to New York, where its usefulness and safe-keeping are necessarily better than in San Francisco.

It is evident that the worst effects of this great calamity have been amply discounted so far as Wall Street is concerned. The future of the local money market has consequently now a clearer outlook. For the next eight or ten weeks, at least, comparatively easy conditions ought to exist. After the first of August, when crop and legitimate trade demands begin to increase, then we may expect firmer rates. In the stock market the tendency has been irregular. The rampant bulls have lost some of their enthusiasm, but a good undertone remains. Already there is a considerable increase in the short interest, and should this be much extended another rally will be in order. As regards the future, much will depend, as usual, upon crop conditions. Reports of damage from frost are already in evidence, but it is much too early yet to form any reliable views as to the outcome. Railroad traffic is heavy, and as yet there are no signs of abatement in general business activity. So far as trade conditions are concerned they are entirely satisfactory to Wall Street. Speculative activity is being conducted on more conservative lines, and the leading banking interests are still disposed to discourage extravagant expectations. In the coal stocks there has been much strength, backed by rumors of important developments in the coal trade. The demand for railroad bonds continues somewhat disappointing, partly owing to conditions in the money market and partly owing to the large amounts still held by syndicates awaiting purchasers. It is known that a number of our large railroad and steel corporations will soon come into the market with large new issues, and this is not considered a bullish factor, although banking interests are quite likely to give their support to the market preparatory to the making of new issues.

Mercantile Summary.

We are told that the assessment of North Sydney for the current year is $26,949, and that its rate of taxation is fifteen mills.

Dominion Henderson Bearings, Limited, Toronto, has received an Ontario charter. Its capital authorized is $300,000, and its avowed object is to take over the business and assets of the Henderson Roller Bearing Manufacturing Co., Limited, including the patents in its possession. It will also buy, sell, repair and deal in machinery, machinists' supplies, etc. Among the provisional directors are William Bowman, of Georgetown, Ont., C. W. Thompson, Toronto, and others.

A concern which was recently granted a charter by the Ontario Government to authorize it to drill and make wells for obtaining natural gas, oil and other mineral products, operate pipe lines, etc., is the Ontario Iron and Steel Co., Limited, Toronto, the capital of which is fixed at $500,000, and the provisional directors include David Ross, of Welland, and J. L. Steefel, of Albany, N.Y.

An assignment has been made by C. S. Easton, general merchant, at Easton's Corners, Ont., to A. E. Baker. Easton has been in business, off and on, for ten or twelve years, but does not appear to have ever made material progress. During several months past he has been sued by various creditors. The final outcome is his insolvency.—Honore Levesque, in a small grocery way at Rockland, on the River Ottawa, has assigned to W. A. Cole, of Ottawa, and Robt. Hanson, grocer, at Russell, in the same district has also placed his affairs in the hands of an assignee.

An assignment on demand has been made by Wilbrod Bouchard, a contracting builder, of Quebec city. His liabilities total $10,365, and nominal assets are shown to the amount of $8,200. — Napoleon Cantin, a woodturner, of the same city, is also reported as embarrassed, and proposing a compromise arrangement with his creditors on the basis of 25 cents on the dollar. He owes about $3,000.

Frederick H. Reynolds, selling clothing and men's furnishings in Sydney, N.S., under the style of the Reynolds Co., has assigned to Isaac Greenwell for the general benefit of his creditors. He was formerly and for a long time engaged in business in Halifax, and on removing to his present location in 1900 was credited with possessing a very fair capital, but he is an elderly man, and does not appear to have been able to hold up his end against the keen competition prevailing.

The Great North-Western Telegraph Co. has completed the erection of a new wire between Toronto and North Bay, to connect with the Temiskaming and Northern Ontario Railway system. It is expected to fill a rapidly increasing want; at any rate, the complaints of unsatisfactory telegraphic service between Toronto and the Cobalt district have been numerous and bitter.

Managers and Underwriters

The Grand Central Hotel and an adjoining building in Niagara Falls, Ont., were on the 21st May completely destroyed by fire, and some other buildings were saved with difficulty. The loss was heavy, only partially covered by insurance.

The Pacific Coast Lumber Manufacturers' Association, at a meeting at Seattle a few days ago, advanced the cargo list price of lumber $1 all round. From British Columbia comes news that the "woods are full" of Americans on the look out for timber properties. Business is reported good in all kinds of lumber.

We hear the news from Seattle to the effect that one of the largest timber deals put through in the North-West for some years past was consummated the other day, when Ray W. Jones, Lieutenant-Governor of Minnesota, and H. W. Stone, Senator from that State, purchased fifty thousand acres of standing timber land in the Knights Inlet country, on the British Columbia mainland. The deal was engineered by Henry B. Thomson, of Victoria, and Ornsby McHarg, of Seattle and St. Paul. It was stated also that they secured a mill site, and will erect a mill capable of turning out two hundred thousand feet of lumber per day.

The Crown Life Insurance Company

Mercantile Summary.

A London cable quotes official emigration figures showing that the number leaving the United Kingdom for Canada in 1905 was 82,457, against 69,681 the previous year. The number who went to Australia was 15,181, against 13,910. The number to Europe, South Africa and the United States has decreased compared with 1904.

The Canadian Northern Railway has on order rolling stock which will cost $2,975,000, including forty-four powerful engines. With the exception of about $275,000 worth, all is being made in Canada. Delivery of some of the engines, passenger and freight cars is now being made. During the month of April the company took into the North-West 559 carloads of settlers' effects, which made almost 1,000 carloads since January 1st, this year, and the month of May will show a large increase over April.

A despatch from East Tilbury Township, Ont., states that great activity exists in the oil industry there at the present time, new wells being struck each day. The wells are drilled to a depth of 1,450 feet, there being 90 feet of pay sand. At 1,360 feet a strong flow of gas is encountered; at 1,385 feet a flow of oil is found; at 1,405 to 1,410 feet the gusher is tapped, and oil spouts far above the 80-foot derrick. This would appear to indicate that the existence of oil in that neighborhood is no mere question of "spots," but that there is a widespread stratum of it. Many experienced oil men from Virginia, Pennsylvania and Ohio are said to be looking over the field.

Mr. Eugene Foss, of Boston, who has worked hard and faithfully in favor of reciprocity between his country and Canada, has been across the Atlantic lately, looking into the question of maximum and minimum tariffs and reciprocity treaties in European countries. While in England Mr. Foss has been studying Chamberlain's tariff policy, and had interviews with a number of leaders of the movement. As a result of his investigations on the Continent, Mr. Foss believes the United States must adopt a maximum and minimum tariff or enter into reciprocal relations with other countries. He also believes that the time is opportune to conclude a reciprocity treaty with Germany.

The Metropolitan Life Insurance Co.

(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policyholders and additon to Reserve.
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada. over $3,0000,00.00

THE CANADA LIFE

Paid its policyholders in 1905 $3,272,000, being the largest amount so paid in one year by any Canadian Company.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses **the advantages of both.**

ASSOCIATED BOARDS OF TRADE OF WESTERN CANADA.

We have been favored with a revised memorandum of the resolutions set down to be presented at the third annual convention of the Associated Boards of Trade of Western Canada, to be held at Edmonton, the capital of Alberta Province, on the 13th and 14th of the present month, under the auspices of the Edmonton Board of Trade. We give a brief resumé of the more important resolutions to be moved by various boards of trade. They are these:—

Regina.—To ask the Dominion Government to nominate in each of the new provinces a point of redemption for the notes of Canadian chartered banks.

Strathcona.—To compel all imports of goods to be marked according to Canadian standards.

Edmonton.—That the new provinces unite in appointing a commission for the purpose of codifying and rendering as uniform as possible the laws relating to their commercial and business interests.

Calgary, Lethbridge and North Battleford.—Various resolutions affecting commercial legislation.

Moosejaw.—To pay higher salaries to school teachers and to grade them in accordance with merit and responsibility.

Edmonton.—To urge the Imperial Government to make definite pronouncement as to the real cause of its embargo against Canadian cattle, and if it be for protection against contagious diseases to ask for the appointment of a commission composed of veterinary experts from the United Kingdom, Canada, and other self-governing colonies to thoroughly investigate the matter, and to take steps accordingly.

Edmonton.—To adopt a comprehensive plan for the improvement and maintenance of good roads.

Wetaskiwin.—To enforce a much stricter inspection of settlers' effects coming into Canada from the United States, and to prevent the importation of dutiable goods.

Edmonton.—To compel corporations and others doing business in the West to protect the public by a clear disclosure of their agents' authority.

Calgary.—To establish efficient statistical and intelligence bureaus in the West to gather agricultural statistics, report upon values of products in foreign markets, with special reference to the extension of Canadian trade, to investigate excessive transportation rates, etc.

Lethbridge.—That the Provincial Government should take hold of the exportation of live stock, so as to ensure to the producer its full value.

Edmonton, Strathcona and Lethbridge.—To pass a provincial statute preventing municipalities from granting bonuses to railroad or other corporations without permission from the Legislature.

Edmonton.—In view of the growing application in the Canadian West of the principle of municipal ownership, and seeing that a constantly changing municipal council cannot give that efficient and consistent management so necessary to success, to place the management of such enterprises in the hands of commissioners removed from political control, and responsible rather to the Government than to individual municipalities.

Edmonton.—To adopt action calculated to conserve the timber growth of the two provinces, by the setting apart of forest reserves, etc.

Edmonton.—To afford all reasonable encouragement to proposals for increasing the transportation facilities of the West, and to urge that no legislative obstacles should be placed in the way of any railway building lines in any direction.

Prince Albert.—That in view of the importance of Hudson Bay as a natural outlet for western products, the Dominion Government be requested to build a railroad from some point on the North Saskatchewan River to Fort Churchill.

Regina.—To reduce railway rates in Alberta and Saskatchewan to the scale in force in other sections of the Dominion.

Lethbridge.—That in the opinion of this convention immediate provision should be made for the establishment of Local or County Courts with resident judges in the main centres of the Province. That in the opinion of this convention there is urgent need of some legislation providing for the arrest of absconding debtors.

In the twenty or thirty resolutions here foreshadowed are to be found a good number which clearly merit approval. Especially practical are those looking forward to future growth in our Western country. Of these are the propositions of a comprehensive plan for providing good roads—setting apart forest reserves and conserving the timber growth of the two provinces—collation of statistics as to values of merchandise abroad, with a view to the extension of foreign trade—paying higher salaries to school teachers, and grading them to accord with individual merit and responsibility. In this class may be placed the suggested codifying of laws which relate to the commercial interests of the new provinces. And there is a shrewd request from one body that the Imperial Government formulate the reasons for its embargo upon Canadian cattle reaching the shores of the United Kingdom, and that a commission of British and Colonial members decide upon the justice of these reasons, if they can be elicited.

It may be said, broadly, that the recommendations to be placed before this important body for discussion, are eminently sensible. While there may be some amongst them that appear of small consequence to people at a distance, it must not be concluded that because local they are unimportant. The fact that they are presented by commercial bodies or committees of those bodies for discussion seems to be a guarantee that they are not merely the personal notions of "cranks." And even if such be the case, their ventilation before a still larger deliberative body will tend to discover whether or not they are paltry or impracticable.

Much good should come of these three days' deliberation by Western business men upon matters which come day by day under their notice. They have the future of a vast and valuable region to consider, and many problems in nation-building will be theirs to ponder and to solve. From what we already know of the composition of the coming assembly at Edmonton, we feel great confidence that its outcome will be not only the perfecting of much that is now crude, and the correction of what may be at fault, but the carrying out in the future of valuable suggestions now made looking to the betterment of conditions in our Great West.

* * *

SHOE AND LEATHER TRADE.

Quite satisfactory conditions may be said to prevail in all the branches of the allied trades, hides, leather, boots and shoes. In the Toronto market, the receipts of hides have been fairly liberal, but the improvement generally prevailing in the quality of the same has had the result of keeping up the price without difficulty, thus offsetting any tendency to decline. The high prices, therefore, which have prevailed for so long continue unabated. Indeed, tanners would appear to have become reconciled to the situation, and while they have been doing little or no speculative buying, they have been more disposed to enter the market and purchase their requirements without waiting for the easier conditions which never come.

One thing which may have affected the situation advantageously is the fact that leather dealers in their turn have found a diminution in the difficulty of keeping up the value of their products on a scale commensurate with the enhanced price of their raw materials. Heretofore a certain proportion of the leather men would seem to have felt no compunction in easing down their prices a little to suit the immediate requirements, in spite of the well-understood agreement of the majority. During the last month an improvement has set in in this regard. The cause, no doubt, is that all concerned have become reconciled to the true position of things, and are convinced that the high values reigning are not merely speculative, but truly representative of the inner state of the market. Splits and sole leather have been conspicuously strong during the past two weeks.

Coming to the boot and shoe trade, most accounts given by the manufacturers and dealers are to this effect, that their business has taken on a brighter aspect than for some time past. Orders have been both large and frequent, and the fall trade is "moving along in good shape." Particularly brisk has been the sorting trade, which indicates that the retailers now at least are cognizant of the fact that prices cannot well go lower, and that they are quite likely to go higher. From all accounts this satisfactory state of things seems to be general in all parts of the Dominion. Trade in the North-West is particularly active just now. From the Maritime Provinces come similar reports. In Quebec there was some slight dullness a month ago, but this is not complained of now, while in Ontario the tone of the market is very good indeed. Our Montreal market report of yesterday indicates no marked activity in either hides or foot-wear at the moment, though good orders are awaiting the shoe factories when they resume in earnest on autumn work after stock-taking.

So far as we can learn there are no striking new features in the style of boots and shoes asked for. Tans retain a conservative popularity, while patent leathers may be said to do the same, the refusal to guarantee the latter having apparently been acquiesced in by the public to their own better feeling and the advantage of both retailer and jobber. One line of shoes which is selling with an especial degree of activity just now is the summer or sporting articles for which demand has set in on a large scale at an earlier period than usual. All kinds of boots and shoes show, of course, a material elevation of prices compared with a year ago, and in many cases, customers complain. But this is not nearly so much the case now as it was at first, the public, no doubt seeing a just cause for it in the prices for all kinds of raw material and labor.

We observe that in the United States shoe centres a feeling of conservatism prevails. Trade has been active, prices have advanced, but now the manufacturers would appear to have adopted a waiting attitude. It is not the feeling exactly that values of materials have reached their top limit, and that they must now decline; but nevertheless, they feel inclined to let the "other fellow do the buying." Perhaps the only real reason for this frame of mind is the monetary stringency which in some measure has existed for a considerable period in the neighboring Republic.

* * *

THE CANNED MEAT DISGRACE.

The horrible disclosures as to the methods used at the Chicago stock yards for putting up food for millions of human beings, disclosures so nauseating as scarcely to bear being put into cold print, have a very practical interest for Canadians. Are we to take advantage of the disgust felt against American packed meat to push our own in the British market? Are our own packing houses kept so scrupulously clean and sanitary that they can hope for success along this line in the face of the indignation which the British public very naturally feels towards the whole race of American packers? Would not a thorough Government investigation be in the best interests of the Canadian packers, even though their establishments be conducted in a fitting matter, which we have no reason to doubt? These are questions that are well worthy of thorough consideration.

Already, the cables tell us, the effects of the Committee's report on what they found in Chicago, are making themselves felt in the unmistakable manner in which sales of United States canned meat have fallen off in England since the revelations. The goods are largely used in that country, more particularly by the working classes, and though the consumers there very possibly think the reports of uncleanliness and adulteration may have been exaggerated, they know enough of actual conditions, even in their own midst, to have a very real suspicion now of the stuff they have been eating. The point is, will they differentiate clearly enough between Canada and the United States to recognize that the word "American" does not or should not include the products of the northern half of this continent. A doubt exists here which has had influence already on trade relations between ourselves and the Mother Country, and may have a very considerable influence at this stage. Too often the average Briton looks upon Canadian and American people, and Canadian and American products respectively, as one and the same thing. This is why, if for no other reason, it seems to us advisable that a thorough investigation into the circumstances under which meat is packed in Canada, and a Government guarantee to the effect that such and such a brand as been inspected, and found satisfactory in every way, would do much to dissipate any existing confusion in the British mind. One thing that may effect the hopes of one believing in the possibility of building up a gigantic packed meat trade in this country, similar to that across the line, is the fact that Canadian animals do not as a rule so readily lend themselves to such treatment. They are too fat, or in one way too good to be put into cans.

Turning to the Trade and Commerce blue book, we find that in the eight months ending with February 28th last, Canada exported $1,296,828 worth of canned meats, of which quantity $1,280,780 worth went to the British Isles. For the same period in the previous year the whole of the goods value sent was $2,946,584, of which $2,933,213 went to Britain. It will thus be seen, in spite of the falling off in the past year, that the industry is one of considerable importance, and, apart from the considerations above set forth, it seems that it is one which ought to be developed to a much greater extent. But at any rate, for the sake not only of the industry itself, but of the reputation of the whole Dominion, let us not have the barest suspicion of the existence of such a disgraceful state of things in our factories as is calling down the condemnation of the whole world upon Chicago.

* * *

TWO VIEWS.

A man who stands high in the financial circles of Europe and America, Mr. Jacob Schiff, head of a very prominent New York banking house, having been last year a director of one of the large life assurance companies of the United States, and of other financial concerns, resigned from the boards of these institutions because as director of them he might have to deal with loans from his own banking firm of Kuhn, Loeb & Co. This action caused great surprise in the New York money market, which has rarely witnessed the spectacle of a man giving up emolument from any such high-minded motives as actuated Mr. Schiff. Taking place as it did while the life assurance investigations were being made in New York, the circumstance attracted great and deserved attention.

Quite otherwise is the attitude of a very prominent financier and underwriter, Hon. George A. Cox, who is president or director of various insurance and other institutions in Canada. He sees no impropriety in borrowing, while representing one financial institution temporarily needing money, from himself as representing another institution which has a surplus of money. For, with the utmost frankness he tells the Insurance Commission, before which he has just been examined, that he courts the fullest enquiry into the transactions of all his companies, one with the other, in so far as they relate to the Canada Life Assurance Company. Nay more, when asked by counsel for the Insurance Commission whether he sanctioned the use of life policyholders' money in purchasing large blocks of shares in an industrial company (in which the Canada Life was already a stockholder), when those shares showed a somewhat alarming decline, he replied that it was done to "support the market," and that he thought it quite justifiable.

Here then are two opposing planes of thought and action as assumed by two men, both eminent in modern finance on this continent. One resigns his fiduciary position in a life company in order to avoid the very appearance of evil—lest he might be accused of borrowing with his life assurance hand and lending with his banking hand. The other considers such borrowing and lending quite proper, and professes his entire willingness to have the transactions looked into fully, confident that they will be found all right.

It used to be said—and written—that the practice of fire underwriting, which deals with property merely, was an inferior and subordinate profession to life underwriting, because the latter deals with that sacred thing, human life. And some of its apostles to-day, Mr. Cox among them, possibly, will maintain the superior claims of the life manager and the life agent over the fire agent and his company, because the former is a protector of the widow and the fatherless; a guardian also of the funds held as a sacred trust for the dependent ones. But we must have declined from the standard of former years which regarded life assurance as an elevated profession, and the unrisking care of accumulations of money consecrated to a solemn purpose as a serious duty. For we find it now treated as a thing of course, that *investments* of life assurance reserves may be freely handled by the latter-day methods of the stock exchange, and used to "support the market," if the market happens to need support.

Nor does Mr. Cox, and the Canada Life, of which he is president, afford the only instance of laxity in dealing with securities in a way not contemplated or indeed permitted by the Insurance Act. We have already indicated, ("Monetary Times," 4th May), our view of the transactions of the Manufacturers' Life in selling securities at the end of one year, and buying them back in the early days of another, for the purpose of evading the law. And it comes out before the Commission that the Confederation Life, which is deservedly looked upon as one of our most conservatively and economically managed life assurance companies, has not been able to reconcile itself to an exact observance of the law in one particular; but, "saying I will ne'er consent, consented"—to buy some securities which the Act does not permit, the managing-director confessing himself meanwhile cruelly handicapped in being expected to obey a provision which other companies did not respect, and which he himself did not believe in. We shall see, when the Commission reports, what its members think of these things.

* * *

TORONTO LIFE POLICYHOLDERS REINSURED.

It is some relief to the apprehensions of those who insured their lives in the Toronto Life Company—as the insurance attachment of the York County Loan Company was termed—to learn that a sale has been made by the first-named company to another, which guarantees all policies. A circular just issued to policyholders states that all the policies in force in the Toronto Life Insurance Company have been reinsured in the Union Life Assurance Company, which company has agreed to guarantee in full all the terms and conditions of the policies in force at 2nd June, 1906. The manager of the Toronto Life, Mr. G. A. Calvert, announces in this circular that "there will be no charge, and no increase of premium; no change will be made in the terms and conditions of the policies, and no action will be necessary on the part of any former policyholder."

We understand that the controlling interest in the Toronto Life, which was acquired by the National Trust Company from Mr. Joseph Phillips, the Misses Hudson, and other proprietors connected with the York County Loan, was sold by the Trust Company for $56,278 in cash to the National Agency Company, which transfers it to the Union Life Company. The arrangement is an advantageous one for York County shareholders, inasmuch as it realizes for them, and that quickly, a sum of money that could not probably have been raised in any other way. And the policyholders have their fears quieted.

* * *

MAY FIRE LOSS.

A loss of $16,512,850 for last month is shown by the compilation of the fire waste in the United States and Canada, made by the "New York Journal of Commerce." This is compared against $12,736,250 for May, 1905. In detail, the figures for the present and last two years were as follows:—

	1904.	1905.	1906.
January	$21,790,200	$16,378,100	$17,723,800
February	90,051,000	25,591,000	18,249,350
March	11,212,150	14,751,400	18,727,750
April	23,623,000	11,901,350	292,501,150
May	15,221,400	12,736,250	16,512,850
Total five mos..	$161,891,750	$81,358,100	$353,714,900
June	10,646,700	11,789,800	......
July	11,923,200	13,173,250	......
August	9,715,200	11,435,600	......
September	14,387,650	13,715,250	......
October	12,866,200	12,267,000	......
November	11,515,000	16,178,200	......
December	19,422,350	15,276,600	......
Total 12 mos....	$252,364,050	$175,157,800	......

Later estimates, says the "Journal," indicate a property destruction at San Francisco of at least $280,000,000, and an insurance loss there of $175,000,000, many of the companies finding their losses to be far heavier than they at first supposed.

* * *

SCANDINAVIAN TRADE.

In a single month, that of January last, Denmark exported provisions, such as dead meats and dairy products, and live animals, to the value in all of thirty-two million kroner, equal to about $8,800,000. For a country of three million population, this is a remarkable sum to be attained by this description of exports in one month. Items going to make up the total are 157,875 casks of butter, weighing 17,366,250 lbs., or say 8,683 *tons*; also 18,268 cases of butter, part fresh, part in tins; 7,000 tons of bacon; 1,349,000 pounds mess pork and salted beef; 2,747,170 dozen eggs, fresh beef and pork, 4,258,000 pounds; fresh and cured swine products, 5,069,000 lbs.; cattle, 15,179; horses, 4,104; milk, 918,720 pounds. These figures we derive from the latest report to the Department of Trade and Cor merce at Ottawa, by Mr. C. E. Sontum, commei agent of Canada for Norway, Sweden, and Denmar

It is to be remembered, of course, that food substances form a very great proportion of the total export of that marvellously industrious people. Her total trade in 1903 amounted to 1,076,202,000 kroner, which, as 18 kroner equal one pound sterling, is almost exactly £60,000,000. Of this the exports constitute 494,309,000 kroner, and the imports 581,893,000 kroner. The extent of her trade wit Great Britain is very large, in exports especially she sent to the United Kingdom in 1903 no less thar 60 per cent. of her total export. But the United Kingdom does not sell her nearly so much merchandise as Germany. Put into dollars, of total exports amounting to $131,875,560 in one year, no less than $79,477,74 worth went to the United Kingdom.

Respecting wood pulp in Norway this official reports that for prompt parcels of chemical rather highe prices have been obtained. The new mills which a building in Norway and in Sweden have made a tempts at selling, but so far only with indifferent su cess. The spot market for mechanical is still d pressed and inactive. It is tolerably evident that th

Norwegian people do not like the idea of their resources being developed by foreign capital. A strong agitation has been raised, Mr. Sontum says, to bring the State to take steps to prevent foreigners from acquiring waterfalls, mines and forest property in Norway. "The most ardent champions of this movement even go so far as saying that it is better to let ore deposits remain undeveloped and waterfalls unused for fifty years, awaiting the creation of sufficient Norwegian capital for their development, than to let foreign capital do it now. On the proposal of the Norwegian Government an Act has been passed in secret meetings of both sections of the Storthing (Parliament) temporarily forbidding the sale to foreigners or Norwegian limited companies without a Royal concession of Norwegian waterfalls."

The wood trade of the Scandinavian countries appears to be quiet. A statement is made with respect to flooring, which may with propriety attract the attention of Canadian shippers of lumber. It is that in Norway and Sweden in cargoes of flooring there is little business going on, but the shipments of parcels by the regular lines of small weekly or fortnightly lots are constantly growing from one year to another, although these small assorted lots are more expensive to fill than cargo shipments.

* * *

AN EFFORT IN A RIGHT DIRECTION.

It has been known for a good while to those of the outside public who take an interest in such things, and it was by no means unknown to agents and managers themselves, that there were things needing amendment in life assurance conduct in Canada. Customs, we mean, and modes of procedure that are unfair and otherwise objectionable have long prevailed. It was high time that concerted effort by managers and agents should be made to rid the profession of life underwriting of improper and deforming attachments, seeing that the Life Managers' Association has been unable to shake them off. Therefore we welcome the announcement made this week of the formation of a Dominion body, one purpose of which will be to stimulate insurance men in cities of all the Provinces to form branches, whose object it will be to do away with certain practices now followed, such as "switching" and "rebating," and that business rules may be adopted which would be followed by all Canadian insurance people. The rebater, according to the definition of a Toronto insurance officer, is a man who, to secure a policy, will return his commission. The switcher is a man who will resort to almost any method to secure a policy from a man who intends entering some other company.

It is hardly to be expected that competition for life policies can be lessened, but it is possible to regulate it, to reduce its acrimony, to improve its morale. At present some of the companies are too much engaged in waging war against each other, the outcome of which is to injure the business generally. Hence, this movement in the direction of reasonable, if not friendly, attitudes towards each other and the maintenance of honorable methods in canvassing.

Organizations with such purposes in view had recently been made by life men in Montreal, Toronto, and London. Taking advantage of this fact, it was deemed well to have a Dominion organization, in the hope that branch, or rather collateral, bodies should be formed in different Provinces or places to take action in concert towards a common end.

It was decided to organize a national association under the name of the Dominion of Canada Life Insurance Underwriters' Association, and these officers were elected: T. G. McConkey, honorary president, Toronto; G. H. Allen, honorary vice-president, Montreal; with the following vice-presidents: J. A. Johnson, Halifax; E. R. Machum, St. John's, N.B.; J. T. Hyndman, Charlottetown P.E.I.; G. H. Simpson, Montreal; H. C. Cox, Toronto; H. Worsley, Winnipeg, and E W. McLean, Victoria. B.C. Vice-presidents were also appointed for Alberta and Saskatchewan.

The Executive of the Dominion Association is composed of A. H. Vipond, Montreal; O. Gagnon, Quebec; W. J Fair, Kingston; A. S. McGregor, London; J. E. McCuaig, Ottawa; Dr. W. H. Richardson, Windsor; C. O. Palmer, Sherbrooke, and W. J. Watson, Hamiton, who are all active field men.

The Life Underwriters' Association of Toronto has the following officers: President, Mr. E. H. Bisset; vice-president, Mr. J. O. McCarthy; secretary, Mr. W. D. Campbell; treasurer, Mr. Robt. Lovell. Executive Committee—Messrs. Ira B. Thayer, William Hamilton, J. A. Macfadden, J. S. Mills and F. H. Heath.

We may remark that the feeling of field men and others in the profession in favor of such organization was shown unmistakably in the number of persons who responded to the call for a meeting in the King Edward Hotel on Monday of the present week. No fewer than 120, possibly 150, were there, a number of them from Montreal, Hamilton, London, Stratford, and other points.

It is a good idea of the Executive to have invited, as we are told, they have done, Mr. C. W. Scovell, of Pittsburgh, president of the National Association of Underwriters of the United States, to address those gathered at a banquet by the Montreal members of the Association, and on June 25th Mr. Scovell is to be entertained at luncheon by the Toronto members. This gentleman has done excellent work in the United States along the same lines as are intended to be followed by the Canadian organization.

* * *

THE QUEBEC BANK.

Year by year this old-established bank maintains and increases its considerable business and pays a steady dividend to shareholders. It has so long been reputed an economical concern, and a very conservative one, that rather a surprise is caused when we find among the items in profit and loss account a round sum put aside out of profits for office renewals in the city of Quebec and a lesser sum for the erection of a new building for one of the out-of-town branches of the bank. But one need never expect to find the Quebec Bank going in for extravagance in office buildings or anything else. Nor has it gone the length of some of its competitors in opening branches, though it has the very respectable number of eighteen branches, most of them in Quebec Province.

The total deposits of the bank amount now to $8,622,000, and the shareholders' capital and rest to $3,650,000 more. Current discounts are larger, in a ratio about corresponding to the increase in deposits; call loans are larger also. Circulation remains at about the same figure as last year. An addition of $100,000 is made to Rest out of this year's profits and the usual sum towards pension fund is not forgotten. The bank has joined the considerable group which now pay quarterly dividends; and we observe an innovation in the statement, hardly to be expected here, but not unexampled in the present competition for deposits, namely, the payment or crediting of interest to depositors every three months. The report contains a reference to the death of a valued director, Mr. Edson Fitch who has been long a respected resident of Quebec.

* * *

OUR HALIFAX LETTER.

Progress is being reported by the Commissioners of the Dominion Exhibition to be held at Halifax. The Eastern Canada Passenger Association, covering Ontario, Quebec and many United States border points, will make one-way rates to Halifax on certain dates, and the railroads generally offer very low rates for that event. Great improvements and additions are being made to the exhibition grounds and equipment in anticipation of the coming occasion. The space in the grand stand will be enlarged to accommodate 8,000 people. The fine, new Fisheries Building in the Fair grounds is well under way, and an extra effort is to be made with the fisheries exhibit this year. A good display of this kind was made at last year's Toronto Fair. The superficial floor space of the buildings when completed will equal 180,000 square feet. The total amount of money offered for premiums is $100,000, which includes $9,000 for horse races, and a fine field of equine entries is expected.

At a recent meeting of the Nova Scotia Institute of Science an interesting paper was read on the water-powers of the Mersey River, being one of a series of papers on provincial water-powers to be read before the Institute. The Mersey is probably the most important river in this respect in Nova Scotia, draining a territory of 600 square miles, having its main source in Annapolis County. Some account of it was given in our letter of 18th May, describing the railway outing of Halifax merchants. Draining about forty square miles of lakes, it is unfailing in water supply. The last sixteen miles of the river has a total fall of about 260 feet and the amount of horse-power it could develop is enormous.

The city council, as at present constituted, is, with one or two exceptions, a very representative body, probably one of the strongest councils Halifax has had for many years. An attempt was recently made to have the Legislature sanction a change in the mode of electing the council whereby they should all be elected at once, but the bill was thrown out, although it had received the endorsation of the Board of Trade and other prominent bodies. In the elections recently held politics entered largely into the contest, but the result was, on the whole, satisfactory, the best men being returned. Speaking of politics, the local elections in this Province will take place on June 20th. They are not creating any great excitement, as the only issue is that of office. The Murray Government, if somewhat colorless, has followed pretty carefully in the safe lines laid down for it by the present Minister of Finance of the Dominion when Premier of this Province. The Opposition consisted of two members in the last House. The Liberals have now been in power in this Province for twenty-four years, and, with the exception of a few persons of independent mind, who may be "tired of hearing Aristides called 'the Just,'" there does not appear to be much likelihood of a reverse of opinion this year. A great many persons, both Liberal and Conservative, would be glad nevertheless to see a stronger Opposition. At present it is somewhat farcical, every vote standing 36 to 2.

It is announced that the Provincial Government has agreed to enter into a contract with the Margaree Coal and Railway Company to build a railway through the northern districts of beautiful Inverness County, on the Island of Cape Breton, from St. Rose to Orangedale, via East Lake Ainslie. The road is expected to develop valuable coal and barytes deposits.

An Anglican cathedral, to cost half a million dollars, is to be erected on the site of the old Exhibition grounds on Tower Road.

Tenders are asked for the purchase of the property and plant of the Brookfield Mining Co., situated at Brookfield Mines Station, in Queen's County. The mining areas are fifty-two in number, and have yielded about three-quarters of a million dollars worth of gold.

There is a good demand in the local financial market for bank stocks and bonds. Earnings of Cape Breton Electric Railway show a good improvement. The figures for March were $7,807 over those of last year, the increase for the year ending March 31st being nearly $40,000.

The Dominion Iron and Steel Company are still breaking records in production with their rail mill, the heaviest day's output on record in Canada being recently broken with 865 tons.

Halifax, Nova Scotia, 2nd June, 1906.

* * *

TORONTO TECHNICAL SCHOOL.

Principal Pakenham, of the Toronto Technical School, in asking the city for the sum of $280,000 for a new school building, gives some strong reasons why money is needed and why such a sum as that mentioned is a moderate amount for the purpose. Toronto is the centre of a section of the Dominion which for years past has been eminent in manufacturing, a feature which is growing more marked with every decade. Her mechanics and craftsmen need the very best education that money and brains can supply, and at present they are not getting it to the extent they ought, nor to the extent that other cities of equal importance enjoy. The workers themselves have no doubt as to the urgency of the need for technical education. American correspondence schools claim that 2,000,000 students on this continent have taken, or are taking, correspondence courses in technical subjects. Not fewer than 25,000 Canadians are registered, it is said, in correspondence schools. Toronto maintains two successful art schools and half a dozen studios for instruction. Her many business colleges and her Y.M.C.A. branches, her settlement schools, her schools of design, of telegraphy and of watchmaking, are crowded night and day. About 1,100 students, whose average age was over twenty-one years, attended the evening classes of the Technical High School during the current year. The Toronto Technical School receives at present no provincial aid but if proper accommodation and equipment be provided it will receive an annual grant of $50,000, besides which, these being put in, such a reorganization might be effected as would reduce materially the present cost of maintenance. Mr. Pakenham also figures that if the present Technical building be sold—and it has grown steadily in value—there would be in sight an additional $75,000 without extra cost to the ratepayers. This leaves $50,000 to be provided at the expense of the ratepayers, which is not an immoderate demand.

* * *

BANKING AND FINANCIAL.

A branch of the Sterling Bank has been opened at Kirkfield, Ont. Mr. J. A. Walker, formerly of the Ontario Bank has been appointed manager.

We are informed that Mr. R. H. Smart, manager of the Traders Bank of Canada at Grand Valley, Ont., has been transferred to Stratford as manager at that point of the same bank.

For the year ending June 30th next the Lake Superior Corporation calculates that its earnings will be in the neighborhood of $5,200,000 for the steel rail mill, and of over $7,500,000 over the whole enterprise.

The Sterling Bank of Canada is making alterations to the building at the south-west corner of Adelaide Street west and Simcoe Street. They will occupy the first floor, and expect to be in possession in about one month.

At a meeting of the Twin City Rapid Transit Company (Minneapolis and St. Paul) on the 1st inst. the shareholders authorized an additional issue of $2,100,000 worth of common stock. Present holders of either common or preferred stock have the privilege to subscribe at par for 10 per cent. of the new stock.

The seat on the Montreal Stock Exchange, formerly owned by the late Ernest Howard, has been bought by McCuaig Bros. & Co. for $23,500. This price is $1,000 more than was paid for the last seat sold, though it is less than the record price. We understand that another seat on the Montreal 'Change is for sale, the price asked being $24,000.

The Canadian Government has extended for a farther period of five years from the 1st of October, 1907, its contract with the American Bank Note Company, of Ottawa for the manufacture of Dominion notes, postage stamps post and letter cards, post bands, and certain inland revenue stamps. It is stated that the Government saves, by this contract, $518,000 a year compared with what it used to pay to the British American Bank Note Co. in former years. The statement affords room for reflection upon the probable profits of the British American Bank Note Co.

The Sovereign Bank of Canada has taken over the private banking firm of Telford & Company, of Owen Sound. The business will be continued as a branch of that bank under the joint management of Messrs. W. N. Telford and P. C. Telford.

The report of the Trust and Loan Company of Canada, was recently issued in London. The net profits for the six months ending with March 31st last were £16,824, out of which a 6 per cent. dividend was declared. The sum of £4,633 was added to reserve fund, which now amounts to £187,354. Altogether the company has investments in Canada totalling £6,920,185.

Incorporation of new companies in the Eastern States during the month of May shows a total of $135,300,000, compared with $249,250,000 in the same month of last year, and of $132,000,000 in May, 1904. The grand total for the five months of the current year is $1,087,349,000, against $836,856,111 and $403,008,000 in the corresponding periods in 1905 and 1904 respectively. These totals include only Eastern companies having more than $1,000,000 capital.

In acknowledging the receipt of the financial statement for the municipal corporation of Brantford for 1905 we make a few extracts regarding some of the more striking features of the position of that city. The revenue amounted to $224,931, of which $184,997 was received in the shape of taxes. Expenditure amounted to $230,821, of which $52,058 is debited to education, $5,756 to bonuses, $23,422 to pavements and sewers. There was thus a deficit of $5,890. The net revenue derived from the water works during the year was $38,349, compared with $37,452 in 1940. The number of house connections added was 202, making the total up to date 3,773. The expenditure in this department, including operating expenses, material and labor, etc., was $15,966. The quantity of service pipe laid was 13,327 feet. The estimated revenue for the current year is $257,900.

The Canadian Bank of Commerce has recently opened branches, one at Quebec, under the management of Mr. W. H. Dunsford, and at Weyburn, Saskatchewan, with Mr. J. D Bell temporarily in charge. The agreement for the purchase of the assets and business of the Merchants Bank of Prince Edward Island by the Canadian Bank of Commerce took effect on the 31st ult. and the following branches of that bank have now become branches of the latter bank: Alberton, P.E.I., Mr. W. R. McKie, manager; Charlottetown, P.E.I., Mr. J. M. Davison, manager; Montague, P.E.I., Mr. H. H. Lowe, manager; Souris, P.E.I., Mr. G. W. Sutherland, manager; Summerside, P.E.I., Mr. J. F. McMillan, manager.

The Committee of the United States Congress on Banking and Currency has reported favorably on the Fowler bill, which authorizes any national bank, with the approval of the Comptroller of the Currency, to take out for issue and circulation an amount of national bank notes not exceeding fifty per cent. of its paid-up and unimpaired capital without depositing United States bonds with the Treasury as security therefor. The amount of these notes must not exceed the amount of secured notes of the bank making the issue, and the total amount of both shall not exceed the paid-up and unimpaired capital of the bank. It requires banks taking out this credit currency to keep on deposit in the Treasury an amount equal to five per cent. of such credit money to be held for the redemption thereof. The bank is also required to maintain in its vaults the same reserve against the credit currency as is required to guarantee its regular circulation. The object of the bill is to provide a system of credit currency "without cheapening the present methods for issuing currency; that is, to graft upon the present United States bond security circulation of bank notes that will currently adjust itself to the varying needs of business throughout the year, and thus prevent the invariable fall panic growing out of the need for more money when the crops are being harvested and marketed."

LIFE AND FIRE INSURANCE NOTES.

Mr. C. W. I. Woodland, joint manager with Mr. R. I. Griffin, of Montreal, of the Canadian branch of the Employers' Liability Assurance Corporation, sailed for England this week, to be gone about two months. While abroad Mr. Woodland intends to be present at the sixth annual congress of the Chambers of Commerce of the British Empire. He is a delegate from the Toronto Board of Trade.

The Hon. Mr. Cox's opinions on the practical end of the insurance business are of interest, and should be of value. Asked by one of the Commissioners as to the chances of success for a new life insurance company at the present time, the Senator replied that, under proper management and with substantial capital, the prospects should be excellent. As to the requirements in an insurance manager, his idea was that one man might be cheap at $40,000 per year, while another might be dear at any price.

The capacity of Montreal's pumping engines is said to be far from equal to the demand, and a report on the question of increasing the supply, as well as obtaining a purer quality of water, is shortly to be presented to the council. It is true that new engines are being installed, but these, it is contended, will only stave off the difficulty for a little while. It is suggested that the aqueduct between Lachine and St. Gabriel's Ward be enlarged to twice or more times its present size. Besides the question of a better water supply, there is the necessity for a more adequate fire protection service to be borne in mind.

❧ ❧ ❧

DRY GOODS NOTES.

Notice has been served by the New York State Forest, Fish and Game Department that it intends to use every means in its power to enforce the law prohibiting the possession or sale of the bodies or feathers of wild birds, whether taken in that State or elsewhere.

Gault Brothers, Limited, have been granted a Dominion charter authorizing them, with a capital of $500,000, to carry on the business of merchants, manufacturers and dealers in all kinds of dry goods in Vancouver, B.C. Mr. L. H. Gault, R. W. MacDougall and Jas. Rodger, all of Montreal, are charter members of the new concern.

Business in the Irish linen market has been fully maintained. The turnover shows little increase, but this is due to the fact that producers are averse to booking orders too far ahead, and the tendency of prices is still upwards. In the yarn market a moderate amount of new business is passing. Both home spinners and Continental spinners are in a very independent position, and in some cases are almost declining to book fresh orders. Prices have further advanced.

The dry goods section of the Toronto Board of Trade is urging the Dominion Government to enforce more rigidly the regulations regarding the importation of silk. The regular tariff on silk is 30 per cent., but when intended for the manufacture of neckties it is only 10 per cent,, and when for hat linings it is admitted free of duty. It is alleged that large quantities of silk really intended for general purposes, such as making blouses, skirts, etc., has been brought in under the cheaper or free categories, which, of course, means an injustice to honest dealers.

A company is being organized by W. Farwell, W. Jenckes, H. A. Moore and others, of Sherbrooke, Que., and D. M. Steindler, of New York, to carry on the business of buying, selling, spinning, manufacturing, importing, exporting and dealing in wools, cottons, jutes, silks, hemps, linens, yarns, and like materials; also buying and dealing in machines necessary in such manufacturing business. The concern will be known as the Crown Spinning Company, Limited, with a capital stock of $100,000, and head office at Sherbrooke.

The general state of the home trade in the Manchester district does not show much change as compared with a week ago, says the "Draper's Record" correspondent. Speaking generally, the departments dealing with cotton goods are greatly hampered by the long time which now has to be given for orders to be completed in. This matter really affects the home trade houses to a greater extent than shipping business. The trade in white calicoes has been very good all round since the beginning of the year. Of course, just at present things are not very active, but arrangements are being made for a good business later on in the year.

For merinos and the finest crossbreds of a merino character an advance of quite 5 per cent. on the concluding prices of the previous sales in March was quickly established at the London wool sales, and this was often exceeded as the sales proceeded. The value of combed merino of a 60's standard quality is now quite 28d. per lb., as compared with 26d. per lb., in March, and as there is every indication of the finest Australian wools being in greater request, both in the worsted and woolen home districts, as well as in the Continental manufacturing centres, it is quite possible that a still further advance may be reached before the next series of London colonial sales in June.

The annual meeting of the Canadian Colored Cotton Company was held in Montreal on the 1st inst. The financial report showed the net earnings for the fiscal year just closed to have been $262,000. Out of this was paid interest on the bonds to the amount of $111,000. A dividend of 2 per cent. was paid on the paid-up capital of $2,700,000, and the sum of $97,000 was carried forward to the credit of profit and loss account. A vote was given by the shareholders to increase the number of directors from five to seven, the two new directors elected being Mr. G. Caverhill and Senator Beique. The other directors were re-elected as follows: Mr. David Morrice, president; Sir George A. Drummond, vice-president; Messrs. E. S. Clouston, T. King and D. Morrice, jr.

Manufacturers of silk goods are receiving no particular encouragement for believing in any augmentation of their trade for the time being, and consequently are proceeding on most conservative lines, says the New York "Dry Goods Economist." While stocks are depleted, under existing conditions it is only regarded as businesslike policy to keep them down to the lowest possible ebb. Buyers realize, too, that by going into the market at this time they might injure their prospects for securing a moderate level for new silk. Demand at this time might cause importers to put the price of silk at a point where it would be possible for them to pay for cocoons at a high rate, which would certainly be demanded if the grower thought there were any probability of a continuation of high level.

* * *

FOR GROCERS AND PROVISION DEALERS.

The Sandwich, Ont., fish hatchery has, it is stated, distributed over 25,000,000 whitefish fry at various points along the Detroit River and in Lake Erie, including Sarnia, Bois Blanc and Fighting Island. It will shortly also distribute quantities of pickerel spawn.

American mackerel seiners, of whom there are calculated to be about seventy at present in the neighborhood of the Nova Scotia coast, are said to have met with but little success this season. Some of them have arrived in port practically empty-handed, while others have only a few barrels to their credit.

Mr. P. B. McNamara, Canadian trade agent at Manchester, Eng., calls attention to the neglect of the English barley market for Canadian growers. Last year there was imported into Great Britain 49,996,098 bushels, valued at £6,017,200, most of which came from Russia, Turkey, Roumania and the United States. The price of California malting barley in the British market, he says, at the present time is 63 cents a bushel.

The laws against fraudulent advertising in Germany ar very strict, as is shown by a case recently reported fron Berlin. The defendant, a merchant of Spandau, advertise that he would clear out his stock of goods at less than hal price. A customer who made a purchase complained to th police that the advertisement was a fraud. Thereupon th retailer was prosecuted by the police and was find $150 an ordered to pay the customer $75 damages. On appeal th fine was reduced to $75 and the damages were remitted o the charge that the customer had not suffered any materia loss.

Mr. W. A. McKinnon, the Canadian Commercial Agen at Bristol, Eng., has seen a number of prominent frui dealers, and says they are agreed, with one exception, i regard to apples, that Canadians sell more readily and a higher prices than Americans; that one reason for this is th larger sized barrel in which Canadians are packed; that much more important reason is that Canadians are bette packed and graded, the grade marks being more reliable tha those used by American competitors, and that this result i unanimously attributed to the influence of Government inspection, carried out under the Fruit Marks Act. The frui trade, he goes on to say, approve the proposals made by th recent fruit convention at Ottawa to define No. 2 grade an also for a standard Canadian barrel.

* * *

—Another exceedingly rich find of silver is reporte from Cobalt. The find was made by a party sent out b Lucky Barber, of Cobalt, and was located about thirty mile south of this town. The vein is eight inches wide, and ha been traced over 700 feet. The samples brought in are sai to be the richest and finest seen. A large area of new an good mining lands will now probably be prospected over.

* * *

—D. M. Howard, Government inspector in the MacKenzie River district, reports as follows regarding the catc of whales in the Arctic Ocean:—Boats now winter at Herschell Island and have between them 33 whales and one cal This represents a considerable amount of money. Eac whale is computed at San Francisco values to be worth fro twelve to fifteen thousand dollars in oil, bone, etc., according to the size of the whale. At fifteen thousand dollars th 33 whales would have a value of four hundred and ninety five thousand dollars, and of this sum Canada reaps n benefit whatever, all this money going to owners of vessel in San Francisco. It seems a pity that the vessel-owners c Vancouver and Victoria do not realize the profits in this industry and turn their attention to it. The run for them t the whaling grounds would be shorter by the distance between San Francisco and Vancouver, and they would be fre from duty and should thus be able to compete successfull with the Americans.

DEBENTURES FOR SALE.

Sealed tenders marked "tender for debentures" will be received by the undersigned up till 4 p.m. on Friday, 6th July, 1906, for the purchase of $679,406.55 of the City of Vancouver 4% general and local improvement debentures, repayable as follows:

$483,629.00	**40 years.**
42,400.80	**30 years.**
43,551.63	**20 years.**
74,825.12	**12 years.**
35,000.00	**10 years.**

Full particulars of debentures can be secured on application to the undersigned. The debentures will be ready for immediate delivery.

Tenders must be accompanied by a marked cheque for 1% of the amount tendered, payable to the City Treasurer; this amount will be forfeited if purchase be not carried out.

The highest or any tender not necessarily accepted.

A. McEVOY,
City Clerk.

HON. CONSUL NOSSE ON JAPANESE TRADE.

Without a doubt the present is a very opportune period for the working up of a large trade between Canada and Japan. During a recent visit to Toronto of Hon. T. Nossé, the Consul-General of Japan in Canada, he made some remarks on this subject that, like several other utterances of this gentleman, deserve to be reproduced. As is well known, Mr. Nossé has given constant attention to the question of better trade relations between this country and his own during the eleven years he has represented Japan in this capacity. He reminds us that the Japanese are rapidly changing their foods, and instead of a "rice-eating" are becoming a "bread-eating" people. He sees no reason why, when bread and butter are so expensive in Japan, and tea so cheap, there should not grow up between Canada and Japan an extensive trade in these commodities, Japan sending to Canada for her bread and butter and this country receiving in exchange Japanese tea.

The present is a favorable time for trade development, not only because of the very cordial attitude of Japan towards Great Britain and her colonies on account of the alliance and of their sympathy during the late war, but because of recent tariff adjustments. Through being part of the British Empire, Canada has, within the present year, been placed on the same footing in the matter of trade with Japan as Great Britain and the United States. Heretofore goods going to Japan from Canada have been subject to a heavy customs duty, while goods from the United States were admitted in accordance with the rates fixed for most-favored nations. This gave the United States a very great advantage over Canada, of which advantage she has availed herself to extend her trade with Japan, but Canada now, in consequence of being part of the British Empire, has been admitted to the position of the most-favored nations.

Besides this, the Hon. Mr. Fisher, Dominion Minister of Agriculture, when he visited the National Exhibition at Osaka in 1903 taught the Japanese the value of Canadian wheat and its fine bread-producing qualities. In the Canadian exhibit, which Mr. Fisher's department controlled on that occasion, flour from Manitoba hard wheat was made into bread. At the same time bread was made from flour which came from the United States, and it was demonstrated openly that a given quantity of Canadian flour was capable of producing, not only a larger quantity, but bread of a finer quality.

Mr. Nossé makes the suggestion that the Canadian Government should establish, in different parts of Japan, particularly in the large cities, bakeries where bread made from Canadian wheat should be baked and distributed at cost price to the people. We can scarcely over-rate the importance of the Orient as a future market for Canadian products.

Mr. Nossé continued: "I know so well the great demand there is in Japan at the present time, and which will increase year by year, for the foodstuffs of this continent, that I feel that the business men who are interested in the production or sale of any of the products which this country has, and which Japan is likely to need, could not go to too great an expense, in sending their agents to Japan, and in beginning a business there, just as they have started trade in other parts of the world. Perhaps if the business men are not shrewd enough the railway corporations, who are always looking out for future trade, will see the importance of doing something in this direction themselves. The Grand Trunk Pacific Railway will have a great advantage in the matter of trade with Japan over any of the other railways on the continent, because the route from its terminus to Yokohama, say, will be so much shorter than the route from any other ocean ports on the Pacific coast. As a matter of fact the city of Seattle has taken away a large part of the trade from the city of San Francisco, simply because it is much nearer to Japan. Why should not the city of Vancouver and the new city of Prince Rupert, in their turn, displace the city of Seattle as great shipping ports to the Orient?"

Another line of goods for which Mr. Nossé sees a fine opening in Japan is canned milk, which is used very largely in that country for feeding infants.

ONTARIO CROP REPORT.

The May bulletin of the Ontario Department of Agriculture has been issued. With regard to the two crops in which perhaps there is most interest at this early stage of the season, namely, fall wheat and clover, there is great diversity of opinion expressed by the correspondents of the Department, even in some cases by those who are located in the same districts. At the approach of winter, it will be remembered, the young growth in these crops looked very promising, though some danger was foreseen from this very cause of the plants having made too much head. The remarkably open winter, accompanied by great changes of temperature varying between extremely mild and severely cold, caused both wheat and clover to be badly leaved in many districts, especially in low-lying fields. In some cases wheat fields will be partially re-sown to barley. However, the general situation in the third week of May may be described as having been somewhat better than anticipated, taking the whole Province through.

The open winter was a benefit to some other interests, however. For live stock there was sufficient provender of all kinds except roots, though the backward spring caused an unlooked-for raid to be made upon surplus fodder. Horses came through the winter in splendid condition for spring work. Cattle are rather thin, but healthy. Sheep are coming more into favor. Swine wintered well, but there was large mortality among spring litters. Fruit trees wintered better than for many years. In some localities several plum trees died but this is attributed to the preceding two severe winters. Orchardists will have to wage a keen contest against the San José scale and other pests if the quality and quantity of their fruit and the healthfulness of the trees are to be maintained.

Spring seeding made very good progress, owing to the excellent condition of the seed-bed, and except in the more eastern counties along the St. Lawrence, it was practically completed by the middle of the month. The acreage of spring grains is estimated to be fully up to average with an enlarged area of peas and oats. Tobacco is being put in in large quantities in Essex County.

On the important question of farm labor the bulletin says: The quality and cost, and not the quantity of labor, is the great question facing the Ontario farmer to-day. The exodus of native sons to the Canadian West and to New Ontario has drained the older parts of the Province of a large number of skilled agricultural workmen, and while the tide of immigration has brought in many to take their place, few of the new-comers prove to be up to the mark from a Canadian standpoint. However, some of them are reported to be "making good," and a more hopeful tone regarding the promise of raw labor is observed in the remarks of correspondents. Rates of wages continue high; in fact, many report that farmers cannot pay such wages and succeed. Enlarged implements and the use of more horses in the field would help some out of the difficulty. Domestic servants are, if possible, harder to secure than ever before.

* * *

THE ECONOMICS OF POWER PRODUCTION.

This pamphlet of forty-eight pages deals with the economics of combustion, which subject is dealt with in a series of papers on fuels and flue gases; smoke consumers and mechanical stokers; boiler waters; producer gas and gas engines. It is issued by the Canadian Section of the Society of Chemical Industry, whose chairman is F. J. Smale, Ph. D., with vice-chairmen in Montreal, Toronto, Ottawa, and whose honorary secretary is Mr. Alf. Burton, 44 York Street, Toronto, from whom copies of this pamphlet may be obtained. The Society of Chemical Industry was founded in England in 1881, and numbers at present 4,200 members. Its chief object is the promotion of those industries in which chemistry plays a part, be it large or small, and consequently manufacturers, engineers and chemists fill its ranks. And its journal has been described as the most important periodical in the world on applied chemistry and chemical engineering. The Canadian Section, which has been in existence for four years, devoted the session of 1904-1905 to a consideration of the problems of the power house. The value and efficiency of fuel, the prevention of smoke, mechanical stoking, the improvement of boiler water, the gas engine and its adjuncts, were some of the subjects introduced by capable authorities and discussed by members of the Section.

* * *

MONCTON BOARD OF TRADE.

The annual meeting of the Board of Trade of Moncton, N.B., took place on the 29th ult. The secretary's report showed the membership of the board to be at the present time 69. President Hawke, in the course of his address, referred to the rebuilding of the Intercolonial Railway shops, reading a telegram from Deputy Minister Butler to the effect that plans for the car repair shop would be ready shortly, and that plans and specifications for the other shops would be proceeded with as rapidly as possible. These shops are of much importance to Moncton.

The meeting having proceeded to the election of officers, the following gentlemen were found to have been elected: J. T. Hawke, president (by acclamation); E. C. Cole, vice-president; D. I. Welch, secretary-treasurer (by acclamation). Council—J. H. Harris, J. E. Masters, C. W. Robinson, R. Clark, F W. Sumner, J. W. Y. Smith, Dr. C. A. Murray, W. H. Edgett; auditors, G. B. Willett, H. H. Ayer.

* * *

NORTH BATTLEFORD BOARD OF TRADE.

A special general meeting of the North Battleford Board of Trade was held on the 23rd May, Mr. J. A. Gregory presiding in the absence of the president. A number of new members were elected *en bloc* by open ballot. The committee appointed to see about the providing of a flouring mill for the town reported several parties had been seen. The Minnesota Grain and Lumber Co. would put in a mill costing $15,000 or $18,000 if a site and a bonus of $5,000 cash were given them. It was resolved to see what stock could be raised in the town for the purpose. It was moved and carried that the delegates to the Associated Boards of Trade Convention should be J. A. Gregory, R. R. Earle, J. R. Ross and J. T. Simpson, and that the convention be invited to meet at North Battleford next year. The Sub-Land office, the railway crossing, the road to the Jackfish district, timber limits preservation were all topics of discussion; also the prevention of the fur trade from being diverted to Prince Albert. Last year, said Mr. F. A. Ross, $200,000 worth of furs were brought to Prince Albert. "This could be secured for this town if we go about it in the right way."

STYLE "B"

Capacity to 30,000 Weight, 8,500

This machine in its original form, as built 20 years ago, has been on the Canadian market during that time made by several parties. Not being satisfied with the old machine, we procured from the patentee the latest improved machine, and it is this machine we offer our customers. Every machine is correctly adjusted before leaving our works.

We have a few of these machines in ck for immediate delivery.

SOCIETY OF ACCOUNTANTS AND AUDITORS.

The secretary of the Society of Accountants and Auditors, Mr. James Martin, informs us that the council of that body have re-appointed Mr. William George Rayner, incorporated accountant, London, and Mr. Harry Lloyd Price, incorporated accountant, Manchester, to the respective offices of president and vice-president of the society for the ensuing year. We have been favored with a copy of the report of council to the twenty-first annual meeting. The names of 92 new members were entered during 1905 upon the society's roll; 28 students qualified, and were elected associates, and 29 associates were advanced to the degree of fellow. The total number of members on the roll at the close of the year 31st last was 2,111, and consisted of 809 fellows and 1,215 associates, together with 87 students, who were elected prior to September, 1902. Three fellows of the society are also honorary members. There are six Canadian members three in Montreal and three in Toronto. New rules have been prescribed by the council, the object of which is to ensure one standard of qualification in the United Kingdom and colonies. Examination centres are now set up in London, Manchester, Edinburgh, Dublin; Melbourne and Sydney, Cape town and Johannesburg.

The council have given their sanction to the formation of a branch of the society for Canada, and a committee of five members has been formed for the purpose of advising the council as to the steps to be taken for the advancement and protection of the members of the society in the Dominion. The members of the committee are identified with the leading associations of Chartered Accountants in Canada.

FIRE AND MARINE INSURANCE.

On various occasions the Merchant Service Guild, of Liverpool, has suggested to the Dominion Minister of Marine and Fisheries various improvements for the greater safety of the St. Lawrence route. The latter has given notice to the Guild that pilots are all now undergoing a very thorough examination by an officer of the department in compass, rule of the road, and various other matters in navigation. With stricter supervision in this way it is hoped that much greater efficiency on the part of the pilotage service will be secured.

Referring to the recent accident to the Ogilvie elevator at Fort William, Mr. F. W. Thompson, the general manager is said to have spoken as follows: "In connection with my company's notice that owners of grain stored in the wrecked elevator must share in the general average of the loss, while our solicitors definitely advise that this position is absolutely sound in law, my company are willing, in the interests of all purchasers of grain, to join with the Grain Exchange in petitioning the Dominion Government to amend the Grain Act by making all elevators, both terminal and otherwise throughout Canada, responsible in future for all such losses. The Ogilvie Company will then undertake to pay and make good to all storers in their Fort William elevator any loss occasioned by the recent elevator accident, as if such amended act applied to this past loss. As the Dominion House is now in session, and as the seriousness of the question to all grain shippers has been made apparent by the recent accident, I would urge immediate action along this line."

THE QUEBEC BANK.

Proceedings of the eighty-eighth annual meeting of the shareholders of the Quebec Bank, held at the head office of the bank in Quebec, on Monday, the 4th June, 1906.

Present—Messrs. John Breakey, Gaspard LeMoine, Wm. Brodie, J. H. Simmons, H. B. Patton, John Shaw, Vesey Boswell, J. T. Ross, T. A. Piddington, Andrew Joseph, Archibald Laurie, A. E. Scott, W. A. Marsh, Peter Johnston and others.

On motion of Mr. Wm. Brodie, seconded by Mr. J. H. Simmons, the chair was taken by Mr. John Breakey, and Mr. R. C. Patton was requested to act as secretary of the meeting.—Carried.

The chairman read the report of the directors, and Mr. Thomas McDougall, general manager, read the statement of the affairs of the bank, as on the 15th May, 1906.

Report.

The directors of the Quebec Bank beg to submit to its shareholders, for their information and approval, the general statement showing the condition of the bank on the 15th May last and the profit and loss account at that date, being the close of last year.

The profit for the year, after paying charges of management and making full allowance for bad and doubtful debts, is therein seen to be $295,036.57. From this amount, together with the balance carried over from the previous year, two dividends have been paid at the usual rate; the yearly sum authorized towards the pension fund is taken; an amount of $17,500 is devoted to building purposes, and the rest is enlarged by $100,000. The balance of profit and loss, namely, $60,832.31, is carried forward into this year.

In accordance with the understood wish of shareholders, dividends shall in future be paid quarterly instead of half-yearly as before; and for the advantage of savings bank depositors, their interest shall henceforth be credited to them every three months.

The directors record with much regret the death of Mr. Edson Fitch, for several years a director of the bank. He was a valued colleague, and one who was very much esteemed in this community.

John Breakey,
President.

GENERAL STATEMENT, 15TH MAY, 1906.

Moved by Mr. John Breakey, seconded by Mr. John T. Ross, that the report and statements now read be adopted and published for the information of the shareholders.—Carried.

The usual resolutions conveying thanks to the directors and officers were passed, after which the vote was taken for the election of directors. The following persons were elected for the current year: John Breakey, John T. Ross, Gaspard LeMoine, W. A. Marsh, Vesey Boswell, Thomas McDougall, W. S. Paterson.

At a meeting of directors held immediately after the annual meeting, John Breakey, Esq., was re-elected president, and John T. Ross, Esq., vice-president.

* * *

—Those interested in Cobalt are elated over the reports which come to hand concerning the Tretheway mine. The west vein there was lost, and it was feared that this would prove but the forerunner of what many people have foretold all along, namely, that Cobalt ores had no depth. Drillwork, however, beyond the place where the "fault" was struck at Tretheway's shows that the vein goes on, and that the ore is as rich as ever.

* * *

—Freight traffic through the Sault Ste. Marie canals for the first two months of the present season of navigation was 7852,545 tons, compared with 7,075,953 tons for the first two months of last year, in spite of the strike this May, which brought down the total by at least 500,000 tons. During the month 8,834,407 bushels of wheat passed the "Soo," besides 6,056,553 bushels of other grain. The iron ore tonnage was 3,916,592. The lumber traffic amounted to 125,419 thousand feet, board measure, and the down-bound tonnage of general merchandise, 23,994 tons, and flour, 669,520 barrels. The principal items in the up-bound traffic were: Coal, 550,603 tons; general merchandise, 117,576 tons. The west-bound tonnage was 3,230,718 tons; east-bound, 4,621,827 tons. Vessel passages numbered 2,762, and more than three thousand passengers were carried.

By order of the Board,

The Traders Bank of Canada.
Toronto, 17th April, 1906.

H. S. STRATHY,
General Manager.

A HAPPY AND PROSPEROUS FAMILY.

There is probably no bank in the Dominion that has instituted so many innovations in banking practice as the Sovereign Bank of Canada. Its general manager was criticized by older banks for his methods of bringing his institution before the public, but it is now well known that many of the methods which were condemned in 1902 are being freely adopted to-day by the bankers who condemned them. This in itself is a justification of the methods of the Sovereign Bank, which it is now admitted have been approved of from the outset by the business and mercantile community all over the country. The success of the Sovereign Bank shows that in departing from the old and settled ways and accepted ideas of a quarter of a century ago, a wise policy was adopted.

The Sovereign Bank has adopted the "publicity" doctrine very freely, but there is one feature which has not generally been made public, but which the "Monetary Times" feels it will be interesting to the banking community generally to call attention to. In speaking to the representative of this paper recently, the general manager stated that he never hesitated to bring anything connected with the bank as a body corporate before the public, but anything that related to his dealings with the staff, he felt to be a "family affair" and consequently entitled to the privacy of the home. It was only after some pressure that he was induced to give any information regarding a feature which has been in vogue in the Sovereign Bank since before it opened its doors, namely, the "Conference of Managers."

The first of these gatherings was held in Toronto in April, 1902, two weeks before the bank commenced business. This gathering was held in a small room in the National Club, and not only were the prospective managers present, but the entire staff, the whole number aggregating 30, including the general manager. "It was with fear and trepidation that I addressed that little gathering after our dinner was over," said Mr. Stewart, "and enunciated to them my own views and the principles which I wished to govern them in the struggle for business, which was just about to begin."

The gathering was so successful that the next year all of the managers and senior officers were invited, and this time the total number present was 32, but did not include the entire staff. From these small beginnings has grown what is now an annual event, which is looked forward to by every manager and senior officer with keen interest.

The plan is briefly as follows:—

The 24th of May has been fixed upon as the day to hold the conference, as this combines the cheap holiday fares and makes a pleasant time for the visiting officers to meet in Toronto. The bank pays all the expenses for two days, including the day before or the day after Victoria Day, the idea being that as the men voluntarily give up the legal holiday to attend a conference in the interests of the bank, they are entitled to another day in lieu of this.

At ten o'clock, sharp, the general manager takes the chair, and all present are provided with typewritten memoranda of the programme. This programme is made up in advance from queries, suggestions and opinions submitted to the head office by the branch managers a week or two before the meeting. Where the questions involve points of law, they have previously been submitted to the bank's solicitors, and the written answers are given after the respective questions in the printed memoranda supplied to every one present.

At one o'clock lunch is served, and precisely at two the conference again commences its work. The printed memoranda afford ample subjects for discussion and give rise to other matters and every man is encouraged to give full vent to his views. The chairman controls those who would talk too much, and has a way of inducing those who are backward in this respect to speak out.

At six o'clock the meeting adjourns, and from that moment it assumes more of a social than a business aspect.

At half-past seven the members become the guests of the general manager at a dinner, which on four occasions was held in one of the smaller rooms of the National Club, but this year the large members' dining room was necessary to accommodate the 85 guests. A toast to the King—our Sovereign—is invariably proposed, after which the general manager addresses the gathering. We are informed that this gentleman is seen in his happiest mood when talking in a confidential strain to the loyal members of his staff. While maintaining the dignity of the position, he impresses all with the idea that he and they are comrades and brothers in more than the ordinary official respect. What the speech refers to is not given out for publication, but one of those present probably expressed the views of all of his confreres when he said to a representative of the "Monetary Times, "When our general manager sits down after one of these speeches, I feel that there is no institution in the world worth working for outside of the Sovereign Bank, and I make up my mind to go back to my branch next day and work overtime."

Other speeches follow the general manager's, and the formidable head office officials, who are looked on with a certain kind of dread by the average country manager, are introduced in a happy manner which goes far towards creating harmony throughout the whole service.

Songs, recitations and story telling form part of the evening's entertainment, and it should be mentioned that while these dinners are strictly temperate, they are not lacking in hilarity of the right sort.

The proceedings invariably terminate by all joining hands in the good old Scottish fashion and singing Auld Lang Syne.

* * *

THE SAN FRANCISCO INSURANCE.

An important conference took place at Brooklyn on Thursday of last week of representatives of the several fire insurance companies interested in the San Francisco fire and to a large extent a line of policy was agreed upon as to the course to be pursued in the payment of losses. Briefly stated, the conclusions arrived at were as follows:—

Where policies covered buildings (or their contents) which had certainly fallen before the fire, or which had been so damaged as to void the insurance under the express terms of the contract, claims under such policies should not be paid; where policies covered buildings (or their contents) which may have been damaged or destroyed by the authorities, civil or military, subsequent to the conflagration—claims under such policies should not be paid until the facts have been definitely ascertained. Where policies covered buildings (or their contents) which were probably, but not certain so damaged by earthquake as to be brought within the provisions of the fallen building clause, or where policies covered buildings (or their contents) which has suffered from shock of earthquake, but not to such an extent as to bring them within the provisions of the fallen building clause; or, where policies covered buildings (or contents) which had been damaged or destroyed by the authorities, civil or military, before fire had reached them; or, where policies covered property whose owners, by reason of the destruction of their books and records, are unable to supply the proofs of value required by the conditions of their insurance policies; in all such cases claims should be settled by a reasonable compromise: where policies covered contents of buildings which are certainly not affected by the exemption conditions of the policy—claims under such policies should be paid as soon as adjusted, subject to such deduction, if any, as may fairly be made on account of the salvage resulting from the removal of portable property from the buildings before the fire had reached them.

* * *

—Mr. E. Lancaster's bill in the Dominion House to provide for the proper protection of level railway crossings in thickly-populated parts of towns and cities has been at last, after a long discussion, passed by the committee, and it will become law. The bill provides that all such crossings must be protected by the railways, unless a special order from the Railway Commission exempts them from such obligation. In particular cases, should any person be injured at any such crossing the railway will be prima facie liable unless it can be shown that the crossing was protected, and that exemptions had been secured from the Railway Commission. The companies are given one year from July 1st next to equip the crossings.

* * *

—The power question is evidently a very live topic just now in Winnipeg, as we have intimated before in these columns. A by-law was introduced in council the other day providing for the creation of a debenture debt of $3,250,000, to be extinguished in forty years, bearing annual charges of $130,000 for interest and of $38,000 for sinking fund. Should the ratepayers approve, the by-law will come into effect on August 15th next. In the meantime various power companies are figuring on the cost of putting in electric plants for the Western metropolis. One Chicago concern, for instance, believes it will shortly be in a position to make an offer on a basis of $20 per horse-power per annum (at least this is what a newspaper says), providing a franchise can be obtained for a long term of years. Besides this, there are one or two other plans in the field of a somewhat similar character.

The Merchants Bank of Canada

Notice is hereby given that a dividend of 3½ per cent. for the current half-year, being at the rate of 7 per cent. per annum upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city, on and after

Friday the 1st day of June Next.

The Transfer Books will be closed from the 17th to the 31st day of May next, both days inclusive.

The Annual General meeting of Shareholders will be held at the Banking House, in the City of Montreal, on

Wednesday the 20th day of June

next. The Chair will be taken at 12 o'clock, noon.

By order of the Board,
E. F. HEBDEN,
General Manager.

A Blue Book recently issued by the Department of Railways and Marine shows that the number of vessels on the Dominion register at the end of 1905 was 7,325, with a total tonnage of 669,825, which was an increase of 173 vessels and a decrease of 13,013 tons register, as compared with 1904. Of these, the steamers numbered 2,654, with a gross tonnage of 363,888 tons. Taking the average value to be $30 per ton, the value of the registered tonnage of Canada on December 31st last was $20,094,145. The number of new vessels built and registered in Canada last year was 352, measuring 19,781 tons' registered tonnage. Estimating the value of new tonnage of $45 per ton, it gives a total value of $890,145 for new vessels.

MANUFACTURED BY
THE CANADA SUGAR REFINING CO. Limited,
MONTREAL

On demand of Caverhill & Kissock, of Montreal, Rodrigue Martel, engaged in the millinery business at Roberval, Que., has assigned, and is said to owe $2,150. The business was really run for the benefit of Mrs. J. B. Martel, who had previously failed in 1903.

It is reported in railway circles that the Grand Trunk Railway contemplates doing away with Brockville and Belleville as divisional points, and selecting Kingston as the interim terminus for freight and passenger runs in their stead. There would thus be only one division between Montreal and Toronto. Now-a-days the old-time necessity for divisional points every hundred and twenty miles or so does not exist, owing to the improved locomotives in use and the faster time made.

Mercantile Summary.

The Home Bank of Canada has declared a dividend at the rate of six per cent. per annum, payable on and after June 18th.

Calgary, Alberta, has had a strike on its hands, the brick-layers and stonemasons having left work in an effort to obtain higher wages. It looks as if the latter will lose their positions.

Total shipments of ore from the Boundary district of British Columbia for last week were 24,628 tons, making a total since the beginning of the year of 509,539 tons. The Granby Smelter treated 16,712 tons.

The failure is noted of Goldvogel Bros., prominent tobacconists in Montreal, having stores on St. Catherine St. West, and on St. Peter St. There liabilities are stated at $35,000, and the failure has given rise to more or less unfavorable comment.

A. F. Elsliger, running stores at Notre Dame du Lac, Que., and at Grand Falls, N. B., is reported in trouble, and through his lawyer advises his creditors he is unable to meet his liabilities which aggregate $6,800, and a settlement at 30 cents on the dollar is proposed.

The business of Dieckerhoff, Raffloer & Co., manufacturers of and dealers in smallwares, etc., Toronto, is being converted into a joint stock company under the name of Dieckerhoff, Raffloer and Company, of Canada, Limited, with a capital stock of $80,000.

The United Coal & Supply Company, head office, Toronto, capital stock $200,000, has been incorporated under Ontario laws. It will carry on the business, in coal, wood, ice, and builders' supplies. Geo. Morton and J. B. Kilgour, of Toronto, are provisional directors.

The George block at Bancroft, Ont., occupied by Weiss' jewelry store, Embury's drug store, and the new Masonic Hall, was totally destroyed by fire a few days ago. The Council, we understand, is taking up the question of fire protection, another large block having been destroyed only a few months ago.

A Vancouver paper says that this is a very active time in the dock at Esquimalt. Steamer after steamer has to undergo overhauling for a season of heavy traffic which is predicted to develop as a result of flourishing conditions prevailing all along the coast. It mentions the names of several vessels which have has thus been overhauled and repaired within the last few weeks.

The Canada-Jamaica Steamship Company, Limited, Montreal, has been incorporated with a capital stock of $350,000. It will carry on a general business as ship-owners and agents, and as carriers of merchandise and live stock, and will also do the business of towing, wrecking and dredging, and as shipbuilders, manufacturers of machinery, etc. Henry Fred. White and G. W. Marsh, of Toronto, are among those interested.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

A winding-up order has been issued in the matter of the Zill Company, of Canada, Limited, a concern which was incorporated at Montreal only last September, with an authorized capital of $20,000, to engage in the manufacture of patent medicines, etc.

Robert Armstrong, of Arrow Head, B. C., has, it is said, located near that place a large deposit of asbestos. The veins, of which several have been uncovered, range from one to six inches in width, and the mineral is claimed to be of good quality.

It is understood that the British Columbia Government is about to make an experiment in land-clearing on some land owned by it, west of Kitsalano, not far from Vancouver. Stumping and logging machines will be used. The land, when cleared, will be sold by auction.

Last year the Crow's Nest Pass Coal Company mined 831,933 tons of coal, or over half the total production for 1905 of the Province of British Columbia. About half this coal produced by the company was converted into coke. All told the value was about $2,375,000, the larger portion of which went to the United States.

The Canadian Pacific Railway is negotiating with the British and Dominion Governments regarding the renewals of its mail contract across the Pacific. If the negotiations prove satisfactory, it is quite likely that the company will make extensive improvements in their fleet of steamships running from Vancouver to China and the Orient.

Mr. E. R. Thomas, of New York, has been elected president of the Brockville, Westport & North-Western Railway, a short railroad running from Brockville to Westport in Leeds county. An extension is proposed to Sharbot Lake, a distance of twenty miles and the road has authority to extend in a north-westerly direction for 450 miles.

The Ontario Government has granted the privilege to cut the red and white pine on timber berths "D" and "E," on the Pigeon River, Thunder Bay district, to Vigers Shear & Co., of Port Arthur. The total area involved is about twenty-six square miles. The licensees have to remove the timber by April 30th, 1911, and the price they pay is 7.75 per thousand, besides an annual ground rent of $5 per square mile.

At the Cariboo Consolidated mine, Cariboo, B. C., during the past four months the main east tunnel has been pushed on a further distance of 300 ft. and connected with the old shaft by an upraise of 24 ft. and a drive of 34 ft. Several cross-cuts have also been made. Recent discoveries of ore, though showing no very high values apparently, have been deemed very satisfactory.

Chatham, Ont., ratepayers have voted against the by-law to loan $75,000 to the Keystone Sugar Company, of Toronto.

CORRESPONDENCE INVITED

54 King Street West TORONTO

Mercantile Summary.

Mr. A. A. McMichael, vice-president and general manager of the James Robertson Company, and a well-known man in hardware circles of Toronto and Montreal, died suddenly last Saturday of heart failure, aged 44. He was well-known in fraternal circles.

Development work is going on satisfactorily at the Ymir mine, in the Ymir district of British Columbia. At the 1,000 ft. level the width of ore is officially stated to be five feet, with an average value of $23. The new vein, recently discovered continues strong and well defined.

A compromise at 40 per cent. has been arranged by Michel Coulombe, general dealer at St. Leon le Grand, Que., whose insolvency we noted several weeks ago. He owes $3,800.——Liabilities of $5,000 have been compromised at 35 per cent. by Theodule Leroux, who runs a general store and butter factory at St. Armand Station, Que.

The directors of the Windsor, Essex and Lake Shore Rapid Railway Company have decided to run that line by electricity, the machinery, which is to be of the single-phase alternating current system, being furnished by the Canadian Westinghouse Co. Contract for the construction of the road between Windsor, Kingsville, Leamington and Chatham has been awarded to the Keystone Construction Company, of Philadelphia.

Here is a group of Montreal small failures. Alfred Rubbra, doing business since June 1903, under the style of the Machinery Exchange, has made an assignment on demand, and is reported to be owing $4,125.——Henry Carignan started in the grocery line last January, having previously been a clerk in Three Rivers. He is reported to have developed some weakness in habits, and has already been asked to assign.——Josephat Desroches, for the past two years a jobber in cigars and tobacco in a limited way, is reported an absentee, and a meeting of his creditors is called.

A bill has been reported by the Railway Committee at Ottawa, to incorporate the Toronto Union Station Company, which proposes to acquire property extending from York to Bay Street, and to erect a much larger station than the one at present existing; the new station to be owned jointly by the Grand Trunk and Canadian Pacific Railways. A sub-section states that lands, buildings and constructions will be available to all steam railways which now may hereafter enter the city of Toronto. The chief discussion took place over the bonds. The bill says that the company may issue bonds, debentures or other securities and secure the same by mortgage on the property. This introduced the difficulty of the security of the present bondholders of the G. T. R. A clause was inserted protecting the rights of the city in the contract made with the company.

HALF-YEARLY DIVIDEND

NOTICE IS HEREBY GIVEN that a dividend of three per cent. of the Permanent Stock of this Company has been declared for the half year ending June 30th, 1906, and that a dividend of three per cent. upon the Ordinary Permanent Stock of the Company has been declared for the half year ending June 30th, 1906, and that the same will be **payable on and after Tuesday, the 3rd of July next.**

The Transfer Books of the Company will be closed from the 15th to the 30th of June, inclusive.

By Order of the Board.

(Signed) A J. JACKSON,
General Manager.

Dated this 31st day of May, 1906.

DEBENTURES

The Trustees of the Saskatoon Public School District will shortly offer for sale debentures of $30,000 in two instalments of $15,000 each repayable in twenty instalments with interest at six per cent. Full information on application to the Secretary, William P. Bate, Box 7, Saskatoon.

Debentures for Sale

By the County of Peterborough

Tenders will be received by the undersigned to and including June 20th next for the purchase of $30,000.00 debentures bearing 4% interest per annum payable in twenty equal annual payments.

ED. M. ELLIOTT,
County Clerk,
Box 1001, Peterborough.

Peterborough,
May 23rd, 1906.

We understand that the Canadian Deforest Wireless Telegraph Company are completing arrangements for a station at Haileybury to open immediate communication with Toronto, and that supplies have already been ordered.

Mercantile Summary.

The Consolidated Light, Heat & Power Co., Limited, Toronto, is the name of a corporation which has just been granted a charter by the Dominion Government to produce and supply gas and electricity, for light, heat and power purposes, operate works, etc. Among the names mentioned are those of Albert Oakley, accountant, Toronto, and W. H. Lyon, attorney, Boston, Mass.

Mr. J. Pierpont Morgan is said to be financing another great combine with an eventual capitalization of over a billion dollars. It will be in the form of a merger of six great coal companies, and will represent the separation of the anthracite coal mines from the railroads. Definite plans have so far not been shaped, but each railroad company owning coal lands is expected to pass the same to a coal company, and then a large holding concern may be formed to take over the shares of all such coal companies.

* * *

MONTREAL LIGHT, HEAT AND POWER COMPANY.

The fifth annual report of the Montreal Light, Heat and Power Company shows a very satisfactory state of things from the shareholder's point of view. The gross earnings for the year were $3,186,102.74, as against $2,901,264.67 for the previous year, or an increase of $284,838.07. The net profits, after providing for fixed charges, interest, etc., amounted to $1,278,486.31, against $1,128,789.05 for the previous year, or an increase of $149,697.26. Out of the year's net profits dividends amounting to four per cent. have been declared, amounting to $680,000, leaving a net surplus for the year of $593,486.31, as against a surplus for last year of $448,789.05. The surplus, added to the surplus of $603,490, brought forward from last year, brings the surplus to $1,201,976.36, from which has been appropriated $300,818, leaving to the credit of surplus account $901,158. During last year there were issued $396,000 worth of the company's 4½ per cent. bonds, of which $358,000 were to repay the company 75 per cent. of the amount expended by it for extensions in the gas and electric departments, and $38,000 to provide for the retirement of $38,000 debentures of the Royal Electric Company. There were also issued $64,000 of the company's 5 per cent. bonds to retire the remainder of the outstanding bonds of the Standard Light and Power Company. There has been a large increase in the demand for power, so it has been decided to develop during the present season the surplus water of the Soulanges Canal, the rights to which the company acquired through the purchase of the Provincial Light, Heat and Power Company. The power plant will have an output of approximately 15,000 horse-power, and, it is expected, will place the company in a position to supply all demands made upon it.

Standard Life Meeting.

The 80th Annual General Meeting of The Standard Life Assurance Company was held in Edinburgh, on Thursday, the 10th of May, 1906.

The following results for the year ended 15th November, 1905, were reported:

Amount of assurances accepted during the year 1905, for which 6,248 policies were issued...........	$12,338,985.60
Of this amount there was reassured with other offices...	857,764.60
Leaving Net amount of New Assurances for the year 1905.........................	$11,481,221.00
Corresponding Premium Revenue on New Policies during year 1905:	
Annual Premiums..........	$501,188.80
Single Premiums...........	109,130.14
	$610,318.94
Less Premiums on Amount Reassured......................	74,898.00
Leaving Net Premium Revenue on New Assurances.....	$535,420.94
Amount received in purchase of Annuities during the year 1905 (for which 180 Bonds were issued).........	$786,278.13
Claims by Death under Policies during the year 1905, inclusive of Bonus Additions......................	$3,133,578.53
Claims under Endowments and Endowment Assurances matured during the year 1905......................	$571,663.00
Subsisting Assurances at 15th November, 1905, exclusive of Bonus Additions............	$140,647,469.67
Accumulated funds...........	$55,401,612.60
After deducting Current Liabilities.	
Revenue for the year........	$7,128,586.27

At the same meeting the report of the Directors upon the Fifteenth Quinquennial Investigation of the Company's affairs as at 15th November, 1905 was submitted, and it was resolved to adopt the recommendation of the Directors that the Reserves of the Company should in several ways be strengthened, and that provision should be made for valuing the Company's liabilities under Assurance Contracts upon the Om Table (except East and West Indian risks), with interest at 3 per cent. and 3½ per cent., and for valuing all Annuity business on the Oa Table, with 3 per cent. interest.

This step involved the absorption of so large a sum that the Directors have found it necessary upon this occasion to pass the Bonus.

The Directors' Report will be issued shortly.

A PROSPECTUS.

What Banking is Coming to in Canada.

The following on a note-paper sheet came to us through the post without any indication as to its author. We think it good enough to print, as a satirical intimation of the vagaries that some Canadian banks are indulging in.

The Limit Bank of Canada; capital, $1,000; incorporated 1906; rest, $50. Head office, Brantford, Ont.; branches throughout country. A general banking business done; special attractions offered. Current accounts opened without formalities of any kind and interest allowed at the rate of five per cent. on maximum daily balance. No objection is made to overdrafts. Special deposits received and interest allowed at the liberal rate of ten per cent. per annum, made up and added to principal at the close of each month.

Loans—To any amount granted without delay or security at three per cent. per annum. Should the borrower not desire to meet his note at maturity the bank will gladly hold it over for any length of time, free of charge.

Should our customers or their wives desire to leave their dogs or children in safe keeping while transacting business in the city, the bank staff will gladly take charge of them. The tellers' boxes form safe play rooms and the tellers will be delighted to have the little ones and their canine pets and to provide them with new cents to swallow, or a bundle of clean $10 bills to play with.

Free Lunch—In order to be "up with the times," the bank has decided to open at all its branches, from 12 to 2 p.m., a free lunch counter. Customers are cordially invited to bring their families and friends. All the delicacies of the season will be provided, and the best of liquors and cigars. A stove will be provided (in winter) and customers will be welcome to sit around it and smoke, spittoons to every chair; eating tobacco free.

Ladies' Rooms—A luxurious suite of reading-rooms, also writing and retiring rooms, are in connection with every branch. Stationery of every kind provided. An especially smug-faced junior clerk detailed to lick the stamps, which the bank also supplies gratis.

Farmers will find the bank rooms a great convenience as a corn exchange. No sort of objection to samples of any kind of farm produce (live stock excepted) being left in their rooms.

A monthly paper, full of nice little stories and stale jokes will be imported from the United States, name of the bank inserted on same and posted to any address upon application free of charge.

Office Hours—9 a.m. to 6 p.m.; Saturdays, 9 a.m. to 10 p.m.; Sundays, some of the staff will be in the office so that collections may be deposited. A hearty welcome to all.

TORONTO MARKETS.

Toronto, June 7th, 1906.

Chemicals and Drugs.—While no new development has taken place on the market, it keeps its steady tone and the volume of business being carried on is fairly large. Quinine and opium have made no appreciable change in tone during the last few days. Carbolic acid is dull and so are the iodides. During the month there has been little, if any, alteration in the general position of the English chemical market. There has been a good steady demand for most chemicals, both for home trade and export, and values have been well maintained. Business doing is, however, mainly for near delivery, buyers feeling that prices are now fully high and not inducing for heavy purchasing. In heavy alkalies the position is perhaps a little slower. Ammonia alkali is brisk, and caustic soda steady, but new business in bleaching powder is not plentiful, and chlorates are offering rather more freely from seconds hands. Soda crystals continue in good demand. The export returns for the first four months of this year as compared with the corresponding period of 1905 show in bleaching materials an increase of 2,125 tons or £8,873, and in soda compounds an increase in weight of 2,718 tons but a decrease in value of £13,072. In tar products this has been an active month. Solvent naphtha continues in good demand at improved prices, and Toluole is selling well at full figures. Benzole is, however, barely steady. In creosotes a good business is passing, but price remains low. Crude carbolic has less enquiry, and business doing is at reduced figures: crystal carbolic is dull, but liquid is moving off well.

Dry Goods.—Taking the month of May as a whole, business in general dry goods, especially in the lines of a seasonable character, was hardly so brisk as might have been anticipated. This probably is attributable to the cool weather, which prevailed for the most part and to the holding over of stocks from the same cause last year. However, there is a better movement now in the branches affected, so that on the whole perhaps little complaint need be made. Carpets and house furnishings have, we are told, moved out rather exceptionally well, and as these are regarded as luxuries, they are as good an indication probably of general prosperity and good business conditions as can be found. Payments are being met satisfactorily and representatives of the wholesale houses in country districts report the enquiry promising.

Flour and Grain.—Flour is somewhat stronger in tone than it was, though actual business is on the dull side. Millfeed still keeps high-priced, though an easier feeling has developed on account of pastures becoming more available. Oats are quite strong in tone.

Groceries.—Sugars of all grades have gone up 10c. per cwt., and the enquiry is noted to be a trifle brisker this week. However, the movement is not a heavy one as yet by any means, and probably will not become so until the preserving season sets in. Valencias are very high, being quoted now at 6c. Other dried fruits have made no specific change, but prunes are very firm indeed. Almonds sell at 13c. Apricots are out of the market. No further development has taken place in canned goods, which are very firmly held.

Hardware.—All lines of building material are moving out rapidly. Orders for such are large and frequent, and prospects for a continuance of the present large volume of trade are promising. There is continued strength in the iron market, as well as in several of the other metals, though tin has slumped. An English advice just to hand says that there has been a good trade in pig iron during this month, and prices have improved moderately, say some 6d. to 1s. per ton. Latterly there is some falling away in the volume of business, but values all round remain steady, and there is no want of confidence in the position. The manufactured iron trade is in satisfactory condition, works being well supplied with orders: rail makers are especially well placed. Copper, after falling 30s., has improved again, and is at present firm at slightly above the quotation of a month ago. Tin has had a most extraordinary month, advancing some £20 to £203 during the first fortnight, and since falling to £188 10s. Spelter has steadily gained 12s. 6d. per ton, and is firm. Lead has advanced about 20s., and is at present strong.

Hides and Skins.—Spring hides are now coming in more plentifully. Trade is good, but without special feature.

Provisions.—Cheese prices fell last week, but a brisker trading is the result. The business may now be said to be more on an export basis. The quality of offerings has improved notably the last week or two. Butter is still very high-priced, too high for export purposes it is said. On the local market it shows little change. Eggs retain their firmness, and, indeed, have made another slight advance.

Wool.—The offerings are more liberal and they are being taken up at the old prices. There is very little of special note to be commented on under this heading at the present time.

—A lady going from home for the day locked everything up well, and for the grocer's benefit wrote on a card: "All out. Don't leave anything." This she stuck on the front door. On her return home she found her house ransacked and all her choicest possessions gone. To the card on the door was added: "Thanks; we haven't left much."
—Sacred Heart Review.

OVER $500,000 A MONTH

is the average of new business now being written by the Great-West Life Assurance Company. Over **$25,000,000** of Insurance is in force.

This for the reason that the insuring public are recognising more and more that a Great-West Policy offers all that can be desired in Life Insurance—low rates, high profit returns, and the safeguard of careful, conservative management.

Ask for rates at **your own** age.

MONTREAL MARKETS.

Montreal, 6th June, 1906.

Ashes.—Supplies are coming in very slowly indeed, and it is somewhat difficult to establish regular quotations, as it is understood that some buyers have been offering more than $5.50 for first quality of pots. Pearls are dull, and are quoted at about $6.75 per cental.

Cements and Firebricks.—Good business is reported in these lines. We quote Belgian cement at $1.70 to $1.90; English, ditto, $1.90 to $2.05; Canadian, $1.90. Firebricks are worth from $17 to $21 per thousand.

Dairy Products.—Export business continues fairly active, and last week 13 steamships took out 30,708 boxes of cheese, and 9,262 packages of butter, figures somewhat in excess of those for the previous week. Cheese values have shown a material falling off since a week ago, and fine Western makes are quoted at the moment at 11⅛ to 11¼c., and Easterns about 11c. Fine grass butter is quoted in the city at 20½ to 21c., though it is claimed that more is being paid in some parts of the country.

Dry Goods.—While the larger city department stores are said to be doing a good volume of trade, the smaller suburban dealers are disposed to complain of somewhat slow sales. Taking sorting business and fall orders together wholesale dealers report a fair aggregate of trade. General collections are favorably spoken of, and some of the larger houses report 90 per cent. of customers' paper as being met on the 4th June. Some manufacturers of blankets, sweaters, and other woolens have given notice of a withdrawal of quotations.

Groceries.—The distribution is not marked by any special activity at the moment. Sugar refiners report a moderate demand for sugars, and factory quotations are about steady at $4.10 for standard granulated in barrels, ranging down to $3.65 for low grade yellows in bags. In teas there is nothing of special interest to say. Some small lots of early picked Japans have reached here, and have sold at from 23 to 28c. June pickings, which are the goods mainly bought for this market, are said to be improving in leaf quality. In prices of Ceylons and Indian teas there has been no recent variation, the market holding steady. The firmness lately noted in dried fruits is fully sustained, owing largely to unfavorable crop prospects. Evaporated apples are held at 13c. in jobbing way; gallon apples, $2.60 to $2.75.

Hides.—Lambskins are firm at last week's advance, being quoted at 20c. each. No. 1 beef hides are quoted at 11½ to 12c. per lb.; calfskins, 15c. for No. 1, and 13c. for No. 2. The market is not particularly active.

Leather—While boot and shoe orders are coming in well, some of the larger factories have not completed stocktaking, and active cutting of leather for fall footwear is hardly yet begun. Leather men, however, report good export enquiry for both sole and splits, the latter readily realizing 26 to 28c., while mfrs. No. 2 sole is stiff at 26c. Buff, 16½c.; pebble, 15½c.; Western splits, 27 to 28c.; Quebec, ditto, 24 to 25c.; glove grain, 14 to 14½c.; harness, 33 to 34c.

Metals and Hardware.—Active demand is still the general report. Iron values are firmer and from 25 to 50c. more is being asked for pig-iron. Bars are steady at $2 to $2.05; bar steel, $2.15 to $2.17½; round machinery steel, $2.75; cast steel, 7¾c. Wire, nails, etc., are unchanged. Boiler plate, $2.30 for quarter-inch and over; iron pipe, $4.38 per 100 ft. per inch; Canada plates, $2.60 for 52's; black sheets, $2.40; ternes, $6.85; coke tin, $4; charcoals, $4.25; galvanized sheets, $4.20 to $4.45. Lead is firmer at $4.40 to $4.50; copper, steady, at 20½ to 21c.; spelter, firmer, at 7 to 7¼c.; antimony is now quoted up to 29 to 30c.

Oils and Paints.—As anticipated last week the price of window glass has been reduced to $3.50 per 100 ft. for first break. Turpentine is also easier at 88 to 90c. as to lot; linseed oil, 53 to 54c. for raw, and 56 to 57c. for boiled, with a slightly firmer tone to the market abroad. All other lines are unaltered in price.

Wool.—Importers in this line report a very light volume of business, indeed, but prices are very firmly held. We quote, Capes, 20 to 24c.; fine washed B. A., 45 to 46c.; scoured, ditto, 52 to 55c.; pulled, domestic, 30c. per pound.

* * *

For the past thirty odd years one of the most prominent general store firm in the Gaspe Coast has been that of J. & W. Baker at Anse du Cap, below Percé. They have been asked by Thibaudeau Freres & Co., Quebec, to assign, and Lefaivre & Taschereau, accountants of that city have the estate in hand. They have been more than usually slow in their payments during the past six months, it is true, but their failure does not seem to have been anticipated. Impossible to learn as yet the amount of their liabilities.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and, at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

CURIOUS CONDITIONS IN SAN FRANCISCO.

Among the many thrilling and memorable experiences told by survivors of the disaster few, says "Leslie's Weekly," have combined vividness of description with brevity in detail to the extent found in the story of Dr. Dorothea Moore, wife of Professor Moore, of Berkeley, whose home on Washington Street, San Francisco, was swept away by the flames with all its contents. Writing from a temporary retreat to a friend in Los Angeles, Dr. Moore says:

"Our little house in the garden on the hillside met the earthquake with an adaptable little shiver of its timbers; it was well built forty years ago. As soon as it was light we went over the neighborhood. In Chinatown the brick walls had fallen outward, and while the mothers and babies were already gathering in chattering groups in Portsmouth Square, the old town behind them was like a doll's house of empty rooms, having only three sides.

"When we met our neighbors in little, untidy, scared groups at the corners and discussed small breakages, none of us had the shadow of an idea that all these absurd "things" of which we were so proud and careful would be taken away in one splendid sweep of noise and flame, teaching us once and forever that life alone is enough, and courage and kindness are its sole valuable assets.

"Many eloquent words will be written of the tragic days, and also of the wonderful days of recuperation that have already begun. Some of the street scenes are not easily forgotten, so close is laughter to tears. The little Italian family who preferred to sleep cold outside on the church steps, with the puppy, than warm within, without him. The gentle old man, a common workman, who sits night and day beside his hysterical wife at the temporary maternity hospital, who can neither eat nor sleep, but who rises to help others. The little four-year-old Spanish girl, who is carried from bed to bed among the patients as the only interpreter to help nurses and doctors to discover where the worst hurt is among these poor foreigners. The two old ladies—having had no water for two days, and, finding it turned on—rushing out into the streets and calling out to all, 'Water, water! Come all of you and share; we have water!'

"The pathetic signs hung on projections of burned houses, on a bit of timber or a door, saying where 'mother' is, or where 'they have taken the baby.'

"The too-shrewd elderly Jew who, seeing the approach of officials with power to pre-empt untenanted houses, frantically tears down his sign of 'To Let!' and declares with tears that "it is yust rented to a friendt.'

"Groups of homeless people in the blessed square with a great grand piano in the middle and somebody always ready with a song or solo.

"People picking up the bricks of their fallen chimneys almost before they are down, and, following fire ordinances, building little fire-ovens on the edge of the gutter, and cooking one hot dish or the baby's milk.

"Staid and elegant men on personal errands impressed by the soldiers and set to work to sweep a whole dirty block before being allowed to go.

"A big man with the red badge of the relief service discovered digging out blue china plates from the ashes.

"The girl who climbed up the balusters of the ruined stairs of the public building in which she was employed to the third storey, and lowered all the records to the floor and to safety; the delicate man who brought the plans of the new university library—an enormous weight—down eleven flights of stairs and to a place of safety."

SALMON THAT LEAP.

Many have seen the photograph of the "leaping salmon" exhibited in the Intercolonial Railway office window, in the King Edward Hotel, Toronto. And many people who had never heard of leaping salmon, doubted the genuineness of this product of the photographic art.

Mr. D. G. Smith, Fishery Commissioner of New Brunswick, tells the story of how he secured the picture on a New Brunswick river:—

"One day in early August five years ago, when visiting the Big Sevogle, a tributary of the North-West Miramichi, I observed a large number of salmon attempting to leap up over the 9 feet perpendicular fall a short distance above the Square Forks. I timed the leaps and counted 33 in 45 minutes. The scene suggested a unique photograph, so the next week found me back to the spot with my old 5 x 7 Blair camera and 16 Stanley plates. I made a raft of three cedar sleeper logs by battening them together with short boards nailed to their upper sides, and by means of two suitable lines leading from the up stream end, I had my assistants draw it, with myself seated on it with the camera on its tripod in front of me, as near to the fall as I dared to approach, and fasten it there. The salmon were not leaping so plentifully as the week before, but I snapped nine of my sixteen plates the first afternoon, and the remaining seven the next. It was all guess work with a mechanical focus, and although I had, on developing them, but one perfect picture out of the sixteen plates, I felt that the result was worth going some forty miles to get."

DECAY OF THE BRITISH IRON TRADE.

Mr. J. Stephen Jean, who for a long period was secretary of the British Iron Trade Association recently published a book on the Iron Trade of Great Britain. One very interesting point with which he deals is the decay of the finished iron trade and the booming of the steel industry.

In 1882, he says, the world produced 9,680,000 tons of finished iron, and in 1902 the output was only 1,580,000 tons, Great Britain's share falling in that time from 2,841,000 tons to 965,000 tons. But the place of finished iron has been largely taken by steel; for whereas in 1882 only 7,000,000 tons was the extent of the world's production of steel, it is now more than 36,000,000. A chapter on the iron-making conditions in other countries as compared with those in Great Britain explains the phenomenal growth of the iron and steel industries in the United States and Germany, and indicates, from Mr. Jean's point of view, how it is that Great Britain, which was first in importance in the manufacture of pig-iron in 1880, now takes third place.

The question of "dumping" is discussed, and the author affirms that the agitation which has been carried on in Great Britain for some time against it has been partly founded on a more or less imperfect ascertainment of essential facts. An illustration of the conditions under which dumping is carried on is afforded by the experience of the German Wire Rod Syndicate, which comprises 82 works. In a recent six months they supplied 22,307 tons to home consumers, and on that made a profit of $293,280, while on the 19,524 tons exported there was a loss of $214,860. The German consumers were charged $62.40 per ton, whereas only $35 per ton was obtained for the quantity exported. In Germany there are at least 46 different syndicates in the coal and iron trades alone.

The Alberta legislature is introducing a bill providing for the expenditure of $250,000 in bounties for the assistance of the beet sugar industry, to be shared between the refiners and growers.

We understand that the Town Council of Berlin, Ont., have agreed to give the Bell Telephone Company a five-year exclusive franchise on condition that the wires in the centre of the town are placed underground before December next.

Managers and Underwriters

The Frontenac Cereal Co., Limited, of Kingston, Ont., is to be liquidated, a winding-up order having been applied for by the Ontario Bank, with the consent of the directors. The company was incorporated in May, 1902, under Ontario laws, with an authorized capital of $600,000, to take over the Frontenac Milling Co., and the Kingston Elevator & Transit Co., also subsequently actively engaging in the manufacture of breakfast food, known as "Orange Meat." It has been patent that the concern was over-capitalized from the start.

Port Elgin, Ont., ratepayers have decided by a large majority, in favor of installing a system of waterworks to cost $30,000. They also voted to guarantee a loan of $10,000 to Stevens, Hepner & Co., who will make large extensions to their brush and broom factories.

Montreal City Council has been suffering the throes of a long-winded discussion as to the advisability of giving the Street Railway a fifty years' franchise. The upshot was that on Monday last Alderman Carter introduced a by-law, extending that company's franchise for thirty-two years, making a fifty-years franchise from the present time. The motion was lost on the first reading, a thing which does not often happen. However, in spite of this drastic treatment, perhaps, indeed, because of it, the matter is likely to come up for further consideration.

The Crown Life Insurance Company
Head Office: Toronto, Canada.
Offers These Advantages to Insurers:
Lower Premium Rates than those charged by most other Companies.
Policies Indisputable from Date of Issue.
Loan Values Guaranteed after Two Years.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their circular dated June 2nd, 1906, said:—

During the last six months the stock market has been entirely dominated by monetary conditions. The demands for various purposes, such as new enterprises, trade activity, stock and real estate speculation and, finally, the San Francisco fire, have all tended to the practical exhaustion of monetary supplies. Fortunately we have been able to make extensive borrowings abroad, and the danger arising from this strain upon our credit system has been happily averted. Some of these demands have been satisfied, temporarily at least, and the prospects are that during the next two months easier conditions will prevail.

At this juncture, however, come the demands of the railroads, which have been postponed as long as possible. These have been unusually heavy in the past, and promise to be very large in the future. Our railroad system is still behind the country's requirements, the expenditures of the last four or five years having been insufficient to meet national growth.

Business conditions continue generally satisfactory. There is more or less complaint of high prices, and some recession in values of commodities as well as securities would, no doubt, be beneficial. But until supply overtakes demand and credit has been strained to the utmost—neither of which contingency is yet in sight—it seems useless to expect any important reaction.

The immediate outlook of the market is for moderate activity. With basic conditions still sound the various cliques are sure to find favorable opportunities for brief manipulation. No prolonged movement, however, upwards or downwards need be expected while present conditions last. Although the investment demand for the time being has been checked by high prices and speculation, still it is sure to revive later on if unfavorable conditions do not intervene. The industrial dividends on June 1st aggregated nearly $22,000,000, or $2,000,000 more than a year ago. So long as business continues active funds will accumulate for investment, and whatever is held back now must come into the market later on. A period of rest will serve to check speculative excesses and permit a gradual and healthy readjustment. Should prices recede somewhat to a lower basis no uneasiness need be felt. On the contrary, on pronounced breaks good stocks will be a purchase should present conditions last. In case of favorable crop reports we may see still higher prices. What the market most needs is the building up of our bank reserves and strengthening of our credit system. The strain here has been prolonged and its readjustment should command the attention of our leading bankers. It is all very well to depend upon foreign assistance, but we should look to it that our house is in good order at home.

* * *

AN HONEST BROKER.

Shakespeare says "No legacy is so rich as honesty," and upon this high authority we may pronounce Edwin S. Hooley, of New York, wealthier to-day than he was before he paid more than a million dollars to discharge old indebtedness. Three years ago the Stock Exchange firm of which he was the head went under, with liabilities amounting to upwards of two millions. He compromised with his creditors by paying fifty cents on the dollar, promising to pay the remainder so soon as possible if he were permitted to resume business. How little such an agreement is worth abundant human experience has illustrated sadly; the man with empty pockets who says he will pay a million dollars when he makes it may not be such a rarity, and perhaps he may feel at the time that he will keep his pledge. In reality, however, he rarely recuperates his fortune to that extent, and when he does he with much greater rarity observes his obligation to creditors. It is so easy to evade; so hard to pay. But Edwin S. Hooley is a man of moral heroism, and on Saturday he sent cheques to all his creditors, paying them in full, including six per cent. interest. When there is so much swindling and scalawaggery aired daily in the press, so many sinuous devices to sneak out of paying just dues, it is refreshing to note examples of this sort, which usually receive little publicity in comparison with fraudulent transactions.

Shakespeare is right. Edwin S. Hooley is richer to-day in all that constitutes real wealth in contradiction to perishable wealth than he was a week ago. For he has triumphed over any temptation to stuff his pockets by skinning his creditors.—Troy Press.

Tot'l Led. Assets	$8,846,658 42	100%

Mercantile Summary.

The Canadian Foundry Company proposes to establish a large car-wheel works at Fort William, Ont.

The ratepayers of MacLeod, Alberta, have voted very decisively in favor of expending $95,000 in putting in new waterworks.

The Ogilvie large tank elevator at Fort William two or three days ago partially collapsed, and is now leaning at an angle of 20 degrees towards the river. The part of the building which is made of wood and steel is said to be practically a wreck. The elevators capacity is half a million bushels and it was nearly full of wheat and oats when the slide took place. The building cost a quarter of a million dollars and was erected by a Chicago firm. About 80 per cent. of the wheat will likely be saved. It is supposed that the outside row of piling nearest to the river may have sprung away owing to dredging operations. The tanks held together.

A dispatch to Montreal from Rossland, B C., dated 26th May, states that development work is going on at the Jumbo mine very satisfactorily. A new glory hole is being opened on the surface, which, it is thought, will yield between 30,000 and 40,000 tons. A diamond drill is at work on the second level, and the outlook is that it will pierce some large ore shoots. Work on the Velvt-Portland has energetically been resumed. A drift is being run along the ledge for the purpose of tapping the main ore shoot. A diamond drill is at work exploring some ground which is thought to be rich. A force of twenty men are at work, but this force is to be doubled. The shipments for last week were: Centre Star, 2,880; Leroi, 2,400; Leroi No. 2, 450; Jumbo, 130 tons. Total for the week, 5,950 tons, and for the year, 131,565 tons.

The Metropolitan Life Insurance Co.

(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policyholders and addition to Reserve.
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

FUEL FOR WESTERN CANADA.

The Regina delegates to the Convention of Associated Boards of Trade of Western Canada held at Edmonton this week, raised a very important question when they introduced a resolution favoring the remission of taxes now collected upon denatured alcohol. The resolution calls attention to the seriousness of the fuel problem in the West, and points out that prices for wood, coal, coal-oil, gasoline and other materials which may serve as fuel, have been steadily rising during the past few years. It also mentions the recent action of the Congress of the United States in passing a law which frees from taxation denatured alcohol to be used for industrial purposes, a step which the British Government cannot ignore. The Germans have long recognized the importance of cheap alcohol for arts and manufactures.

The solution of the fuel problem in the West of Canada would be a boon, the effects of which it is difficult to estimate. Leaving aside the benefits which would be conferred upon individuals by the reduction in the cost of fuel for heating purposes in stoves and furnaces, there is the larger question of power production to be considered. A great handicap to the industrial development of the West along the line of manufacturing enterprises, has thus far been the lack of power. The production of power has always been an expensive undertaking on account of the scarcity of fuel. From Fort William to Calgary on the main line of the railways, and for a great distance to the north, little or no coal is mined, and there is an almost total absence of timber. At Banff, Lethbridge, Edmonton and other points in Alberta, and in a few districts near the United States boundary in Saskatchewan and Manitoba, coal mines are being worked, but the heavy charges for freight make the cost of delivery at a given point in Manitoba or the new provinces very high.

The abolition of the inland revenue tax now collected upon denatured alcohol should enable this substance to be produced on a very extensive scale. It might almost be said that wood and coal would be supplanted. It has been calculated that if the tax on denatured alcohol were removed, an ordinary room could be heated with a spirit-burning stove at less cost than with an ordinary coal stove, which burns anthracite costing $6 per ton. When it is considered that anthracite costs $10 to $14, according to quality, in the Province of Saskatchewan the annual saving even in the domestic fuel bills would be enormous. The most important feature of this subject as far as the West is concerned, is that the raw material for the manufacture of denatured alcohol can be produced in the three prairie provinces in practically unlimited quantities. An acre of land will produce 300 bushels of potatoes, and from that quantity say 250 gals. of commercial alcohol can be procured; but with the use of a special grade of white potato intended chiefly for the production of alcohol, it is alleged that the output could be increased to more than 500 gallons of alcohol per acre. Much depends, of course, on the proportion of starch in the wheat or potatoes. With the enormous areas of fertile land now under cultivation in the Canadian West it is difficult to imagine how much commercial alcohol could be produced. It is not out of the way to say, however, that it is possible to supply this fuel for power to much of Western Canada. This view does not take into consideration the fact that decayed, frozen, and other unmarketable kinds of potatoes can be used for the purpose.

The market for frozen and rejected grain will also be opened to the development of alcohol production. It is in this connection that the subject has come under the notice of the Department of Agriculture at Regina. The Deputy Commissioner of that Department made enquiries in 1904, and has given out the statement that frozen wheat would be worth 78 cents a bushel at Hamilton, Ont., on the basis of 25 cents per gallon for alcohol. It is contended, in other words, that alcohol can be produced at Regina for less than 25 cents a gallon on the basis of 52 cents per bushel for feed wheat, the prevailing price at that point at the present time. We are not prepared to go as far as this, in stating what can be done to-day, but we learn from Professor Shuttleworth, of Toronto, that the price at which French chemists have aimed is 25 francs per hectolitre, not far from 23 cents per gallon, and if they can get it down to that price it will afford an excellent prospect as fuel. "If you can get good alcohol," adds the professor, "you have a good fuel for power, it is better than gasoline, because safer; better also because it furnishes more available power, and gives off no offensive odor. At the present time in Canada, we cannot expect alcohol to rival gasoline and petroleum and coal for fuel, but these substances show a tendency to go higher. In Germany and France, however, alcohol is used as fuel in many minor directions, such as propelling cycles and motors and small engines or for household purposes.

Meanwhile the Deputy Commissioner of Agriculture of Saskatchewan, Mr. J. R. C. Honeyman, has prepared statistics and other information on the subject for the Territorial Grain-Growers' Association, and that body will probably take some action in the matter. The commendable action of the Regina Board of Trade in introducing the subject at the important convention in Edmonton this week brings the question before the public in concrete form. A topic which has long engaged the attention of the Emperor of Germany, and upon which he has had repeated conferences with King Edward VII, as one of great moment to the small German farmer and the British agriculturist as well, is one which may with great propriety attract the observation and study of the Canadian cultivator.

The following is the resolution:—

> Whereas, the problem of obtaining cheap and economical fuel for domestic and manufacturing purposes is a serious one at all times with the people of Western Canada. and,
>
> Whereas, the tendency of prices for wood, coal, coal-oil, gasoline, and other materials which may serve as fuel has been steadily upward during the past few years, and there is no prospect of their being reduced in price in the near future, and,
>
> Whereas, the Congress of the United States has recently passed a law freeing from taxation denatured alcohol to be used for industrial purposes, and,
>
> Whereas, alcohol can be manufactured at a cost of about ten cents per gallon, and there are in this country many waste products of the farm, from which alcohol can be manufactured, and the adulterating or denaturizing done at the various factories under the supervision of an Inland Revenue officer,
>
> Therefore, this convention of Associated Boards of Trade of Western Canada urges upon the Dominion Government the advisability of introducing legislation at the next session of Parliament for the abolition of all taxes now collected upon denatured alcohol.

* * *

EAST-BOUND TRAFFIC.

An occasional correspondent in Montreal sends us a clipping from a daily journal of that city referring to the recent speech of James J. Hill. That western railroad man and distinguished Canadian, besides a disquisition on low-grade railway tracks, tells Eastern Canadians that his prescription for them, looking ahead as he does, is the construction of the French River canal, which would connect the Georgian Bay with the Ottawa River via Lake Nipissing and the Mattawa. This enterprise, it will be remembered, was a favorite scheme of Mr. Tarte, the former Minister of Public Works at Ottawa. In the opinion of Mr. Hill, it would, if completed, make Montreal into Buffalo and New York in one, eliminating the distance between. "Montreal will be as near Chicago as Buffalo, and much nearer Liverpool than New York," says the "Witness." "But if Montreal is to be anywhere on the ocean, she must have a thirty-five foot channel. Without that she will soon be nowhere. Many an old harbor has ceased to be a seaport at all through the increase in the size of sea craft; and Montreal will soon cease to be unless she has a thirty-five foot channel. The opening of the French River canal would make this river bottom canal a necessity."

The development of water traffic on this continent within the memory of men still living, is one of the surprises of modern life. But it is not only on the route through the Great Lakes from Duluth and Chicago to Buffalo that we must look at the modern volume of traffic. Says our correspondent:—

"What do you think of Jim Hill's idea of Montreal and the Ottawa route? It has long been my dream that Georgian Bay water should come to Montreal via Ottawa,—and mayhap, old as I am growing, I may stay long enough on earth to see it. In my opinion, it's bound to come sooner or later."

* * *

EXTRAORDINARY RAILROAD DEVELOPMENT IN THE WEST.

Canadians have become accustomed of late to hear of the extraordinary growth of the West, and its transportation facilities. But when the plans of the three chief railway companies, to say nothing of the Hill lines, are carefully looked at in detail, and it is realized that a large part at least of these is to be carried out during the present year, one's astonishment grows at the tremendous change which is now converting hundreds and thousands of miles of what even yesterday was a desolate tract of "nowhere," into a farming country gridironed with railway track. Within the territory roughly bounded by Winnipeg, Prince Albert, Edmonton, Lethbridge, and Regina, something like five thousand miles of new railway is to be completed before next winter. Estimating the expenditure per mile at an average of $20,000—and this figure is likely to be exceeded—the outlay will run into a hundred million dollars. And this represents only one summer's work. True, it deals with great distances of through lines, but the construction of branches will almost surely keep the contractors and their men "going" for many seasons more, so that it is safe to say the several railways between them will be spending something like $50,000,000 per year in new tracks in Western Canada for the next few years.

A western correspondent of the Toronto "Globe" writes interestingly of some of the work to be done this year, in a manner, indeed, which brings this marvellous development into concrete form. Summarized, his list of new railway constructions is as follows:—

Canadian Pacific Railway Lines.

1. From Sheho, the present end of its Yorkton branch, to Saskatoon, 185 miles.

2. The C. P. R. line at present ending at Strassburg continued to meet the Sheho-Saskatoon extension, 75 miles.

3. From Saskatoon west to Daysland, where it meets a spur of 53 miles running out from Wetaskiwin, about 250 miles.

4. From Tuxford, north of Moose Jaw, probably northwest to the Elbow of the Saskatchewan, on the way to meet the new C. P. R. coming east from Lacombe, and already built out to Stettler. Total length of line about 270 miles, of which, at least, the portion to the elbow will be constructed this summer. When complete this line will be an almost direct route to Edmonton.

5. From Sheho to Prince Albert, another continuation of the Yorkton line, though this may not start this summer; about 200 miles.

6. The C. P. R. plans also a railway from Swift Current northwest to a point on the proposed Lacombe-Moose Jaw line; about 200 miles.

7. A cut-off from the Sault line to some point on the Arcola-Regina branch, so that the 40-mile jog from Moose Jaw back to Regina may be saved for passengers going up into the Saskatoon and Prince Albert district.

Canadian Northern Lines.

1. The main line is already completed between Winnipeg and Edmonton, 827 miles, on the one hand, and between Winnipeg and Port Arthur on the other, 439 miles.

2. The C. N. R. line from Dauphin to Prince Albert, 320 miles, is already running to Melfort, 302 miles, and through trains to Prince Albert will begin on June 3.

3. From Edmonton northwest to Morinville, about 40 miles. This is the beginning of the section that will ultimately go on to the mountains and through to the coast.

4. The C. N. R. has recently connected its line to Hartney with Virden, on the C. P. R., giving that place and points west a double service east and south; about 40 miles.

5. From Swan River on its Prince Albert branch to run between the two existing C. N. R. lines, and to connect eventually with the main line at a point a few miles east of Battleford; 375 miles.

6. Present line to Prince Albert to be continued to connect with the main line a few miles east of Battleford; 150 miles.

7. A C. N. R. line was located last winter from Erwood, on the Prince Albert branch, to Pas Mission, better known as "The Pas," on Cedar River. This will be the most northerly piece of rail in Canada, and will doubtless be ultimately continued to the Hudson's Bay; distance from Erwood to the Pas, about 100 miles.

8. There is a charter for a railway running from Prince Albert to Battleford and Edmonton, on the south side of the Saskatchewan, and it is surmised that the C. N. R. is at the back of the enterprise; about 375 miles.

9. Short line now running to Rossburn continued to connect with the main line at Kamsack; 100 miles.

10. A seventeen-mile spur will connect the C. N. R. main line with Saskatoon, on the Prince Albert branch of the C. P. R.

11. The line running from Portage la Prairie to Delta (Lake Manitoba), will be continued up to the west side of Lake Manitoba, and connecting with the C. N. R. line at Dauphin; about 110 miles.

12. The line from Winnipeg to Oak Point, on the east side of Lake Manitoba, will be continued north, crossing the lake at the Narrows, and connecting with the main line at Dauphin; about 200 miles.

13. The C. N. R. has expressed its desire to build from Morris across to the Port Arthur section of the main line, provided that the Provincial Government will build a bridge across the Red River at Morris; 100 miles.

Grand Trunk Pacific Lines.

1. There is, of course, first the Grand Trunk Pacific main line from Winnipeg to Edmonton, the prairie section of the transcontinental line; 900 miles.

2. A branch line from Saskatoon, through which the main line is expected to run, to Calgary; about 400 miles.

3. Regina will be connected with the main line of the G. T. P. in the Touchwood Hills district; about 100 miles.

4. From Prince Albert to Calgary, crossing the main G. T. P. line at Battleford; about 500 miles.

The Hill Lines.

These are not very definitely planned, so far as the public knows at present, however, of the many branches which the Hill road will throw out. there is already under construction and being pushed rapidly that from Boissevain to Brandon; about 100 miles. The Portage & Midland Railway Company is building from the boundary north to Portage la Prairie through Morden. Work on this branch also is being rapidly pushed. This also is a Hill line, though not constructed in his name; about 100 miles.

* * *

CANADIAN BACON IN ENGLAND.

The Canadian trade agent in Birmingham, Mr. P. B. Ball, speaks in a recent report to the Department of Trade and Commerce at Ottawa, very encouragingly of the increase in Great Britain's imports of Canadian bacon. He gives the official figures of the importations of that article from Canada and other countries for the last two years, as follows:—

From.	1905. Cwt.	1904. Cwt.	Increase over 1904. Cwt.	Decrease from 1904. Cwt.
Denmark	1,471,687	1,723,884	....	252,197
United States	2,755,233	2,806,108	....	50,875
Canada	1,191,390	829,883	361,507	....
Other countries	80,650	92,436	....	11,786
Totals	5,498,960	5,452,311	361,507	314,858

This shows a net increase of 46,649 cwt. in the past year's imports of bacon, more than made up of Canadian selections alone. That this was not merely a temporary or fitful expansion in the consignments hither of Canadian bacon is clearly proved by the fact that Great Britain's imports for the first three months of this year were on the same enlarged scale, the increase from Canada being 94,320 cwt., and from the United States 23,068 cwt., Denmark showing a decrease of 25,908 cwt., and other countries 7,063 cwt. And it must be remembered that the Canadian bacon trade is young, as compared with that of Denmark or of the United States.

* * *

THE DRY GOODS TRADE.

The tendency towards advancing prices is still highly noticeable in both woolens and linen textiles. In the case of the latter this is due partly to the anticipated poorness of the crop of flax, at least in Europe. With wool, it would appear that the reason probably lies more deepseated; that is to say that the consumption is larger than the supply, taking the world as a whole. Strictly speaking, perhaps, this is scarcely so; because taking the last two or three years of great firmness in this staple, stocks have always, with but few exceptions, been in advance of immediate requirements. Nevertheless, they have only kept this position, as it were, on account of prices being so high that manufacturers and consumers held back from purchasing as long as they possibly could. Of course they acted on the assumption that prices would surely decline after a while. The final outcome has proved that holders were warranted in their waiting attitude, as even at the time of the last London wool sales the tone was still extremely firm. In Great Britain there is still quite a scarcity of the coarser-fibred wools, as indeed there is of the fine merinos also. This, of course, affects the price of many of the staple goods turned out in the Bradford district, and exported to Canada and elsewhere.

In the United States woolen manufacturing centres, however, an easier tone has developed in the market according to later reports, though this has been far from taking the form of any decline in prices. Manufacturers have simply "waited a while" to see how things promised to move. This is in line somewhat with the behaviour of consumers who also are keeping outside as long as they can conveniently.

Montreal and Toronto wholesale dealers are fairly well employed in these classes of goods, but there is no special feature presented by the trade. Fall business has begun to engage their attention, but it has not reached a brisk stage as yet. The prospects they believe, however, are excellent.

The Washington Government report on cotton was issued last week, and was not as good as had been expected. The condition of the plant was put down at 84.6, instead of at least 86 or 88 as was looked for. There is an increase in the acreage, however, and this is likely to offset such a decline in condition or in yield per acre. Low prices are by no means expected, however, the general prosperity of the Southern States being against any tendency to accept anything but the best value. The restricted consumption also of the last two years has to be evened up. The Canadian mills, like others, are far from being loaded up with stocks of raw material, and the question of probable prices for next crop is an interesting one.

The feature in general dry goods business, which has struck the Canadian wholesaler most forcibly is the more than usually heavy demand for house-furnishings, such as carpets, curtains, etc. These articles are mainly luxuries, only indulged in as a rule, when the domestic purse *is* fairly plethoric, so that the demand this year, especially when, as is the case now, it has been manifested for goods of a finer quality than usual, is an admirable indication of the reigning national prosperity.

* * *

OUR AGENTS ABROAD.

A Toronto gentleman who has spent some weeks in the Midlands, called upon the "Monetary Times" the other day to express his appreciation of the excellent work being done for Canada in England by the Dominion agent at Birmingham, Mr. P. B. Ball. He describes Mr. Ball as an enthusiast, "a perfect whale to work;" one who goes round with a lantern containing Canadian slides, and lectures upon the attractions of Canada. We quite agree with this gentleman that Mr. Ball is a valuable officer, for in addition to his other qualifications he possesses that very quality of enthusiasm which is so rare in combination with saving common sense.

But Mr. Ball's common sense does not permit him to praise Canada and Canadians to the exclusion of perceiving and acknowledging faults in the latter. Indeed he has boldly made the same criticism of our manufacturers that the Canadian agent in Australia has made, that they are sometimes disdainful of possible English customers, and certainly negligent of instructions as to make and shipment of goods. We have a recent communication from a Canadian in London, which says: "We are making an impressio here; and if nothing untoward happens, and nobod on our behalf makes the sort of 'break' which some times upsets all calculations, we shall continue to go shoals of British people as residents, and not onl that, but increase our exports to this country in marked way. That man Ball, at Birmingham, is good sort, and is doing excellent service for Canada The Glasgow man, too, is working hard."

It is nearly a twelve-month since the editor o this journal met Mr. Ball, in Birmingham, in Manchester, and in London. He then expressed a wish that he could get hold of some of the Canadian exporters, whose merchandise he had heard of, in order that he might impress upon them the importance o altering their preconceived notions, and making and shipping goods exactly as ordered. The Governmen did well to send for Mr. Larke, our Australian agent last year. His conferences with manufacturers and boards of trade in Canada were of service, and he learned a lot about the progress of Canada. Similarly a visit to the Dominion by Mr. Ball and by others of our representatives abroad this year might do much good. Things move so rapidly now-a-days that agents abroad get out of touch with their native land in a few years. There is a larger Canada now than in 1896 or in 1900; not only is there more population, but there is more enterprise, a great variety of industry, a greater production. The Government would probably find it pay the country to recall for a while, for purposes of observation and report, certain of their European agents.

* * *

EUROPEAN REINSURANCE COMPANIES ON THE SAN FRANCISCO DISASTER.

We gave last week the conclusions of the conference held in Brooklyn, N.Y., as to the liability of companies for loss by the San Francisco earthquake and conflagration. And although it is not stated that they were unanimous conclusions, a general course to be pursued in the payment of policies was carried. A clear line was at least drawn as to what losses should not be paid; in certain cases compromise must be resorted to, and in other specified cases claims would be paid. The European companies who have re-insurance treaties with the underwriting companies engaged in San Francisco have also held a meeting. This was at Frankfort-on-Main a month ago. And we have just read the circular which they addressed last month to the fire offices involved in the great disaster.

The circular is signed by twenty companies, German, Italian, Danish, Swiss, Russian, French. It starts out with the statement that, "it is universally accepted as a rudimentary principle of fire insurance that the insurer is not liable to indemnity for losses caused either directly or indirectly by earthquake." Article 46 of the French parliamentary bill is quoted to show that fire insurance does not cover fires caused by volcanic eruptions, earthquakes, hurricanes, and such cataclysms. And the most recent insurance bill, the Austrian, says practically the same thing. Therefore, says the circular: "A clearer proof than that provided by these two statements cannot be adduced of the fact that the universal legal interpretation is contained in the principle that earthquake losses can only be considered as being comprised in the liability of the insurer when this has been expressly agreed upon in the contract. * * * The principle which holds force in the relation of the direct insurer to the insured is also valid in that of the reinsurer to the direct insurer." And they say very explicitly that it was never their intention to bind themselves for losses to pay which there is no legal obligation on the direct insurer. While prepared to stand by their reinsured even to sacrifice, these companies demand that "liberality be not exaggerated," and that improper claims be not admitted. The concluding paragraph is as follows:—

"Although, according to the explanations made above, the decision on the legal side of the question does not depend on the fact whether or not earthquake losses are expressly excluded in the policy, it still seems desirable, in order to give the insured also a clear understanding of the situation, that in future, in all policies in all fields where such a clause is lacking, a clause should be immediately inserted which shall exclude in the clearest and most definite manner liability for all losses arising, directly or indirectly, as a result of earthquake, and other natural phenomena which are outside the range of calculation, and that the ceding companies should endeavor that such a condition be inserted not only in their own policies, but in those of all other companies operating in the same field."

* * *

—Little by little an effect is being produced in official circles in Britain leading to a consideration of Canadian trade from new points of view. An Associated Press despatch of Monday last says that the Commercial Intelligence Department of the Board of Trade is sending Mr. Richard Grigg to Canada, who will visit all the important old and new centres of commerce, "reporting on his return as to the expediency and cost of appointing correspondents of the Board of Trade in all cities and towns of the Dominion." And a report made last week by the Parliamentary Committee of the Co-Operative Congress at Birmingham regretted the failure of the effort to have the Government remove the embargo on Canadian cattle. President Maxwell said they were determined to persevere, because, after the Chicago revelations the removal meant the life and health of the people of this country. In the opinion of Mr. Maddison, M.P., there would be a great fight over the matter, owing to the opposition of the Irish members.

* * *

THE SOVEREIGN BANK.

The report of the Sovereign Bank of Canada is an interesting document. Seeing that it summarises the transactions of an institution only four years old its transactions are remarkable for their extent, showing great energy and enterprise on the part of the management; while their results, in so far as results can be predicated upon events so recent, appear to be profitable in a high degree. A transaction which illustrates the interest now taken in Canada by influential concerns beyond the seas, and marks the readiness of this bank to seize upon promising business, is the sale of a large block of shares at 130 to the Dresdner Bank. It was approved by all but two out of 1,040 shareholders, and attracted a degree of attention which must have proved gratifying to the management. Deposits of $11,858,000 accumulated in so short a time—three and a half millions of them in a single year—are of themselves an achievement. And their wide distribution is shown in the fact that they represent some 37,000 different accounts.

The paid-up capital increased by $2,285,000 during the year and the reserve fund by $830,000. The total assets are swelled to $6,899,000, of which $1,483,000 is immediately available. Current loans and discounts amount to $5,057,000 and Mr. Stewart tells us that they average rather less than $2,000 per borrower, which is, we consider, a remarkable showing. It is not usual for bank statements to show what revenue is derived from bank premises; but we are given to understand that the Montreal building and land of the Sovereign Bank stand in its books at $300,000, and that the annual revenue from them is five per cent., which must be considered a justification for the investment.

An interesting tabulation finds place in the report comparing the amounts of various items of liabilities and assets at the close of April in each of four years. From this we gather that the circulation, which in 1903 was $859,000 was $1,031,000 in 1904; $1,198,000 in 1905, and $1,416,000 this year. Reserve fund and undivided profits were as under at the close of each year; $324,000 in 1903; $372,000, $426,000, and $1,277,000 in the succeeding years—the last item arising largely from the issue of new stock at a premium. Current loans and discounts have gone up from $2,709,000 to $11,691,000, while call loans rose from $1,715,000 to $2,902,000 in four years. Net profits of the latest year were $187,467, apart from premium on stock, out of which $102,923 was paid in dividends, and $10,000 written off bank premises, and $62,200 transferred to reserve. From bank premises, safes, etc., $30,000 has been written off to date. The president's address made it known that seven per cent. dividend could have been declared this year; and the first vice-president gave some reasons for the remarkable growth of the bank in so short a time. The particulars given in the general manager's address are minute and explicit. He is entitled to congratulation upon this; and the success so far of his aggressive and sometimes novel policy must be gratifying to him, as it evidently is to his shareholders. We note the addition of A. E. Dyment, M.P., a desirable man, from a northern constituency, to the board of directors.

* * *

CANADIAN WOODS IN LIVERPOOL.

Less Canadian wood has gone into the port of Liverpool in May 1906 than in the same month of several years, and stocks generally are light though probably sufficient. Farnworth & Jardine's circular of 1st June, says that May business has been very similar to the preceding months, of a quiet but steady character. The arrivals all round have been moderate, the deliveries fair, and values on the whole are firm.

In Canadian woods.—Waney pine is in light stock, values firm. Square pine: Little enquiry, but stocks are small. Red pine: The stock is nominal, demand very limited. Oak: Rather more enquiry, the stock is low and prices are very firm. Elm: The demand is slow, but stocks are not heavy and values rule high. Pine deals: The new season's arrivals have been on a moderate scale, and stocks are now moderate; values are steady with a tendency to improve.

Of New Brunswick and Nova Scotia spruce and pine deals the consumption has been satisfactory, and stocks are reduced to a moderate compass; values are steady. The stocks of Galatz whitewood and lower grade Baltic goods, which come in competition, however, run into large figures. Birch logs have been imported freely, though rather less than previous month; the deliveries have been fair, but stocks have increased, and values have declined. Planks: The arrivals have been large, stocks are heavy, and prices easier.

The arrivals of pitch pine have been 5,382 tons, against 14,711 tons during May 1905. Hewn: There has been a fair quantity imported; prime wood continues in demand, values are unchanged. Sawn has been imported freely, there has been a satisfactory consumption, and stocks are still very light; values have eased to some extent during the past month. Deals and boards have again been imported freely; value of prime boards continues firm.

British Columbia and Oregon pine: There have been no arrivals; the deliveries continue on an increased scale, and prices are firm; the stock is still large and consists practically of logs, the stock of lumber being about exhausted.

* * *

TORONTO STOCK TRANSACTIONS.

A greater volume of business has been recorded this week on the local 'Change and prices for the most part retained a steady tone. Bank shares have been rather on the quiet side. The chief feature has been Mackay, in which quite a lot of business was done. There has been in this stock an upward tendency for some days, and now it realizes 76. C. P. R. is steady at 160. St. Lawrence Navigation has risen some points. Twin City and Sao Paolo were both fairly active. The New York market is reported dull and inactive. Montreal also has been less active during the last few days.

OUR HALIFAX LETTER.

The movement to secure industries for Halifax is progressing favorably, and the city is now fairly committed to a policy of subsidizing new industries which appeal favorably to its consideration. The Brandram-Henderson Company came before the city some time ago with a proposal to establish lead corroding works for the manufacture of paint material. The City Council has decided to bonus this company to the extent of $10,000 a year for ten years if they locate in Halifax; to exempt them from taxation for the first ten years, and agree not to levy taxes in excess of $1,500 per annum for a second ten years; and to supply water to the company at the minimum rate of 7½ cents per thousand gallons. The company on its part must undertake to employ not less than seventy-five men, and pay in wages at least $50,000 per year. It is altogether probable that the Brandram-Henderson Company will accept this liberal offer. They propose to erect a brick building to cost about $130,000; and, later on, subsidiary industries would probably be attracted by the success of the corroding works. The above named conditions are considered to be pretty liberal ones.

The feeling is very strong here that industries must be attracted to the city, and Halifax stands ready to treat them very generously. It appears probable that a capable expert will be employed by the city to devote his whole time and energies to advising the Council on this subject, and in endeavoring to attract suitable industries in this direction. The City Council has authorized Mayor McIlreith to proceed to the United States and visit the different locomotive works with a view to inducing one of them to establish a branch in Halifax.

The whole vote in Halifax now is one of optimism. A few females in sassiety, whose favorite air is "*J'aime la militaire*," are still heard to regret the departure of the Imperial forces from Halifax, but the more wide-spread opinion is that it has been an unqualified blessing to the place. A good deal of the money made in Halifax by hard working old merchants of a bygone day has been carried abroad as a result of marriages made with Army and Navy people, and invested, frequently squandered, elsewhere.

The most encouraging evidence of the new spirit, besides the industrial campaign already mentioned, is the tearing down of old rookeries and the erection of new and modern structures. At the present time such work of demolition is going on at three of the most prominent corners in the city, and fine blocks will be erected immediately. Work has begun on the expenditure of over $150,000 on new sidewalks and street improvements. The Tram Company is pushing the work of double tracking and extension. Modern tenements are to be erected in what has been the worst quarter of the city. A general spirit of civic improvement is in the air. It is believed that by the time the Dominion Exhibition is open we shall have a much cleaner and handsomer city to present to the view of visitors.

Speaking of the Exhibition, progress is being made in the preparations at the grounds and a large attendance is anticipated. Exhibits are to be very numerous. The new Fisheries Building has just been completed. It has a floor space of 5,000 square feet. There is a tank 20 x 14 feet and 4 feet deep for showing fish alive, and there will probably be a small refrigerating plant for exhibiting frozen fish. The building is a prominent one with concrete foundation. The fisheries exhibit this year is in the hands of a strong committee and an interesting display may be expected.

The Royal Securities Co. of this city has purchased the Dartmouth Electric Light, Heat & Power Co. for $30,000. The capital stock of the company is $30,000, and the shareholders will thus receive par for their shares. The 10,000 in bonds will be assumed by the purchasers and the balance will be paid in cash. The new proprietors propose to improve and extend the service.

Reports from the Lunenburg fishing fleet have not been very rosy. A good many of the vessels have returned from the spring voyage and the general opinion among fishermen appears to be that the catch will not be more than half that of last year. Both fish and bait are scarce. A large proportion of the fish have been sold "green" to the Atlantic Fish Company.

Labor is very scarce in Nova Scotia at present. An agent of the Londonderry Iron Company was in the city a few days ago trying to secure forty men, principally miners, and found them hard to get. The iron output at Londonderry is now about one hundred tons per day. This company has about 8,000 acres of good hardwood, and has three sawmills in operation. The lumber is dressed at the company's plant at Londonderry, where they have steam dry kilns.

The Hewson Woolen Mills Co., of Amherst, have decided to increase their capital stock to one million dollars, and to erect a large four-storey stone and brick building, wherein they will manufacture fine knitted goods. It is expected that the mills will be ready for occupancy in November. The directors of the enlarged concern will remain unchanged.

Frank Calwell has resigned from "Calwell Bros., Limited," and sold all his interest to his brother. He has purchased the Hollis Street store of the company.

Amherst hopes to add cheap power to its other advantage for manufacturing. The manager of the Maritime Coal Company at Chignecto is arranging with the Robb Engineering Company to instal the necessary plant, and electrical power will be supplied in any quantity in a short time.

* * *

—From ten years to thirty years are the current terms of the debentures shortly to be issued by the city of Ottawa. Their aggregate is some $270,000, of which $100,000 will be to cover the cost of water-works extensions, about $150,000 for miscellaneous local improvements and $20,000 for public schools. It is expected that for the outlay in connection with the water-works there will be a return equivalent to six per cent. on the investment.

* * *

—In Baltimore on Wednesday a million-dollar fire took place which destroyed the wharves of the Merchants' and Miners' Transportation Co., as well as a steamer and several scows. Two lives were lost. The event teaches the need of constant vigilance in guarding against the fire-fiend. Costly lessons, dreadful lessons, are being taught us all the while on this continent. And yet we do not seem to cure ourselves of carelessness in dealing with combustible materials. The public memory is short, and the average man is heedless.

ANNUAL REPORT OF THE SOVEREIGN BANK OF CANADA.

The fourth annual meeting of shareholders of the Sovereign Bank of Canada was held at the head office, Toronto, 12th inst., and was largely attended. The following shareholders were present:

A. A. Allan, Geo. Barnes, Walter J. Barr, W. Graham Browne, R. E. Cox, R. E. Culbert, P. M. Clark, Wm. Cooke, D. B. Crombie, J. S. Dougherty, A. E. Dyment, M.P., H. H. Edmison, Harold W. A. Foster, C. E. A. Goldman, David Herring, Geo. W. Holmes, F. E. Karn, Aemilius Jarvis, J. L. Johnson, G. C. Martin, Stanley Mills, Randolph Macdonald, A. Claude Macdonell M.P., S. McDougall, H. C. McBride, Hon. D. McMillan, Thomas McLaughlin, W. K. McNaught, M.P.P., H. F. McNaughten, A. G. Peters, A. G. Peuchen, B. Pinder, Jas. Petty, Campbell Reaves, W. Philip, D. M. Stewart, David Smith, D. King Smith, L. P. Snyder, Milton A. Thomas, Henry F. White, Hon. James Young.

It was proposed by David Smith, seconded by David Herring, that Randolph Macdonald be appointed chairman and W. Graham Browne secretary of this meeting.—Carried.

Proposed by Stanley Mills, seconded by W. J. Ard, that Messrs. A. C. Macdonell and C. E. A. Goldman be appointed scrutineers for this meeting.—Carried.

Reports were presented as follows:—

GENERAL STATEMENT, 30th APRIL, 1906.

Liabilities.

To the Public:—		
Notes of the bank in circulation		$1,416,050 00
Deposits not bearing interest	$2,819,586 36	
Deposits bearing interest	9,038,709 95	
		$11,858,296 31
Balances due to other banks		$ 431,853 29
		$13,706,199 60
To the Shareholders:—		
Capital stock paid up	$3,585,410 00	
Reserve fund	1,230,000 00	
Dividend No. 12, payable 16th May	31,358 38	
Former dividends unclaimed	110 00	
Balance of profits carried forward.	15,931 77	
		$ 4,862,810 15
		$18,569,009 75

Assets.

Gold and silver coin on hand	$ 173,869 05
Dominion Government notes on hand	672,313 25
Deposited with Dominion Government for security of note circulation	70,000 00
Notes and cheques of other banks	881,631 46
Balances with bankers	817,473 80
	$2,615,287 56
Railway, municipal, and other bonds	911,653 59
Call and other demand loans secured by bonds, stocks, etc.	2,902,731 13
	$ 6,429,672 28
Current loans and discounts (less rebate of discount, $30,000)	11,682,290 33
Past due bills (good, no loss to provide for)	9,491 62
Real estate, other than bank premises	11,307 54
Bank premises, safes, and office furniture	434,044 75
Other assets	2,203 23
	$18,569,009 75

D. M. STEWART,
Second Vice-President and General Manager.

Montreal, 30th April, 1906.

DIRECTORS' REPORT.

The directors beg to present to the shareholders the fourth annual report, showing the result of the business of the bank for the year ended 30th April, 1906.

Balance at credit of profit and loss account on 29th April, 1905		$10,088 32
Net profits for the year ended 30th April, 1906, after deducting charges of management, Provincial Government and Municipal taxes, advertising expenses, and accrued interest on deposits, and after making full provision for all bad and doubtful debts		187,467 35
Premium on new stock issued at $125 per share	$ 81,250 00	
Premium on new stock issued at $130 per share	686,550 00	
		767,800 00
		$965,355 67

This has been appropriated as follows:—

Quarterly dividends at the rate of 6 per cent. per annum:—			
No. 9, paid 16th Aug., 1905.	$23,560 12		
No. 10, paid 16th Nov., 1905.	23,868 35		
No. 11, paid 16th Feb., 1906.	24,137 05		
No. 12, paid 16th May, 1906.	31,358 38		
		$102,923 90	
Transferred to reserve fund		830,000 00	
Written off bank premises		10,000 00	
Reserved for rebate of discount on bills not yet due		5,000 00	
Donations to hospitals, etc., including South African Memorial Fund		1,500 00	
			$ 949,423 90
Balance carried forward			$ 15,931 77

RESERVE FUND.

Balance at credit of account, 29th April, 1905	$400,000 00
Transferred from profit and loss account	62,200 00
Premium on new stock, as shown above	767,800 00
Total, 30th April, 1906	$1,230,000 00

COMPARATIVE STATEMENT.

Liabilities.

30th April	Capital paid up	Reserve Fund and Undivided Profits	Sovereign Bank Notes in Circulation.	Deposits	Balances due to other Banks	Total Liabilities to the Public
1903	$1,293,876	$324,360	$859,375	$3,252,919	$45,102	$4,157,396
1904	1,300,000	372,363	1,091,865	5,691,453	148,393	6,931,711
1905	1,300,000	426,626	1,198,190	8,316,205	428,885	9,943,280
1906	3,585,410	1,277,400	1,416,050	11,858,296	431,853	13,706,199

Assets.

30th April	Cash on Hand and at Bankers	Bonds, Debentures, etc	Loans at Call	Commercial Loans and Discounts	Bank Premises and Other Assets	Total Assets
1903	$837,580	$465,949	$1,715,963	$2,709,642	$46,498	$5,775,632
1904	1,157,830	664,458	1,960,160	4,760,613	61,013	8,604,074
1905	1,626,551	832,931	2,286,917	6,632,665	290,842	11,669,906
1906	2,615,287	911,654	2,902,731	11,691,782	447,555	18,569,009

Branches or sub-agencies have been opened at the following places during the year:—

Baden,
Berlin,
Brucefield,
Chatham,
Essex,
Goderich,
Huntsfield,
Ilderton,
London East,
Millbank,
New Dundee,
Penetanguishene,
South River,
Teeswater,
Thorndale,
Walton,

These offices have fulfilled or exceeded our expectations, and the outlook for all of them appears to be satisfactory.

The branches have all been duly inspected during the year.

The most important event during the year was the sale of a large block of stock to the Dresdner Bank at $130 a share net to the bank. This, with the new stock issued in Canada, increased the bank's paid-up capital to $3,585,410 on 30th April. This was fully referred to at the special general meeting of shareholders held on 1st March to ratify the agreement and approve of the increase in the capital to $4,000,000, but the directors now wish to record their gratification at the unanimity expressed by the shareholders on that occasion. Out of 1,040 shareholders, there were but two dissentients and their total holdings aggregated only fifteen shares.

The directors feel sure that the bank's progress as shown by the comparative statement of the past four years already submitted, will be highly satisfactory to the shareholders. The increase of $3,542,000 in the deposits, which now aggregate nearly $12,000,000, affords the most satisfactory evidence of the ever-increasing confidence of the public in the Sovereign Bank of Canada.

Exclusive of the premium on new stock, the net profits were $187,467.35, an increase of $53,491 over the previous year, and $67,706 over 1904.

All bad or doubtful debts have been amply provided for, and the shareholders may rest assured that the business of the bank is in a sound and healthy condition, and on a very satisfactory earning basis, the importance of which will be more apparent later on.

The number of shareholders in the bank on 30th April, 1906, was 1,120, as compared with 887 in 1905, and 841 in 1904. This wide distribution and the fact that our shareholders include some of the most powerful financial interests in the world, afford the investing and borrowing public, and all who do business with the bank, a bulwark of strength and security of incalculable value.

All of your present directors offer themselves for re-election, and they beg to also present for election to-day, Mr. Albert Edward Dyment, member of the Dominion Parliament, one of the original, as well as one of the largest shareholders of the bank. Mr. Dyment's high position in the financial world, his successful business experience and recognized ability eminently qualify him to represent the shareholders on this board.

The directors have pleasure in again recording their appreciation of the zeal and efficiency of the staff, through whose efforts the bank has now grown to such important dimensions.

RANDOLPH MACDONALD, President.

President's Address.

The statements submitted to you with the directors' report are so complete, and, I trust, satisfactory, that they leave little for me to say.

In addressing the shareholders a year ago, when I also had the pleasure of announcing an increase in the dividend, I remarked that, even with the increased capital then being issued, we anticipated no difficulty in paying a 6 per cent. dividend and still making handsome additions to the Reserve Fund and otherwise strengthening the bank. You will understand how fully these anticipations have been realized when I tell you that we paid some $103,000 in dividends during the past year, and after doing this had a surplus from the ordinary net earnings of $84,500, as compared with a surplus of $68,900 the year before over dividends aggregating only $65,000. On this basis we could easily have paid 7 per cent. and still have had as much to appropriate for the Reserve Fund, bank premises, etc., as we had at the end of April, 1905.

Our shares were listed on the Toronto and Montreal Stock Exchanges during the year, and the market quotations ever since have represented a handsome premium over the original price.

The business of the bank has now assumed large proportions, and we shall welcome the addition of another representative of the shareholders to the board. The feelings of the directors towards Mr. Dyment have been expressed in their report, and I am sure his election would give great satisfaction to all who are interested in the bank and to the people of Canada generally.

I will ask the general manager to discuss the statement submitted to you, and before doing so I wish to state that in Mr. Stewart we have a gentleman of proven ability and sound judgment, and under his management the shareholders may look forward to even greater results in the future.

I now move, seconded by the first vice-president, Mr. Allan, that the report of the directors be adopted, and printed for distribution among the shareholders.

The first vice-president then spoke as follows:—

The president has covered the ground very fully, and I can only add that I concur in everything he has said. One thing I have noticed which has pleased me very much is that the enlargement of the bank is attracting a more important and influential class of business than might have come to us if we continued to be a comparatively small institution. We have, from the outset, enjoyed an exceptionally good patronage, but for some reason or other people prefer doing business with a "big bank," and the increased security afforded by the enlarging of our capital to $4,000,000 has undoubtedly brought our deposits and other valuable business from insurance companies, bankers, and large corporations which would not ordinarily go to a smaller bank.

The greatest difficulty we have to contend with is the securing of premises to accommodate our business, as in a short time after we open at an important centre the business outgrows the building. We have twice had to alter the interior of the Toronto office, but we think we have at last succeeded in providing our customers with satisfactory accommodation, at least for a reasonable time.

I now second the adoption of the report.

General Manager's Address.

The statements submitted to you are as complete as it is possible to make them, and, with a few explanatory remarks regarding some of the figures, I trust they will be sufficiently comprehensive to enable the shareholders to form a fairly accurate conclusion as to the present position of the bank and an intelligent idea of its future prospects.

Taking the "Profit and Loss Statement" first, I think the results of the year's business may be considered satisfactory. We made more money, both actually and in proportion to our capital, than in any previous year. The only item in this statement that calls for special comment is the appropriation of $1,500 to hospitals, etc. Contributions to such public objects are both necessary and desirable, and need no defence. All we desire is the shareholders' approval of them, and I am sure we will always have this so long as such donations are confined to moderate amounts.

Referring to the "General Financial Statement," the first seven items require no explanation. They comprise the immediately available assets, which amount to fifty-four per cent. of the deposits, although fully two-thirds of the latter are payable only after notice.

The "Current Loans and Discounts" amount to $11,682,290, being an increase of $5,000,000 over last year. They consist of advances to merchants, manufacturers, farmers and others doing business in Ontario and Quebec, and represent so many diversified interests that in no sense have we too many eggs in one basket. These loans are also well distributed as to amount, and average only $1,992 per borrower.

The next item, "Overdue Debts, $9,491," really belongs to current loans, as it is quite good, and composed of bills only temporarily past due. Where we have a really bad debt it is wiped out from profits and does not appear under loans, either current or overdue.

"Real Estate, other than bank premises, $11,307." This chiefly represents the price we paid recently for the old Nipissing Hotel property at the corner of King and George Streets in Toronto. We intend to put up a suitable building there for our Market Branch, where the business has long since outgrown the present premises at 168 King Street East.

The next item, "Bank Premises, Safes," etc., is a valuable asset; nearly three-quarters of the amount is represented by our magnificent ten-storey building on St. James' Street, Montreal. The Montreal branch occupies the ground floor and basement, and the executive offices take up the whole of the first floor. The other eight floors are all rented, and there is not a vacant office in the building. After charging ourselves with a very modest rental compared with what we know we would have to pay for inferior accommodation elsewhere in the city, I am very pleased to be able to tell you that this building is now netting the bank a clear 5 per cent. on its investment. Our tenants are of a high order, and are all under lease, so that you may expect this yield to continue for some time to come. Apart from its value as a safe revenue producer, this building is a good advertisement and business attraction. The banking-room was planned with a view to the comfort and convenience of our customers and staff, and is an unqualified success. Profiting by the experience of the Baltimore fire, we had the vaults built under ground, and nothing was left undone to provide the bank with the very maximum of protection.

The building and location could not be duplicated in Montreal to-day for within $50,000 to $75,000 of the value it stands at in our books, and we regard it as an extremely good asset.

The balance of the items under this heading represents only some $1,800 per branch, for furniture, steel safes, vault doors, etc., and is good value, as we have written off $30,000 from these assets to date.

The total "Assets" amount to $18,569,000, an increase of nearly $7,000,000 for the year.

Turning to the "Liabilities" side of the statement, you will observe the substantial increase of $217,840 in the note circulation, which has increased another $100,000 since the date of this statement.

The "Deposits" have increased by over three and a half million dollars, and stand at $11,858,296, divided amongst 37,532 depositors, representing an average of $316 per head. Since 30th April our deposits have increased by over half a million dollars. Comment on this showing is unnecessary, and I will simply ask the shareholders to think over it and to ponder upon the possibilities of a bank with such a clientele in a growing and prosperous country like Canada.

The next item, "Balances due to Banks," arises out of our ordinary business, and is about one-half the amount due to us by other banks, as shown on the opposite side of the statement

A small balance of our recently issued capital is being paid up by instalments, according to law; the great majority of the shareholders having paid in full in advance. When completed, the paid-up capital will be $4,000,000, and to-day it amounts to over $3,716,000.

The Reserve Fund increases proportionately as the capital is paid in, and now amounts to about $1,250,000, an increase of $20,000 since 30th April.

I think this completes my résume of the statements, unless you have any questions to ask about them. Remember, this is your bank, and you are entitled to know all about it.

The following figures show that the bank's staff and customers have doubled within the past two years:

	1904.	1905.	1906.
No. of officers on the staff....	151	247	358
No. of depositors	17,710	26,725	37,532
No. of discount customers.....	3,531	6,185	7,364
Total number of customers....	21,241	32,910	44,896

During the past year we received applications for 2,893 discount accounts, of which 1,714 were declined.

There were 32 chartered banks in Canada when we opened our doors on 1st May, 1902, and we stood 32nd on the list. On the 30th April, 1906, we had moved up into 15th place, in point of assets, and to 6th place in point of paid-up capital. It is not, however, by such comparisons that I would convey to our shareholders the merits of their own institution, but rather by inviting their careful consideration of the unvarnished figures and hard facts laid before them to-day.

I have always had large ideas regarding the position the Sovereign Bank of Canada should take in the financial world, but my ambition ran towards strength and safety rather than size. It is none the less pleasing to me, however, to be able to say that I believe we now have within our reach the happy combination of both solidity and magnitude, and when we hold our fifth annual meeting I hope we shall be able to celebrate the occasion in a manner satisfactory to the shareholders and becoming to a great institution.

A Voice—What proportion of the new issue of stock was not subscribed for?

The General Manager—By referring to the statement you will see that on 10th May, $3,995,000 had been subscribed, or all but $5,000 of the total issue, and to-day the amount outstanding is only about $1,500. Shareholders have six months to take up their allotments and the only reason any stock is treated by us as unsubscribed is that owing to absence in Europe, Australia and elsewhere, we have not yet heard from all who are entitled to allotment. If, however, we were to include the subscriptions received from shareholders for more than their allotments, the new issue of our stock was over subscribed.

Mr. W. J. Barr—I recently saw an announcement of a branch being opened in New York, and I would like to know the particular advantage of this move.

The General Manager—This was not referred to in the statement, owing to the fact that it does not come within the year at present under review, as the New York agency was only opened a couple of weeks ago, and I am glad Mr. Barr has mentioned it. We have always done considerable business with the United States and with New York in particular, and for some time past we felt it would pay us to open our own office to handle our collections and other business. This move has brought us other agency business, which has an important bearing upon our Canadian business. We have been appointed agents for the Commercial Banking Company of Sydney, and the National Bank of South Africa, two very strong banks, who do an extensive business in the colonies, and who have London offices. We are, therefore, in a position to compete successfully for the Canadian business that goes to South Africa, Australia and New Zealand. As you know, there is a great deal of shipping direct from Canada and the United States to South Africa and Australia, and we are also in a position to handle such business advantageously on the spot. I may add that at the present time we have no less than nine men on our New York staff and we would not have them there unless it were paying. Outside of the collateral advantage of the prestige our New York office gives us, we have enough agency business to pay all our running expenses.

Proposed by Hon. James Young, seconded by W. J. Barr: That the thanks of the shareholders are due and are hereby tendered, to the president and directors for their careful attention to the interests of the bank. Carried.

Mr. Young said the statement presented to-day is a very satisfactory one, showing good management as well as tact and success in the handling of business. Before the meeting to-day he met a gentleman who had been in the banking business for nearly forty years, and his verdict was that the arrangement for increasing the bank's capital was a most happy and successful stroke, reflecting great credit upon the management. The showing in the way of profits is also excellent. He had been more than pleased with the solid and business-like way the Sovereign Bank of Canada was being conducted. Its record has been remarkable, and the accumulation of $12,000,000 of deposits in four years certainly evinced the feelings of the public toward the Sovereign Bank of Canada. There was one important matter he would like to refer to, namely, the opening of a great many branches by the banks generally. He did not think the Sovereign Bank was at fault in this, but most people agreed that the expansion is being overdone to some extent. Mr. Young said the shareholders were to be congratulated upon the bank's position and policy generally, and it seemed to him that these indicated the most careful and conservative management.

"One word more and I am through. I have followed the course taken by the bank for some time and am convinced that in Mr. Stewart we have a most capable and efficient manager. I may say of him that he is most aggressive in getting business, and yet conservative in handling it. During the past year the dividend was increased to 6 per cent., and let us now live in hope that before another year is out we may get further returns as shareholders."

Mr. Barr, in seconding the motion, said he was sure the shareholders appreciated the services rendered by the directors. The shareholders should be more than satisfied with the excellent report which had been presented. He knew this motion had the hearty approval of all present.

Mr. Macdonald—On behalf of myself and my co-directors I beg to thank you for the kind words spoken by Hon. Mr. Young and Mr. Barr. We have all watched with much pleasure the progress of the bank and are pleased that we have so excellent a statement to present to you and that so many shareholders have done us the honor to attend and have so kindly expressed their approval of our efforts.

Proposed by Major Arthur G. Peuchen, seconded by A. C. Macdonell, M.P., that the thanks of the shareholders are due and are hereby tendered to the general manager and staff of the bank for the satisfactory manner in which they have discharged their respective duties during the past year. Carried.

Mr. Peuchen said it was needless for him to express the views of the shareholders, as he knew each and every one of them appreciated the high order of service rendered by the general manager, Mr. Stewart, and the other officers of the bank. The shareholders have known Mr. Stewart for some time, and also Mr. Browne, by whom he is ably assisted, and know they are very busy men. Another thing that Mr. Peuchen noticed was the active and intelligent interest taken by the local managers of the Sovereign Bank in bringing industries to their respective towns and thus getting business for the bank. This showed how keen and alive this staff must be, and the results showed it.

Mr. Macdonell, in seconding this resolution, said it was his privilege to be associated with the bank ever since its incorporation. On this account he felt fully qualified to speak of the zeal and efficiency of the general manager and of his staff.

The general manager had the happy faculty of combining zeal with prudence, and this he endeavored to instil into all those around him. He was also in close touch with each member of the staff, and the friendship and affection which existed between Mr. Stewart and the other officers of the bank largely contributed to its success. Mr. Stewart's aim has been to instil into all officers uniform courtesy and civility, and this was noticeable in every one of the Sovereign Bank's men from the general manager down to the junior clerks. The result given us to-day came from actual work daily and nightly.

Mr. Allan—Before you put this motion to the meeting, Mr. Chairman, I would like to say a word about the staff.

Our men are deserving of all the good things that have been said about them, and no one appreciates this more than the directors. The annual gatherings of the managers and principal officers, to which I referred a year ago, is an important function in the management of the bank. This year no less than eighty-five were present at the conference, and although the directors are not permitted to attend these meetings, I am none the less certain that they are advantageous to the bank. The bringing together of these men once a year for consulation with one another must be of great value to themselves as well as to the general manager, and, I think, the shareholders will agree with me that their money is well expended for such a purpose. I understand the general manager intends to celebrate the bank's wooden wedding to the staff in a more substantial way than usual, and I would like if he could do this by extending the conference of managers to include a larger number of the staff as well. If we can persuade him to do this I would suggest that the invitation be extended to the directors.

The President—It gives me much pleasure to put this motion. I have had considerable experience with large organizations, and I have some knowledge of the ability necessary to effectually control so large a number of men. I have had the pleasure of meeting various members of the staff, and they are all worthy of the vote of thanks just passed by the shareholders. Mr. Stewart also deserves great credit for the able manner in which he handles them.

The General Manager—These resolution are time-honored and always passed at the general meetings of Canadian banks. We have adhered to that extent to the old established order of things, and while they are cut and dried to a certain extent, we never know beforehand to whom they are to be given, or what the speaker is likely to say about them. I am quite free to admit that the results accomplished are due to hard work, and that we have also benefited to a very large extent by good times,but they could not have been achieved either by the directors or myself without the unselfish and efficient service of our excellent staff.

I would like to refer to the remark of my friend, the Hon. Mr. Young, in regard to the opening of branches. We, perhaps, have been the greatest offender in this respect. We have now 68 branches, but we have stuck to the old and settled Provinces. where, as you see, by this marked map on the wall, here, our branches are not scattered, but grouped and concentrated in certain territory, the richest and most productive parts of Ontario. This method saves expense and facilitates supervision, and its success is proven by the results achieved, and, after all, that is the criterion. On behalf of the staff I thank you from the bottom of my heart for this vote of thanks, and I assure you that my fellow officers and I fully appreciate the sincerity of the remarks which have been made, even if the resolutions themselves are more or less formal.

Proposed by J. J. Warren, seconded by G. C. Martin—That the meeting do now proceed to elect directors for the coming year, and that for this purpose the ballot box be opened, and remain open until three o'clock this day, the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the secretary, and for that purpose only this meeting be continued. Carried.

The scrutineers then proceeded to take the votes and the secretary duly reported that the following gentlemen had been elected directors for the ensuing year: Randolph Macdonald, A. A. Allan, D. M. Stewart, Hon. D. McMillan, Hon. Peter McLaren, Arch. Campbell, M.P., John Pugsley, W. K. McNaught, M.P.P., and Albert E. Dyment, M.P.

At a subsequent meeting of the directors, Mr. Randolph Macdonald was elected president; Mr. A. A. Allan, first vice-president, and Mr. D. M. Stewart, second vice-president and general manager.

London	1,083,737	1,324,704
Calgary	932,456	....
Total	$76,543,607	....

Mercantile Summary

The Department of Marine and Fisheries will presently begin the work of dredging the Crane Island Flats, below Quebec, which have long been an obstruction to navigation at low tide. A powerful dredge called the "Galveston" has been purchased for this purpose.

In London a great international business Congress has been held lately. One resolution passed was that the employment of women in mining, or of children under the age of fourteen, or in underground work under the age of sixteen should be totally prohibited.

Seven ocean vessels reached Montreal from the Atlantic last Saturday and Sunday, three being passenger ships. The "Montfort," of the C.P.R., brought a general cargo from Bristol, arrived on Saturday afternoon. The "Lake Manitoba," from Liverpool, arrived on Sunday morning; 1,198 third class passengers were landed at Quebec from her. The "Manchester Trader" arrived from Manchester last night with general cargo, and the "Iona," of the Thomson line, from Shields, also reached port. The "Tunisian" brought many young Englishmen bound for our Canadian West, and the "Ontarian" came in from London on Saturday.

OUR AUSTRALIAN LETTER.

Australia appears to be on the eve of a boom. Just now the weather is a little dry, causing some apprehension as to the future, but rain is promised, and if we should have three or four months of good weather, the boom will certainly manifest itself. Prices have gone up in the most unexpected fashion. Even silver, which was supposed to go down instead of up, has jumped up to 2s. 7d. per ounce as against 2s. ¾d. two or three years ago. The highest that tin has reached for years, and that only for a short time, was £170 per ton. It it quoted to-day at £197, and it is expected that over £200 will be reached. Coal has advanced, and 9s. instead of 11s. per ton is supposed to be the fixed price at Newcastle. In pastoral products, wool has gone up another 5 to 10 per cent., and skins, hides and the other accessories of the pastoral trade have gone up in like proportion. Sheep skins reached 9½d. per pound last week, more than used to be got for the wool. Even wheat has felt the impulse. At the beginning of the year 3s. 3d. was the quotation; today 3s. 6½d., and but small supplies come forward even at the advance. It is quite probable that the estimate of the Australian harvest was too high. There ought to be thirteen million bushels yet to export, but the exporter cannot locate it, so that it is quite possible that wheat will go higher still. These figures are, of course, inspiring the importers, and there is a demand for goods such as has not been experienced for thirteen years. As yet it has been kept within bounds by the present dry weather, but should the seasons be good it is bound to extend. There never were more enquiries for Canadian goods at the Canadian office than now, but there is a very great hesitancy to close either for Canadian agencies, or to send orders for Canadian goods, owing to the uncertainty of the supply. Orders, which if the buyer were sure he could obtain them would be sent to Canada are going to the United States. I suppose there is no help for it.

Naturally the cost of living has advanced with the prices of materials, and there are some complaints as to the fashion in which it is going up. It is suspected that in many cases the sellers as well as the producers in New South Wales are following the course pursued in New Zealand. Instead of fighting the demands of the labor unions, employers seem to have come to an agreement and advanced the prices even at a more rapid rate than the wages. It may be interesting to some of your readers to get the wholesale prices of certain staples in this market. The quotations are:—Flour, local, $40 per ton; flour, Manitoba, $73 per ton; potatoes, $1 per bushel; onions, $1 per bushel; tomatoes, $1.50 to $2.50 per bushel; apples, $2 to $3 per bushel; cabbages, 36 cents to $1.50 per dozen.

All the above articles are in the season, and what they are likely to be later it is difficult to say. It is alleged that the Chinamen—who produce most of the vegetables consumed in Sydney—following the example of the whites, have also formed a combination, and hence the price of vegetables, others are in proportion to the instances quoted. Meat is the one exception, but it is scarcely an exception now, and to-day is very nearly the same price as the papers quote in Eastern Canada. Hams, for instance, are quoted wholesale at from 16 to 25 cents per pound, and yet the pig grower complains that there is no money in producing pork, just as he does in Canada, but with not so good reason. Buying in the quantities that the ordinary consumer does he would pay about 50 per cent. more than the prices quoted. The Canadian housekeeper can congratulate herself that on the whole her position is not the worst in the world.

The prices of imports are advancing, but not in proportion to those of exports as yet. The cost of living must produce a demand for higher wages, and that in turn will make it more difficult for the local manufacturer to compete with foreign goods.

The arrangements for putting the Commerce Bill into effect are announced as about completed, so that a proclamation may issue at any time. Exporters of foods and drinks should take note of this, and be careful that the label shall be a true description of the article, and that its weight, measurement, etc., are given. It will not do to label a case as one pound when it contains only 14 ounces. One item is likely to be affected in spite of the long usages of the trade. It is possible that nothing will be allowed to enter as "whisky" except that derived from the distillation of malt. It, of course, may come in as "mixed spirits." Until the order-in-council has been issued this is by no means certain.

Although fair, business is not as bouyant in New Zealand as it is in Australia. Collections are not as good as it was hoped they would be, still the exports of its staple products, if not increasing very much in quantity are bringing better prices, and the islands are likely to enjoy another year of prosperity. The exports of mutton and lamb have recently improved in quantity and already have made up for the deficiency for the early part of the season.

The "Bucentaur," the first ship of the new Canadian-New Zealand service, left Wellington on the 26th April last, but the only cargo she took from New Zealand was 443 bales of hemp, the rest of her space being filled up with coal from Australia. New Zealand is grumbling at the ships, at the management, and at the fact that there is no cold storage on board to enable them to carry the products that might go to Vancouver if there were such provision.

Mr. Seddon, the strenuous Premier of New Zealand, is expected in Australia next week. One of the purposes of his mission is to discuss a preferential agreement with the Premier of the Commonwealth. Canada can wish him every success in his effort, not only because a proper agreement should be beneficial to the two sections of the Empire in the southern hemisphere, but Canada would be likely to share in some of the advantages. [The news of Mr. Seddon's sudden death reached Ontario two days before this letter.—Editor M. T.]

The Australian Council of Chambers of Commerce has invited the Imperial Council of the Chambers of Commerce to meet next year in Australia. If this invitation should be accepted, Canada should send a large delegation of business men and manufacturers. If taken in time it might be possible to have a sufficient number to charter a special steamer, which could take them to different portions of Australia and then to New Zealand and home in reasonable time, and at a very moderate expense It would assist materially, not only in the development of trade but in making Canadians and Australians know one another better.

Preparations are being made for an extensive celebration of Empire Day on the 24th inst. This celebration is extending in the country as well as in the cities. The feature of the day—which, in New South Wales, is not a public holiday—will be a number of addresses, which will be delivered to the scholars in the public schools and to other gatherings. The chief assembly undoubtedly will be the gathering of the business men of this city in the Merchants' Exchange. The Commissioner for Canada, Mr. Larke, has again been invited to deliver the address on the occasion.

F. W.

Sydney, N. S. W., 11th May, 1906.

* * *

A SUGGESTION FOR COUNTRY LABOR.

We find in the eighteenth annual report of the Inspectors of Factories just issued by the Ontario Government a good suggestion by Inspector Arthur W. Holmes. His district is among the canning factories, and is in a section where very little native help is to be had, Swedes, Poles, and Italians from across the border being largely employed. The wages are fairly good, being mainly on the piecework system, and the wages running from six to twelve dollars per week, and the season extending from three to six months. Numbers of the girls employed are able to return to their homes in Buffalo and Lockport with savings of $200 or so for the season. "I would like to see," says Mr. Holmes, "some attempt made to retain that money in Canada. There are large numbers in the cities and towns who would be pleased to have an opportunity to make fair wages and have an outing in the country at the same time. It would be a change which would be beneficial to everyone, as a great number of factories are in the midst of the fruit-growing country. It would require some systematic movement whereby the workers and the employing canners could be brought together. Something along the line of an employment agency under the supervision of the Government would fit the requirements of the case. A large number of people could be given work and the money kept in the Province."

THE FIRE WASTE.

Editor "Monetary Times."

Dear Sir,—I have read with great interest your editorial and also the report of the annual meeting of the National Fire Protection Association in the "Monetary Times" of June 1st. I believe that a large portion of the fire waste can be prevented if proper steps are taken.

I hope that you will continue to bring the matter before the public until they realize the immense amount of money

that is being wasted every year by fire. In some of the States they have taken hold of the matter and the results are gratifying already. We are having at the present time in Canada commissioners appointed for power and railways matters (which are all very good and will, no doubt, be beneficial) and agricultural societies and others have officers appointed by the Government to look after different things, but in the line of fire waste, where the loss runs into many millions each year, as far as I know practically nothing is being done to stop it. If we could once get the people aroused I do not think it would be long before something would be done.

It seems to me that a great many think that the loss is coming out of the insurance companies only. The insurance companies are only gathering the money up from the people and paying it out again, and unless there is something done to lessen the fire loss the rates of premium cannot be lowered.

I sincerely hope that you will continue to work along the line of your recent article. We should have an association formed here as well as in the United States.

W. H. SHAPLEY,
56 Noble Street, Toronto.

June 8th, 1906.

ANSWERS TO ENQUIRERS.

Careful Reader, Oshawa.—We understand it to be the Government's intention to make the Canadian fiscal year end with March instead of June, beginning next year.

T. B., Stratford.—Bless your friend's heart! Does he think the writers for this journal, or its editor, are in the habit of looking over its advertising pages to see "who will be hit" before sitting down to write articles? You are very kind in the expression of your fears, likewise of your sympathies; but we have no dread of the results your correspondent suggests. The kind of person who will take umbrage at such utterances as those you point out is not of the sort whose advertising is much cared for. We try to keep in mind Davy Crockett's advice: "Be sure you're right —then go ahead."

* * *

—The Hon. H. R. Emmerson's forecasts as to the Government's intentions with regard to the Intercolonial Railroad shops at Moncton seem to be in a fair way towards fruition. Tenders have been called for a freight car repair shop, 630 ft. long by 132 ft. wide, to be made chiefly of reinforced concrete. Work is to be completed by September 26. Other tenders are to be called shortly. Meantime it is gratifying to learn that a more satisfactory state of things is developing in the financial situation of the I. C. R. For the ten months ending with April 30th last, the deficit was only $82,000, while during May, there had been no deficit but an actual surplus. Several economies have been made in the running of the line, but apart from that the earnings last month increased by over $100,000 compared with May 1905.

* * *

—The Scottish Co-operative Wholesale Society, to which we have referred as having possessed itself of an option on 100,000 acres of land in Saskatchewan for wheat-growing purposes, has decided against carrying out the deal on the grounds that members did not like locking up so much money and that values of land might possibly depreciate, although it is said that the tract on which they were figuring at a little over $7 per acre has since sold at $10. We understand, however, that the directors are so impressed with the importance of being in "on the ground floor" in the Winnipeg wheat market that they have decided to establish immediately a wheat handling depot at Winnipeg, and will despatch expert wheat buyers, at the end of July to purchase for them direct on that market.

BANKING AND FINANCIAL.

We learn that Mr. J. E. Gaudet has purchased the seat on the Montreal Stock Exchange of Mr. Robert Lindsay for $24,000.

Mr. G. de C. O'Grady, general manager of the Crown Bank of Canada, has been added to the directorate of the Union Trust Company.

The Imperial Trusts Company of Canada has removed into new and more commodious offices at 17 Richmond Street West, Toronto, having been previously at 16-18 Adelaide Street East.

* * *

LIFE AND FIRE INSURANCE NOTES.

We are advised by the president of the Metropolitan Life that a meeting of the board of directors of the company held on 1st June, Mr. Frederick H. Ecker was appointed treasurer of the company, an office created by the by-laws as amended, and Mr. Walter Stabler was appointed comptroller of the company in place of Mr. Ecker, resigned.

In London, England, a few days ago was held a conference on "Thrift and Insurance for Women." Sir Edward Brabrook, C.B., was in the chair. Papers were read by Mrs. A. Pollard on "Why Saving is Difficult;" Mrs. E. Loch on "A Benefit Society for Women;" and Mr. A. W. Watson, F. I. A., on "Friendly Societies for Women," with special consideration of the sickness risk from the actuarial point of view.

In Chilliwack, B. C., a few days ago there was a serious fire which destroyed an entire block occupied by stores, and the rest of the town was saved only with difficulty. The loss is estimated at $30,000. The town council has come in for criticism for not having acceded a short while ago to the citizens' application for a new water service and more modern fire-protection appliances. It is understood that the merchants whose premises were destroyed have already decided to rebuild with brick, and on a more substantial scale. This being true the authorities cannot longer delay dealing with fire fighting appliances.

The following are T. I. P. pointers:—

A cheerful agent covers more ground in a day than a grumbler.

Start each day with hope for the best and strength for the worst.

Talking points are good, but the main thing is to get your man to the buying point.

Some agents are like certain cigars—fair wrapper but poor filler. They lack knowledge.

The sprinter gets fewer medals in the life insurance work than the long distance runner. Endurance counts.

* * *

FIRE AND MARINE INSURANCE.

The executive committee of the National Board of Fire Underwriters has organized for the ensuing year by the election of A. W. Damon, president of the Springfield Fire and Marine, as chairman. The Munich Re-Insurance Company has, we are told, been elected a member of the National Board.

Considerable progress is being made toward the organization of the Large Cities' Association in the West. The association will have control of commissions and brokerages in Chicago, Milwaukee, St. Louis, Louisville, Cincinnati, and Cleveland, the "excepted" cities of the Western Union. It is expected that a substantial reduction in expenses can be secured and as the membership contains both union and non-union companies there is every prospect of success.—Argus, Chicago.

"Insure your crops with the Central Canada Insurance Company, authorized capital $500,000." Such is the advice given the Western farmer by the manager of that company, Mr. Jos. Cornell, whose office is at Brandon and its specialty insurance against hail. Speaking of hail insurance, we observe from a despatch of Monday last that the Hail Insurance Commission has finished its investigations and finds everything O. K., except the Crown Mutual Company, the charter of which will probably be either altered or revoked.

We hear from England of the formation of a new marine salvage company, with a capital of $1,000,000, which will have for its special object the equipment and maintenance of a wrecking fleet in the St. Lawrence. The Dominion Government has been asked to grant a subsidy to the company, on this understanding, namely, that it place a salvage steamer with all needed appliances in the St. Lawrence. It is possible that other steamers may be provided at Sydney, Cape Breton, and Vancouver. Lord Strathcona is understood to be interested in the scheme. The proposed new wrecking steamer for the St. Lawrence, it is said, will have a complete installation of electric lights, including search lights. Her capacity of fixed and portable pumps will equal six thousand tons of water an hour. She is specially adapted for telegraph cable work and available for lighting and placing buoys. She should have accommodation for a large number of officers and men.

In the "Insurance Record" (London) of 25th May is a paragraph about the biennial International Fire Service Congress to be held at Milan the first week in June. A special commission of executive officers of the British Fire Prevention Committee left London to attend this Congress. It has been organized under the auspices of the International Fire Service Council and at the invitation of the Italian authorities. Among papers to be read by members of the British Fire Prevention Committee were one by Mr. Edwin O. Sachs, entitled "International Relations in the Fire Service and the International Fire Service Council;" one by Mr. Marsland, entitled, "The Different Systems of Fire Resisting Shutters, etc., in use to Protect Doors and Windows;" one by Mr. James Sheppard, entitled, "Fire Resistance of Buildings Constructed with Reinforced Concrete;" and one by Mr. Percy Collins, entitled "Fire Risks due to New Industries and the Motor Industry in Particular."

* * *

DRY GOODS NOTES.

The fact that more money is being made by the big Montreal cotton mills would appear to be evidenced by the activity of several of their stocks on the local change. Colored cotton was selling last week at 50 and a day or two later a considerable block realized 52½. Montreal cotton fetches 125, while Dominion Textile is quite firm at 103 to 105. Some Dominion Cotton bonds sold for 97½.

The Dominion Cotton Company and the Merchants' Cotton Company, which are now component parts of the Dominion Textile Company, held their annual meetings in Montreal on Monday last. Mr. David Yuile presided at both. According to reports read at the meetings, the affairs of the two companies under the new régime have prospered, and that a substantial surplus will be shown at the annual meeting of the Dominion Textile. The following officers were elected: Mr. David Yuile, president; the Hon. L. J. Forget, first vice-president; Mr. C. B. Gordon, second vice-president; other directors, the Hon. Robert Mackay, Mr. H. S. Holt, Mr. J. P. Black, Mr. D. Williamson.

The French Fur Trading Company, or better known as the important fur establishment of Revillon Bros., Edmonton, Alta., has been granted a Dominion charter authorizing a capitalization of $5,400,000. This house has recently established trading posts in the most remote districts of the North-West, and may be regarded as the Hudson's Bay Company's most formidable rival. Very extensive powers had been asked for from Parliament, including banking and a savings bank system. The bill, in its amended form,

allows the company to operate vessels for the carriage of passengers and merchandise, also telegraph and telephone lines, canneries, timber limits, mills, water-powers, mining rights, to hold lands, to forward moneys, fishing and hunting rights, to accept deposits from its employees upon such terms of interest as may be agreed upon.

Everything in connection with the price situation in the raw silk market depends upon the developments in the markets of production as to cocoon prices, says "Dry Goods Economist." The manufacturing situation is still more or less discouraging, and does not warrant any free operations in raw material by local manufacturers. Little news has been obtained as yet regarding the new crop, and nothing can be prophesied with any degree of certainty regarding the future. It is certain, however, that reelers will earnestly combat any high prices which may be asked for cocoons. The weather reports from Japan and China do not indicate any unusual excellence as regards the coming crop, but too much reliance should not be placed on the reliability of these reports, and only time will develop the actual status of affairs.

* * *

FOR GROCERS AND PROVISION DEALERS.

Reports having been circulated that the winter wheat crop of Southern Alberta promised to be somewhat of a failure this season, the Calgary Board of Trade has made public a statement that these reports had been greatly exaggerated, the damage having been very slight.

D. C. Brosseau & Cie, Limited, have been incorporated for the purpose of carrying on a business in groceries, tobaccos, teas, coffees, fruits, liquors, pickles, and similar commodities. They will take over the business and goodwill of D. C. Brosseau in Montreal and develop it with a capital of $190,000.

Boswell Brothers, Limited, Quebec, have received authorization from the Dominion Government under the Companies Act of 1902 to take over the business of V. Boswell in Quebec of brewer, maltster, miller and warehouseman and to carry on a business on those general lines. The capital stock named is $500,000.

The extensive pork and beef packing business of J. Y. Griffin & Co., of Winnipeg, St. Thomas, Vancouver, and other places, has been sold out to a large United States company whose name is not mentioned, but who will largely extend the business and increase the number of branches in the West.

About 3,000 packages of Mediterranean fruit, brought to Montreal last week by the steamer "Escalona" were sold at auction by Walter M. Kearns and realized very high prices, the competition being very keen. Oranges met with a keen demand, and cases of Valencias sold up to $8.25 each, the cheapest being $3.90 each. Half cases ranged from $2.80 to $4.10 each. Half boxes of Catania oranges sold at 70 cents to $1.50 each, and half boxes of Messinas at $1.30 to $1.70 each. The lemons sold at $1.80 to $3 per box.

The British Columbia Native Oyster Company has secured from the Provincial Government a title to its oyster beds, of a thousand acres, on Blundon Harbor, Queen Charlotte Sound. The company will begin at once to develop the industry and will put on a large force of men to transplant and thin out the oysters for the spawning season. The conditions for the industry at Blundon Harbor are believed to be perfect for spawning purposes. The company is capitalized at $75,000, and the president is Mr. A. McNair.

The tomato growers in St. Catharines' district apparently have given up their fight for higher prices for tomatoes from the Amalgamated Canners. Several independent factories have started up, but notwithstanding this, there seems to be a general disposition on the part of growers to accept 25 cents per bushel though they declared last year that unless they could get 30 cents they would discontinue their production.

—Here are some Western items:—Debentures to provide for a fire apparatus, sidewalks, and the building of a court-house, are to be issued by Cranbrook, B. C.

A Winnipeg paper states that the North-West Commercial Travellers' Association is about to erect a six story brick building on the corner of King and Bannatyne Streets, Winnipeg. The site cost $25,000, and the building is to cost $75,000.

Parties in Medicine Hat have been asking the town council for a free site and tax exemption for the Doty Biscuit Company. The mayor replied that the council could promise water at a nominal figure. They could sell the gas at five cents, but the question of a site and exemption would have to be voted on by the rate-payers.

* * *

—The activity which for some time to come is bound to mark Kaien Island on the Pacific shore of Canada seems already to have begun, according to late reports. The camps of the surveyors, both those of the Dominion and of the Grand Trunk Pacific Railway, are pitched on or very close to the boundaries of the future city of Prince Rupert. Mr. Dodge, superintending the Government survey, has his camp, we are told stationed near the mouth of Tuck's Inlet, just opposite Venn's Passage, in view of historic Metlakahtla. He intends to make a survey of the coast line waters of the inlet, and as this will take him considerable time, he expects to remain in camp until October, and has accordingly fitted up comfortable quarters. Further east, up the inlet where surveys are now in progress at different points, the Grand Trunk Pacific Company's men are busy in the vicinity of their respective camps—one near Seal Harbor, where the new sawmill is to be built, and one a mile and a half further east. Here the wharf and three buildings will at once be erected, as already piles for the wharf are being secured.

* * *

—The Railway Committee of the House of Commons has practically completed its consideration of the bill affecting the Grand Trunk Pacific Branch Line Company. The clauses respecting vessels, wharfage, wharf-owning, hotels, restaurants, expropriation, telegraphs, telephones, cables, parks, electricity, water-power, bonds, aid to settlers, mining rights, tolls, agreements with other companies, and the guarantee of its bonds by the Grand Trunk Pacific Company were all agreed to. There were a number of minor amendments, however, designed chiefly to protect the rights of municipalities on highways. The amendment of the most importance provides that to preserve the right to build any branch it must be begun within two and finished within five years. A motion was made for the reconsideration of the section describing the branch line routes for the purpose of restoring the direct branch to Montreal and doing away with the branch down the L'Assomption River by way of Joliette, and this had not been settled when the committee adjourned.

* * *

—Canada, it seems, is not to be allowed to have everything her own way in her immigration propaganda. The Hungarian Government takes strong objection to its people being "enticed" away. A Buda-Pesth newspaper the other day commenting on this, made the following remarks: "An association founded in Canada under the name of the Homeseekers' Land Colonization Company, Limited, has opened imposing offices in Winnipeg for the purpose of enticing Hungarian farmers to emigrate, promising to sell them land at cheap rates. The company has flooded the whole of Hungary with letters, circulars and pamphlets, which are well calculated to mislead credulous farmers. The Minister of the Interior, therefore, ordered the letters and pamphlets to be confiscated, and it should further be explained that the lands belonging to the company are several thousand kilometres distant from the ocean, and the rugged climatic conditions prevailing there are extraordinarily unfavorable for

The Merchants Bank of Canada

Notice is hereby given that a dividend of 3½ per cent. for the current half-year, being at the rate of 7 per cent. per annum upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city, on and after

Friday the 1st day of June Next.

The Transfer Books will be closed from the 17th to the 31st day of May next, both days inclusive.

The Annual General meeting of Shareholders will be held at the Banking House, in the City of Montreal, on

Wednesday the 20th day of June

next. The Chair will be taken at 12 o'clock, noon.

By order of the Board,
E. F. HEBDEN,
General Manager.

A means of adding interest to prairie life and of increasing the population of our Great West has been hit upon by the "Western Home Monthly," of Winnipeg. It inserts letters from correspondents and exchanges the replies sent by those who wish to make acquaintance with a view to marriage. There are twenty-two such letters from the Canadian West and the United States in the June issue. The editor says: "The interest in the discussion in these columns is on the increase. During the past month we have exchanged letters and re-addressed them to the number of about ten letters a day on an average. We are willing to assist readers of both sexes in forming each other's acquaintance."

Throughout the entire West of Canada there is a marked increase in the use of electricity, including the employment of electric locomotives in place of steam for mine haulage, fast traction work, factory yards, etc. The district about Rossland, B.C., is prolific in mining operations, and the West Kootenay Power and Light Company, which supplies electricity to many of the mines, have decided to extend their electrical distribution plant. On the advice of the well-known consulting engineers, Messrs. Ross and Holgate, the company are adding to their already splendid equipment six Westinghouse raising transformers of 1,875 kilowatt, 2,200 to 60,000 volts, and fifteen lowering transformers of 1,250 kilowatt, 60,000 volts to 2,200 and 440 volts.

Mercantile Summary.

The Barber Asphalt Company is establishing a permanent plant in Vancouver. It has some large paving contracts to fill there.

Woodstock, Ont., City Council have awarded the contract for building a new steel and cement reservoir for the waterworks to the Toronto Contracting and Paving Co.

Our Eastern readers should not forget, when making arrangements for their summer vacation, that the Industrial Fair at Winnipeg is to be held from July 23rd to 28th.

The Canadian Pacific Timber Co. is a concern recently organized to take over the lumber and mill at Gerrard, near Revelstoke, B.C., recently owned by the Canadian Timber and Saw Mills, Limited.

The Brunette Sawmill Company, of New Westminster, will shortly erect a large additional cedar mill, which, we understand, will be the largest exclusively cedar mill in the Province of British Columbia. It will be situated on the water front, where so many industrial sites have recently been taken up.

We are indebted for a small folder, giving views in Vancouver and statistics of its growth, to Mr. C. A. Lett, real estate and insurance agent, 542 Pender Street, in that city. The population in April, 1886, according to this folder, was only 900, whereas in April, 1906, it was 51,000. The building permits in 1905 amounted in value to $2,706,000; they are estimated for 1906 to reach $3,500,000. Bank clearings for one week this year were $22,328,927, they were $1,380,545.

The Canada Dredge Manufacturing and Purchasing Company, Limited, of Newcastle, N.B., has been granted a Dominion charter giving it power to purchase or otherwise acquire and dispose of patent rights for dredging machinery; also on roller ball-bearing movements, etc.; also to carry on the business of manufacturing and selling such goods. W. H. Russell, of Newcastle N.B., and H. D. Aiton, of Redbank, N.B., are among the charter members of the new company.

The Temiskaming and Northern Ontario Railway Commission has granted to the Town Site Mining Company a lease for 999 years of about thirty-seven acres of the Cobalt town site, which contains mineral. The company agrees to pay a cash bonus of $40,000, and, in addition, agrees to pay to the Commission 25 per cent. of the gross value of every ton of ore mined of value of up to $1,000, and 50 per cent. of the gross value of every ton of ore of the value of over $1,000 a ton. The Commission has not yet dealt with tenders for the right to mine the mineralized sections of the T. and N.O. right of way. Some very good offers, however, we understand have been received.

DEALERS IN

HIGH-GRADE GOVERNMENT MUNICIPAL AND CORPORATION BONDS

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Great Northern Railway Company is making arrangements for the erection of a fine new depot at Brandon, Man., at a cost of $30,000.

Seaforth, Ont., has voted almost unnanimously in favor of loaning the W. H. Willis Shoe Company $10,000 from the town's funds to establish a factory for the manufacture of children's shoes.

Mr. W. F. Rittenhouse, of Chicago, a native of Jordan, Ont., who recently presented the Ontario Government with fifty acres of land at the latter place for an experimental farm, has now added fifty acres more, lying nearer to Lake Ontario, to be used for a similar purpose.

The British Columbia newspapers refer to the inauguration of another bustling mineral camp at the mouth of Bear River, at the head of the Portland canal. Here some galena prospects, which are believed to be very promising, are in process of development. The new camp is known as Stewart City, being named after the Stewart Bros., of Victoria, who have been largely instrumental in bringing the mining wealth of this section to public notice.

The Gloucester group of mines, Boundary district, B.C., has, we understand, been bonded to the Dominion Copper Co. for about $90,000, and active development work is to be started almost immediately. The property is owned by T. Newby, L. Mercer and H. Garnett. The Diamond Hitch property, in the same neighborhood, is to be added shortly, it is said, to the list of working properties. An immense quantity of iron ore, with some good values in copper, is said to be in sight.

Progress is being made in erecting buildings for the Cobalt Refining Company's plant at Hamilton, and it is expected to be in operation within a few weeks. This will no doubt be a great boon to the mine owners in Northern Ontario, who, we are told, have been engaged in sacking their ore in readiness to ship at the earliest opportunity. The results from the smelter in New Jersey have not been satisfactory by any means. It was too far away and needed too much "looking after," according to all accounts.

W. P. Tierney, of Nelson, B.C., has been awarded a contract to build the extension of the Kettle River line of railway from Grand Forks, B.C., along the north forks of the Kettle River to the famous McKinley mines, a distance of fifty miles. The contract covers all the work: clearing, bridging, grading, track-laying and ballasting. It is all mountain work, and will average $25,000 per mile, making a total of $1,250,000 for the contract. The line is supposed to be a branch of the Canadian Pacific Company's lines to be extended to Spokane to connect with the Corbin road, which has been extended from Yak to Spokane.

Mercantile Summary.

Miss Clara Pilon, carrying on a millinery business at Rockland, Ont., has assigned to E. Desrivieres. Her liabilities are not to exceed $1,000.

The grocery and liquor firm of F. Arpin & Co., at Marieville, Que., whose failure we noted last month, are now offering their creditors 30 cents on the dollar, liabilities being $3,400.

The Canadian Pacific Railway Company has inaugurated a service between Vancouver and Skagway, the SS. "Amur" having left the former port on that run last week. Later, the "Princess Beatrice" and the "Princess May" will be put on.

A firm which started in the retail grocery line at Halifax, N.S., A. McLean & Co., have assigned for the general benefit of creditors. The business was begun only a little more than a year ago.—The Reynolds Co., clothiers, of Sydney, N.S., reported in a late issue as having assigned are now offering 30 per cent. on liabilities of $4,500.

A despatch from Atlin, B.C., states that the immense coal deposits, owned by the Atlin Tooya Coal Syndicate on the Tooya River, are attracting much attention. Extensive seams, running from 22 to 34 feet in depth, are said to have been exposed, and it is expected that further prospecting will show larger deposits on the property. The probabilities are that the work of exploring will be carried on very thoroughly this season.

A winding-up order has been applied for and granted in the matter of the McKenna Thomson Co., Limited, manufacturers of clothing, Montreal, and Messrs. Savage & Fisk, accountants, are in charge as provisional guardians pending a general meeting of creditors. The company was incorporated in August, 1903, with an authorized capital of $125,000 to take over the business previously carried on by the firm of McKenna, Thomson & Co. The liabilities amount to about $75,000 direct and $82,000 indirect.

The scarcity of labor is a feature affecting not only Canada and the Northern States. In the Southern States there seems to be almost an equal dearth of the right kind of help, and both farmers and manufacturers are suffering as a consequence. People interested have now established an immigration bureau in New York for the purpose of diverting as many immigrants as possible towards the South. One difficulty in the way of its success, we imagine, is that the bulk of the newcomers have probably before landing already laid their plans as to destination, and it will be no easy matter to turn the attention of these towards an entirely new direction. The South, we fancy, will have to broadcast a knowledge of its merits among the people whom it hopes to attract in their own homes and haunts.

Mercantile Summary.

The Ames-Holden Shoe Company are about to open a large branch warehouse at Edmonton, and will shortly open another at Calgary.

Says the Montreal "Witness": Mr. H. Sherman, president of the Garment Workers' Union, is another labor leader to become a convert to the "back to the land" propaganda. He intends to purchase a farm within easy distance of Montreal and live a more independent and natural life.

J. S. Emerson has bought the Kwatsi Bay Lumber Company's sawmill at Kwatsi Bay, together with a large acreage of timber held by that concern under lease. Mr. Emerson, we are told, will operate the mill, using it as a sort of adjunct to the Emerson cedar lumber mill at Port Moody. Timber being cut at the Emerson limits at Broughton Island will be cut at the little mill.

The new Cunard turbine steamship, "Lusitania," which is said to be the largest ocean liner in the world, was launched at Glasgow last week. She is 790 feet long, with a displacement of 40,000 tons, and her speed is said to be 24 to 25 knots, say, 28 miles per hour. The steamer has cabin accommodation for 550 first-class, 500 second-class and 1,300 third-class passengers, and the crew will number about 800.

Year by year the carriers on the Great Lakes are straining to build larger boats that will carry bigger cargoes. In less than ten years the average capacity of ore-carriers has been doubled. On Tuesday last the steamer "J. P. Morgan" cleared for South Chicago from Escanaba, at the north end of Lake Michigan, with 13,295 gross tons of iron ore, and was not loaded within 1,000 tons of her full capacity. The previous carrying record was held by the steamer "Elbert H. P. Gary," which took 12,595 gross tons last season. The "Morgan" is the first 600-foot vessel on the Great Lakes, and is owned by the Steel Trust.

It throws a strong light on the rapid increase of the C.P.R.'s lake steamship business in connection with immigration that the company finds it necessary to charter five additional vessels to cope with the traffic. These extra vessels have nothing to do with the movement of grain, it seems, for it has been the practice of the C.P.R. to give cargoes to all comers during the season of navigation after they have delivered the grain at Fort William. That policy will likely be pursued until such time as the company have provided a large grain-carrying fleet of their own for the lakes. Cargoes that await transportation just now consist largely of flour for the East and cement and structural iron for the West. The shipment of these last two commodities to the West is an indication that extensive building operations of a substantial character are being contemplated. There are also large consignments of package freight.

Wanted.

Manager for an old established Organ and Piano Factory. Good salary to the right man. Apply by letter with references to K., care of Clarkson & Cross, Toronto.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart & Wilton, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS, Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

The Canadian Shipbuilding Company has just turned out a new steel dredge, called the "Montague," for the Dominion Government. After doing a little work at the eastern channel, Toronto Bay, it will be taken to the Gulf of St. Lawrence.

Mercantile Summary.

The assignment is noted of Henry Ratelle, of Cornwall, Ont., who started in a small jewellery and watchmaking business in 1901. D. Davis, of Cornwall, is the assignee in charge.

In last week's "Canada Gazette" was announced the incorporation of the International Publications, Limited, Toronto, with a capital of $1,000,000. Among the provisional directors are: Messrs. Charles H. Murray, magaine proprietor; N. Klein, publisher; of Toronto. The company is authorized to establish or acquire by purchase or otherwise newspapers, magazines, etc., and to carry on a general printing, publishing and lithographing business.

So pleased was Mr. Weatherston, apparently, with our reference to the "leaping salmon" photograph in his window at the King Edward Hotel that he straightway sent us a big envelope full of literature about the Intercolonial Railway. This is fresh literature, he says, having been wholly or partly re-written; and we must take his word for it, for we can neither read nor transcribe just now twenty pages of time-table and description. Every man in Ontario who commands the time and the money for a summer trip eastward should go and see some part of that beautiful region, our Atlantic Provinces. Quebec folk don't need it so much, having salt water glories of their own. Send to the Toronto office of the I.C.R. and get a copy of their May folder. Get also some of the publications, such as "Tours to Summer Haunts," "A Week in the Canaan Woods," "Fishing and Hunting Resorts on the I.C.R.", "The Salmon and the Moose." If you do, you will be as restless as a schoolboy till you are off on a seaside special.

We learn from Dr. Orr, the secretary, that there are numerous changes in the prize list of the Canadian National Exhibition, to be held in Toronto, Ont., August 27th to September 10th. In nearly every department there is a material increase in the premiums. In the horse department classes have been added for Welsh, Shetland, and Hackney ponies. It has also been decided to award the premiums in the trials of speed on the three-heat plan, each heat to be considered a completed contest and the money to be divided according to the place won in each heat. The Dominion Short Horn Association having increased their grant for prizes to $2,000, the Exhibition management have responded with a like amount. In sheep and poultry several sections have been added. Changes have been made in the dairy department, and the building is to be supplied with improved cold storage. In the floral division a prize is added for the best and most original floral design. The total increase all round amounts to close upon $4,000, which makes the total close to $50,000. Entries will close on 4th August.

OUR TRUCKS are fitted with rubber tires that do not come off. . . . .

MONTEITH, NIXON & Co.,
MAKERS OF GOOD TRUCKS.
256 Macdonell Avenue, Toronto.
Telephone, Park 1318.

B. C. Howard has sold some 12,000 acres of timber limits on his Famine River property, in Beauce, Que., to the Silsby Lumber Co., of West Burke, Vt., who are about to erect a modern saw-mill there. The price paid was $120,000.

The Canadian Pacific Railway has arranged to have built in its Angus shops in Montreal a thousand box cars, the cost of which will approximate a million dollars. When the work is fully started an average of twenty-five cars a day will likely be turned out.

Halifax, N.S., council has decided to give a bonus of $10,000 per year for ten years to the Brandram-Henderson Company to establish lead-corroding works in that city. Exemption from taxation, water at a low rate, and other privileges are also agreed upon. The company will put up a plant costing $130,000, employ seventy-five hands, and pay at least $50,000 a year in wages.

* * *

GOLD AND SILVER GOODS.

Hon. R. W. Scott has introduced into the Senate a bill to regulate the sale and provide for the marking of gold and silver manufactured goods. An article composed in whole or in part of gold or silver, or any alloy of these metals, with the exception of gold-filled jewellery, is not to bear any stamp, engraving or other mark, otherwise than (a) such design or mark as shall have been registered under the Trade Mark and Design Act; (b) such mark or letter as shall indicate the period of manufacture; (c) such mark or marks as shall describe the true and correct quality of the gold or silver or alloy of either of the metals used in the construction of the article. With respect to articles made of gold, the manufacture or sale is prohibited if marked with any number of karats less than ten, or if the box, package, cover or wrapper or any tag or label bears such words as "gold," "solid gold," "pure gold" or "U.S. assay." In articles made of gold the quality marks are to state the fineness of the gold in karat, thus "10k," "14k," "18k." Gold marked as "18k" must contain eighteen parts of pure gold and six parts of alloy, and all other quality marks are to be in the same proportion, with "24k" as the standard of pure gold.

TORONTO MARKETS.

Toronto, June 14, 1906.

Chemicals, Drugs, etc.—The volume of trade done remains much as before, with prices keeping steady. There is really little of a new character to say under this heading. Quinine, opium, carbolic and the other staples have made no appreciable change. New York advices say trade is steady, but a trifle on the dull side. From Baltimore comes word that the fertilizer market has been very active, though quieter now with the advance of the season.

Flour and Grain.—The prevailing quotation for ninety per cent. patents is about $3.15, and a fair trade is passing. Wheat keeps in accordance with last week's quotations, and the movement is not brisk. Other grains are much the same, except corn, which has advanced to 59 to 60c. Oatmeal is a little higher, the mills having come together apparently in their ideas of prices.

Fruits.—A fairly active business is going on in fruits and vegetables. Strawberries from Oakville and the Peninsula are beginning to arrive, being quoted at 15 to 20c. per box. They are not plentiful, however, the cool weather of the last week or ten days having kept the fruit back somewhat. Oranges are high priced, but continue to sell readily enough. We quote: Oranges, extra fancy California navels, $4.25 to $5.00; lemons, new, $3.50 to $4; bananas, $1.85 to $2; do., green, loose, $1.25 to $1.75; pineapples, case, $3 to $3.50. Tomatoes, four-basket crates, $2.50; asparagus, Canadian, dozen, 75c. to $1; cabbage, Carolina, new, crate, $2.25 to $2.50; Egyptian onions, sack, 100 lbs., $2; do., Texas, Bermuda, 50-lb. case, $1.75. The market for apples is now quiet, and is becoming less important. Some are still for sale at prices varying from $3 to $5 per barrel, according to quality.

Groceries.—Sugars remain unchanged from last week's quotations. No great movement has yet set in, however. With the strawberry preserving season approaching it is believed the market will become more active. Dried fruits, or many lines of them, are in very good demand, and prices are higher. Currants are firmer than they were, and Valencias preserve their firmness. Prunes (California) are very high, and are reported somewhat scarce. The scarcity of canned tomatoes continues, and prices are fully as strong as they have been. Reports from the country districts speak optimistically of the prospects for business for the balance of the season.

Live Stock.—The trade in cattle this week has been more active. More offerings have been made, but the demand was better than it has been. For butchers' cattle, of good quality particularly, the enquiry was quite marked. For exporters also there was a fair demand, and some went at $5.35. Hogs are about 5c. lower than last week.

Provisions.—Cheese preserves its firm tone, but butter is a little easier. Cable reports from the Old Country speak of good enquiry for dairy products. Eggs retain their great firmness, the supply being barely equal to demand. The price at which they are selling this week ranges from 17 to 18c. Hog products present no special feature. They are in good demand, but keep high in sympathy with the price of live hogs, which, however, declined 5c. this week.

Wool.—While supplies of this spring's crop continue to come forward in fairly plentiful measure there is nothing in the situation to indicate any change in the market prices. In other markets it is preserving its high tone, and it looks as if it will do so for the next few weeks at least.

FOR EVERY DOLLAR

of liability to Policyholders, The Great-West Life Assurance Company holds assets to the value of $1.24 (Liabilities $2,787,147, Assets $3,149,359) — an ample margin of security.

Moreover Great-West Policyholders have the added security of $750,000 of Capital Stock, subscribed but not called for.

The closest scrutiny merely emphasizes the high value of Great-West Life Insurance.

SWEET CAPORAL

CIGARETTES
STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 13th June, 1906.

Ashes.—Offerings are still very light, and, owing to the scarcity of snow throughout the country last winter there was comparatively little ashes gathered up for potash making. We quote about $5.50 per cental for first quality pots, but a round lot of good tares might fetch a higher figure. Complaints have recently come to hand from English buyers regarding the poor quality of ashes sold them as inspected Canadian, some of which showed adulteration with salt to the extent of 20 per cent., and in this connection we would direct the attention of our English readers to the fact that all inspected Canadian ashes bear the brand of Dyde & Major, a mark which has been the guarantee of purity for more than half a century. It is surmised that the lots complained of are ashes made in the United States and shipped through Montreal—a "wooden nutmeg" sort of adulteration, to be sure.

Dairy Products.—Export business was again brisk last week, shipments of cheese having aggregated 66,413 boxes, including a small lot to South Africa. Exports of butter were 10,663 packages. Cheese values are just about on a parity with those of a week ago, fine Westerns being quoted at 11⅛ to 11¼c., and fine Easterns at 11 to 11⅛c. June grass butter of best quality is quoted at 21 to 21½c., and medium grades at 20½ to 20¾c. per pound.

Dry Goods.—Advices are to hand announcing an advance in Baldwin's fingering yarns. The Scottish Vulcanite Co. also gives notice of an all-round advance in their makes of hard rubber goods. In other lines there is nothing new reported. Fall orders are reported as being booked in very fair volume, but sorting trade is not very active, and the weather at the beginning of the week was quite cold enough for overcoats.

Groceries.—The sugar market took an upward move to-day, refiners advising an advance of 10c. a cental on all grades, making the present factory price for granulated in barrels $4.20, and 5c. less in bags. Molasses is firm at 27½c. in round lots for standard Barbadoes, and 30c. in single puncheons. Stocks at the Island are about cleared out, and local receipts have been only about 5,000 puncheons so far. Stocks of evaporated fruits are practically exhausted, and Valencia raisins and currants are very firmly held. The canners' combination now asks $2.90 for gallon apples, but some supplies are available from outside packers at lower figures.

Hides.—Lambskins are now up to 25c. each. Receipts of hides are light, and prices are steady, buyers quoting 12c. for No. 1. Calfskins are unchanged at 15c. for No. 1.

Leather.—Quotations are firmly held at last week's figures, and there is marked scarcity of the plumper grades of sole required for the jobbing trade. There is excellent British enquiry for splits.

Metals and Hardware.—There is as yet no slackening in the active movement in these lines. Antimony is again firmer at 29½ to 30c., and spelter at 7¼ to 7½c., with prospects of further stiffening; tin, 45 to 45½c.; copper, 20½ to 21c.; lead, $4.45. The cut in wire nails is still maintained, the general quotation being $2; cut nails, $2.10. Sheets and plates all remain as quoted last week.

Oils, Paints and Glass.—Orders are still coming in well. Glass is now being generally sold at the lower figure quoted last week, namely, $3.50 per 100 feet for first break. Leads are very steady on the basis of $6 for chemically pure; putty, $1.40 in bulk. Shellac and varnishes are firm. Linseed oil, 53c. for raw; turpentine, easier at 88c.

* * *

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular under date of June 9, 1906, said:

The stock market is in rather an unusual condition. While sellers are exceedingly optimistic, buyers are conservative, and more or less critical. General conditions continue excellent outside of the stock market, and are much in favor of holders. The local monetary situation, for instance, steadily improves. Funds are returning from the interior, and large amounts (fully $13,000,000 thus far) have been sent back from San Francisco, so that our bank reserves ought to show a rising tendency. Call loans have consequently been easy, indicating a better supply of money for immediate needs, although time money is still held at fairly good rates. In the foreign markets easy conditions also obtain, and the outlook is for a continuance of these favorable conditions. Nearly all unusual obligations have been satisfied in Paris and London, and the situation there is favorable to further operations on American account should conditions remain as satisfactory as at present. In general the outlook abroad is cheerful, and it is quite probable that the foreign markets would expand their accommodations to sound American projects if called upon. No doubt many of our early maturing obligations will be renewed without difficulty. The business situation is eminently satisfactory. Crop prospects thus far are certainly encouraging. A fine winter wheat crop is practically assured, and good prices will be secured by the farmer. Other grain crops also promise well at this date, although corn-planting is a trifle late. A moderate increase in the cotton crop is also anticipated, and the Southern planter is justified in expecting another profitable season. All over the United States the agricultural classes are enjoying very unusual prosperity through the good prices obtained for their products. This should assure the country another good fall and winter trade.

Railroad earnings continue to show liberal gains, the totals for the fourth week in May of twenty-four roads showing a gain of about 13 per cent. over last year.

Within the stock market conditions are not so eminently satisfactory. Some of the encouraging features above alluded to have been well discounted. Prices are exceedingly high; so high, in fact, that investors are not rushing for stocks when they can secure more profitable employment for their money in other directions. Another deterrent feature is the large present and prospective increase in the supply of new securities. The bond market is already badly congested with new issues which investors will not take until money market conditions improve. At the same time it is well known that the railroads will be obliged to raise considerable amounts of new capital during the next few weeks, either through new stock and bond issues or short term notes. The situation, therefore, is one that favors an upward trend in values, with occasional reactions. Stocks have been accumulating in stronger hands, and no doubt everything will be done to keep the market in good form. There is a large amount of money in this market awaiting investment, and nothing but the fact that shrewd investors consider prices too high prevents a quick absorption of floating securities. A decline in time money rates just now would inevitably stimulate investment buying.

CORPORATION CONSCIENCE.

The various disclosures that have been made in the last few years of moral wrongdoing and violation of civil and criminal law on the part of corporations have led to a general feeling of distrust, if not actual hostility, toward corporate organizations, in spite of their acknowledged utility. Corporations have been denounced as soulless, exacting, evasive, unfaithful and addicted to all manner of iniquity, but they could be reached by no worse penalties than occasional fines or curtailment of privilege and have not seemed to mind the condemnation visited upon them. They had no fear of imprisonment or death or of retribution hereafter, and cared nothing for obloquy. They were treated as entities with power and responsibility, but no bodies to be kicked or souls to be damned.

But of late people have come to realize more vividly than before that corporations are made up of men and that their conduct is directed by men; that the power and responsibility are intrusted to men, who are subject to the moral and statute law as other men are, or should be made so; that duties and obligations are imposed upon men, and if there is injustice, wrongdoing or violation of law, it is their doing and judgment should be visited upon them. There is no longer any admission that a corporation may do wrong and no man be condemned, disgraced or punished on account of the iniquity. While the corporation as an organized financial body is soulless and without conscience like a machine, this fact gives the men who are running it no immunity from human or divine judgment for the deeds that are committed through its operation.

But something has grown up among those who are said to be "in the service" of corporations, but who are really using corporations to perform some service or business in the community, which may be called the corporate conscience, different from that by which other men are expected to be guided. They seem to have assumed that, as the corporate organization has no moral sense or scruple, they as its servants or instruments need not exhibit any, and are not to be judged as if they were responsible beings, forgetting that the corporation and not they is the servant and the instrument, and that men are the animating power by which alone it can act. From controlling stockholders and directors down through all grades of officers and employees of large corporations, such as the greater railroad and industrial companies, this atrophy of the human conscience seems to have gone like a creeping paralysis, as if they were helpless parts in a soulless mechanism and free from the ordinary sense of responsibility to God or man.

Men engaged "in the service" of corporations or in directing them have done things which they would not think of doing in the service of individual employers, or in conducting a personal business, and which they could not do without incurring disgrace and the penalties of crime; and yet they have seemed to have no consciousness of turpitude and to suffer no loss of reputation or standing in the community. A clerk employed by an individual or a firm who should take money or an interest in some business for favoring one customer at the expense of another, for allowing a higher price to a seller or a lower price to a buyer in his employer's business, would speedily lose his place and his character, if not his liberty. A trustee in charge of estates who should use funds in his keeping to profit himself beyond his legitimate compensation for service rendered, or contribute from them to political or social organizations or causes in which he was interested, would be treated as a criminal. An individual in business, who in his dealings seeks to build up one customer and ruin another, or perpetrate injustice, deceit and fraud to enhance his profit, or who deprives another of what rightly belongs to him or fails to grant to him that to which he is entitled, is apt to be judged according to his deserts if his ways are known.

But there is hardly a commercial, financial or pecuniary iniquity or a moral obliquity that men directing or serving corporations have not been guilty of without seeming to realize their amenableness to civil, criminal, moral and social law, and to the standard of judgment applied to independent personal action. They have appeared to think that they could divert or appropriate funds to their own use or profit, defraud, oppress and rob under the shadow of a soulless corporation, without being called to account like ordinary cheats and thieves or judged unworthy of a reputable position in society. They have been afflicted with this corporate conscience which acknowledges responsibility to no divinity or humanity except that symbolized in money. There is enough of this subserviency to the golden idol among men who act upon personal responsibility and are held to personal account, but in corporations it seems to have usurped the place of moral sense. The time has come for asserting that men who organize and direct corporations, or who act in the service which they are organized to perform, must be held to the same standard of conduct and judged by the same rules that apply to those who hold individual relations to their fellow-men. This is what is being slowly insisted upon by an awakened public opinion, to the astonishment of those who have been allowed so long to prey upon others with impunity.—N. Y. Journal of Commerce.

Mercantile Summary.

The Gerin butter factory at Coaticook is turning out 3,000 pounds of butter daily.

Two new factories are to be built soon in Montreal, one for the Dominion Textile Company at a cost of $50,000, and the other of the same value for the Smart Bag Company.

Hotel accommodation is being improved in various parts of the Eastern Townships of Quebec. At Valleyfield, for example, a contract has been awarded for the construction of the new Palace Hotel. The total cost will be in the neighborhood of $18,000. At Granby Mr. S. Page intends erecting a fifty-room hotel, at a cost of about $35,000. Collections are being made towards the erection of a temperance hotel at Howick, which is between Montreal and Huntingdon. The collectors report having received subscriptions to the amount of $1,375. An effort will be made to raise the subscriptions to $2,500.

The British Mortgage Loan Co.,
OF ONTARIO.

Dividend Number 56.

Notice is hereby given that a Dividend at the rate of Six per cent. per annum, on the Paid-up Capital Stock of this Company, for the half-year ending the 30th June, inst., has this day been declared, and that the same is payable at the office of the Company, in the City of Stratford, on and after

Tuesday, the 3rd Day of July next.

The Transfer Books will be closed from the 16th to the 30th instant, inclusive.

By order of the Board.

The "Chronicle," published at Raymond, which lies between Lethbridge and the United States line in Southern Alberta, says: "The sugar company reports about 3,000 acres already prepared and being seeded to beets. While this area is not yet as great as that of last year, conditions are such that the yield should be greater, owing to better preparation of ground, irrigation and extended experience.

"THE ROMANCE OF STEEL AND IRON."

Full of interest and instruction is the story of Andrew Carnegie's career, as told under the above title by Herbert Casson in this month's "Munsey." And it helps us to understand the man when we learn whence he came and what his early years were like. His father, we are told, was a Dumfermline weaver and labor agitator; and his uncle was even a mob leader. But that was seventy years ago, and social conditions may then have justified revolt against them. So we hardly wonder that Andrew flames out in "Triumphant Democracy." In 1848 the Carnegie family "came out to America" and settled in Allegheny, Pa. Andrew earned $1.20 per week as a bobbin boy in a cotton mill, and his chum was Harry Phipps, son of a shoemaker next door. In later years that boyish chum was his partner.

Stoking and engine-driving in a cellar was Andrew's next employment, and then came the great and happy call to

The Crown Life Insurance Company

higher things, when he was made a telegraph messenger at $3 a week. Of the half-dozen messenger boys who sat beside him on a wooden stool were some of the afterwards prominent men of Pittsburg. The boy's eyes and ears were open, and one day, in the telegraph operator's absence, he jumped to the key when he heard a "call," and for this timely proof of quickness and pluck was made an operator at $300 a year. He was presently in the employ of "Tom Scott," as the distinguished head of the Pennsylvania Railroad was called, and once, in the absence of his boss, when a message came in telling of an accident that tied up the road, this Scottish youngster of nineteen sent out, of his own impulse, a dozen telegrams signed "Thomas A. Scott," setting the trains in motion and preventing a costly blockade. This bold stroke gave him the friendship of his employer, who made him private secretary, afterwards superintendent, and gave him a first-foot in the commercial world.

He had the instinct of thrift, and his first chance of investment came in the shape of an offer of ten shares of Adams Express Company stock at $60 per share. His mother mortgaged her little home for $500 and Tom Scott lent his secretary $100, and the purchase was made. Then Andrew began to invest in shares of a sleeping-car company, of oil companies, of elevator companies, to the extent that a salary of $50 a month would permit. Next, he speculated in oil, making $1,000 the first trial, and soon was worth the "six figures" that in those days bounded the idea of wealth. It was not till 1864 that he got into the iron business, paying $8,925 for a one-sixth interest in an axle foundry with T. N. Miller, Andrew Kloman and Henry Phipps. Next, he organized the Union Mills Iron Co., whose stock he shrewdly floated among railway men, and the Keystone Bridge Co., the latter of which became, with the backing of its powerful customer, the Pennsylvania Railroad, the most prosperous concern of the kind in the United States. Mr. Carnegie at this time resigned his superintendency of the railway.

Now came hard times: prices fell, business was slack; Carnegie and his friends began to know what it was to be "hard-up"—they had to pawn pig iron to pay the hands. The puddlers went on strike. Miller lost heart and sold out to Carnegie at $32 per share. This is the way in which Casson puts the incident, but, according to the different version we have heard, Carnegie did not treat Miller well. This block of 2,300 shares, acquired about 1868, was sold thirty odd years afterward to the United States Steel Corporation for millions. "This was luck," said Miller. "Nay, it was foresight," claimed Carnegie In less than ten years the railway mileage of the United States practically doubled, and the iron-workers worked themselves breathless to supply the demand. This was the time that Andrew showed himself a clever "drummer," for he brought in contracts for rails at a rate that kept things moving. One day Col. Scott sent for him and said: "Big business, Andrew. Do you think you can handle a six-million-dollar deal for us?" (*Us* meant the Pennsylvania Railroad.) "I can," said Carnegie, undaunted. So he was handed over $6,000,000 worth of bonds, issued to build a branch railroad to Davenport, Iowa. Away went the little Scotchman across the Atlantic with the bonds in his valise: he sold them, and netted $150,000 commission. In his absence his partners had made $250,000 in real estate operations in Pittsburgh, and the group began to be what the boys nowadays call "well-fixed." In these years Andrew travelled much abroad.

Now was formed the Carnegie-McCandless Company to make steel rails by processes new and startling. The newer processes of steel-making have been described in Mr. Carnegie's own book, quoted in the "Monetary Times" of May 11th. Twenty odd years ago Gilchrist & Thomas perfected a method of getting rid of the phosphorus in iron ore by the "basic process," and the manager of a great iron works in Britain, Windsor Richards, put it quickly into practice. Carnegie and his friends in Pittsburgh did the same, and the enormous $300,000,000 fortune of the Iron King was the result. Sir Lowthian Bell had already experimented in the same direction, but Thomas and Gilchrist went farther than he and reached a satisfactory result, while his was only partially so.

The associates of Mr. Carnegie are elements of interest in Mr. Casson's admirable story. They all had a place in building up his success. Determining upon a 100-acre tract of land, twelve miles from Pittsburg as a site, the new firm erected the Edgar Thomson Steel Works, tactfully naming it after the president of the Pennsylvania Railroad. Describing first the Prussian mechanic, Kloman, who looked after the machinery and the men, the author of the story says: "Shinn bossed the show; McCandless lent it dignity and standing; Phipps took in the pennies at the gate and kept the pay-roll down; Tom Carnegie kept everybody in good humor; Andy looked after the advertising and drove the band-waggon."

In 1873 Pittsburgh had no great prestige as an iron and steel centre. The building of the celebrated "Lucy" and "Isabella" furnaces in that year gave rise to enquiry and wonder abroad, for these two furnaces, the former owned by the Carnegie group and another by a rival group of men, turned out 100 tons of iron per day. And the steel rail production went on for thirty years, with more furnace room and increasing profit. In some years they made 26, others 40, and in one year 62 per cent. profit. Day and night working became the rule. Carnegie Brothers & Co. re-organized in 1881, when the aggregate holdings of seven partners were $4,000,000, Andrew's being $2,737,000, his brother's and Phipps' $878,000 each.

Vandervort was the one of the partners who had said on the coach excursion to Scotland in 1884, "Great Cæsar! boys, if ever I get $1,500 a year, catch me working like a slave as Carnegie and Phipps do." "Good boy, Vandy," as Andrew called him. But in another ten years he was working as hard as any of them. Like the darkey boy digging for woodchuck, he "just done had to." It is a wonderful story, well worth one's while to read in full in "Munsey." And to any one who has seen and heard Carnegie it helps to explain the manner of the modern enlightened Midas and Maecenas he has become.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

The editor will be glad to receive for publication early reports of public companies, and other enterprises. Communications on subjects directly connected with the monetary interests of Canada will also be welcomed. Financial and commercial questions will be gladly answered.

WHAT IS GILT-EDGED?

There is talk of limiting insurance companies to gild-edged investments. It is hard to draw a distinct line between securities that are gilt-edged and those that are just securities. Consols at three per cent. used to be regarded as the standard of everything that was steadfast, immovable, in the financial world. But consols fell from 114 to 85. President Fasken, of the Excelsior Life told the Insurance Commission on Wednesday that the company's agent at Winnipeg secured gilt-edged investments, paying from 7 to 10 per cent. Between London 3s., and Winnipeg 10s., there is range enough for interminable controversy. The truth is that faith has expanded even while interest has contracted. All things, money included, move so much more quickly than they did when the retiring generation of investors began to buy and sell, that new standards are in process of evolution. The Insurance Commission will have to recommend legislation, which in revising the present bounds of lawful insurance securities, will inferentially set up a new measurement of gild-edged and other-edged. The conditions likely to affect the final decision are likely to be popular, political and passionate, rather than financial. There is abundant reason, therefore, for the experts to try to arrive at some clear basis of understanding.

Severe limitations to Government and allied securities in Canada will, of course, tend to reduce the rates of interest earned. Competition will work its natural work in that direction. The indications are that the Commission will pronounce against continuance of what most insurance directors have regarded as a legitimate and reasonable freedom in the placing of accumulated premiums—they know the financial situation; they are accustomed to handling large sums of money on clearly-defined responsibility; and they have proved their capacity to make more money for their companies than a mediæval policy of devotion to consols could possibly accomplish.

While the problem of flexibility is stewing in the minds of the Commissioners, and of those who will proffer a plentitude of advice to them, let one or two facts indicative of the mutability of the bulwarks of the financial world be kept in mind. There never was a period of more strenuous development of the earth's resources than this period. Canadian conditions are not singular. Land values in our West have advanced steadily for several years. The same is true of the United States. Land which ten years ago was selling in Mississippi at from $1 to $6 per acre, changed hands two weeks ago at $44. There is more money to spend almost everywhere; but its purchasing power is declining. Dun's index number makes the cost of living 47 per cent. higher in 1906 than it was in 1897. This change is co-incident with a decline in the value of bonds. A dozen of the best-class American railroad bonds, of which particulars are immediately available, are selling at between 9 and 10 per cent. below their prices of five years ago. The declension is general. Between March 20th, and April 20th, this year, the London Stock Exchange values of 325 representative securities dropped from £3,087,642,000 to £3,075,066,000. The decreases included 14 British and Indian Funds, 0.3 per cent; 8 United Kingdom municipal corporation stocks, 0.2 per cent.; 11 colonial government stocks, 0.3 per cent.; 30 foreign government stocks, 0.5 per cent.; and 10 British bank shares, .01 per cent. The increased values were almost entirely in securities such as are prohibited to Canadian insurance companies. Eight breweries went up 3 per cent :

10 mines advanced 2 per cent.; and fifteen other commercials and industrials rose 0.6 per cent.

There is a great readjustment of values going on, due to causes not yet widely understood. It is the function of those who look after the cash of the multitude to find these out. Perhaps from the Insurance Commission and its candid friends a new Gamaliel will be evolved, who will really know all that can be known about the science of the gilt-edged.

* * *

FEAR NOT FOR THE WEST.

It is no crime against patriotism to be ambitious for a powerful corporation. The irrigationist of the Nile is the most patriotic of Egyptians; for the Nile is Egypt and Egypt is the Nile. There was a time, when the C.P.R. was the West, and the West was the C.P.R. The C.P.R. can look at the prairie country with a sort of paternal pride; and can contemplate the ocean track from Vancouver to Yokohama with the peaceful content of the justified pioneer. Mr. Wm Whyte, who controls the line from Fort William to the Coast is a great asset of the West—which is more even than being a great asset of the C.P.R. It is said of him that he lives for the West. That is the literal truth. He has the sense of national upbuilding. Nobody who has once talked with him about the future of the West has missed the deep, kindly, patriotic, progressive note which pervades his discourse. This week in Montreal he has been discussing the Western outlook. He finds a menace to Canadian commerce in the expansion of the J. J. Hill system into a direct competitor of the all-Canadian road. "Americanization" is not a blessed word with Mr. Whyte. He fears a Yankee domination of the best wheat-growing country in the world; a portent whereof is the increasing fervour of fourth of July celebrations in Winnipeg.

Mr. Whyte is scarcely fair to himself. His Winnipeg friends, who are continually beseeching kindly fate to multiply railroads, will say that a trip to Montreal always tends to de-westernize the westerner; and that the C.P.R. should be too big to play, in ever so modified a degree, the game which was played against its struggling infancy, by established interests which did not see that the way to make traffic for every railroad in the East, was to build new lines in the West. The West has made up its mind that it cannot have too many ways of getting its crops out of the country. The West has had many wheat blockades already. The increase in production will be persistent for many years to come. Premier Scott, of Saskatchewan, and Premier Rutherford, of Alberta, are just as anxious as they can be to enlarge the railroad services of their provinces. That the West in its ideas and ways of doing things approximates more to the American than to the more conservative business element in Eastern Canada is true.

The influx of scores of farmers from the northwestern States is bound to have a strong effect on social growths and political tendencies, as well as upon the every-day methods of husbandry. But the American immigrant is a contented being. He is not a fanatical devotee of the stars and stripes. He knows a better form of government when he sees it. There is no more reason why he should refuse to become a Canadian than there was against Canadians becoming Americans. A country that is good enough to get rich in should be good enough to swear allegiance to. A fourth of July celebration is not regarded as an offence against international morals in London. We can hear the Declaration of Independence read with amusement as well as admiration—amusement that slave-owners should declare that all men are born equal; and admiration at the assertion, even unto blood, of the honest doctrine, that to take a man's money from him without giving him a chance to say how it shall be spent, is tyrannical, as well as foolish. The American in Western Canada is too busy growing wheat to spend his time plotting against the Crown. His neighbor is like unto him. Prosperity is the greatest political acclimatiser known to mankind. The flourishing farmer will stand by the influence of his affluence. He will not be particular about the name of the railroad so long as the rates are right.

There is, of course, something in Mr. Whyte's apprehension that the Hill lines will divert traffic in the Minneapolis direction. Complaint has already been made that the Grand Trunk Pacific intends to use the Wisconsin Central, to connect with Eastern Canada, via Chicago, pending the construction of the Government portions of their transcontinental system. But it is not impossible to rely upon the native force of purely Canadian interests. The "national policy" can be made to apply to the diversion of freight. The channels of export and import are not absolutely uncontrollable. Mr. Hill is building railroads in Canada because there is money in the enterprise. He has proved that comparatively little territory is necessary to the support of a well-found, well-run steel road. It may be that the Canadian Minister of Railways obtained from him the formula that six miles of farming land on either side of a railway is enough for dividend-earning purposes. That such a statement should have been made in the House of Commons without contradiction, is sure proof of the complete revolution in railroading, which is one of the best grounds for really believing that we have got a mortgage on the twentieth century. The Americans will never take it from us.

* * *

EDITORIAL NOTES.

Over five hundred delegates will attend the conference of the Chambers of Commerce of the Empire, to be held in London, on July 10th, 11th, 12th, and 13th, under the presidency of the Earl of Elgin, Secretary of the Colonies. The conference is held triennially. Preliminary steps will be taken to secure the 1909 meeting for Toronto.

*

The Montreal Street Railway would amend its charter so as to enable it to operate cars in certain parts of the city at a considerably higher speed than at present. It proposes also to stop cars only at certain corners instead of at each street. This latter policy was adopted for a short while in Toronto. Though it was approved by many citizens, the chorus of condemnation was too great, and the legal aspect of the case too uncertain for the company to allow of its continuance. But Canadian cities are growing big, the inhabitants thereof are becoming more accustomed to step lively, and any scheme which will make for faster car service should be worthy of consideration.

*

Although an "anti-usury" bill is before Parliament, the usurers in Montreal and other Canadian cities against whom it is aimed, are still plying, we believe, their nefarious trade. Maybe they trust to the lateness of the session for immunity from interference for another year. Perhaps they are wise; there's many a slip twixt the bill and the act. Meantime, many weak, worthy people, may fall victims to to these sharks—widows, clerks, men trying to support families amid unfortunate circumstances, and so forth.. They need protection from themselves, almost as much as from the Shylocks. Many bills that are rushed through the House as "emergency measures," are less called for than this one.

◆

Forty-three old-line companies are writing new business in Canada, and twenty of them are Canadian. Some of these twenty are having a strenuous time in trying to earn dividends for shareholders and profits for policyholders. Indeed, a movement is on foot to roll three or four of the smaller of them into one, to lessen competition, and to save expense. In the face of this, some Ontario people, with a prominent Toronto man at their head, are trying to get a company incorporated with several millions of capital to further divide the market with the existing twenty. There may be something in this move, that will enure to the benefit of promoters, but from a life assurance standpoint there is more rashness than wisdom about such an enterprise, unless it is based on some principle of business hitherto undiscovered by the oldest experts in the business.

◆

In the "Economist" a writer states cogently the case against the provincial subsidy system, which is associated with the federal right to veto provincial legislation. There is another side to the case; though Ontario may naturally sympathize with the anti-subsidy contention. But to see how much you pay in and how little you get back, is not the whole wisdom of subsidization. No scheme of public finance can be equitable to the last copper. The old province benefits by the development of the new. The "Economist" correspondent is too sweeping in his condemnation of municipal finance. He would lead the conservative British financier to suppose that the municipalities are indulging in an orgie of bonusing manufacturers; to the demoralization of themselves and of Parliament. The only fair way to deal with an alleged evil in the monetary relations of towns is to take specific instances, which can be tested thoroughly. Indiscriminate financial criticism harms everybody concerned in it.

◆

A Newfoundland letter, printed elsewhere, says there is a very good opening in the island for Canadian loan and building societies, which might help to supply a growing demand for houses. Rents are high; and the value of real estate is increasing. There ought to be a maximum of business relations between the Island and the Dominion. Politically they should be federated. The United States trade with Newfoundland has been increasing for years. But lately the Harmsworth invasion of the colony has helped a little to redress the balance of national tendency. The obstacles to Canadian loan companies doing business in Newfoundland are said to be the remoteness of St. Johns from Toronto and Montreal; and the practice of building leasehold houses in the Island. But distances exist to be overcome. Leagues of salt water are no barrier to quick communication, in comparison with a dozen miles of country road a generation ago. It is not beyond the wit of the Canadian man to devise a means of dealing with leasehold property. Our correspondent might make a definite proposition.

◆

Finance is predominant in the personnel of the new Board of Governors of Toronto University—which is as it should be. Religion is also strongly represented, and politics has its share of members. Learning is not too conspicuous. The function of the academic mind is to absorb knowledge and distribute it to absorbent minds. Capacity for administration is not usually a strong feature of the professional make-up. If it were, first-class presidents of universities would not be so far to seek. The new board, has a unique opportunity. With the right president—nobody seems to have the slightest idea where he is to come from—it can achieve great things for the Canadian development of Canada. We love the Americans, and gladly appropriate their best ideas and experience; just as they have annexed so many bright young minds which despaired of finding adequate fields at home. But we must keep our best young men; and give abundant scope for their talents. The Commission is thoroughly balanced by a becoming element of venerability. Old men for counsel; young men for war. They will not be short of advice. We will be content to state one fact for their remembrance. The University of Manchester, England, has a faculty of commerce,—which is not the same as political economy. The political economist does not build railroads, and found new towns in the West.

◆

In likening Buluwayo to Winnipeg, an Imperialist writer has surely mistaken contrast for similarity. Mr. Jebb, who toured Canada last year says he does not think the Rhodesian city will fill up as rapidly as Winnipeg, because gold is less certain than Manitoba wheat. Buluwayo is nearly in the centre of a continent as Winnipeg is. It is a young city. So is Winnipeg. When you have said that you have exhausted the similarities between the two cities. The unclothed negro abounds in and about Buluwayo. The aboriginal is practically a Winnipeg minus quantity these days. Rhodesian farming is still in its problematical stage. Locusts, redwater, rinderpest, drought, and half a dozen other plagues will menace the Central African agriculturist for many a year. Rhodesian mining has had more money put in it than it has yielded. The country is not a good place for the bread which perisheth. It is a land in which the white man lives by the sweat of the black man's brow, Winnipeg is neither of these things. It is founded on the surest agriculture the world has ever seen. Its climate is so bracing that it will produce lusty beings from indifferent stock. . It is long past the measles and whooping-cough state of infancy. In fine Winnipeg is modern Canada—which is to say that it is as far removed from Buluwayo in the things which count for national upbuilding, as it is in geography.

◆ ◆ ◆

Senator L. J. Forget, Montreal, has been elected a director of the C. P. R. in place of the late G. R. Harris, of Boston.

Huyler, the New York confectioner, is opening in Toronto, and Childs, the New York restaurateur, in Hamilton. We must be making progress.

A PAGE OF BANKS.

There is a very satisfying reflection of Canadian activity and prosperity in the reports of five banks whose annual meetings have been held in Ontario and Quebec this week. They are, the Merchants, the Union, the Ontario, the Traders, and the Standard. The aggregate paid capital is nearly fifteen millions of dollars, and their assets exceed one hundred and forty millions. No exception to the prevailing experience of brisk and satisfactory business during the last twelve months is to be found in these reports. Indeed, the figures which the statements exhibit bear eloquent testimony to the enlarging volume of transactions.

Here are some of the principal items in all five reports grouped together:—

	Paid Capital.	Net Profits.	Per cent. Profit on Capital.	Circulation.
Merchants . . .	$6,000,000	$740,398	12.34	$3,984,050
Union	3,000,000	452,930	16.04	2,589,640
Traders	3,000,000	396,231	13.21	2,310,125
Ontario	1,500,000	156,915	10.46	1,188,906
Standard	1,184,278	175,652	17.54	935,841
	$14,684,278	$1,922,126		$11,008,562

	Total Assets.	Quick Assets.	Percentage of Quick
Merchants	$49,541,955	$19,526,486	39.41
Union	28,281,157	7,399,066	26.16
Traders	27,973,445	5,872,684	20.99
Ontario	16,734,991	3,504,227	26.48
Standard	17,745,111	5,306,812	29.90
	$140,276,659	$39,609,275	

	Additions to Reserve.	Value Bank Premises and Furniture.	Coin and Dominion Notes on Hand.
Merchants	$200,000	$ 955,095	$3,657,393
Union	400,000	99,449	2,081,959
Traders	150,000	690,245	1,796,866
Ontario	50,000	125,000	531,405
Standard	100,000	185,000	1,377,432
Total	$900,000	$2,946,829	$9,445,055

The Merchants Bank.

The Merchants Bank has written a larger sum off bank premises account this year than last, and it has also placed a larger sum to officers' pension fund, while the addition to reserve fund, the same amount as last year, brings that fund up to $3,600,000. This bank has had a very considerable accession to its deposits; and its totals of liabilities and assets are now swelled to $49,541,955, which is an increase of more than eight millions during the year. The large proportion of quick assets held, nearly forty per cent., is a noticeable feature. Comparing the earnings of the twelve months with those of the same period of 1904-5 there is seen to be a marked increase this year, even counting the $90,000 recovered in the latter year from other securities. During the past year a number of offices were opened in the North-West at growing centres, and in addition agencies at Fort William, Orillia, and Vancouver, the latter being the first office of the Merchants in British Columbia. The appointment of Mr. E. F. Hebden as general manager was confirmed.

The Union Bank.

The forty-first year of the Union Bank of Canada is signalized by good earnings. No less than $452,930 is noted as the net profits, while a sum of $200,000 was realized by the sale of 5,000 shares of new stock at a premium of 40. The reserve of the bank is swelled to half the amount of the capital as a result of the year's business. The number of branches of this bank has long been remarked. It now reaches 120, more than half of them in New Ontario or the Western Provinces. The deliberate policy of Mr. Webb in former years in opening branches to meet the trade that he felt sure would come is evidently being followed by his successor for no fewer than 25 have been opened within the last year. A move to be commended is the establishment of a pension fund for the bank's employees. To replace the late Mr. Giroux upon the board, Mr. M. B. Davis, a well-known Montreal business man has been chosen.

The Standard Bank.

A very interesting address was given to the small gathering of his shareholders by the president of the Standard Bank. It was reminiscent, sometimes spicy, the burden of it being: "We have come through hard times in our early years by pluck and prudence; now let us go forward and march with the times. We have done well for our shareholders, and even in the matter of dividend we believe they are almost satisfied. The bank has some things to be proud of in a modest way: one of them is that all our office furniture and safes, the value of which is not less than $40,000 or $50,000, have been written off." The year's results are net profits of $175,652, and a larger sum derived from sale of $250,000 new stock issued at 200. Quarterly dividends are now being paid at 12 per cent. The addition to Rest this year has been $284,000. Seven new agencies or sub-agencies have been opened within the year. Mr. F. W. Cowan, a brother of the president, has been chosen a member of the board to succeed the late T. R. Wood. Another new member on the board is Mr. H. Langlois.

The Traders Bank.

It is only a month since an allotment of $2,000,000 new capital of the Traders Bank was made, and yet almost $1,000,000 of it has been already paid in. This forward step was taken after a meeting of shareholders in April, the directors being impressed with the rapid growth of the North-West wished to capture some of its business, and this they have proceeded to do. Since the last annual meeting nineteen new branches have been opened, including five in the new Provinces or Manitoba. The bank shows a marked growth of business and an improved ratio of net profits. Deposits have gone up from $15,720,000 a year ago to $20,490,000 now. As the date of the annual meeting has been changed from June to January, and the bank's year will be the calendar year, the dividends will be paid quarterly except one of four months on 1st October. It is expected to hold the January meeting in the bank's new building on Yonge Street, which overshadows everything in its vicinity.

The Ontario Bank.

Something seemed to give unusual zest to the meeting of the Ontario Bank on Tuesday. Perhaps it was the increased dividend, perhaps it was the prospect of a speech and a foreshadowing. But the proceedings were quiet, as usual. An increased business is shown, resulting in somewhat larger profits. All the profits were not shown, however, for we are told that the expense of fitting up the new offices lately opened has been written off out of the year's profits, and the president gave it to be understood in his knowing way that the management had, as all shrewd bankers have "something up their sleeve."

* * *

The Central Telephone Company has been authorized by the New Brunswick Legislature to increase its capital stock from $209,000 to $1,000,000.

SAN FRANCISCO FIRE SETTLEMENTS.

There is trouble in San Francisco because sixty-one members of the Underwriters' Bureau, which met at Oaklands, agreed to offer seventy-five cents in the dollar of their adjusted claims. Those who did not accept would, apparently, have to prove their claims in court. The following thirty companies agreed, it is said, to pay in full: Aetna, of California; Mercantile, of Boston; American Central, of St. Louis; St. Paul, of Manchester; Atlas, of London; Kings County; Springfield, of Massachusetts; New Zealand; North British and Mercantile; Liverpool and London and Globe; Sun, of London; Northern Assurance, of London; Phœnix, of London; Pelican, of New York; Continental, of New York; London Assurance; New York Underwriters; Teutonia; London and Lancashire; English American Underwriters; Orient, of Hartford; State, of Liverpool; Hartford, of Hartford; Citizens', of St. Louis; Home, of New York; Connecticut; New Hampshire; Queen, of New York; Royal, of Liverpool; Industrial Underwriters.

The sixty companies are accused of "trying to dodge their responsibilities." The mayor of the city and the Governor of the State have given written warning to them that they "must deal fairly and honestly by the San Francisco public or be driven from California." The Insurance Commissioner of the State threatens to revoke the licenses of such as propose to pay 75 per cent.

This vehement language is a little too reminiscent of the times when Mayor Schmitz authorized the shooting at sight of men suspected of stealing immediately after the catastrophe. The companies may be supposed to have reasonable ideas of fairness and honesty. It should be counted to them for righteousness that they are not insisting on complete enforcement of their legal immunity from the results of earthquake. "Your money or your life" is not a suitable invitation from the Governor of a highly civilized State.

Among this group of sixty-one underwriting bodies are at least a dozen of the best-known United States companies; and another dozen of first-rate British and continental companies. Good reasons must exist for such a stand.

In the first place, the earthquake came before the fire in San Francisco. Hardly a chimney stands in the stricken part of the city, which is abundant proof that the convulsion of nature had wrecked property before fire had anything to do with the loss. A San Francisco policyholder has brought suit against the Commercial Union Insurance Company for the full amount of a claim for fire loss, notwithstanding an earthquake exemption clause in the policy. This proceeding will not commend itself to the other fourteen German and English companies whose policies contain a similar clause. The attitude of many insured persons in San Francisco and of their press is noisily abusive of every underwriting concern that dares to stand upon its legal rights. They would be better employed in backing up Insurance Commissioner E. Myron Wolf's appeal to policyholders to be honest. "Dishonest raising of the values of properties destroyed by the fire only serves to give dishonest companies an excuse to shave policies and compel honest concerns to look with suspicion upon every proof of loss filed with their State agents," he says. "Complaints have come to the Insurance Commissioner's office—complaints so backed up by proofs that they cannot be questioned—of policyholders who are inflating the values of their destroyed property. Many of the insured are taking advantage of the mixed-up conditions and filing proofs of loss for goods which they never possessed or which they saved from the conflagration. It is work of this kind that gives dishonest companies an excuse to shave honest policyholders. We must be honest all around if we expect proper settlements."

The local records of the insurance companies were destroyed, just as thousands of policies held by individuals were. There may have been cancellations on the local books which are not yet shown on head office books. Would it be reasonable under such conditions to expect a cancelled policy to be paid? This is only one of a score of circumstances to be considered when attempting adjustment of claims in the presence of an unprecedented disaster. Some settlements have been made. But it must be months before full settlements can be completed. Bearing in mind the view expressed by the thirty European reinsuring companies last week, policyholders and public officials should maintain a less belligerent attitude towards the underwriters. An offer of 75 cents in every dollar of adjusted loss might with wisdom be accepted rather than await the delay of going into court to attempt to prove claims.

* * *

FIRE INSURANCE NOTES.

The Consolidated Mining and Development Company's electric light plant at Rossland, B. C., was on the 13th inst. burned to the ground, with a loss of $18,000, fully covered by insurance. The fire is believed to have originated in a short circuit.

The Warren Bituminous Paving Company's large new plant on the Toronto Waterfront was damaged on Sunday to the extent of $3,500 by fire. Several costly stone-crushers, mixers and asphalt carriers were injured or destroyed. There was no insurance. This is the third occasion on which this company has suffered loss from fire.

The sawmills of the Yale-Columbia Lumber Company, together with about 2,000,000 feet of lumber, and several C. P. R. cars at Nakusp on Arrow Lake, B. C., were totally destroyed by fire on Thursday of last week, and the whole place was only barely saved from wreck. The plant had a capacity of $50,000 feet daily. The loss is placed at $22,000, covered by insurance.

London advices announce the results of the business of the North British and Mercantile Insurance Company for 1905. The net fire premiums amounted to £1,940,195; the net fire losses to £970,997; the surplus on fire account to £323,720. At December 31st,, 1905, the amount at the credit of profit and loss was £950,188. Out of this sum the directors have carried £25,000 to the superannuation fund, and recommend the payment of a dividend of £1 per share, and a bonus of 10s. per share, along with the bonus of 5s. 6d. per share from the shareholders' life and annuity profits—in all £195,250—all free of income-tax. The directors have thought it wise, in view of the disaster at San Francisco, and in part payment for losses thereby incurred, to carry to a special suspense account a sum of £250,000. This leaves £479,938 to be carried forward, as against £486,923 at the end of 1904. No definite information had, at the date of the report, been obtained as to the company's loss at San Francisco.

A statement issued by the Liverpool & London & Globe shows that the fire premiums of that company for the year 1905 amounted to £2,199,100, and the losses to £1,066,852. The fire account, after providing for expenses, shows without the addition of interest a surplus of £393,705, which has been carried to profit and loss account. After payment of dividend, already announced, the profit and loss account will stand at £1,010,022, the general reserve funds at £1,400,000, and the fire re-insurance fund at £900,000. The directors state that it will be some time before the actual loss by conflagration at San Francisco can be known. The company's representative there advises that the total amount at risk in the district damaged by earthquake and fire is £867,000, which even if the whole amount were lost the company could pay, in addition to its dividend, without touching the reserve or re-insurance funds. This announcement is of itself a sufficient commentary on the strength of this fine old underwriting company.

* * *

—Several Toronto bucket shops were raided yesterday when they were crowded. Many books and papers were seized and several arrests were made though bail was accepted in all cases. Many pool rooms and cigar stores where "the making of handbooks on races" was suspected were also raided. The bucket shop brokers were charged with "gaming in stocks."

COME TO NEWFOUNDLAND.

A well-known Canadian who has a large experience of business in Newfoundland, writes to the "Monetary Times" from St. Johns:—

From information I have, I gather that there is a very good opening here for the operations of some good Canadian loan and building societies, as the field is quite unoccupied, and there is a demand for houses which cannot be supplied under present condition.

I am somewhat surprised to learn that none of the Canadian loan companies have representatives here, and I believe it would be to their advantage to make enquiry as to the prospects of doing a profitable business in this colony, and perhaps a reference to the subject in the columns of your journal would have the desired effect of directing the attention of those who are interested in the matter to this opening.

Rents are high, and the value of real estate has increased very considerably in recent years, while business generally is in a very prosperous condition in the colony.

THE OUTLOOK IN NEW BRUNSWICK.

St. John, June 19th.

The lumber situation in New Brunswick is less pleasing than it was a few weeks ago. Then the rivers were in flood and nobody doubted that all the logs cut during the winter would reach the mills along with the forty million and more feet that were hung last year. The freshets subsided quickly and reports to-day are that between thirty and forty million feet will not get down for another year. Much of that which has arrived was only got out at extra heavy expense. And, now to add to the worries of the situation the mill workers of St. John have struck for more pay. The pilers want a raise from $2 to $2.30 per day, and are supported by their fellow-workmen. A union has been formed and all the mills are shut down. Some of the millmen have sent to Fredericton mills logs that would have been sawed here. All declare they will not give in; but the men say they are a unit and will not lose as the logs must be sawed sooner or later. Lumber is the backbone of business in St. John, and even a temporary suspension of activity is very injurious.

In other lines of business there is much briskness being shown. Announcement is made to-day that the Maritime Art Glass Works, a local concern, has secured in competition with United States firms, the contract for five memorial windows for a Boston firm to be made according to the latest designs. The contract may open a new line of business to the St. John house.

This city had a visit a few days ago from Messrs. Fred. Barker and Robert Coyle, of Toronto, and it is announced that they secured from the Canadian Pacific Railway a site for a large frost-proof warehouse for Ontario apples en route to the English market. The building will have capacity for $20,000 barrels.

Messrs. Stetson, Cutler & Co., who recently leased the pulp mill on the Mespec stream owned by the city of St. John, are taking out the old engines and installing heavier machines. Messrs. Stetson, Cutler & Co. are Americans, and are operating the pulp mill with great success. The English concern who built it were unable to earn dividends, and the city bought it at bankrupt sale to wipe out damage claims in connection with its water extension.

Recently two New Brunswick mills which were destroyed. One was at Williamsburg, York County, owned by John A. Humble, and the other at Middle River, Gloucester County, owned by The Gloucester Lumber Company.

Professor Carey, an expert from Harvard University, with a corps of assistants, has been for some time examining into the water-powers on the property of the Inglewood Pulp Company in this Province. Their lands in the heart of the Province are very extensive, and it is said the company composed largely of Americans, plan to unite two rivers and thus secure a powerful water privilege capable of great development.

BANKING AND FINANCIAL.

Brouse, Mitchell & Co., have removed from 18 King Street West, Toronto, to larger and more suitable offices at 19 Colborne Street West.

Mr. Charles F. Millar, of the Canadian Bank of Commerce, has been appointed manager of the Shedden branch of the Sterling Bank of Commerce.

Mr. R. L. Davidson, who resigns his position with John Macdonald & Co., Limited, to enter into the commission business on his own account, was presented with a gold watch by his late fellow-employees of that establishment.

The Central Railway Company of Canada, which proposes to build a line from Midland, on Georgian Bay, to Montreal, with extensions to Toronto and Port Stanley, will shortly offer for subscription a large block of 5 per cent. first mortgage sterling fifty-year bonds.

J. C. Mackintosh & Co., bankers and brokers, Halifax, have sold the building occupied by them and have bought the Bank of Montreal building on the corner of Hollis and Prince Streets in that city, which they will occupy as soon as the bank moves to its Duke Street property.

La Chambre de Commerce of Montreal is going ahead. Fifty-three names were added to its roll of membership at a recent meeting. The number of new members since 30th April is 198. Those who will go to London as delegates of the Chamber to the sixth congress of the Chambers of the Empire in July are: Mr. C. H. Catelli, president of the Chambre de Commerce; Hon. J. I. Tarte, Mr. Alcide Chausse, civic building inspector; ex-Ald. S. D. Vaillieres, and Mr. Leon Garneau, barrister.

The following are now appointments in connection with the Dominion Bank: Mr. C. D. Gordon of Toronto Junction branch, to be manager of the Queen Street branch, Toronto, in succession to Mr. Horsey, who has been appointed to Montreal; Mr. J. Cruso, from the Market branch, to be manager at the Junction; Mr. C. A. Ross, manager at the City Hall branch, to be assistant manager of the Toronto branch, and Mr. S. L. Jones, one of the inspectors, to replace Mr. Ross at the City Hall branch.

Mr. W. F. Cockshutt, M.P., and Mr. F. G. Morley, secretary of the Toronto Board of Trade, two of the Toronto delegates to the congress of Chamber of Commerce of the Empire, which opens in London on July 10th, sail from Quebec by the "Empress of Britain." Of the other representatives, Mr. J. F. Ellis, sailed yesterday by the "Victorian," and Mr. Noel Marshall on Tuesday from New York. Their colleagues, Col. Denison, Mr. W. A. Medland, Mr. C. W. Band, Mr. C. W. I. Woodland, and Mr. J. W. Woods are already in England. Mr. A. E. Kemp, M.P., and Mr. D. R. Wilkie will be going shortly. As an instance of the hospitality which will be extended to the Canadian delegates, it may be mentioned that Mr. Morley has already been accorded the privileges of membership of the Constitutional Club.

Financiers and Toronto University.

Of the eighteen members of the new Board of Governors of the re-constructed Toronto University, ten are associated with leading financial and business institutions, as the following list shows:—

Mr. W. T. White is general manager of the National Trust Company, Toronto.

Judge Colin Snider, of Hamilton, a director of the Hamilton Provident and Loan Society.

The Rev. D. Bruce Macdonald, principal of St. Andrew's College, who was a member of the University Commission, is a director of the Niagara Navigation Company.

Sir Mackenzie Bowell, Belleville, formerly Premier of Canada is president of the Imperial Life Assurance Company, also president of the Belleville Hardware Company, Limited.

Dr. John Hoskin, K.C. (Chairman of the Board), is a member of the firm of McCarthy, Osler, Hoskin &

Harcourt, president of the Toronto General Trusts Corporation, vice-president of the Canada Landed and National Investment Company, and a director of the British America Assurance Company, Canada Life Assurance Company, Canadian Bank of Commerce and Consumers' Gas Company, of Toronto.

Mr. J. L. Englehart, of Petrolea, is a member of the Temiskaming & Northern Ontario Railway Commission, and the vice-president of the Crown Savings and Loan Company, the Imperial Oil Company, and the London and Western Trusts Company.

Mr. Byron E. Walker, who was a member of the University Commission, is general manager of the Canadian Bank of Commerce, and a director of the Canada Life Assurance Company, and of the Toronto General Trusts Corporation.

Mr. G. R. R. Cockburn, M.A., Toronto, is president of the Ontario Bank, Consumers' Gas Company, London & Canadian Loan & Agency Company, Toronto Land & Investment Corporation, and Western Assurance Company.

Mr. Chester D. Massey is treasurer and hon.-president of the Massey-Harris Company, Toronto, a director of the Central Canada Loan & Savings Company, Dominion Securities Corporation, and National Trust Company, City Dairy Company, and president of Sawyer & Massey Company, Hamilton, and Jas. Warnock Company, Galt.

Mr. J. W. Flavelle, late chairman of the University Commission, is managing director of the Wm. Davies Company, president of the National Trust Company, director of Canada Life Assurance Company, Canada Cycle & Motor Company, Canadian Bank of Commerce, president of Davies, Limited, Montreal, and of The William Davies, Buffalo, president and managing director of the Davies Packing Company, Limited, director of Flavelle Milling Company, Imperial Varnish & Color Company, John Murphy Company, Limited, Montreal, and Robert Simpson Company, Toronto, and president of the News Publishing Company, Toronto.

Mr. E. B. Osler, M.P., of the financial firm of Osler & Hammond, Toronto, is president of the Dominion Bank, vice-president of the Canada North-West Land Company, vice-president of the War Eagle Consolidated Mining & Development Company, director of the Canadian Pacific Railway Company, Centre Star Mining Company, Consolidated Cariboo Hydraulic Company, Confederation Life Assurance Company, Qu'Appelle, Long Lake & Saskatchewan Railway & Steamship Company, Consumers' Gas Company, St. Lawrence & Chicago Steam Navigation Company, Toronto General Trusts Corporation, managing director of the Ontario and Qu'Appelle Land Company, and member of the Advisory Board for Canada of the North of Scotland Canadian Mortgage Company.

* * *

C. M. A. IN THE WEST.

A pretty legend of the Greek Mythology is given as a basis for an old-time Mediterranean custom of calling periods of especially fine weather "halcyon days." The term has often been applied to the delightful weeks enjoyed on ocean or prairie or mountain by the excursionists of the Canadian Manufacturers' Association. More halcyon days are promised by the Canadian Manufacturers' Association circular, giving the itinerary associated with the annual meeting to be held at Winnipeg on September 17th, 18th and 19th. Leaving Montreal and Toronto on Friday evening the 14th, and arriving in Winnipeg on Sunday, excursionists may take part in the convention, and on Thursday morning proceed by special train to Regina, Calgary and Banff, thence to the coast cities. The homeward trip is to be by C. N. R. from Edmonton to Winnipeg, with stops at Battleford, Kenora, and Port Arthur, arriving at Toronto and Montreal October 4th.

HOW CROPS ARE GROWING.

Below is the first of the weekly telegrams from our Winnipeg correspondent on Western crop progress:

Winnipeg, Thursday, June 21st.

"Crops growing fast and prospects never better" is the sum and substance of the crop report throughout the West. In many districts the wheat is from one to two feet high and in the Brandon section the high water mark is reached at Chater, where the wheat is reported to be 36 inches high. In that district warmth and heavy dews have brought all the crops forward rapidly. At several points the wheat is heading out following the past week of heat and moisture. The crops generally are in a splendidly healthy condition and the remark, "Prospects never better" is made again from practically all districts.

Ontario Prospects Have Improved.

Toronto, Thursday, June 21st.

Opinions as to the Ontario outlook gathered from competent authorities in all parts of the Province are somewhat divided. Three weeks ago much concern was felt. A late spring, followed by cold dry weather retarded growth of both winter and spring crops. The ground did not receive its cleaning up by beneficent rains, but the moisture since the first of the month has made fair amends and failing later drawbacks an average all round crop is assured. Hay particularly on old meadows will be light, and new sown fields are not as prolific of timothy as they might be. It is not too late for recovery in grass, but a heavy crop is impossible. Clover, like winter wheat was disturbed by the frosts and is patchy. Results from the spring seeding are showing better than that of last fall. Oats and peas are looking well. The latter is making for a splendid yield in Bruce County. Seeding of root crops has been delayed by late rains. Prices of cereals of all kinds are ruling firmer and grain merchants are not disposed to expect any lowering of prices unless a more than average improvement is noted from this time forward.

The Canadian Seed Growers' Association will hold its third annual convention at Ottawa next Wednesday and Thursday. The first Minister of Agriculture for Saskatchewan, the Hon. W. R. Motherwell, will be a leading speaker, and will also read a paper on "Wheat Growing in the West." Papers will also be contributed by experts from North Dakota and France.

* * *

AMERICAN AND WORN SILVER COINS.

The Canadian Bankers' Association was notified this week that the arrangement between the Government and the banks, whereby the latter became the custodians of United States silver coins pending their deportation to that country, will expire on June 30th. No appropriation having been made for its renewal. This is to be regretted, for although the plan took some time to become workable, it has been beneficial; though not, perhaps, for the banks, whose commission of ⅜ of 1 per cent. was barely sufficient to pay for the trouble incurred. But on national grounds, the arrangement has been profitable. The amount of American silver in this country having noticeably decreased this year. Up to last Friday the amount received by the agents of the Dominion Government in New York was $360,435. Representations will likely be made to the Government against cancelling the arrangement.

Hon. Mr. Fielding's bill providing for the redemption of worn-out silver is badly needed. There is all the difference between clipped or defaced coinage and coinage that becomes worn through ordinary use. Why should the public suffer for the deterioration of an article upon which the Government makes a handsome profit? Government notes are redeemable, even though they be in shreds; why not silver coins?

LIFE INSURANCE CHRONICLE.

Our report of the Insurance Commission's investigation of the Excelsior Life Company is crowded out.

The Minister of Justice announced that he was reasonably certain that the Insurance Commission will report in time for the next session of Parliament.

The Insurance Commissioners have invited the Dominion Life Underwriters' Association to appoint a committee to lay before them the Association's views upon the questions upon which report will be made to Parliament.

By voting unanimously on Wednesday for the mutualization of the company, the directors of the New York Equitable endorsed the pro-mutualization vote passed by the stockholders on Monday by a large majority. There is still opposition to this step. But though some formal protests were made at the stockholder's meeting charging it to be unconstitutional and illegal, it is not likely that further action will be taken. The amended charter provides that the policyholders shall elect 28 out of 52 directors.

A bill to incorporate the Sterling Life Assurance Co. with a capital of $2,500,000 passed the House of Commons. The company is a Toronto venture. Its incorporators are the Hon. J. W. St. John, J. W. Garvin, R. J. Wilson, W. H. Shaw, and G. H. Garvin. Protest against the largeness of the capital was made by Mr. W. F. Maclean, to which Mr. Miller replied that as the company would issue no profit sharing policies the amount of stock was unimportant.

The General Accident Assurance Company, of Canada, is beginning business with offices at 301-303 Stair Building, Toronto. The company has an authorized capital of $1,000,000, and will write accident, sickness and guarantee insurance. A deposit of $50,000 has been made at Ottawa and it is expected that the company will open for business within the next few days. Mr. W. G. Falconer, who has long been identified with casualty insurance will, in conjunction with Mr. C. Norie Miller manage the company's affairs. Prior to coming to Canada Mr. Falconer was claims manager for the parent company, the General Accident Assurance Corporation, Limited, Perth Scotland. Mr. C. Norie Miller comes to Canada from the Philadelphia office. He is the son of F. Norie Miller, the general manager of the Scottish company. A new feature will be the writing of industrial accident risks, these premiums being collected monthly. Mr. W. H. Hedges, late superintendent of agencies of the Ontario Accident Insurance Co. is to be assistant manager.

* * *

DEATH OF W. B. HAMILTON.

A business career of fifty-seven years spent in one community is a long one. The business career of Mr. Wm. B. Hamilton, the Toronto shoe manufacturer, who died on Tuesday at the age of 83, was even longer than this, for he was in business in Montreal in the days of Champion Brown, of Brown & Childs, whose brother-in-law he was. The Toronto branch firm in those days was Childs & Brown, and when Myron Brown left it for Massachusetts, and W. B. Hamilton took his place it became Childs & Hamilton, and when he went into the boot and shoe manufacture in Toronto about 1859, after having been a clothier on King Street East, it was as a member of the firm of Childs & Hamilton. In later years the style of his business was changed, and at his death it was the W. B. Hamilton Shoe Company. Mr. Hamilton was one of the old school business men, honorable, conservative and steady-going. Having been all his life methodical and prompt he had no patience with those retailers, and they are many, who have neither method nor promptitude, but are always behind. Mr. Hamilton was born in Montreal in 1823, and came to Toronto in 1849. He built up a large business and accumulated considerable capital. Of late years his sons have been associated with him, and we understand, that they succeed him in the business. Mr. Hamilton was president of the Toronto Board of Trade in 1881, and had been for a number of years a director of the Canadian Bank of Commerce. He was on the board of the Industrial Exhibition Association for years; also a director of the London & Ontario Investment Company and of the Fire Insurance Exchange.

* * *

STOCK EXCHANGE HAPPENINGS.

Several reasons may be given for the present unsettled state of the stock market. Lightness of money is one, the curiosity as to the outcome of the season's farming operations is another, while the publicly and privately expressed doubts as to the inner methods of large financial corporations on this continent is undoubtedly another factor which helps to keep the outside public, at least, comparatively uninterested in stock exchange matters. Against these more or less bearish factors may be placed, the great prosperity of the whole country, together with the large earnings of railroad and industrial enterprises, and the spirit of buoyancy consequent thereupon.

On the whole, though, as we have said, there is no extraordinary activity either on the Canadian Stock Exchanges or in Wall Street, the volume of business is about normal for this period of the year. Prices of most stocks, it should be remembered, are high, higher perhaps than is warranted altogether by circumstances. This and the tendency of money to fluctuate daily within reasonable limits, ought to make a good trading market.

Perhaps the most conspicuous feature on the Toronto 'Change recently has been Mackay, which has shown a fairly constant though slow tendency to advance. Common was yesterday quoted at 75 and preferred at 73 to 74. There is a general impression that the dividend may be further increased. Navigation companies are beginning to draw greater attention as is usually the case at this period of the year. Both Northern and Niagara Navigation have shown considerable firmness. A good deal of uncertainty has been apparent in Dominion Coal and Dominion Iron and Steel. The bounties on steel become automatically lower from the first of next month, and as this, of course, is likely to affect earnings materially, speculators are indisposed to take hold of the stock deeply. Dominion Coal output is likely to be influenced by scarcity of labor. However, on one or two days this week it was fairly active, 79 to 80 being the average quotations for common stock and 80 to 83 for preferred.

A strong feature on the Montreal Stock Exchange has been the great firmness of Montreal Street Railway, due, it would seem to the Company's plans of extension and consequently enhanced earning power.

* * *

Osler & Hammond, financial brokers, are about to erect a $200,000 five-story office building in Winnipeg.

The southwest corner of Bank and Somerset Streets in Ottawa has been bought by the Bank of Ottawa to erect a branch office upon, as soon as present leases expire. An opposite corner is to be occupied by a branch of the Royal Bank, a new building of cement concrete of modern design and with latest equipment will presently be erected.

* * *

—The city treasurer's recent statement shows that there are in Montreal 55,462 houses, yielding rentals varying from $20 to $5,000 a year. Three yield $2,500, eleven $2,000, and only one as much as $5,000. The most numerous class of houses is that yielding $70 a year; there being 6,685 of these (tenements probably—for the most part). Those which bring rentals of $60 and $80 number slightly over 6,000. On the other hand there are 66 houses rented at $1,000 each, and an equal number at $900, 99 yield $800, and 101, $700. These rentals are what the city assesses water taxes, etc., on, and are usually a little less than the actual rent paid by tenants.

MEETINGS.

THE MERCHANTS BANK OF CANADA.

The forty-second annual meeting of the shareholders of the Merchants Bank of Canada was held in the board room of that institution yesterday, at noon, when there were present: Sir H. Montagu Allan, Messrs. Jonathan Hodgson, J. P. Dawes, C. R. Hosmer, Alex. Barnet (Renfrew), E. F. Hebden, John Morrison, Michael Burke, F. Orr Lewis, D. A. Lewis, Allen Brown, George Smith, Edward Fiske (Joliette).

The proceedings were opened by Sir H. Montagu Allan, the president, taking the chair, and requesting Mr. C. N. Read, the secretary of the bank, to act as secretary of the meeting.

Report.

The president submitted the following report of the directors:

The directors beg to present to the shareholders the annual statement of the bank's business as at 31st May last.

It will be observed that the earnings have improved somewhat over the previous year, due to the better trade conditions and the better opportunities offering for the employment of capital. The directors have thus been able again to add $200,000 to the rest account, and, in addition, have been enabled to write $100,000 off bank premises, and to make the usual contribution—this year, $19,000—to the officers' pension fund.

Mr. E. F. Hebden, who was appointed acting general manager before the last annual meeting of shareholders, was confirmed by the directors in the position of general manager.

The various branches of the bank have been inspected.

The board have decided upon the policy of paying quarterly dividends, beginning with the current financial year.

All of which is respectfully submitted.

H. Montagu Allan, President.

Statement of the Result of the Business of the Bank for the Year Shows.

The net profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to		$740,398 99
The balance brought forward from last year ending 31st May, 1905, was		73,197 20
Making a total of		$813,596 19

This has been disposed of as follows:—

Dividend No. 74, at the rate of 7 per cent. per annum	$210,000 00

E. F. Hebden, General Manager.

* * *

The Discussion.

The president stated that he would be pleased to answer any question any shareholder might desire to ask, and in the meantime he moved, seconded by Mr Jonathan Hodgson, the vice-president:

"That the report of the directors as submitted be, and the same is, hereby adopted and ordered to be printed for distribution among the shareholders."

Mr. John Morrison enquired if the general manager had no remarks to make, and the latter replied that he hoped the statement which had just been read would speak for itself. There was really nothing to say to business men like the shareholders present, who, no doubt, studied the general situation for themselves, as it applied to their own important interests.

Mr. John Morrison referred to the financial statement and spoke of the excellent position which the bank occupied, after which Mr. D. A. Lewis asked if the large increase in the deposits was general throughout the year, or had some large amounts been paid in which were likely to be drawn out?

The President—There were one or two large amounts paid in, but the increase has been pretty general all over. There may be withdrawals—it is impossible to say—but I think the tendency is to increase all the time.

The motion for the adoption of the report was then carried unanimously.

The President—Now, gentlemen, I have rather a delicate matter to bring before you. from the fact that it is for the benefit of the directors. We have hitherto had $10,000 annually for our remuneration, but the bank has grown very largely, as you know, and work has increased also, so we ask you to increase our remuneration from $10 000 to $15,000, for the president and the board generally. Mr. John Morrison moved, and Mr. F. O. Lewis seconded, the following resolution:

"That By-law No. 6 be amended by striking out the word 'ten,' and replacing the same by inserting the word 'fifteen.'"

This resolution was unanimously concurred in, after which it was moved by the president:

"That Messrs. John Morrison and F. Orr Lewis be appointed scrutineers for the election of directors about to take place; that they proceed to take the votes immediately; that the ballot shall close at 3 o'clock p.m., but if an interval of ten minutes elapse without a vote being tendered, the ballot shall thereupon be closed immediately."

This was adopted.

A vote of thanks was tendered the president for his conduct of the business of the meeting, and shortly afterwards the scrutineers reported that the following gentlemen had been elected as directors: Sir H Montagu Allan, Mr. Jonathan Hodgson, Mr. J. P. Dawes, Mr. Thomas Long, Mr. C. R. Hosmer, Mr. C. F. Smith, Mr. Hugh A. Allan, Mr. C. M. Hays, Mr. Alex. Barnet.

The meeting then adjourned.

The new board of directors met in the afternoon, and Sir H. Montagu Allan was re-elected president, and Mr. Jonathan Hodgson, vice-president.

* * *

FROM THE NORTH OF ENGLAND.

Manchester, Wednesday, June 13th.

The Chicago packing-house disclosures led the Hon. Mr. Fisher promptly to cable on behalf of Canadian canned meats: "The establishments are clean," his message runs, "the goods are of the very best quality, and no complaints of any kind are made." So far so good, but consumers are anxious for particulars as to the method and thoroughness of the inspection. American canned stuff is foremost indicted; but canners everywhere are under a cloud, and at least temporarily the business of all must suffer. No better service can be done for, or by, Canadian producers than to show why their produce may be bought unhesitatingly. Our minds are made up that the British system of inspection is inadequate and will have to be improved. Is the Canadian system thorough?

Of course, the scare will pass and time will bring a new generation who know nothing of the horrors of Packingtown. Meantime it, is observed that two separate purchasers have testified to the finding of human fingers in Chicago cans. In various workhouses our paupers have rebelled against canned beef, and without respect of origin factory. Butchers' stuff is held suspect. Canadian and American packers will know what the British market is worth to them. Our own statistics tell nothing, except that $13,000,000 worth of meat, preserved otherwise than by salting (exclusive of bacon) is imported annually. Of that, $1,500,000 is re-exported. Canadian packers might find our merchant exporters of use to them.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, 21st June, 1906, as compared with those of the previous week:—

	June 21.	June 14.
Montreal	$29,999,092	$30,620,465
Toronto	23,651,077	24,085,389
Winnipeg	8,770,877	8,369,721
Halifax	1,678,528	1,959,993
Hamilton	1,501,013	1,409,635
St. John	1,165,436	1,078,081
Vancouver	2,529,322	2,492,451
Victoria	641,126	692,901
Quebec	1,920,103	1,814,275
Ottawa	2,554,877	2,004,503
London	1,071,102	1,083,737
Calgary		932,456
Total		$76,543,607

TRADE OPPORTUNITIES IN BRITAIN.

The following were among the enquiries relating to Canadian trade received at the Canadian Government office, 17 Victoria Street, London, S.W., during the week ending 8th June, 1906:—

A London firm is anxious to open up business with a Canadian exporting house seeking an outlet for sausage casings, preserved tongues, etc.

A Cardiff firm is desirous of getting in touch with a first-class flour milling company in Canada who can supply a good lower grade flour at a moderate price.

A Canadian firm importing graphite has asked to be placed in communication with English houses, handling graphite from Ceylon.

A London manufacturing company asks to be placed in correspondence with Canadian manufacturers of pulp board suitable for the production of paper boxes.

A Sheffield firm manufacturing butchers', shoe, palette, putty, and other knives, also table cutlery, scissors, and razors, asks to be placed in communication with Canadian importers of these goods.

ONTARIO BANK.

The annual meeting of the shareholders of the Ontario Bank was held at the head office, Toronto, on Tuesday, June 19th, 1906, at 12 o'clock noon.

Among those present were: G. R. R. Cockburn, Donald Mackay, John Flett, Henry Lowndes, Thos. Walmsley, R. Grass, Hon. R. Harcourt, R. D. Perry, Henry Lowndes, Barlow Cumberland, R. Mulholland, Cephas Goode, F. B. Polson, J. K. Macdonald, T. H. Bull and others.

On motion Mr. Geo. R. R. Cockburn was called to the chair and Mr. McGill was requested to act as secretary.

Messrs. J. K. Macdonald and Henry Lowndes were appointed scrutineers.

At the request of the chairman, the secretary read the following report:—

Report.

The directors beg to present to the shareholders the 49th annual report for the year ending 31st May, 1906, together with the usual statement of assets and liabilities.

Profit and loss (brought forward from 31st May, 1905)		$ 62,445 79
The net profits, after deducting charges of management, interest accrued upon deposits, and making provision for bad and doubtful debts, were		156,915 83
		$219,361 62

Which have been appropriated as follows:—

Dividend 3 per cent. paid 1st December, 1905	$45,000 00	
Dividend 3½ per cent. payable 1st June, 1906	52,500 00	
Added to rest	50,000 00	
Reserved for officers' pension fund	5,000 00	
		$152,500 00
Balance of profits carried forward		$66,861 62

The rest account has been increased by $50,000, which now stands at $700,000, and the amount carried forward to the credit of profit and loss account is $66,861.62.

The deposits have increased $634,040.25 since our last annual meeting, and the general business of the bank continues to steadily improve, which must be regarded as satisfactory.

Branches and sub-branches of the bank have been opened at King City, Port Hope, Millbrook, Warsaw and Peterboro', (South End).

Your directors have decided that in future all dividends shall be paid quarterly.

All the offices of the bank have been inspected during the year, and your directors have pleasure in acknowledging the efficient manner in which the staff have performed their respective duties.

G. R. R. Cockburn, President.

		$13,230,764 09
		$16,734,991 64

After a few remarks by the chairman, the report was adopted.

By resolution the sum of $5,000 was granted to the officers' pension fund of the Ontario Bank.

The following resolution was moved and carried:—

That the thanks of the shareholders are due and are hereby tendered to the president, vice-president, directors, general manager and officers of the bank for the satisfactory manner in which they have discharged their respective duties during the past year.

The scrutineers appointed at the meeting subsequently reported the following gentlemen duly elected directors for the ensuing year, viz.:—Geo. R. R. Cockburn, Donald Mackay, R. D. Perry, Hon. R. Harcourt, R. Grass, T. Walmsley, John Flett.

The new board met the same afternoon, when Mr. Geo. R. R. Cockburn was elected president, and Mr. Donald Mackay, vice-president.

C. McGill, General Manager.

The Ontario Bank,
Toronto, June 19th, 1906.

* * *

UNION BANK OF CANADA.

The forty-first annual general meeting of shareholders of the Union Bank of Canada was held at the banking house in Quebec, on Monday, June 18th. There were present:—Messrs. Andrew Thomson, Hon. John Sharples, Wm. Price, E. J. Hale, Wm. Shaw, Wm. Brodie, T. C. Aylwin, Lieut.-Col Turnbull, Arther E. Scott, C. P. Champion, Peter Johnson, Geo. H. Thomson, J. P. Casgrain, H. E. Dupre, Capt. W. H. Carter, T. H. Norris, J. H. Simmons, C. A. Pentland, and Jules Roy, (St. Anselme).

On the motion of Hon. John Sharples, seconded by Mr. Wm. Price, the president, Mr. A. Thomson, took the chair, and requested Mr. J. G. Billett to act as secretary of the meeting, and Messrs. C. P. Champion and Arthur E. Scott as scrutineers, which was agreed to. The chairman read the report of the directors, which was as follows:—

Report.

The directors beg to submit a statement of the assets and liabilities of the bank at the close of the financial year ending 31st May last, also the following statement of the result of the business for the past year:—

Profit and Loss Account.

Balance at credit of account, May 31st, 1905	$74,513 66
Net profits for year, after deducting expenses of management, interest due depositors, reserving for interest and exchange, and making provision for bad and doubtful debts, and for rebate on bills under discount, have amounted to	452,930 24
Premium received on 5,000 shares of new capital stock	200,000 00
	$727,443 90

Which has been applied as follows:—

Dividend No. 78, three and one-half per cent.	$94,897 00
Dividend No. 78, three and one-half per cent.	105,000 00
Transferred to rest account	400,000 00
Written off bank premises	100,000 00
Balance of account carried forward	27,546 90
	$727,443 90

The capital of the bank was increased during the year by the sale of 5,000 shares of its stock at $140 per share. The premium on $200,000 was added to the reserve fund, which now amounts to $1,500,000, or 50 per cent. on the capital of the bank. The net earnings of $452,930.24 show 16.04 per cent. on the average capital in use during the year.

New branches or agencies have been opened in the following provinces:—Quebec, 1; Ontario, 7; Manitoba, 4; Saskatchewan, 11; and Alberta, 2.

Your directors recommend that authority be given to them to make such provision for a pension fund for the officers of the bank, as they may from time to time deem desirable.

The directors have to record with much regret the death during the year of Mr. E. Giroux, a much esteemed member of the board. The vacancy was filled by the election of Mr. R. T. Riley, of Winnipeg.

The customary inspection of the branches has been made during the year.

A. Thomson, President.

Quebec, June 18th, 1906.

Rest Account.

Balance at credit of account, May 31st, 1905	$1,100,000 00
Premium received on new capital stock	200,000 00
Amount transferred from profits	200,000 00
	$1,500,000 00
Average capital in use during the year	$2,823,800

Other assets		1,260 00
		$28,281.157 74

G. H. Balfour, General Manager.

Quebec, May 31st, 1906.

It was then moved by Mr. A. Thomson, and seconded by Hon. John Sharples:—"That the report submitted to this meeting be adopted and printed for distribution among the shareholders.—Carried.

Moved by Captain Carter, and seconded by Lieut.-Col. Turnbull:—"That authority is hereby given to the directors of the bank to establish guarantee and pension funds, at such time and on such terms and subject to such conditions as the directors may by resolution of the board determine, and, for the purpose aforesaid, the directors may contribute thereto out of the funds of the bank such sums as they may deem proper for the due carrying out of this by-law."—Carried.

The chairman having asked for an expression of opinion from the shareholders assembled as to the advisability of the bank paying quarterly dividends in future, instead of half yearly as heretofore, it was moved by T. H. Norris, seconded by Lieut.Col. Turnbull, and carried unanimously, that the practice of paying half-yearly dividends be continued.

Moved by Mr. A. Thomson, and seconded by Mr. T. H. Norris:—"That the meeting now proceed to the election of directors for the ensuing year, and that the ballot box for the receipt of votes be kept open until one o'clock, or until five minutes have elapsed without a vote being offered, during which time proceedings be suspended."—Carried.

The scrutineers appointed at the meeting reported that the following gentlemen were elected directors of the bank for the ensuing year:—Messrs. Andrew Thomson, Hon. John Sharples, E. J. Hale, Wm. Price, Wm. Shaw, E. L. Drewry, John Galt, F. E. Kensington, R. T. Riley, and M. B. Davis.

At a subsequent meeting of the new board of directors Mr. A. Thomson was re-elected president, and Hon. John Sharples, vice-president.

Mr. Mortimer B. Davis, of Montreal, who has been elected a director of the Union Bank of Canada, is president of the American Tobacco Company, of Canada, Limited, Montreal; the Empire Tobacco Company, Limited, of Granby, P.Q., and Montreal, and the H. Corby Distillery Company, Limited, of Belleville, Ontario.

* * *

THE STANDARD BANK OF CANADA.

The thirty-first annual meeting of the shareholders of the Standard Bank of Canada was held at the head office, corner of Jordan and Wellington Streets, Toronto, on the 20th inst. Amongst those present were; W. F. Allen, R. C. Bickerstaff, W. F. Cowan, Fred. W. Cowan, W. Francis, J. Hedley, W. R. Johnston, David Kidd, (Hamilton), H. Langlois, J. K. Niven, G. B. Smith, W. W. Tamblyn, Frederick Wyld, and others.

The chair was taken by the president, and the general manager was requested to act as secretary of the meeting.

The chairman read the report of the directors, and the general manager read the statement of the affairs of the bank, as on the 31st May, 1906.

Report.

The directors beg to present to the shareholders, the thirty-first annual report for the year ending 31st May, 1906, together with the usual statement of assets and liabilities.

The business of the past year has been very satisfactory and the net profits, after making provision for bad and doubtful debts, for rebate of interest on unmatured bills under discount, etc., amount to $175,652.03. To this has been added $184,278, the premium on new stock issued at $200 on the 15th May, 1906, which, together with the balance of profit and loss account of $62,114.83 brought forward from last year, amounts to $422,044.86.

This has been appropriated as follows:—

Half yearly dividend No. 60, paid 1st December, 1905, at the rate of 10 per cent. per annum	$ 50,000 00
Quarterly dividend No. 61, paid 1st March, 1906, at the rate of 10 per cent. per annum	25,000 00
Quarterly dividend No. 62, payable 1st June, 1906, at the rate of 12 per cent. per annum	30,975 14
Transferred to reserve fund from profits	100,000 00
Transferred to reserve fund from premium on new stock	184,278 00
Carried forward at credit of profit and loss account.	31,791 72

Authority was obtained from the shareholders at a special meeting held on the 13th February, 1906, to increase the capital stock of the bank by $1,000,000, and the directors, in pursuance thereof, have allotted $250,000, to shareholders of record at a premium of 100 per cent.

Agencies and sub-agencies of the bank have been opened during the year at Bloomfield, Castleton, Consecon, Deseronto, Flesherton, Maple and St. Lawrence Market, Toronto. Offices will also be opened next month in Ottawa, and on Yonge Street, Toronto.

Since our last meeting the bank has sustained a severe loss in the death of the late Mr. Thomas R. Wood, who joined the board of directors in 1894. Mr. F. W. Cowan was appointed to the vacancy.

The head office and agencies of the bank have been inspected during the year, and your directors have pleasure in acknowledging the efficient manner in which the staff have performed their duties.

W. F. Cowan, President.

Toronto, 31st May, 1906.

	$17,745,111 98

G. P. SCHOLFIELD, General Manager.

The usual resolutions conveying thanks to the directors and officers were passed, after which the vote was taken for the election of directors. The following were elected; W. F. Cowan, W. F. Allen, Frederick Wyld, W. Francis, W. R. Johnston, F. W. Cowan, and H. Langlois.

At a meeting of the directors held subsequently, Mr. W. F. Cowan was re-elected president, and Mr. Frederick Wyld, vice-president.

* * *

—An eminent English judge, sent to South Africa on Royal Commission business, took lady B. with him, and opened an account of £300 for her at the Standard Bank, Capetown. After a while her ladyship presented a cheque which the teller declined to cash, saying there were no funds. "How can that be?" came the reply. "I haven't finished my cheque book yet."

		$22,100,761 02
		$27,973,445 77

H. S. Strathy, General Manager.

Report.

The accompanying statement shows the result of the business of the bank for the year ending 31st May, 1906; also its financial position as on that date.

The business of the bank continues to show satisfactory progress. The net profits, 13.21, are in excess of the previous year, when they were 11.34.

New business of a most desirable character continues to be offered, and in order to take advantage of the large and growing business offering in the North-West, and especially at Winnipeg, where results have far exceeded the best expectations of the management, your directors considered it was in the best interests of the bank to increase its capital, under the authority given at a special meeting of the shareholders held on the 17th of April. An allotment of two million dollars was therefore made on the 21st of May in the proportion of two new shares for each three held at the close of business on the first day of June. This allotment was made at 40 per cent. premium, being slightly below the proportion the rest then bore to capital, and, while it is only two weeks since the allotment was made, it has been most gratifying to the directors to find that subscriptions have already been received for nearly one million dollars, a large proportion of which has been paid, and with still many shareholders yet to hear from.

At the special meeting of shareholders above referred to the date for holding future annual meetings after the present one was changed by by-law to the fourth Tuesday in January of each year, and as our stock is held almost entirely as investment, it is proposed that dividends hereafter shall be paid quarterly, and in order to bring those into even quarters for the year a dividend for four months will be paid on the first of October, and quarterly thereafter on the first of January, and each succeeding three months.

Your directors hope to welcome the shareholders at the annual meeting in January next, in the new and commodious bank premises now nearing completion on Yonge street. The bank has provided for ample accommodation in the building for future growth and expansion, and your directors have pleasure in stating that the demand for offices is quite equal to the most sanguine expectation. The vault accommodation will furnish absolute protection to the bank's securities, and it will be gratifying to know that every precaution has been taken in this respect to guard against loss by fire or otherwise.

During the fiscal year just closed nineteen new branch offices have been opened, viz.: thirteen in the Province of Ontario, two in Manitoba, including Winnipeg, three in Alberta, including Edmonton and Calgary, and one at Regina, Saskatchewan.

The different offices of the bank continue to receive the usual careful inspections.

C. D. Warren, President.

The usual resolutions were moved and adopted.

The scrutineers reported the following gentlemen duly elected to act as directors for the ensuing year, viz.: C. D. Warren, Hon. J. R. Stratton, C. Kloepfer, (Guelph), W. J. Sheppard, (Waubaushene), C. S. Wilcox, (Hamilton), E. F. B. Johnston, K.C.

The meeting then adjourned.

At a subsequent meeting of the newly-elected directors Mr. C. D. Warren was re-elected president, and Hon. J. R. Stratton, vice-president by a unanimous vote.

H. S. Strathy, General Manager.

The Traders Bank of Canada,
Toronto, June 19th, 1906.

The following comparative statement will show the progress of the bank from 31st May, 1897:—

As on 31 May	Capital Paid-up.	Rest.	Deposits.	Circulation.	Assets.	Dividend.
1897 ..	$700,000	$40,000	$4,235,331	$676,195	$5,886,855	6
1898 ..	700,000	50,000	4,930,817	697,680	6,824,850	6
1899 ..	700,000	70,000	5,661,112	680,920	7,638,303	6
1900 ..	1,000,000	150,000	6,528,074	987,440	9,177,061	6
1901 ..	1,344,420	250,000	7,672,591	1,192,470	10,846,449	6
1902 ..	1,350,000	350,000	8,890,430	1,337,600	12,294,836	6
1903 ..	1,500,000	450,000	10,881,652	1,439,510	14,759,572	7
1904 ..	2,000,000	700,000	13,311,296	1,868,900	18,573,533	7
1905 ..	2,996,715	1,100,000	15,809,740	2,111,350	22,330,016	7
1906 ..	3,000,000	1,250,000	20,490,872	2,310,125	27,973,445	7

MR. FIELDING'S TENTH BUDGET.

The Minister of Finance has published his Budget speech, delivered on May 22nd. There are only about 9,000 words in it. Very few men in Mr. Fielding's place would be content with such a condensed setting forth of the figures of a year of great national advance. The speech has a special noteworthy personal association. It was Mr. Fielding's tenth successive effort of the kind. In modern times no Chancellor of the Exchequer in London, and no finance committee in the British Dominions beyond the seas made such a record. Sir Wilfrid Laurier's ministers come and go, but Mr. Fielding seems a permanency. The longer he stays the more compact his Budget speeches seem to grow. Long explanations are sometimes the sign of financial discomfort.

* * *

PROSPECTS OF VERNON, B. C.

Most of us have heard Okanagan (pronounced O-Kanawgan, with an accent on the *aw*) as a fruitful district of British Columbia, surrounding the lake of the same name. It is a lovely country, with a charming climate. On the way down from Sicamous by rail is Vernon, which is thus described in a brochure issued by the Board of Trade of the town: "Vernon—the hub of the Okanagan, with a population of about 1800, is beautifully situated on the S. & O. Railway, 46 miles south of Sicamous on the main line of the C. P. R., at a point from which radiate excellent roads leading to the northern towns and settlements, to Coldstream and White Valleys, to Kelowna and the rich fruit-growing districts of the south, and to Grand Prairie and Kamloops. It has been endowed by nature with as ideal a site as is to be found in the interior of British Columbia, and is especially fitted to hold a most important position among the flourishing towns and cities of British Columbia." Docks are to be built at the north end of the lake, a steamer is being constructed to ply on the lake, and a new station of the Canadian Pacific Railway is shortly to open at Kelowna, on the east side of the lake. East of the big lake and a few miles south of Vernon is Long Lake, a beautiful sheet, most attractive for camping. Says the pamphlet: "The climate of the district is eminently favorable to fruit-production, and pears, plums, prunes, cherries, peaches and small fruit attain a perfection which commands top prices wherever they are sold. The success met with by Okanagan fruit at the Royal Horticultural Society Exhibition in London, Eng., last year, has attracted the attention of the English dealers to the products of this valley. . . . From Vernon alone during the past season there was shipped fruit to the extent of 1,600,000 pounds. Trees to the number of 100.000 were set out during the season of 1905. It is expected that fully 150,000 will be planted this year."

THE RESULT OF THE
GILBRETH SYSTEM
AND THE
COST-PLUS-A-FIXED-SUM CONTRACT

Dependable speed, the vital essence of present day building operations is of necessity, the result of system and organization. It is only when an organization has been so thoroughly trained and its system so perfectly assimilated that its personnel resembles a piece of machinery built on the duplicate part system in which each part can be instantly replaced, that the speed promised by that organization becomes a really dependable factor upon which its clients can bank absolutely.

We solicit an opportunity of demonstrating to owners, engineers and architects that the dependable speed which we can supply in building operations is not secured at the sacrifice of a particle of quality nor at an increased cost.

PROGRESS IN TRADE.

The M. Erb Company, Limited, Berlin, Ont., has been incorporated for the purpose of manufacturing and dealing in gloves, mitts, furniture, mattresses and upholstered goods.

The Clayton Meat Co., Limited, has been organized, with a capital of $50,000, to take over as a going concern the wholesale and retail meat, groceries and fruit business now carried on in Toronto by T. A. Clayton.

Authentic figures from Washington, issued by the United States Geological Survey, show that the production of Portland cement in 1905 in that country amounted to 35,246,812 barrels, valued at $33,245,867, which represents a gain of 8,740,931 barrels in quantity and $9,890,748 in value over 1904.

The Fraser River Canners' Association has decided to make the price for sockeyes on Fraser River this year 25 cents during July and 20 cents during August. This is practically double last year's prices, but last season was a "big" year, and the present is likely to be short. The fishermen are getting ready for operations.

G. B. Meadows, F. A. Mansell and other Toronto gentlemen have been chartered as the Canadian Wire Screen Manufacturing Company, Limited, with a share capital of $250,000 and head offices in Toronto, for the purpose of making and dealing in wire and brass and wire and brass goods and screens of all kinds, taking over also the Mansell patents for wire screens.

Progress in Trade.—Continued.

Robert N. Ahern, sales agent for Canada of the Burroughs Adding Machine Co., has moved from Manning Chambers, Toronto, to 38 King Street East, directly opposite the King Edward Hotel. Mr. Ahern reports a constantly increasing demand for the Burroughs machine. This new stand is a most desirable one, and will permit of a window display, a most desirable thing.

The Ottawa Wine Vault Company, Limited, Ottawa, will carry on the business of merchants, manufacturers and wholesale and retail dealers in all kinds of merchandize, including mineral waters, vinegars, oils, soft drinks, drugs, cigars, groceries, wines and liquors. G. Lebel and A. Charbonneau, of Ottawa, are charter members of the new company, which is to have a capital stock of $250,000.

The W. R. Brock Company, Toronto, have purchased two large lots in the wholesale district of Calgary, and will begin almost immediately the construction of a large warehouse. This is the third large wholesale firm recently to enter the field in Calgary with an establishment of its own, the others being the Ames, Holden Shoe Co., of Montreal, and the Thomas Ryan Co., Limited, of Winnipeg, wholesale boots and shoes.

Fishermen along the Detroit River and Lake St. Clair complain of the scarcity of fish this year, especially of perch and whitefish. They claim that the 25,000,000 fry of the latter sent out by the Sandwich hatchery to replenish the Great Lakes is not nearly sufficient to counterbalance the constant depletion by fishing and the depredations of larger fish. It seems to be a general idea among those interested that the Government does not spend enough of its fishery-protection allowance on Canada's inland waters.

At the annual meeting of the Canadian Wholesale Druggists' Association at Gananoque, Ont., all parts of Canada were represented. It was decided to hold the next annual meeting either in Vancouver or Victoria. The following officers were elected: Honorary president, H. H. Lyman, Montreal; president, C. W. Tingling, Hamilton; first vice-president, W. S. Elliott, Toronto; second vice-president, H. W. Barker, St. John; third vice-president, E. D. Martin, Winnipeg; treasurer, W. C. Niblett, Hamilton; secretary, J. Mattison, Montreal.

It may interest a good many on this continent to learn that for over a hundred years in France it has been a criminal offence to manipulate for speculative purposes the prices of the neces-

saries of life. It is also a punishable offence to allow food products, such as bread, meat, wine, vegetables, butter, and so forth, to perish. The penalties are fine and imprisonment, and the cost of police supervision of the offenders for from two to five years. For a second offence the penalty is said to be so severe that almost any firm would succumb to it. As a consequence, they do not have "corners" in France.

Contracts have been closed and work is now under way on what will be the most notable series of reinforced concrete buildings in Montreal. The American Tobacco Co., Limited, for whom the factories are being erected, demanded speed in construction, and selected as the builders the Dominion Engineering and Construction Co., Limited, of Montreal. All the work is being done on the Gilbreth system and the cost-plus-a-fixed-sum contract. The architects, Messrs. Findlay & McGregor, declare that the plant when completed will be a model of its kind in Canada. The plans call for many novel effects, and also for the completion of the whole in five months.

* * *

TRANSPORTATION NOTES.

The British Columbia Telephone Company is laying a new telephone line across the Fraser River in order to improve the service between Chilliwack, Blaine and Ladner.

The Rainy River Navigation Company, Limited, Kenora, has been granted an Ontario charter. It will purchase, build, charter or otherwise acquire steamships and other vessels, and take over the properties of J. J. Horne, of Fort William.

The Hamilton, Waterloo and Guelph Railroad has, we understand, purchased steel rails for the entire line. Apparently the public is not quite sure yet whether the line will be actually built, but they are hopeful that nothing will be allowed to block the project, now that the company itself has proved its thorough good faith.

Charles M. Hays and Wm. Wainwright, of the Grand Trunk Pacific Railway; Nicholas Bawlf, president of the Northern Elevator Co., and one or two others have been incorporated as the Grand Trunk Pacific Terminal Elevator Co., Limited, with authority to build and operate elevators, warehouses, steamships and mills. Presumably the company will handle the grain brought down by the G.T.P. and its connections.

The Wisconsin Central Railway is aiming for Western Canadian business. This road is generally understood to be closely connected with the Lake Superior and Southeastern, now in course of construction as far as Duluth, and with the Duluth, Rainy Lake and Winnipeg line, which is building to Fort Frances. When the latter work is completed the first-named road will have through connection with Winnipeg, where it will

TRANSPORTATION NOTES.

shortly open offices. It is anticipated that trains will be run direct from Chicago, Milwaukee and Duluth into Winnipeg early next fall.

It has sometimes been complained of that on the Canada Atlantic telegraph wires commercial messages were delayed because of the preference given to railway business. This was to be expected, the demands of the railway coming first. A change has come, for the Great North-Western Telegraph Company has acquired control of the wires of the Canada Atlantic Telegraph from Swanton, Vt., to Depot Harbor. This will give sixty-five offices to the Ottawa district of the G.N.W., under the management of Mr. Davies. In many of the stations extra wires will be put in to accommodate public business.

Not much importance is attached to the contention of the express companies that the Dominion Government has no jurisdiction over the rates they charge. The right and duty of the Railway Commission to regulate them just as it does those of the railway companies is generally acknowledged. Mr. Crysler, arguing for the express companies, against Mr. Alcorn's bill in Parliament, claims that any transaction between a company and its customer is a mere matter for civic contract, and that, therefore, the Provincial Government alone has power to regulate the terms of such contract. Not many people will agree to such a thesis, however. At any rate it is an argument which might apply equally to the railroads, but it is not allowed so to do.

Of the Kootenay Central Railroad, which, it is proposed, will provide transportation for the fertile valley between Golden and Wardner, B.C., several miles of the right of way are already cleared, and the work will go on all summer, according to one local paper. Another expresses doubt as to the speedy beginning of construction work, and reminds its readers that the Dominion subsidy is still in force, but that a subsidy formerly guaranteed by the Province was cancelled, and it would appear the immediate construction of the railway hinges on the revival of the provincial subsidy. "We are not in favor of railway subsidies," it explains, "but there are special circumstances connected with this particular line that would appear to warrant the renewal of the subsidy. The pick of the lands in the Upper Columbia Valley, between Golden and Windermere, were given as subsidies to railways in other parts of the Province. Had these lands been available a sufficient area could have been granted from them to ensure the construction of the railway, but since the Province has used these lands for purposes in no way beneficial to East Kootenay, the Government owes restitution to that section, and in no better way can restitution be made than by subsidizing the railway to an extent to secure immediate construction."

HALF-YEARLY DIVIDEND

NOTICE IS HEREBY GIVEN that a dividend of three per cent. of the Permanent Stock of this Company has been declared for the half year ending June 30th, 1906, and that a dividend of three per cent upon the Ordinary Permanent Stock of the Company has been declared for the half year ending June 30th, 1906, and that the same will be **payable on and after Tuesday, the 3rd of July next.**

The Transfer Books of the Company will be closed from the 15th to the 30th of June, inclusive.

By Order of the Board.

(Signed) A. J. JACKSON,
General Manager.

Dated this 31st day of May, 1906.

DEBENTURES

Moose Jaw, Saskatchewan, Public School District No. 1.

The undersigned will receive tenders up to and including the 30th June next, for the purchase of Ten Thousand Dollars of Debentures of the Moose Jaw Public School, District Number One, in the Province of Saskatchewan, which are repayable to the bearer in thirty equal consecutive annual instalments with interest at five per centum, per annum, at the Canadian Bank of Commerce, Moose Jaw.

H. JAGGER,
Secretary Treasurer.
Moose Jaw, Sask.

Knicker—How do you know the poor fellow never leaves town? Bocker—Because he wears a yachting cap, tennis shoes, chaffeur coat and golf stockings.—New York Sun.

The delegates appointed by the Ottawa Board of Trade to the Congress of Chambers of Commerce of the Empire, which meets in London, England, July 10th to 13th, are: Sir Sandford Fleming, N. A. Belcourt, M.P., Wm. Northwood, George F. Henderson, Peter Whelen, John Coates and George Kydd.

BUSINESS FAILURES.

Arthur Churchill, formerly a coal oil pedlar, and of late running a small grocery business in Smith's Falls, has assigned to A. L. Derrick.

A judicial abandonment has been made by Napoleon Cantin, woodturner, Quebec. Liabilities are $3,300, some $2,000 being in the shape of privileged claims; assets are nominally estimated at $3,500.

A demand of assignment has been made upon R. J. Lough & Co., doing business in a general commission and cartage way in Montreal. The liabilities are figured at about $10,000.—A voluntary assignment has been made by C. P. Riendeau, haberdasher and tailor, in Montreal. He owes but little.

A demand of assignment has been made upon W. B. Crawford, a jobber in groceries and produce in Ottawa, who is reported as an absentee. Crawford has been a merchant at Shawville, Que., also carrying on branches at Quyon, Ladysmith, Campbell's Bay and Waltham, and in May, 1905, transferred his headquarters to Ottawa, continuing his branches as above for a time, eventually closing at Campbell's Bay and Quyon. He has been reported slow for some months past.

We regret to hear of the embarrassment of the important shirt and collar manufacturing firm of Skelton Bros., who, as Skelton Tooke & Co., were one of the first concerns to engage in that line of business in Montreal. Competition, however has developed, and the margin of profit yearly became narrower. A large proportion of the liabilities is due to family connections, and it is hoped an arrangement will be made with regard to these claims which will permit the firm to continue in business.

A judicial abandonment has been made by Louis Peneault, of St. Anges, Que., in the Beauce district. He bought out a moderate sized store business about three years ago. His liabilities are estimated at about $3,500. V. E. Paradis, accountant, Quebec, has the estate in charge.—Alfred Lalancette, of Roberval, Que., who has been engaged in the grocery and liquor line for several years, is reported as being embarrassed, and arranging a compromise at 50 cents on liabilities of $2,460.—An assignment has been made by Cyrille Harvey at Port au Persil, Que. He is a blacksmith by trade, and also carries on a stove business, doing something in the winter season as a log jobber. He is said to owe $9,000, with nominal assets about the same.

* * *

Among miners in the Eastern Townships of Quebec there is a movement to make further use of electricity in mining. The Asbestos and Asbestic Company, of Danville, has decided to make an extensive use of electricity in

AGENTS WANTED in every unrepresented District in Canada.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, Hamilton, Ont.," will be received at this office until Friday, June 29, 1906, inclusively, for the construction of a Drill Hall, at Hamilton, Ont.

Plans and specifications can be seen and forms of tender obtained at this Department and on application to Messrs. Stewart & Wilton, Architects, Hamilton, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS, Secretary.

Department of Public Works,
Ottawa, June 7, 1906.

the operation of their mines. Other asbestos mines think of doing likewise. In Wolfe county the St. Francis Hydraulic Co. is adding another generator, to be supplied by the Allis-Chalmers-Bullock people, the water-wheels to be procured from the Jenckes Machine Company, of Sherbrooke.

REPORTS ABOUT MINING.

Among new mining companies authorized recently by the Ontario Government to carry on operations in the Cobalt region are the following: Sasagenaga Mining Co., Limited; head office, Cobalt; capital, $250,000; F. P. Gavin, Windsor, Ont., provisional director. The Erie Cobalt Silver Mining Co., head office, Toronto, share capital $1,000,000. S. A. Singlehurst, Toronto, provisional director. The Trethewey Silver-Cobalt Mine, Limited, Toronto, capital, $1,000,000. W. G. Trethewey, of Toronto, is a provisional director.

The Amalgamated Oil Company, of Canada, Limited, has been incorporated under Ontario laws with a capital of $1,000,000, and head offices at London. It will drill for crude petroleum, act as tankers and warehousemen of oil, and purchase oil lands, etc. C. B. and A. Keenleyside, of London, Ont., are among the provisional directors.

Extensive finds of iron ore are reported near Port Renfrew, Vancouver Island. The locations are mainly within the mineral zone extending along the west coast. Mining in general in the proximity of Victoria is undergoing considerable development. The great "Jim" Hill has a very high opinion of the productiveness of the iron fields of British Columbia. At St. Paul lately he said: "There is an abundance of iron of very high quality along the north coast of Vancouver Island, Texada and other islands of the coast, and a great deal of coal in that same country. There is an abundance of iron on the west side of the main range of the Rocky Mountains, together with an abundance of good coking coal in the Crow's Nest region, on the east side of the main range. The Orient for a time will furnish a good market, but China has its own coal and iron, probably the largest undeveloped resources of its kind in the world, but Canada has the high seas, and with the coal and iron close to the high seas there wouldn't be any trouble in finding a market."

* * *

INDUSTRIAL AND GENERAL.

A branch factory for making mining machinery is to be established in Victoria, B.C., by the Canadian Mine and Smelter Supply Co., under the management of Mr. W. Smith.

From Cape Breton we hear that the scarcity of labor is becoming serious with the large coal and steel companies. Unless conditions ameliorate there must be a materially reduced production. At Wabana, Newfoundland, the Dominion Iron and Steel Co.'s output of iron ore is even now, it is said, being affected by the shortage of hands.

A company is being organized as a branch of an American concern, and under the name of the International Electrical Co., and with a capitalization

Industrial and General.—Continued.

of $100,000, for the purpose of erecting a plant for the manufacture of electrical generators, switchboards, and general electrical supplies. Negotiations are now being carried on with the council of Chatham, Ont., with reference to a factory being located in that city. The company agrees to build and equip a factory to cost not less than 30,000, and to pay out $20,000 in wages, while for the city it is proposed that it makes a loan of $20,000, payable in fifteen annual payments, give partial exemption from taxation, etc.

Mr. Cecil Ward, the representative of an English company interested in Canadian lands, and capitalized at $2,500,000, has purchased from the C.P.R. about half a million acres in the Edmonton district, which are it is understood, to be colonized at an early date.

The Canada Dredge Manufacturing and Purchasing Co., Limited, Newcastle, N.B., has a Dominion charter authorizing it to hold patent rights on dredging machinery, and to manufacture and sell dredges, etc. The capital stock is placed at $500,000. W. H. Russell, of Newcastle, is among those prominent in the new concern.

* * *

TORONTO MARKETS.

Toronto, June 21, 1906.

Chemicals, Drugs, etc.—A steady and fairly satisfactory trade is being done in drugs, but the market is without any special feature. The firmness and high price of camphor continue unabated, and the price reached now is $1.50. Blue vitriol has advanced to 7 and 8c. Castor oil is particularly firm. There is a heavy demand for Paris green. In quinine and opium there is practically no change, and the market is listless, though the actual movement into retailers' hands is, perhaps, not abnormally low.

Dry Goods.—Greater activity has been the word among wholesale dry goods men this week in Toronto. They are making great preparations for a brisk fall campaign. Orders have already begun to make a move. The position of wool and linen goods is exceedingly strong. The latter is caused more particularly by the shortage of flax in Russia consequent on the war. At the same time the demand for this class of goods is particularly brisk, so that the result is almost sure to be still higher prices. The prices of woolen goods imported from England have a constantly augmenting tendency, and now it is reported in London that there is likely to be some shortage in Australian wools, which will, of course, stiffen values still more. Domestic wools, too, are high, so that every prospect points to continued firmness. A particularly active trade is looked for in dress goods, especially in serges, twills, broadcloths, and similar goods. A favorite shade is green.

Flour and Grain.—The only actual change in our prices current under this heading is in peas, which are a few cents higher. Wheat is not moving over-rapidly, and the position remains practically the same as last week. In flour a fair trade on normal lines is being done. Ninety per cent. patents fetch $3.15. Bran and shorts are in average demand for this season, and prices are a shade easier. Oatmeal has a somewhat firmer tone, as has been the case for a month or more.

Groceries.—Wholesale grocery firms report prospects good for a fair turnover this season, but for the moment there is nothing startling in sight. The movement in sugars is not very brisk, and it is scarcely anticipated that such will prove the case before preserving sets in in earnest. The fruit season being late keeps business on the slow side. Prices of sugar are unchanged, but the tone of the market is good. Syrups and molasses have fallen off somewhat in demand. Dried fruits are firm, and currants have again advanced a fraction. Valencias retain their strength, and are now quoted at 6c., with an advancing tendency.

Hardware.—The wholesale hardware stores are exceptionally busy. The mild winter, which allowed of building operations being carried on almost without cessation, has, it would seem, had no retarding effect on the trade during the summer, for the demand for all kinds of building hardware was seldom better. A very good movement also is reported for rope, haying and other harvesting tools, household requirements, such as screen doors, wire screens, and so forth. Some demand also is expressed for sporting goods. In metals the activity is very great; in iron and some others being little short of extraordinary. Tin, which has been making some great fluctuations in recent weeks, is now quoted at $42 to $43. Antimony also is very high.

Hides and Skins.—No change is reported in hides and skins. Offerings are average for this time of the year, but prices retain fully their firm tone. Tallow is the same as before. In leather the market at the moment is dull, but prospects are good for a fair season's business Sole is firm at the recent advance.

Provisions.—Butter has come in more plentifully this week, and the market is easier in consequence. Quotations, however, are not appreciably altered. Of cheese also practically the same may be said. Pastures have improved, and the outlook is for a large make. Eggs are still high and very firm. Smoked meats are in lighter stock, and prices are strengthening. Long, clear bacon and breakfast hams have gone up half to one cent.

Wool.—No change is recorded in prices, which are considered by dealers already too high. Offerings are about normal for the time of the year.

FOR EVERY DOLLAR

of liability to Policyholders, The Great-West Life Assurance Company holds assets to the value of $1.24 (Liabilities $2,787,147, Assets $3,149,359) — an ample margin of security.

Moreover Great-West Policyholders have the added security of $750,000 of Capital Stock, subscribed but not called for.

The closest scrutiny merely emphasizes the high value of Great-West Life Insurance.

MONTREAL MARKETS.

Montreal, June 20, 1906.

Ashes.—Business is of a limited character, owing to the little stock that is offering. We quote first quality pots at about $5.50; seconds, ditto, $4.90 to $5; pearls, $6.75 to $7.

Cements and Firebricks.—The demand for cements is good, and bricks are in fair request. We quote Belgian cement at $1.70 to $1.90; English ditto, $1.90 to $2.05; Canadian, $1.90. Firebricks are quoted at $17 to $21 per M., according to brand.

Dairy Products. — Marked increase was shown in the shipments abroad last week, exports of cheese having reached 103,645 boxes last week, and the total for the season thus far is 361,755 boxes, as against 305,000 boxes for the same period of 1905. The shipments of butter were the largest for the season, reaching 18,363 packages, making the total to date 50,220 packages. With regard to cheese values there is practically no change since a week ago, best Ontario makes quoting at 11⅛ to 11¼c., and fine Easterns at 11 to 11⅛c. Choice creamery butter is quoted on spot at 21½ to 21¾c., and medium at about 21c.

Dry Goods.—The week has developed little new in this line. City retail business is rather more active, owing to warmer weather and the preparations being made for the summer vacation. Wholesalers report travellers as doing fairly well in the booking of fall orders. Advices continue to be received from British manufacturers of woolens of a general advance in quotations.

Flour, etc.—There is a well-sustained demand at steady prices. We quote: Manitoba spring wheat, $4.70; strong bakers', 4.10 to $4.20; winter wheat patents, $4.30 to $4.40; straight roller, $4 to $4.10. Bran is quoted at $19.50 to $20; moullie, $22 to $25: rolled oats, $2.10 per bag; cornmeal, $1.40 to $1.45 per bag.

Furs.—The London June sales are on this week, and the offerings include 195,000 skunk, 535,000 muskrat, 54,000 mink, 60,000 coon, 7,500 marten, and some smaller assortments of Canadian furs, as well as a fair proportion of Eastern and Australian furs. Local business at the moment is very quiet.

Groceries.—Trade rules on the quiet side. Sugars are very firm at the advance of last week, and there appears to be some anticipation of further stiffening, as the markets for raw sugars are showing some access of strength, and there is good demand with the approach of the preserving season. A slight advance is reported in Ceylon black teas owing to unfavorable weather, and some scarcity is reported of good liquoring Ceylon greens. Canned salmon is in light supply, and quotations are firmer by 50 cents a case. There has been a little break in the high prices of evaporated apples, as new American apples will shortly be in the market, and the quotation is now about 11½c. Of evaporated apricots, peaches and small-sized prunes the mar-

PROPERTY—Consists of 40 acres adjoining the town of Cobalt. Adjoining the property on the northeast is the celebrated Tretheway Mine, on the southwest the Temescaming & Hudson Bay, and to the south across the railway is the McKinley-Darragh, all producing, shipping mines, and amongst the most valuable in the camp.

VEINS—Nine well-defined veins have been disclosed, one of which has been stripped on the surface for over 600 feet.

DEVELOPMENT—Two shafts have been sunk to a depth of fifty and sixty feet, respectively. Two hundred and eighty feet of tunnelling, all in pay ore, has been done.

EQUIPMENT—A complete mining plant has been installed. The Buffalo mine is considered one of the best equipped mines in the camp.

SHIPMENTS—Shipments have been made to the Belbach Smelting and Refining Co., Newark, N. J., and to the Delmar Copper Refining Co., of Chrome, N. J. Out of the first shipment, twenty tons of ore produced $20,000 net. Five cars have been shipped since the first of May, 1906.

ORE—Mr. Charles L. Denison, President of this company, estimates there is $75,000 worth of ore on the dump, which is being assorted and bagged for shipment.

VALUE OF ORE—We, personally, have had an assay made by Messrs. Thos. Heys & Son of Toronto, of the ore taken from the sixty-foot level. This assayed $2,562 worth of silver to the ton.

The following letter, written by Mr. Thomas R. Jones, superintendent of the mine, to Mr. Charles L. Denison, bears out the statement that this is a producing and shipping mine.

(Copy).

Cobalt, Ont., April 24th, 1906.

Charles L. Denison, Esq., 143 Liberty Street, New York, N. Y.

Dear sir: In reply to your letter of inquiry as to the quantity of ore on hand for shipment, will say that we will have a thirty-ton car of No 1 ore which would run from $1,000 to $2,000 per ton, ready in less than ten days Two, or perhaps three cars of No. 2 ore running over $300, and two cars of No. 4 ore running over $150 We are sacking these now and making preparations to move same for shipment.

As to our estimate of future production, based on thirty days from this date, we expect to hoist and ship monthly approximately the following tonnage: 30 tons No 1 ore which will average $1,000 to $2,000 per ton; 126 tons No. 2 ore including middlings which will run $300 or more per ton: 75 to 100 tons No. 3 ore which will average $150 per ton; 500 tons mill rock, $40 per ton, or better.

Yours very truly, (Signed) Thomas R. Jones, Supt.

The above estimate, if realized, means that the company can easily pay dividends of over 33 per cent. per annum.

The directors are all men well known and successful in the business world, and have every confidence in the property and its future. We offer for sale a limited quantity of this stock at par. Cheques, which must be made payable at par in Toronto, may be made payable to us or to the Imperial Trusts Company, Toronto. Applications for the purchase of shares will be filled in the order of their receipt, and the right is reserved of increasing at any time, without notice, the price of the stock, or withdrawing same from the market. Pamphlet containing full information regarding the company may be had upon application to

A. E. OSLER & CO., 43 VICTORIA STREET, TORONTO.

WHOLESALE HOUSES.

Montreal Markets.—Continued.

ket is practically bare. Currants are also in very light supply, and selected Valencia raisins are now held at 6½c. in a jobbing way, and fine off-stalk at 5½ to 6c.

Hides.—The advance in lambskins to 25c. each is confirmed, and calfskins are firm at 15c. per pound for No. 1, and 13c. for No. 2. Beef hides are unchanged at 12½c. for No 1, with light offerings.

Metals and Hardware.—Business in these lines keeps up exceedingly well. There has been some weakening in the trade understanding with regard to the prices of sheets, and we quote Canada plates at $2.50 to $2.60 for fifty-twos; black sheets, 28 gauge, $2.30 to $2.40; galvanized sheets, $4.20 to $4.45; galvanized Canadas, $4.10 for fifty-twos, and $4.35 for sixties; tinplates, $4 for cokes and $4.25 for charcoals; ternes, $6.75 to $6.85. Ingot tin is easier at 42 to 44c.; copper is firm at 20½ to 21c.; lead, $4.45 ; spelter, 7 to 7¼c.; antimony is a little easier at 28½ to 29c. Boiler plate is steady at $2.30, and iron pipe at $4.38 per 100 feet for inch. Bars, nails, etc., are unchanged.

Oils, Paints and Glass.—With the approach of mid-summer there is some slackening noted in the movement, but a very fair volume of business is still passing. Linseed oil is fairly steady at 53 to 54c. for raw, and 56 to 57c. for boiled. Fish oils are in light request; castor, 8 to 9c. per pound; turpentine, 88c. in single barrels. Leads, putty and glass show no change.

THE BUFFALO MINES.

A. E. Osler & Co. advertise for sale to-day stock in the Buffalo Mines, Limited, the total capital of which is $1,000,000, one-tenth of it remaining in the treasury. Only a limited quantity of the stock—all of it controlled by A. E. Osler & Co.—is on the market at the par price of $1 per share. The Buffalo property includes forty acres on the town site of Cobalt, and the company has secured an option of the surface rights from the Government Commissioners. The potential value of this option will not, of course, materially affect the purchaser of Buffalo stock. What he wants to know is the worth of the veins mined and in sight. The first shipments produced a net return of over $1,000 per ton. The expenses of operation are not high; and on the mine superintendent's estimate, which includes profits of sale of No. 2 and No. 3 ores, dividends of 33 per cent. per annum are possible. Since the prospectus was issued, a new three-inch vein has been discovered, making ten in all. Vein 5 and 6 has been stripped for a distance of 600 feet, and is said to be one of the longest in the camp. The shaft has been sunk fifty feet, and tunnels have been run about 100 feet without any sign of diminution in the vein's size. The characteristics of the Buffalo are, therefore, similar to those of the Trethewey mine, which is only a short distance away, and of the Nipissing and other valuable properties which surround it.

*

NIPISSING DIVIDEND.

The Nipissing Mining Co.'s stock has been listed in Pittsburgh and Washington. The property is in the heart of the Cobalt district, and consists of 846 acres of land. Over $1,000,000 worth of ore from it has been smelted. On Wednesday, in New York, a quarterly dividend of 3 per cent. was declared. Over 60,000 of the $5 shares have been placed in Canada.

THE GROCERS' COMBINE CASE.

The conspiracy charge against the officers of the Dominion Wholesale Grocers' Guild came up again before Magistrate Jelfs in Hamilton this week. There was the customary clashing of views as to what constitutes and what does not constitute a sound basis for wholesale trade.

Mr. R. L. Innes, secretary-treasurer of the Canadian Canners, Limited, admitted that that concern had sold goods to the Wholesale Grocers, Limited. In 1905, they refused to sell except at retail prices, because they looked on the wholesale grocers as retailers. Crown Attorney Washington waxed sarcastic at this style of doing business; but the witness explained that it was scarcely worth while selling a carload of stuff to A. when by so doing he would antagonize B., the purchaser of a hundred carloads. He would not admit that the Guild had dictated to his company in any way as to whom they should sell.

Other witnesses, some of whom contended that they did an exclusively wholesale business, claimed they were unable to get goods, sugar being named specifically, because they would not comply with the regulations of the Guild, and, being refused rebates, they were, of course, unable to compete with other wholesalers.

An important witness for the defence was Mr. Hugh Blain, of Eby, Blain & Co., Toronto, who told how the wholesale grocery trade, which was seriously demoralized, was put on a sound basis by the Guild. Prices were fixed by manufacturers, and wholesalers had to abide by them. Under cross-examination he said he did not know whether manufacturers made larger profits now than ten years ago, but he thought that retailers were getting as much profit. He denied that the Guild's object was to prevent manufacturers from selling direct to the consumer.

The officers of the Wholesale Grocers' Guild were committed for trial on charges of combining and conspiring.

AGAINST PROVINCIAL SUBSIDIES.

Ottawa Writer in "The Economist" Scores Canadian Provincial and Municipal Finance.

The Ottawa correspondent sends to the "Economist" a strong article damning the inter-provincial movement for larger subsidies from the Dominion Government. He evidently prefers the United States system of absolute divorce of state and federal finance; and declares that many in the Province of Ontario would welcome a change in the Constitution to prevent a recurrence of the situation which is producing the pending conference between the Dominion and Provincial Governments for the revision of the financial relations. Inter alia, he says:

"The annual grants from the Dominion Treasury now amount to $4,500,000 a year. The prediction that this would encourage the Provinces to be extravagant, and, when they had become over-weighted with debt, to make a raid on the Federal Government for relief, has been amply fulfilled.

"This is the second or third time the Provinces have banded together to secure "better terms"—increased annual subsidies and the assumption of their debts by the Federal Treasury. With the exception of Ontario and the Provinces recently created in the North-West, all are more or less embarrassed. The debt of Manitoba is comparatively light, but she has gone as far as is prudent in guaranteeing railway bonds. The net debt of Quebec is about $22,000,000, or $13 per head of the population, that of Nova Scotia $4,500,000, of

New Brunswick $3,500,000, of British Columbia $9,000,000, or $40 per head, of Prince Edward Island, with 100,000 people, $6 per head.

"Moreover, what with interest on their debts and other fixed charges their yearly expenditure is outrunning revenue. The three Maritime Provinces and Quebec usually offer as an excuse that they have been endeavoring to check the outflow of population to the United States by promoting railways and other local enterprises; British Columbia, that she has a vast territory to develop for which the Dominion Government is not doing enough.

"A majority of the States have reduced their expenditure by abolishing the annual session of the Legislature and substituting biennial sessions.

"In Canada the tendency has been to swell Provincial expenditures and add to the machinery of Government. The Maritime Provinces, with a population of 850,000, have three separate Legislatures and all the paraphernalia of three Viceregal Courts. All told, we have nearly 750 paid legislators in the Dominion Parliament and the Provinces, with 65 or 70 Ministers of the Crown in receipt of salaries, for a population under 6,000,000. If the United Kingdom were represented on the same scale Parliament would have to assemble on Salisbury Plain.

"The present demand for better terms comes at a time when the Federal finances are not altogether satisfactory, even to friends of the Government. Trade has been exceedingly brisk since 1896, when the Liberals entered office, and the country has made great progress; but the expenditure on revenue and capital account has been growing still more rapidly. The Federal debt is four times greater per head than that of the United States, and the construction of the Grand Trunk Pacific will entail a large increase. There is no occasion for alarm. A young country like Canada, with unbounded natural resources, into which population is rushing at the rate of 200,000 a year, can stand a strain that would break the back of an Old World community. But the inevitable reaction cannot be far off, and cool-headed men on both sides of the House are counselling the Government to take in sail.

"In Ontario the better terms movement is viewed with uneasiness. She contributes over fifty per cent. of the revenues. The assumption of the debts of Quebec and the Maritime Provinces woud be tantamount to compelling her to pay for their extravagance. In Ontario purely local movements are paid for by municipal taxation, whereas in those Provinces there is no municipal system worth speaking of outside the cities, and the whole cost of rural administration, the building and upkeep of roads, bridges, courthouses, etc.—falls on the Provincial Treasury. Hence, the Ontario people say, with a large measure of truth, that they are being called on to pay not only for the waste and corruption of other Provincial Governments, but for the cost of those parochial services which ought to devolve on the Quebec and Maritime man as a municipal taxpayer.

"The debts of a number of Canadian cities and towns are also becoming exceedingly burdensome. In Ontario an enormous amount of money has been wasted in bonuses and exemptions to factories. A promoter comes along with a scheme for establishing a beet root sugar rolling mills, or shipyard plant; arranges matters with the local newspapers, distributes stock with a free hand, comes to Ottawa for a protective duty, and soon gets what he wants from the municipality. As a rule, the enterprise collapses after a season, but he 'lights from under' before the crash, and goes elsewhere to start the game anew. Just now, too, there is a craze for municipal ownership of gas, electric light, electric roads, etc., which in most instances is bound to end in disaster as well as in increased indebtedness."

* * *

MUNICIPAL BOND MARKET.

Seldom has the market for municipal bonds been so dull as it is at present. The effect of this state of things is more readily apparent than the exact cause. Broadly, the dullness is owing to the better yield for money in other forms of investments. Again, money is becoming increasingly tight. Even the banks can only barely meet the demand. City of Toronto bonds are readily obtainable on a 4 per cent. basis, so it is not a matter for surprise that the average yield of ordinary town and town-

ship securities is not more than 4¼ or 4½ per cent. These much better returns, are, of course, caused by large numbers of reproductive undertakings, constantly requiring capital in all parts of the country, especially in the West.

Many calls for tenders for debentures or bonds which have been withdrawn owing to the supposed poorness of the bids. Among them are invitations to tender for the bonds of Berlin, Ont., Winnipeg, Man., London, Ont., St. John, N. B., Woodstock, N. B., Fernie, B. C., Perth, Ont., Smith's Falls, Ont., Colborne Township, Ont. Some of these municipalities, upon placing their bonds on the market once more, were disagreeably surprised to find that later bids were even less attractive than the first. One explanation, no doubt, is that the insurance companies, during the investigations of the Commission, are very slow to make investments. Another is that the trust companies have been practically out of the bond market for some months past, showing a disposition to place out their funds more on mortgage.

The Crown Life Insurance Company
Head Office: Toronto, Canada.

WESTERN BOARDS OF TRADE.

Leaders in the business and development of Western Canada met at Edmonton last week to discuss subjects of vital importance to the interests of their respective sections, and through them of the whole Dominion. The occasion was the third annual convention of Associated Boards of Trade of Western Canada, to which we referred at some length last week. It was presided over by Mr. R. J. Hutchings, of Calgary. The following Boards of Trade were represented: Brandon, Dauphin, Leduc, Medicine Hat, North Battleford, Ponoka, Regina, Strathcona, Winnipeg, Calgary, Edmonton, Lethbridge, Melfort, Olds, Raymond, Saskatoon, Vegreville, Cardston, Lacombe, Milestone, Moose Jaw, Prince Albert, Red Deer, Stettler, and Wetaskiwin. The following officers were elected for the coming year: President, R. J. Hutchings, Calgary; first vice-president, Thos. Copeland; second vice-president, Ald. McAra, Regina; secretary, F. T. Fisher, Edmonton.

The Hon. W. T. Finlay, Minister of Agriculture for Alberta, struck the keynote in his address to the delegates by stating that agriculture was the most important department in the public service since the farming industry was the foundation of every business in the country. The Provincial Government had taken the management of the creameries out of the hands of the Dominion, and there had been gratifying increases in the price of butter. It was estimated that 2,000,000 pounds of butter would be handled by the Government this year, meaning a distribution of half a million dollars among Alberta farmers. Last year 50,000 pounds were shipped to Japan, a significant fact for the West when taken in conjunction with other signs of future demand for Canadian products from that country.

An interesting discussion started by a resolution by Mr. Lines, of Edmonton, took place on the embargo against Canadian cattle by Great Britain. Mr. Lines wanted it proven once and for all that Canadian cattle are healthy, and then for that fact to be brought home to the Imperial authorities.

Mr. Ives, of Lethbridge, also suggested that the Government should go into the business of exporting cattle, and thus save the farmers from the control and the extortions of local dealers.

If the experience of the other Provinces is to be reckoned on, the West will make no mistake in attending to the good roads question. A proposal was made, and strongly objected to, that funds for this purpose should be provided by means of debentures chargeable upon the lands benefited.

The motion of Mr. Pearce, of Calgary, that the Government should organize statistical and intelligence bureaus in connection with the Department of Agriculture in order to keep the farmer and manufacturer in close touch with the conditions prevailing in the home and foreign markets was carried.

❧ ❧ ❧

GRAND TRUNK PACIFIC IN SCRIBNER'S.

"Scribner's" for July contains two articles on the Grand Trunk Pacific Railway—one by Mr. Hugh D. Lumsden, the chief engineer of the Government section, and the other by Cy. Warman. Mr. Lumsden gives to the American people a luminous survey of the financial and engineering characteristics of the whole enterprise. He puts the economic outlook for the Winnipeg-Moncton part of the line on the only possible sound basis—that of grade:

> The Great Lakes will for all time remain the favored freight route from the West to tide-water, but when the lakes are frozen, if the crops increase as they have increased for the past decade, there will always be millions of bushels of wheat awaiting shipment in the West. In order to haul wheat at a profit two thousand miles from the wheat-fields to the Atlantic, it is absolutely necessary that the road be as free as may be from heavy grades and excessive curves. While the entire line is not yet definitely located, enough field-work has been done to demonstrate beyond a doubt that the Transcontinental will be, as far as grades go, one of the best laid lines across the continent. From the great wheat-fields of the West to tide-water on the Atlantic the grades going east will, in all probability, not exceed 0.4 of a foot per 100 feet. This will mean that a modern locomotive will handle fory-two cars between Winnipeg and Moncton.

Cy. Warman is more copious and descriptive, and suggests the imminent era of surprising mineral development which is beginning to strike the investor's imagination:

> Cobalt camp is unique. In fact, all this north country is full of surprises. That broken, rugged, and somewhat inhospitable reef that runs west from the St. Lawrence beyond Hudson Bay has produced a greater variety of rare minerals than almost any mining region under the sun. What the prospectors of the coming summer, the pathfinders, and the builders of the Transcontinental Railway will find no man may say."

The Metropolitan Life Insurance Co.

(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve.
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain additional security of $300,000 and what is of greater importance, are assured of careful and conservative management as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a voice in the management of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses the advantages of both.

Home Office - Toronto, Ont

Statement of
Bonds and Debentures owned by

The Royal-Victoria Life Insurance Co.

And Deposited with the Receiver General at Ottawa, in trust for the security of Policyholders.

Province of Nova Scotia Debentures, payable January 1st, 1915	$6,000.00
Province of Quebec 3% Inscribed Stock standing in the name of the Receiver General in trust, payable April 1st, 1937...	9,733.33
Province of Manitoba Debentures, payable November 1st, 1930........................	60,000.00
Town of Maisonneuve Debentures, payable January 15th, 1940	30,000.00
City of St. Henri Debentures, payable May 1st, 1951........................	55,000.00
Canadian Northern Railway Debentures, guaranteed by the Province of Manitoba, payable June 30th, 1930........................	24,820.00
City of Montreal Debentures, payable May 1st, 1944	50,000.00
City of Ottawa Debentures, payable September, 26th, 1928........................	15 000.00
Total........................	$250,533.33

The above securities have a cash market value of $267,172 60

DAVID BURKE, A.I.A., F.S.S.,
Montreal, May 15th, 1906. General Manager.

CONSERVATIVE
PROGRESSIVE
FAITHFUL

Some of the cardinal aims of the Union Mutual management are—to be conservative in the choice of investments—to be progressive in the prosecution of the business—to be faithful to the interests of policyholders.

Agents of like inclination cordially welcomed.

UNION MUTUAL Life Insurance Co.
Portland, Maine.

FRED E. RICHARDS, President.
ARTHUR L. BATES, Vice-President.

HENRI E. MORIN, Chief Agent for Canada,
151 St. James St., Montreal, Canada.

For Agencies in the Western Division, Province of Quebec and Eastern Ontario, apply to

WANTED: A BALANCE SHEET.

By his views on immigration you may pretty safely judge a man's wish to see Canada flourish. The mysterious North Atlantic Trading Company is not the sole incarnation of the immigration policy that has been directed from Ottawa during Sir Wilfrid Laurier's Premiership. The letters and cables of Lord Strathcona to the Prime Minister, which were disclosed on Tuesday are unpleasant reading. albeit they only prove that the trouble in the Department of the Interior has been more apparent than real. We are all immigrants or the sons of immigrants. The growth of this country during the last decade could not have been nearly so heartsome were it not for the new comers from Europe. Each able-bodied immigrant is estimated to be worth $1,000, as a capital asset of the Dominion. The cash brought in from over-seas by the strangers who are a perpetual source of enjoyment to so many of us, is an enormous sum in the aggregate.

Some day, perhaps, we shall be vouchsafed a view of the interior economy of a Western branch bank, so as to know exactly what the newcomer amounts to in the finances of a new and prosperous territory. The anxious immigrant who, without knowing it, is the modern Abram. is not merely capital in himself, but he is the highway to capital for others. When he grows wheat where only grass grew before he must be supplied with the means of shipment. For him the railroad is built.

Whoever is frightened of immigration the capitalist and financier cannot afford to be. We are not running risks of starvation in a country whose main business it is to produce food for the uttermost parts of the earth. No people ever arrived in a new land with fewer of the necessities of bare existence than the Doukhobors. Man for man, none are better fixed than these same poverty-stricken zealots, after six years of eight-hour-a-day toil. According to population their share of the railroad mileage of Canada is 35 miles. They have earned $1,000,000 in wages in less than seven years.

Those who are free from party political governance may unfeignedly acknowledge the debt of Canada to the bold, strong hand that set going a propaganda, which whatever its intrinsic merits was, began before Western development really struck the imagination of the East, and preceded the remarkable ascent of such securities as C. P. R. and Hudson Bay. Mr. Sifton administered the Department of the Interior in a way which is insufficiently understood from the investment point of view. The Department became a money-maker as well as a money-spender. His enemies say that it became a money-maker for Mr. Sifton and his appointees. The suspicion was at the back of the criticism of the North Atlantic Trading Company contract.

That corporation was peculiarly begotten. The sponsors for it did not take into account the certainty with which, sooner or later, the arrangement for attracting continental people, would be assailed. Lord Strathcona seems to have been very quiet about his doubts and fears. They did not expect that the secrecy, which they declare to have been necessary, would involve a demand for the dismissal of the officer who has directed the whole European campaign of publicity from a London office. Mr. Sifton and Mr. Preston—chiefly Mr. Preston—are saddled with a disagreeable onus. Mr. Preston has incurred the grievous displeasure of the labor element, because he is held to have induced mechanics to come to Canada, to the prejudice of mechanics already here. As the champion electioneerer of the Dominion he is bound to be a mark for the other side. The Opposition in

Parliament, and the labor unions outside vainly demand his decapitation. He is said to know too many election secrets to be sacrificed.

Why cannot the Government take the country completely into its confidence with regard to immigration? The position could be expressed in a balance sheet covering the last ten years. As a policy has it paid? Upon the answer to that question must largely depend the justification or otherwise of the executive staff who have carried it out.

In his budget speech Mr. Fielding declined to "burden" the House with certain statistics of immigration. He gave only the sum of the passenger lists of incoming steamers, and the Customs returns from the frontier. The Immigration Department has spent an ascertainable sum during Mr. Fielding's regime as Finance Minister. The proportion of Western growth attributable to newcomers can be estimated with reasonable reliability. The ratio of progress for the next dozen years, assuming that immigration were to cease forthwith, can also be figured out. So can the potential financial gain to the country if the present ratio of incoming is maintained.

That is how to judge fairly the cash value of immigration propaganda. The imbroglio of the North Atlantic Trading Company seems to have put immigration on its trial, with the best materials for clouding the issue. It is bruited around that Minister Oliver's original dislike of Galicians has unduly colored his views upon the whole problem of peopling the West and keeping pace with railroad expansion. Whatever the facts, we should learn precisely what the immigration campaign has done for the country. With the continuation of it is necessarily bound up preparations for future business. The partisan politican hasn't time to look at it in that light, maybe. Which is the greater reason for the business man, with serious engagements to meet, to have a thorough balance sheet placed before him.

There is an international aspect of the demand for official beheadings. It is an inoffensive paradox that our Minister of the Interior is largely our Minister of External Affairs; whose guide, philosopher and friend in the Imperial capital is Lord Strathcona, the High Commissioner. Our foreign service is composed of commercial agents and emigration agents. More people get their impressions of Canada from the emigration propagandists than from the commercial agents. The disturbances in the Immigration Department at Ottawa have penetrated the British Houses of Parliament. Only the other night the Under Secretary for the Colonies read the bonus regulations to the Commons. The inquisitions before the Committee on Agriculture, and the Committee on Public Accounts have been reported by cable to the British press. An irresponsible Nationalist actually invited the Government to decline to receive communications from Lord Strathcona, because his name has been dragged into political strife.

Whatever the disputes between the ins and outs, the conduct of affairs should be such that the nation is not prejudiced overseas. The immigration service in Britain should be above reproach. Judged by broad results, the Government has been well served in London. The Commissioner of Emigration there must necessarily carry large, direct, responsibility. He is perforce running a big business. His office should be judged by business standards. Material for judgment should be more plentiful than it is. And it should include a new kind of balance sheet.

THE CONTINENTAL LIFE.

Senator Cox laid down a useful principle in his notable evidence to the Insurance Commission when, with regard to his connections with companies other than the Canada Life, he intimated that it was only possible to go as far as public opinion would sanction. As governments cannot afford to be more than five per cent. ahead of public opinion, heads of financial institutions cannot afford to be five per cent. behind that impalpable, unmistakable force. Public opinion is often uninstructed and frequently wrong. The wise financier is he who makes it an asset instead of a hostility.

The confidence of the investor has never been withdrawn from any corporation which deserved to retain it. That is why persistent criticisms of details in the management of institutions which are inherently sound, have not materially affected their prosperity. Insurance companies report flourishing business. It is freely said that Senator Cox's policy of throwing the Canada Life cards on the investigation table was the biggest advertisement that company ever had. For once in a way the best advertising costs the least money. Honesty, after all, is the best policy, especially when it is pursued with that natural ease of which so many of us are masters.

It is a pity that all witnesses before the Insurance Commission have not realized that it is bad business to be uncandid. Commissioner Kent rebuked Mr. Woods, the manager of the Continental Life, who he said had been playing with the Commission by repeatedly denying things and then grudgingly admitting them. Whatever injustice Mr. Woods does himself he does much more to the general reputation of Canadian business men who occupy fiduciary positions.

So far there has been very little sign that the general premium-paying public is likely to assume a vindictive attitude to the companies in which loose ideas have been too prevalent. But such slowness as that of Mr. Woods is the surest way of convincing the rather nervous policyholder that the peculiarities of management which it is foolishly sought to conceal were wicked in motive as well as mistaken in method.

A census of the four hundred and fifty shareholders of the Continental Life would endorse the opinion, which Commissioner Kent delivered on Tuesday that the sale of Atlas Loan debentures to Mr. Somers was intended to deceive the Insurance Department, the policyholders, and the public who became policyholders after the deal. "The directors," said Mr. Kent, "missed the chance of their lives by not assuming the loss, paying it, and advertising the fact." Precisely. The foolish distinction of such processes as that which has angered so restrained a man as Mr. Kent is that it is the worst possible business.

The redeeming feature in the Continental story is the admission of Mr. Somers that it is "unwise" for directors of insurance companies to steer investments in the securities of other companies in which they are interested. The Ontario Securities Company was formed, Mr. Tilley says, to make money for the Continental directors. The policyholder's mind is becoming seized of the idea that insurance managers are careless about their fiduciary interests. Commissioner Kent may be too strict in laying down the doctrine that a managing-director of a company should have no other interest. His doctrine hits his brother Langmuir. But the line has got to be drawn more sharply between concerns like the Continental Life and the Ontario Securities.

* * *

EDITORIAL NOTES.

Wisely managed the newly-begotten Dominion Life Underwriters' Association will do a great deal to improve the conduct of life insurance in Canada. Many who doubt that rebating can be suppressed by law, think that it can be ended by the agents and companies acting jointly. The rebating evil is a menace to the whole business in Canada. It has been well said, "rebating robs one man to bribe another." If the Association stamps out rebating it will more than justify its existence.

*

The idea that denatured alcohol can be produced in Western Canada for ten cents per gallon is too optimistic. The Saskatchewan and Ottawa Governments are arranging for experiments to ascertain the cost of the new factor in light, heat and power. It is estimated that this fall from 30,000,000 to 50,000,000 bushels of corn will be converted into alcohol in the Middle and Western States. Yesterday United States Commissioner of Revenue, Yerkes, sailed for Europe to investigate the conditions under which denatured alcohol is manufactured in England, France, and Germany.

*

Japan is formulating a protective tariff, modeled, it is believed, much after that of the United States. Raw material is to be admitted free in most cases, but careful attention is being given to the question of ascertaining what products can be produced in Korea and Manchuria. So far as known at present the duties on manufactured goods are raised in nearly every case, sometimes to an almost prohibitive extent. That on flour affects Canadians hopes of a large trade in that commodity. It is supposed that Japan's object is not merly to protect and develop her industries but to raise a larger revenue to meet the burden caused by the war. Perhaps the "regeneration" of Japan is not going to be so very beneficial after all.

*

The Canadian farmer who is driven to rely upon green immigrant labor, may find comfort in the reflection that in other parts of the continent there is a woful scarcity and inefficiency of hired help. In prospect of an early harvest, Kansas corn-growers are raiding gangs of section men, and haunting railroad stations to pounce on the fortunate individual who has no long engagements. There are reports of automobile tours for the prospective harvester; and fervent promises of the fried chicken for Sunday dinner. There is a story of similar stringency in Massachusetts, which lacks the picturesqueness of the auto. and the fried hen. The New Englander is less profuse of promises, and more fertile in complaint. He wants only the best assistance for $20 a month and board. Where he only supplies his man with shelter, milk, and firewood, he pays $8, and to a fine fellow who dwells quite apart, he will give $35. For haying and harvest he is willing to concede $1.50 a day. It is a little early to size up the harvest labor prospects of Western Canada. Twenty-five bushels to the acre means many pecks of trouble to the prairie farmer. But he can stand lots of it. So can his banker.

*

The Temiskaming and Northern Ontario Railway is supposed by some to be the only profitable Government-owned railway in existence. That is scarcely true, unless the continents which are inferior to our own do not count. The Government railways of Cape Colony for many years paid their way, and did more than anything else to replenish the public treasury. But the Rand made the money. If the road had depended on the agricultural country through which it passed, the traffic would not have paid interest on capital expended. The Temiskaming and Northern Ontario cannot become the subject of such a curious deal as that which has been engineered by the South African Customs Convention. Tariffs on imports were readjusted, so as to produce additional revenue of $3,000,000. Partially to offset this the Transvaal and Orange River Colony, which are also served by Government railways, have been conceded reductions in freight rates estimated at $1,500,000. The arrangement has been legislatively endorsed; but there is a good deal of kicking against it. Clearly, the railroads are not run as purely business propositions. Lots of things in South Africa seem to be handled upside down.

*

The British Chancellor of the Exchequer, Mr. Asquith, has joined the apostolate of financial publicity. He has invited British bankers to publish returns more frequently. Lord Goschen, half a generation ago said it was anomalous that joint stock and private banks only published their accounts half-yearly or yearly. These banks furnish returns more often nowadays; but Mr. Asquith wants them to be like the Bank of England, and do it every week. His proposal is partly due to his desire to abolish "window dressing," a custom to which banks of most exalted rectitude in the United Kingdom are said to resort with much grace and effect. Thoroughgoing assailants of Canadian insurance methods will be surprised that the Imperial treasurer should find it necessary to rebuke the window-dressers who insist on certain loans being paid off a day or two before the balance sheet is made up and renew them as soon as the new year begins. When Superintendent Fitzgerald at Ottawa announced that this had been done occasionally in the Dominion a murmur of horrified surprise floated across the Dominion. From that time English highmindedness has been held up for our respectful salutations. Of course two blacks do not make one white; and when specific kinds of loans are prohibited by law, the law should not be broken by even the most harmless-looking feat in window-dressing. It should be amended. But it is consolatory to know that John Bull is not always the plaster saint in monetary ethics that he is sometimes supposed to be.

* * *

Mr. F. H. Russell, manager for Canada of the Railway Passengers Assurance Co., of London, returned to Toronto Monday, after an absence of six weeks in England.

LONDON BANKERS AND CASH RESERVES.

Mr. Asquith, the British Chancellor of the Exchequer, has raised afresh in London the question of bankers' cash reserves. He pointed out that Lord Goschen, fifteen years ago, discussed the sufficiency of the cash reserves held against deposits in the joint stock and private banks. These deposits then amounted to £600,000,000. They now total £1,000,000,000. The increased importance of the question is obvious. In English bank statements the first item among the assets usually is "cash on hand and at Bank of England;" then follows "loans at call and at short date." The two items together constitute the bulk of the reserves against deposits. As an additional defence the banks lean upon their holdings of investment securities and of bills of exchange. This last-named item is not commonly met with in the returns of Canadian banks. When a bank in Canada discounts a bill for a customer it does so with the intention of holding the bill till its maturity. In England a different custom prevails. But it applies mainly to a class of bills not found in any volume in bankers portfolios in the Dominion.

The first-class bill of exchange, as the British bankers know it, is pretty well rock-ribbed in the way of safety and solidity. When a wholesale importer in Toronto, Montreal, or Winnipeg asks his bank for a sixty-day bill on London the bank gives him its own draft at sixty days on its London bankers. The wholesaler then endorses the bill over to his European creditor, who is likely to be a big exporter or manufacturer. On its being offered for discount at a London bank the bill will bear the names of the Canadian bank that issued it, the English or Scotch bank that accepted it, the Canadian wholesaler, the European exporter or manufacturer, and possibly some provincial or Continental bankers.

In a London banking office a close watch is kept on the balance of cash in hand. When it passes certain bounds a batch of bills is bought or discounted. But, in discounting this batch of bills the bank does not do so with the fixed intention of holding them all till due and then collecting them. Custom in England sanctions what is called re-discounting. None among the strong Canadian banks would think of transferring to another institution any of its bills discounted either by way of sale or as security for advances. That is only done by banks whose discounting business exceeds their own resources, and by the liquidators of failed institutions.

A regular open market exists for these bills in London. When the banker who has bought his batch of bills finds his cash balance running down or some heavy obligations maturing, he selects from his portfolio of bills a batch which he discounts in the market. His credit does not suffer by the process, for nearly everybody does the same thing. It is recognized that bankers' investments in bills are made purely for convenience. The amount so invested runs up or down, according as surplus funds are large or small.

All this has a connection with the cash reserves. The gold reserve held by the Bank of England is regarded as the last resource in case of emergency by the joint stock banks and the great commercial and financial houses. That is why the weekly statements of the bank's position are so eagerly watched in times of stress by those who have balances there. As the balances are kept there for emergencies they wish to know all about the bank's ability to pay on demand. But the bank's specie reserve in time of crisis would be subject to demands from other directions. The joint stock banks hold their reserves in the form of cash, balances in Bank of England, call loans, bills of exchange, and securities. Among these only "cash" could be used in a time of stress without throwing directly or indirectly a strain on the Bank of England's reserve. Were the joint stock banks to call their loans the borrowers who were called would look, many of them, to the Bank of England to take them over. Were they to re-discount or sell their bills of exchange, the Bank of England would be looked to for the funds to take a great part of them up. And were they to sell consols or other securities, those who purchased would likely ask the Bank of England to lend its assistance.

That is how it is that so much discussion hinges around the size of the bank's reserve of coin and bullion. Nearly everybody agrees that it is too small for the work that is expected of it. The controversy turns on the question as to who shall bear the cost of strengthening it. The Bank of England people argue that for its own liabilities its reserve is quite sufficient and that where it falls short is in respect to the liabilities of the joint stock banks. Therefore, they say, the joint stock banks should pay the cost, whatever extra reserve is required, against their own liabilities. They should either hold a much larger proportion of cash—and less in securities, bills or short loans—or keep larger balances at the Bank of England if they wish it to hold their reserves for them. In this way the joint stock banks would pay the cost, since their funds going to make up the extra cash reserve would earn no revenue.

The joint stock banks reply that the reserves they now hold are quite good; that they can, whenever necessary, provide for their liabilities by calling loans and selling securities and that the Bank of England is under a certain moral obligation to preserve financial tranquility because of its great state privileges; one of which is its extraordinary monopoly of note-issuing rights. They say, also, that for each joint stock bank to hold its own cash reserve would produce so great a lock-up of cash as to cause a scarcity. To the proposition to increase their balances in the Bank of England they object that, were they to do so, there would be nothing to prevent the Bank of England from using sixty per cent. of the extra deposits it received in competing for the discounting business of the very banks that handed them in.

A compromise will probably be effected. The Bank of England has always been ready to recognize its public duty. The joint stock banks recognize that they should bear their part of the cost of providing larger reserves. It is likely that some plan will be devised whereby the extra reserve will be held by the Bank of England, but will not be available to be used in competition against the joint stock banks.

* * *

—Capital would seem absolutely to have withdrawn itself from stock investments, future values being thoroughly undermined or largely at sea. It would be surprising if this were not so. Legislation by Congress and by State lawmaking bodies has surrounded all such securities with so great uncertainty as to earning power in coming years that confidence in future stability is lost. Hence prices are in control of trifling suspicions or rumors of unfavorable facts, whether true or not true. It will not be long, unless something shall come to arrest this tendency, before we shall find that we have frittered away the best chance for industrial prosperity the United States has ever had offered it.—"Financial and Commercial Chronicle," New York.

BANK REVIEW FOR MAY.

With the end of May comes the closing of the financial year for several of the banks, and the addition of various sums to the Rest. The more important were dealt with last week. The only other point of interest is that the Home Bank of Canada has opened its Rest Account by a credit of $175,000. The total for all the banks now stands at $63,295,000, being 70 per cent. on a paid-up capital of $90,006,000. On 31st May, 1905, it stood at $55,862,000, or 68 per cent. on a paid-up capital of $81,792,000.

In almost every other month the course of the bank circulation can be predicted with substantial accuracy. May is an uncertain month, the total of notes in circulation sometimes showing an increase for the month and sometimes a decrease. This year the example of the two previous years has been followed, and there is a reduction of $2,313,000. Last year the decrease was $1,805,000, and in 1904 $792,000. During the past twelve months the increase has been $6,081,000, or a little over 10 per cent.

Public deposits payable on demand have decreased by $2,164,000, while those payable after notice have increased by $4,232,000, a net increase of $2,068,000. In May of last year the increase was $5,583,000. At the end of May in each of the last five years public deposits in Canada have been as follows:—

1902	$341,683,000	Increase over	1901,	8%
1903	376,182,000	" "	1902,	10%
1904	418,668,000	" "	1903,	11%
1905	465,122,000	" "	1904,	11%
1906	532,591,000	" "	1905,	14%

The total increase during the past twelve months has been $67,469,000. Individual increases of $3,000,000 and over are:—

Bank of Montreal (allowing for People's Bank of Halifax, absorbed during the year)	$3,981,000
Bank of Toronto	4,773,000
Merchants Bank of Canada	7,223,000
Union Bank of Canada	4,235,000
The Canadian Bank of Commerce	6,607,000
Dominion Bank	3,380,000
Bank of Ottawa	5,198,000
Imperial Bank of Canada	3,795,000
Traders' Bank of Canada	3,395,000
Sovereign Bank of Canada	3,911,000
Home Bank (New)	3,794,000

Deposits outside Canada have increased during the month by $2,929,000, the whole of the increase being in the figures of the Bank of Montreal.

Other items of liabilities show no noticeable change, while total liabilities have increased by $5,113,000, or about .7 per cent. During the year the increase was $87,475,000, equal to about 14 per cent.

In cash held there has been an increase during the month of $3,759,000, the total now being $60,526,000 or 8.8 per cent. of the total liabilities to the public. This is an improvement over April, when the percentage was 8.3 per cent., but it cannot even yet be said to be unduly high.

The ten banks showing the highest percentages are:—

Imperial Bank of Canada	14.87
Bank of Nova Scotia	12.53
Bank of Ottawa	11.74
Dominion Bank	9.30
Union Bank of Halifax	9.18
Merchants Bank of Canada	9.17
Home Bank of Canada	9.16
Canadian Bank of Commerce	9.14
Bank of Toronto	9.13
Bank of Hamilton	9.09

The ten showing the lowest percentages are:—

Banque d'Hochelaga	6.33
Metropolitan Bank	6.28
Sovereign Bank of Canada	6.04
St. Stephen's Bank	5.79
La Banque Nationale	5.03
Ontario Bank	3.72
Banque de St. Jean	2.38
Banque de St. Hyacinthe	2.27
Western Bank	1.52
Banque Provinciale du Canada	1.18

As we have previously pointed out, a bank may hold only a small amount of cash, and yet be prepared to meet on demand any sudden calls which may be made, so that its position in this respect must not be considered with regard only to cash held. Balances with agents, call loans, particularly those outside Canada, and marketable securities all play an important part.

A change worth noting in this connection is the reduction during the last two months in balances due by banks and agencies in Great Britain. For the last eighteen months or more these balances have, as a rule, been from $9,000,000 to $14,000,000. On 31st March they stood at $12,505,000, of which $5,030,000 was due to the Bank of Montreal, and $6,099,000 to the Canadian Bank of Commerce. By April 30th the total had been reduced by $5,133,000, and by May 31st a further decrease of $2,698,000 had taken place, the balances due on that date being only $4,674,000, of which the Bank of Montreal claimed $2,646,000, and the Canadian Bank of Commerce $596,000. The Bank of Montreal has used its funds in meeting a reduction in Provincial Government deposits, while of the $5,500,000 for which the Canadian Bank of Commerce has drawn upon London during the last two months, about $5,000,000 has gone into current loans in Canada, and the balance into additional cash reserves. In this way it has responded during two months to demands for $5,000,000 by borrowing customers, not only without disturbing any Canadian arrangements, but with an actual addition to its cash reserves.

Call and short loans show a net increase during the month of about $2,000,000, the total—both in and out of Canada—standing at $109,000,000, as against $79,772,000 at this time last year, and $75,727,000 on 31st May, 1904. Current loans in Canada continue their upward course, being now $493,505,000, as compared with $486,683,000 on 30th April last, and $437,200,000 on 31st May, 1905. During the last few years, current loans have not, as a rule, shown much increase in the summer months, and although 1906 is a year of exceptional progress, it is not likely that during the next two or three months there will be any considerable growth in advances to Canadian customers. In September the fall activity generally begins, and the large immigration, the good crops which are at present expected, and the vast amount of railway building will all help business, which can hardly fail to make heavy demands upon the banks.

Current loans outside Canada stand at $33,585,000, a reduction of $2,000,000 during the month. A year ago the amount was only $23,128,000. Of the increase during the year about $6,000,000 has been advanced by the Bank of Montreal, $2,000,000 by the Bank of Toronto, and $2,000,000 by the Merchants Bank of Canada. Overdue debts have during the month been collected or made current to the extent of about $400,000. The whole amount overdue is now $1,468,000, being only .0027 of the total current loans. In May, 1905, the percentage was .0049, and in May 1904

.0047. Total assets are now $848,476,000, an increase in twelve months of $102,000,000.

Bank promoters should not be granted extension of their charters to enable them to try to coax enough money out of the public to make up the minimum amount of capital required by the Bank Act. Special circumstances may prevent some promoters from doing so within the year which the law allows, but as a general rule it is safe to assume that when the requisite capital cannot be got together within twelve months of the charter being granted, there is no need for the bank, or else the public have no confidence in its promoters. It should not be necessary for canvassers to go all through the country, soliciting subscriptions, sometimes promising impossible dividends, or undertaking a branch in any place where a certain amount of stock is subscribed. Charters should not be granted until *after* the capital has been obtained. Meantime Parliament should extend no charters, and should require that section 89 of the Bank Act, be printed plainly across every certificate or receipt given on account of bank stock or subscriptions for such stock:—

> "In the event of the property and assets of the bank being insufficient to pay its debts and liabilities, each shareholder of the bank shall be liable for the deficiency to an amount equal to the par value of the shares held by him, in addition to any amount not paid up on such shares."

* * *

DOMINION LIFE UNDERWRITERS' ASSOCIATION.

Over two hundred representatives of Life Underwriters' Associations in all parts of Canada met in Toronto on Monday, and organized the Life Underwriters' Association of Canada, which will shortly be affiliated with the National Association of Life Underwriters of the United States.

A feature of the convention was the speaking of Mr. Scovil, president of the American Association. His object was mainly to convey the greetings of his association, which comprises practically all the life agents of the United States, and to state some of its objects.

The National Association has promoted a better feeling amongst the American life agents. Competition amongst companies is just as keen, but there is a desire to treat fairly with one another. It has ameliorated the rebate plague, and the twisting of policies. In fact, the whole morale of the field work in life insurance has been elevated with great satisfaction to the head offices of companies, as well as to the active field man.

In the United States the agent is regarded as a most important factor, and through the National Association of Underwriters some of the provisions of the noted Armstrong Insurance Bill were made more practical. The Association has also for its object the making of life insurance canvassing more of a business than it is at the present time. It is realized that there are many men who, while known as agents, do not deserve the name, because their sole object is to benefit themselves by the commission, regardless of the best interests of clients and company.

Mr. Scovil is a pleasing, earnest speaker; his address was full of sound common sense, and was greatly enjoyed by some 150 guests at the luncheon in McConkey's. He has done good work as an apostle of insurance reform in the United States, and his lectures in Canada are likely to result in good.

The following are the officers:—Honorary president, T. G. McConkey, Toronto; president, G. H. Allen, Montreal; vice-presidents, T. F. Conrad, Halifax, for Nova Scotia; H. Worsley, Winnipeg, for Manitoba; G. H. Simpson, Montreal, for Quebec; H. C. Cox, Toronto, for Ontario; J. O. Hyardman, Charlottetown, for Prince Edward Island; R. J. Stuart, Calgary, for Alberta: E. R. Machurn, St. John, for New Brunswick; George T. Marsh, Regina, for Saskatchewan; J. Breeze, Vancouver, for British Columbia; secretary, W. S. Milne, Toronto: treasurer, F. H. Heath, London: executive committee, O. H. Vipond, O. N. Gagnon, A. S. McGregor, J. R. Reid, C. O. Palmer, W. H. C. Moore, — Senwater and Dr. W. H. Richardson.

EARLY HARVEST LIKELY.

Winnipeg, Man., June 28th.

Western reports show that the weather continues uniformly favorable, with sufficient moisture. A few points in Manitoba and the Regina section report some damage from exceedingly heavy rains. Very few localities are in need of moisture, but some are now looking for warmer weather. Crops are advancing rapidly, and with favorable weather the wheat in many localities will be headed out in a few days. Indications are that the harvest will be considerably earlier than last year. There is general satisfaction among the farmers as, on the whole, prospects to date would seem never to have been better.

* * *

PUBLICATIONS RECEIVED.

The Department of Commerce and Labor and Bureau of Manufacturers' sends from Washington the Monthly Consular and Trade reports sent to the United States Government during May.

The Bankers' Magazine for June comes just as we go to press. It contains a readable article on "How Canada Provides Currency for Moving the Crops," by A. St. L. Trigge, of the Canadian Bank of Commerce, Toronto. Mr. Trigge explains that the Canadian crops are marketed with "an entire absence of the financial stress which is sometimes a characteristic element in the fall of the year in the United States," because of the bank note currency, and the system of branch banks.

La Chambre de Commerce, Montreal.

This is the twentieth year of La Chambre de Commerce de Montreal. Its progress is fitly marked by a special illustrated, 140-page number of its Bulletin. The issue is of 10,000 copies, and is in English and French, on alternate pages. In 1885 Franco-Canadian commerce totalled 13,300,000 francs; in 1905 it had reached 43,565,000 francs. Something of this result is due to the persistent efforts of this chamber. Notable articles are those by Mm. Obalski, Inspector of Mines for Quebec; Louis Arnould, Professor of Literature at Laval, and Prof. Maurice Leroi, of Montreal. Congratulations to La Chambre de Commerce on a very forcible contribution to trade communication between Canada and France.

* * *

NEW DEPARTURE IN ANNUITY INSURANCE.

On August 1st, the Annuity Company of Canada, which was incorporated in May last year, expects to begin an insurance business on lines which are new to this country, and which will be much discussed by insurance men.

The field for annuity insurance is indicated in the private prospectus of the company from which the following is taken:—

The Annuity of Canada, carrying only annuity business will have several advantages over life insurance companies carrying life, endowment and annuity plans combined. One great advantage will be the smaller cost of operation through having no expense for a medical department; less expense in procuring business, also through having no death payments.

Payments to policyholders accrue only through lapse of time, being thus practically a fixed quantity in any year. There is no risk of heavy calls upon capital through an exceptionally heavy death-rate. It will be possible to make profitable long date investments; and this will also have an important bearing on the regular payment of dividends, especially as much of the payment to policyholders will be due far in the future.

In the industrial branch of the Annuity Company, 15 per cent. will be probably more than ample allowance for agents' fees and expenses. On this basis, comparing a gross yearly premium income on new business of $200,000 with each company, the Annuity Company would receive net income $170,000, agents and expenses taking $30,000, while the Life Insurance Company would receive net income $40,000, agents and medical fees and expenses taking $160,000. In subsequent years both companies would be on about equal terms.

The Annuity Company's head office is in Winnipeg, and the officers:—President, R. Muir; first vice-president, F. O. Fowler; second vice-president. J. Y. Griffin; managing director, G. J. Lovell; secretary-treasurer pro tem, W. F. Hull. These, with Messrs. J. N. de C. O'Grady and Andrew Strang will form the executive committee. The following is the board of directors:—Robert Muir, Andrew Strang, Geo. D. Wood, J. D. McArthur, G. F. Bryan, J. Y. Griffin, John McKechnie, F. W. Drewry, W. F. Hull, G. J. Lovell, James Porter, W. A. Black, J. A. Girvin, J. W. de C. O'Grady and Frank O. Fowler.

THE STOCK MARKET.

The only features on the Stock Exchange this week were the upward movement of St. Lawrence Navigation in Toronto, in consequence of rumors of a coming dividend, and the record day of Light, Heat, and Power in Montreal. On one day alone nearly half the total transactions on 'Change were in this stock.

It was thought Dominion Iron and Steel would be influenced by the issue of the annual report. But this was so non-committal, and the increased earnings were so counterbalanced by the possibility that the bounties will be abolished, that little change was produced.

The activity of Mackays has not been so marked this week, and values have dropped, the quotations yesterday being 71¼-½ for common, and 71¾ for preferred, compared with 74¾-75, and 73-4 respectively. A fair demand has been manifested for bank stocks. Under its influence Royal has gone up to 231-5.

Business this week has been small, and slow. In New York conditions were not very different. Prices are for the most part pretty steady, but with irregular demand. Advices from Wall Street refer to a bear raid on tractions. Money is comparatively easy there, so the declining tendency is not due to stringency in that respect.

LETTERS AND ANSWERS TO LETTERS.

G. H. Burnett, St. John:—It is impossible to judge of the reliability of the circulars and marked letters without seeing them. There must always be a strong speculative element in new mining propositions, whoever puts them forward.

An Advance in Decimals.

To the editor "The Monetary Times":—

Sir,—I take much pleasure in sending a specimen 15-gram weight which is the limit of weight now allowed by the Post Office for letters addressed to foreign countries within the Postal Union stamped 2½d. You will please notice by the attached copy of the letter from the Post Office relating to this increased allowance of weight that the same rule holds good for multiples of 15 grams. . . . . Two points are brought out by this concession by the Post Office:—

1. That a benefit is conferred on the public by the first use of metric weights in a Government Department.
2. That the Post Office has found it not only advantageous but quite easy to adopt the metric weights to quite an important extent.

This partial introduction should be energetically followed up with the view of inducing the Post Office to adopt metric weights solely for foreign letters.

Yours faithfully,

E. Johnson, Secretary.

The Decimal Association, (London, Eng.).

Re Debased Coinage.

To the editor "The Monetary Times":—

Sir,—Referring to your item in re debased coinage, I would suggest that all worn-out coins of the Dominion be called in by the Government and received at full value at all post offices in exchange for stamps by parties wanting stamps, and that all banks receiving worn-out coins should forward the same to the proper authorities at Ottawa in exchange for new coins of a like value.

This suggestion applies principally to silver coins, as we have no gold coinage at present, at least I have seen none, and copper cents are not usually carried in the pocket so as to become worn. I think the Government at Ottawa should do something to get rid of all the worn-out coinage now in circulation, which is really a nuisance. It ought to be called in forthwith, melted and issued in new coins. The financial loss to the country at large incurred thereby would not be felt very much, and all parties using silver would be greatly gratified at the change.

Yours truly,

E. J. Beaumont.

Galt, June 22nd, 1906.

* * *

Yet another English casualty concern, the Accident Insurance Company, of London, with fifty-seven years of activity to its credit and a premium income of nearly $750,000, steps into the imminent deadly breach. It opens a department for fire, and incidentally helps to show that we are still a long way from the time when fire insurance will become the preserve of a compact trust.

IMMIGRATION INTO THE UNITED STATES.

While we in Canada are pluming ourselves upon a great stream of European immigration in the last year or two, let us not shut our eyes to what is happening across the line. In the last fiscal year 1,026,499 immigrants reached the United States from Europe. This year (up to 30th June) probably 1,000,000 Europeans will land at New York alone. Up to the end of May the number had already reached 870,000. The immigrants are of many nationalities. Austro-Hungarians predominate; next come Italians, of whom probably 250,000 have already come in. The Commissioner of Immigration says that the next in respective number are Russians, followed by Scotch, Irish, English, French, Spanish, Portuguese, Germans, Armenians, Turks, Greeks, Dutch, Swedes, Norwegians, Danes, Roumanians, Bulgarians and Swiss. Of this tremendous immigration, 31 per cent. settled in the State of New York, principally in New York City, 20 per cent. in Pennsylvania, 7 per cent. each in Illinois and Massachusetts, 5½ per cent. each in New Jersey and Ohio. So that these six States get 76 per cent. of the entire immigration.

The Southern States have been getting a meagre share, but are taking strong steps to increase it. A German line of steamers has begun regular sailings to Gulf of Mexico ports, mainly with southern European passengers, who are more naturally suited to the climate of those regions than to that of the north. Capital is flowing southwards to an extent which nobody would have predicted ten years ago; and the Italians and others who are being brought in are said to be most profitable workers in the new fields that are opening up.

PERSONAL AND MONEY ITEMS.

Mr. A. M. Bell, president of the Halifax Board of Trade, has gone to England, where he will represent the Halifax and Maritime Boards of Trade at the Sixth Congress of Chambers of Commerce of the Empire.

On Tuesday the friends of Mr. A. M. Campbell, retiring manager of the Merchants Bank of Canada, at Stratford, presented him with a purse of gold. It is understood that Mr. Campbell will enter a wholesale firm in Montreal.

Mr W. M. Botsford, late manager of the Halifax branch of the Royal Bank, and supervisor of the branches in the Maritime Provinces, has been appointed manager of the head office at Montreal in successor to Mr. C. S. Hoare, who is retiring from the bank's service.

The following municipalities are calling for tenders for bonds, in addition to those mentioned elsewhere: Vancouver, $679,406.55, 4 per cent.; Whitewood, Sask., $2,000, 6 per cent., ten years; Hartney, $5,000, 5 per cent., twenty years; St. John, N.B., $721,000, 4 per cent., forty years. These were called for a year ago at 3½ per cent. Cardstone, $30,000, 6 per cent, fifteen instalments; Innisfail, $19,000, 5 per cent., twenty instalments; Gosfield Township, $3,848.42, 5 per cent.

The Ontario Government will raise $3,000,000 by a direct issue of bonds of July 1st date. One half the loan to be repayable on July 1st, 1926, and the other on July 1st, 1936. The money is required to meet the cost of continuing the second section of the Toronto and Northern Ontario Railway, starting at New Liskeard. The interest on the new bonds, which will be of $200, $500, and $1,000, will be 3½ per cent. They will sell at par during next month, but after that accrued interest will be added. The interest and bonds are payable only in Toronto. The loan is chargeable to the consolidated revenue fund of Ontario. It is expected that some proportion of the funds of the High Court of Ontario, which amount to nearly $3,000,000, and are chiefly the property of "infants," invested in municipal bonds, mortgages, etc., paying low interest, will be invested in the new Government securities.

* * *

The unpaid premium trouble is of great magnitude in the United States. In 1869, they amounted to $3,618,312, or 4.02 per cent.; in 1879 to $4,378,771, or 3.50 per cent.; in 1889 to $8,154,598, or 4.88 per cent.; in 1899 to $22,048,138, or 7.32 per cent.; in 1906 to $34,092,222, or 8.06 per cent. In 1899 foreign companies were first included in the returns. During the past year or two there has been a slight increase.

A FARMERS' TRUST?

Usually the farmer is the man who suffers from the trusts; does not attempt to form one himself. At least, according to what one hears from Chicago, he is about to exercise his heaven-born prerogative of giving tit for tat. The farmers of the North-western States and the Western Provinces have gotten together and, with dollar wheat for their slogan, and we know not how much for butter, beef and apples, have formed an association for the proper control of prices. Intrinsically, the farmers have just as good a right to make a combine or a corner as anyone else; probably more so because they are the original producers, and not the mere distributors of others' wealth. Nevertheless it is a safe forecast that Nature and their own numbers and isolation will prove too much for them, and that their efforts are doomed to failure.

* * *

Fire Dangers in Cobalt.

Now look out for a deputation from Cobalt, New Liskeard and Haileybury to the Canadian Fire Underwriters' Association to protest and threaten because fire premiums have been advanced in these places. Pursuant to the report of some fire inspectors, the minimum basic rate is raised in New Liskeard from 2½ per cent. to 4, on Haileybury risks to 5, on Cobalt risks to 8. And why? Because dynamite and gasoline are stored in these places in excessive quantity, and certain by-laws looking to fire protection are not enforced. Let the cool-headed, sensible citizens of these places meet the underwriters by adopting and enforcing needful regulations, and they need not be troubled by raised rates.

Plea for Business-like Women.

Is it not time that teachers of girls would give their pupils an idea of simple business affairs? Few women understand cheques or drafts or even entries in a bank book, to say nothing of book-keeping. There must be thousands of girls who are sent out into the world with what is called finished educations, who can not give a proper receipt for money, to say nothing of drawing a promissory note, a draft or a bill, or understanding the significance and importance of business contracts. It was some such woman who presented a cheque for payment to the paying teller of her bank. He passed it back to her with the request that she be kind enough to endorse it. The lady wrote on the back of the cheque, "I have done business with this bank for many years, and I believe it to be all right. Mrs. James B. Brown." Another society woman in New York presented a cheque for payment at the bank and the teller told her that it was not signed?" Oh! do they have to be signed,' she responded. "What an awful lot of red tape there is about the banking business."

*

Some time ago we discussed opportunities offered by British music halls for popularizing schemes of colonization. It was pointed out then how the cinematograph might be brought into play, and how a stage that carries American performers by the hundred and Australians by the dozen is denied any confessedly Canadian "turn." Premier Seddon, of New Zealand, saw the opportunity and commissioned the Yankee entertainer, Mr. R. G. Knowles, to boom New Zealand in all the chief British and Irish towns. The possibilities are not exhausted, and one ventures to urge the idea upon Canadian attention again.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, 28th June, 1906, as compared with those of the previous week:—

	June 28.	June 21.
Montreal	$27,637,170	$29,999.092
Toronto	20,346,225	23.651,077
Winnipeg	8,640,662	8.770.877
Halifax	1,507,771	1,678.528
Hamilton	1,388,290	1.501,013
St. John	1,032,181	1,165,436
Vancouver	2.147,492	2.529.322
Victoria	746.166	641,126
Quebec	1,786,258	1.920.103
Ottawa	2.126.856	2,554.877
London	905.227	1,071.102
Calgary	....	....
Total		......

REPORTS ABOUT MINING.

Some fine specimens of copper are reported to have been found at Green Lake, near Squamish, B.C.

A rich syndicate is said to have acquired 6,000 acres of land in Raleigh township, near Tilbury, in which several discoveries of oil have been made. The whole district is attracting much attention as an oil producer.

The discovery of a good eight-inch vein of cobalt is reported near the White River, eight miles below Tomstown. It is rich in nickel and silver. Another find is reported from North Liskeard of galena, copper and silver. Molybdenite has been discovered, we hear. on the Temagami Reserve.

Profits from the Le Roi mine, Rossland, for May were $50,000, and they have been from that figure down to $30,000 for each month this year. Shipments for the week ending June 23rd from Rossland were: Centre Star, 2,250 tons; Le Roi, 2,790; Le Roi No. 2, 510; Le Roi No. 2, milled, 600; Crown Point, 120 tons. Total for the week, 6,270, and for the year 156,049 tons.

* * *

—The story comes from the Detroit "Free Press": A Western millionaire was saying to his confidential clerk: "Now, I have arranged those papers for my wife and children all right, so that if I die—" "If you die," interrupted the secretary, "say when you die; there's no 'if' about dying."

TORONTO BOARD OF TRADE REPORT.

At the end of the annual report of the Toronto Board of Trade, just out, are fifty-six pages of advertisements which are as interesting as the letter-press illustrations and lists that make up the report itself. The report is issued in a year in which the membership of the Board has passed all previous records; but the list of members printed in it only gives the names of those who were on the roll January 1st, and the president's address is that of Mr. Allan, who went out of office some months ago. The book aims at being an expounder of the first-class geographical and commercial situation of the city as a whole; which, perhaps, explains why the Board of Trade is not as prominent, and not quite so much "on the nail" as it otherwise would be. It is exceedingly well got up; and placed in a striking cover—which is one of the wise uses of advertisement. It is a good idea to include the address given by Mr. Frederic Nicholls to the Empire Club last January, on "Niagara Power; Past, Present, Prospective." Every year some specially impressive product of Toronto and Ontario enterprise may advantageously be given a place of honor in a publication which, all the world over, will be regarded as the latest expression of the business genius of the English-speaking metropolis of the Dominion.

ACCOUNTANCY IN BRITAIN.

(Contributed by Mr. Edmund Woodroffe, C.A., (Ont.).

The twenty-first annual meeting of the Incorporated Society of Accountants and Auditors, (England), has just been held in London. The society has 2,111 fellows and associates. The society's examinations are held in London, Manchester, Edinburgh, Dublin, Melbourne and Sydney, (Australia), Cape Town and Johannesburg. At the two last half-yearly examinations, 211 candidates satisfied the examiners. The accounting and auditing papers are "set" practically under one standard, but the examinations upon law and commercial usage vary.

To the Board of Trade Departmental Committee upon the working of bankruptcy and liquidation laws the evidence of public accountants will be of the highest importance. The committee's report ought to be of value to colonial economists, who are anxious to prevent illegalities and punish fraudulent bankrupts and directors of insolvent corporations.

The society has continued to foster closer relationship between all recognized bodies of public accountants in the United Kingdom, with the object of obtaining an Act bringing into existence a "Statutory Register of Public Accountants," and conferring exclusive privileges similar to those granted to the legal and medical professions. The Transvaal has an Act governing public accounting, and establishing a Statutory Register, which is working towards raising the status of the accountant, and the protection of the public.

Among the indications that the movement for independent auditing is extending is the unanimous resolution of the shareholders of the Royal Insurance Company, substituting independent professional accountants for the private auditors. A statutory register with provisions of professional conduct enforceable under an Act of Parliament appears the only expedient to circumvent unqualified practitioners.

The society's Parliamentary Committee prepared evidence for the Local Government Board Departmental Committee upon audit of public accounts. The "Chartered Societies' Bill" was opposed in the House of Commons, and withdrawn by its promoters. Two Bills of importance to the accounting profession are the "Limited Partnership Bill," and the "Prevention of Corruption Bill." The first will counteract the abuses of the "one-man company" trading under the benefits of the limited liability acts; the other will check the growing evils of the "secret commission" system.

The Scottish and Irish branches of the society have been active in parliamentary work. The Scottish Committee made representations to the Scottish Education Department in favor of the nomination solely of duly qualified professional accountants as "Auditors" under the provisions of the Education (Scotland) Bill. The district society in Wales continues to increase its influence. The Council regret the loss to accountancy by the demise of the Scottish Branch Secretary, Mr. Robert Alexander Marr, of Edinburgh. The late Mr. Marr was one of the signatories to the fraternal address of the Scottish Branch to the Scottish-American and Scottish-Canadian accountants in conference at the Congress of Public Accountants convened at the St. Louis Exposition.

The twenty-first annual conference will be held in London in the autumn.

The Year Book issued by the council shows an increase in the number of members practising in the Dominion, and Canadian accountancy text-books presented to the London library. The official monthly paper, "The Incorporated Accountants' Journal" has increased its circulation and influence The annual income of the society now exceeds $21,000. The invested surplus funds amounts to $31,000, placed in Government and railway securities. Referring to the Dominion and the growth of intercommunication with the practising accountants in the United Kingdom, the report of the society's president states that, since the last annual meeting the society's Canadian Committee has become a reality. The committee is composed of leading members of the Chartered Institutes of Ontario and Quebec. The co-operation will advance the mutual interests of professional accountancy on both sides the Atlantic. The twenty-fifth anniversary of the incorporation of the "Association of Accountants in Montreal" was celebrated during the time the society was in conference in Sheffield, and congratulations were cabled. In this fraternal movement the Ontario Institute has co-operated. A precedent has been established by the nomination of a member of the Ontario Institute, in public practice in England, as its accredited resident representative there. The selected member is also a Fellow of the Incorporated Accountants' Society, thereby enabling the society to be identified with Anglo-Canadian accountancy and matters of import to colonial practitioners still more closely than heretofore.

The Canadian Committee of the society is composed of members of council:—Mr. H. Barber, F.C.A., (Toronto); Mr. John Hyde, F.C.A., (Montreal); Mr. Harry Vigeon, F.C.A., (Toronto); and Mr. A. F. C. Ross, F.C.A., (Montreal); acting honorary secretary.

The successful candidates at the annual examinations of the Institute of Chartered Accountants of Ontario were:—Final—C. J. Parker, Brantford; D. McK. McClelland, Chicago; F. E. Roberts and J. A. Tweedie, Toronto; W. R. Jex and A. G. Calder, London; W. W. Law and R. J. Cooper, Toronto.

Intermediate—F. J. Stiff, J. M. Langstaff, H. S. Gausby and F. C. Young, Toronto; L. H. Heinke, Flint, Mich.

Primary—J. Wyndham Eddis, Toronto; J. E. Freeland, St. Thomas; D. E. Sinclair and Norman B. Banks, Toronto.

* * *

THE HOME BANK OF CANADA.

The Home is a new bank—and yet it is not a new bank. Before obtaining its present charter it had existed for fifty years on Church Street as the "Toronto Savings Bank," and the Home Savings and Loan Company, which latter designation it assumed in 1878, and had 7,000 or 8,000 savings accounts, principally of Toronto people. Since it became last year a chartered bank it has opened nine branches in Ontario, and will soon have a branch among the miners at Fernie, B.C.

As three of its directors and several of its principal officers are prominent in the Canadian volunteer militia, it has come to be known as the Soldiers' Bank. The designs upon its notes, largely of portraits of military heroes, or views of battle monuments, seem to give it a sort of patriotic mission, which no one need find fault with.

The statement for five months' business submitted at the first annual meeting in June shows deposits of close upon four millions. Circulation is small as yet, but will doubtless increase. Against the deposits are call loans of $3,400,000, practically 90 per cent.; while other bonds, cash balances, and cash amount to another million—an unusually strong condition. Current loans and discounts are naturally not large, but will surely increase.

It is satisfactory to learn from the president's address that of the $233,000 received from premium on capital stock issued at 133 1-3 per cent., $175,000 has been placed to rest account, and that the whole of the organization expenses have been written off, instead of being spread over several years. The bank's present branches are at Alliston, Brownsville, Lawrence, Shedden, St. Thomas, Walkerville, and Toronto (3).

* * *

DOMINION DAY WARNING.

It is time to remind people of the danger from fireworks, now that Dominion Day approaches. Firecrackers, bombs, rockets, toy pistols help the fun of the day and night, but add to the ever-present danger of fire. The latest of the Ohio Fire Marshal's circulars distinguishes the more and less dangerous fire-works: Red fire does not explode; the pin-wheel is fastened to a tree; the Roman candle discharged from the pavement scorches nothing but a wrist and the skyrocket usually falls harmless, even upon a shingle roof. Torpedoes damage nothing but the nerves of the hysterical. But unfortunately the particular kind of fireworks which gives great joy to a boy at small expense, and which he can personally manage with little danger to himself, is the Chinese cracker, which is responsible for nearly all the burning of buildings. Many big fires come from crackers flying through pavement gratings or cellar windows when they explode, and there igniting rubbish. Often they ignite sweepings, paper or shavings or go over a fence into rubbish piles.

* * *

FINANCE OF HAIL INSURANCE.

The extent of the insurance against hail in the West is shown by the report of the Manitoba Government on three companies doing business in the province.

The Provincial Mutual's business last year was briefly as follows:—Insurance at risk, $430,434, representing 71,739 acres at $6 per acre, on 598 policies; revenue, $15,214; losses paid, $9,320, or 61¼ per cent.; expenses, $4,500, or 29¼ per cent.

The Farmers' Mutual Hail Insurance Co.'s insurance at risk in 1905 was $2,662,436, representing 532,487 acres, at $5 per acre. Losses paid were $92,571, or 82.7 per cent. of total income; expenses, $19,306, or 17.3 per cent.

The Central Canada Insurance Co. does a fire and live stock as well as hail insurance business, so it is difficult to ascertain the exact figures for the latter department, but it paid out last year to policyholders for losses from that contigency $11,827.

On the whole, according to the Government report these companies seem to have conducted their business on

safe lines. The premium charged by them, averages approximately 16 to 17c. per acre.

The commissioners responsible for the overlooking of the subject of hail insurance are said to be considering the inauguration of a Government system.

The Attorney-General of Manitoba has ordered the Crown Mutual Hail Insurance Company to be wound up on the recommendation of the Provincial Commission of the investigation into the hail insurance companies of Manitoba, against which many complaints have been made by farmers.

The business of the company stood: Amount collected from policyholders, $14,026.89, distributed as follows. Paid policyholders, $2,739.13, or 19½ per cent.; paid operating expenses, $9,508.08, or 67½ per cent.; unexpended December 31st, 1905, $1,779.68, or 13 per cent. The directors received $1,600, or about 11½ per cent. of total revenue; contracting agent, $5,790.86, about 41¼ per cent.

* * *

STOCK EXCHANGE MEMOS

Canada is not averse to receiving capital, from whomsoever it may come. Particularly fitting it is for new capital to come in from France, England's ally, and the progenitor of a good third of Canada's population. Montreal brokers are pleased that over 4,000 shares of Toronto Railway stock have just been purchased on French account, and at the report that still larger sums are in sight for Canadian enterprises.

* * *

BANKING AND FINANCIAL.

The Standard Bank of Canada will open an office in Lindsay on an early date.

The Monarch Bank of Canada has been granted an extension of time in which to begin business.

A branch of the Ontario Bank was opened on Monday in the town hall of Eglinton, Ont. It is in charge of Mr. B. A. Radcliffe, formerly manager of the Aurora branch.

A branch of the Imperial Bank of Canada was opened on Monday at the corner of King Street and Spadina Avenue, Toronto, under the management of Mr. J. F. Scarth, formerly of the King and York Streets branch.

The British Columbia Packers' Association last year enjoyed a highly profitable season, but in spite of that they have issued a circular to the 7 per cent. cumulative preferred shareholders, asking them to accept 4 per cent., after a period of non-payment of any dividend at all. The latter do not like it, nor do they altogether understand why they should be held off.

It is a gruesome record, the instantaneous killing by a car while crossing a street in Montreal on Monday, of John Morrison, who was often heard as well as seen at annual meetings of banks and other financial concerns. He was an oddity, abrupt in speech and eccentric in behavior; walking and singing in the Féte Dieu procession, although a Protestant—dancing a jig in brokers' offices when a favorite stock would go up a few points. In some respects he was miserly; in others very nearly generous. It is supposed that he was wealthy; at any rate when he left the Custom House employ he inherited a considerable sum, and had added to it by shrewd investment, and probably by lucky speculation.

TO MANUFACTURERS

NEW WESTMINSTER, B.C., offers excellent opportunity for manufacturing in the West. Its fresh water harbour with Canadian Pacific and Great Northern Railways gives unexcelled shipping facilities. Sites on the Fraser River with connection to both Railways are available at low price. Opening for nearly all kinds of manufacturing, milling, ship and boat building, fishing, mining and agricultural requirements. For further information apply to

Being a shareholder in at least three banks, and in many industrial or other companies, he was often in evidence at their offices and made his peculiar views known with blunt force, sometimes with humor. Mr. Morrison was a Scotchman, from Alloa, about 73 years of age.

The Dominion Iron & Steel Co.'s financial report for the year ending May 31st, shows, apart from the Government bounties a surplus of only $13,896. This is not very encouraging from a shareholder's point of view, but it might be worse. The present financial position is:—

Debit balance, May 31st, 1905	$1,021,708 75
Fixed charges and sinking fund	753,711 02
Total liabilities	$1,775,419 77
Profits, bounties and rents	1,406,305 78
Debit balance to be carried forward to next year	369,305 99

The surplus was practically all earned since last October, so there is some reason to hope the turn of the tide has come. But the bounties on pig-iron and steel ingots will be reduced next month; and will expire a year hence, unless renewed.

New Company for the West.

The British Columbia Agency Corporation, Limited, for which a Dominion charter is sought, is being incorporated by well-known Montreal and Toronto men for the purpose of transacting a general, financial and commercial agency and brokerage business in British Columbia, the head office of the company being in Vancouver, where operations are to be commenced at once by the managing director, Mr. J. F. Maguire.

The charter members are:—Thomas Robertson, manufacturer and president of the Monetary Times Co., Toronto; Robert N. Smyth, of H. L. Smyth & Co., manufacturers' agents, Montreal; H. L. Putnam, estate agent, Montreal; E. MacKay Edgar, stock broker, Montreal; W. T. Stewart, insurance broker, Montreal; and J. F. Maguire, Montreal, late organizing secretary of the British Imperial Defence Association, London. The further list of shareholders contains the names of men of high standing and influence, well-known throughout Canada, and in other countries.

* * *

FIRE INSURANCE.

Citizens of Quebec wax indignant at what they style the recent exorbitant increase in the fire insurance rates in that city.

To the convention of the Millers' Association at Milwaukee, Mr. H. B. Sparks described his experience with Millers' mutual fire insurance. He divided the mutual companies into three kinds. (1) Those writing mills and elevators only. All policies on the premium-note plan. (2) Those writing mills and elevators and other approved risks. All policies on premium-note plan. (3) Those writing mills and elevators on premium-note plan, and issuing policies in other risks for cash premiums without premium notes. The great strength of the mutuals and one of the greatest factors in their success, Mr. Sparks declared to be the isolation of the risks. For they are absolutely free from those heavy losses that overwhelm the stock companies from time to time.

Between one and two hundred million dollars is the insurance money expected by San Francisco property owners. Roughly, one-third is expected to come from British companies, one-third from continental, and one-third from American. It will take about 75 per cent. of one year's premiums received by British officers from the United States to make good the San Francisco loss, as the following table shows:—

Company.	Total. Premiums.	U.S. Premiums.	Per cent. Rec'd in U.S.
Alliance	$4,683,475	$471,034	10.06
Atlas	4,157,120	1,378,230	33.15
Caledonian	2,096,195	1,311,739	62.05
Commercial Union	9,838,560	4,673,863	47.50
Law Union and Crown	1,108,720	408,875	36.90
L, and L. and Globe	10,449,175	6,974,169	66.80
London and Lanc. Fire	6,599,345	2,173,727	32.98
London Assurance	2,771,470	1,567,405	56.58
N. Brit. and Mercantile	9,691,680	4,121,657	42.53
Northern	5,451,360	2,479,964	44.76
Norwich Union	5,865,365	2,126,045	36.28
Phœnix	7,242,855	2,577,365	35.59
Royal	14,978,330	5,259,041	35.29
Royal Exchange	3,471,230	1,570,124	45.24
Scot. Union and National	2,986,300	1,960,002	65.79
State	754,580	208,475	27.79
Sun	6,530,900	2,329,817	35.69
Union	3,427,430	1,142,337	33.40
Total	$101,803,790	$42,727,769	41.97

San Francisco settlements will become high affairs of state if some of the citizens there have their way. It is proposed that with regard to the foreign companies which refuse to settle dollar for dollar, policyholders and the general public, together with the municipal and State authorities, should unite in requesting the United States Government, to take up the matter with the respective governments under which the companies exist. The German Consul at San Francisco has promised that his Government "will not permit any insurance company that is able to meet its obligations to escape them." Against the popular clamor for expulsion of sundry companies from the State, the San Francisco "Bulletin" pleads for patience and leniency. It admits attempts to defraud the companies, and says there is a company side as well as a policyholder's side to the situation.

* * *

THE HOME BANK OF CANADA.

The first annual general meeting of the shareholders of the Home Bank of Canada was held on Tuesday last, 26th June, at the head offices, 8 West King Street, Toronto. The original charter of the institution dates from 1854, when the Toronto Savings Bank was launched. In 1878 the bank developed in to the "Home Savings and Loan Company," and operations were begun under a form of charter which entirely filled the needs of the time. Of recent years industrial activities in Canada have made a wider prospect for the scope of business banking and so the Savings & Loan Co., after twenty-eight years' activity in most of the departments of finance associated with banking, took up the original scope of its charter again and became the Home Bank of Canada.

The Shareholders' Security.

The Home Bank of Canada is just six months old this present month. If it were entirely a new bank, with a new list of shareholders and a new executive, it would not have to be reported that a dividend at the rate of 6 per cent. has been paid for the first five months of the bank's operations. But aside from the dividend, the general statement, issued recently, shows some very conservative figures. There is a reserve fund equal to one-quarter of the entire subscribed stock. This is an item of security for the shareholders, which, like the dividend, cannot be produced within any short period of development, and in addition there is a profit and loss account of $30,503.28.

Where the Depositors Come In.

The depositors of The Home Bank of Canada may read with satisfaction that the sum of nearly four and one-half millions of dollars of the public's money, which the bank holds, is placed so as to be readily convertible into cash. In fact, the great bulk of this money is a cash asset for the bank. Something over three million four hundred thousand dollars of this sum is secured by collateral loans on stocks, bonds, and debentures, and the money is therefore returnable to the bank at any time it may be demanded. Of the remainder, over $300,000 is in debentures, and the balance, nearly $700,000, is actual cash. The current loans to business men, and paper discounted for their accommodation, is a small item in comparison, amounting to $384,000.

Has Followed the Tried Methods.

An analysis of The Home Bank's general statement shows that the institution has taken its place solidly among the chartered banks of Canada without any resort to methods of "high finance." Although there has been a change of name, and a broader scope of activities, the newer institution has carried the support of its old clientele, while the new charter has brought in a very perceptible gain of deposits. The notes issued by the bank have proved the most attractive of any series put out to the public, and the circulation is rapidly increasing.

A Representative Meeting.

The meeting was called to order at noon. Among those present at the meeting were:—B. E. Bull, T. H. Bull, John Batho, Wm. Cooke, Wm. Crocker, Lieut.-Col. John I. Davidson, Arthur R. Denison, Daniel Fitzgerald, Major F. A. Fleming, Thomas Flynn, Hon. J. J. Foy, K.C., Edward Galley, E. G. Gooderham, W. J. Green, James Gunn, M. J. Haney, C.E.; Widmer Hawke, Joseph Hobson, H. T. Kelly, W. T. Kernahan, Wm. Lavoie, Paris, Ont.; Lieut.-Col. James Mason, Isaac Moody, W. Parkyn Murray, J. Cooper Mason,

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

R. L. McIntyre, Dr. Alex. McPhedran, C. E. P. McWilliams, Eugene O'Keefe, W. H. Partridge, Lieut.-Col. Sir H. M. Pellatt, Alex. Robertson, J. S. Robertson, Jas. Scott, R. B. Street, Arnold W. Thomas, Milton A. Thomas, J. A. Todd, John White.

The Order of Business.

It was moved by Mr. Wm. Cooke, seconded by Mr. M. J. Haney, C.E., that the president, Mr. Eugene O'Keefe, should take the chair.

It was moved by Mr. Wm. Crocker, seconded by Mr. Widmer Hawke, that the general manager, Lieut.-Col. James Mason should act as secretary. The secretary then read the directors' report as follows:—

Report.

The directors beg to present their report, showing the result of the business of the bank for the period ending the 31st of May, 1906, and its position on that date.

"In accordance with, and under authority of, the resolution duly passed for that purpose, the bank on the 31st of December, 1905, took over and assumed the liabilities of the Home Savings & Loan Co., Limited, consisting entirely of deposits amounting to $3,389,675.27, and received from that company assets of equal value and amount, and such as the bank could legally hold and acquire.

"The bank opened for business on the next legal day, the 2nd of January, 1906, in its new premises, No. 8 and 10 West King Street, and also in the two offices in which the company had been doing business, viz.: No. 78 Church Street, and No. 522 West Queen Street, all in Toronto. Since then branches have been opened at the following points:—Alliston, Walkerville, St. Thomas, Brownsville, Shedden and Lawrence Station, all in Ontario. Arrangements have also been made for the opening of a branch at Fernie, B.C., and business will be begun there shortly.

"The profits for the five months during which the bank has been doing business have enabled your directors to declare a dividend for that period at the rate of 6 per cent. per annum, and add the sum of $9,839.80 to the profit and loss account, which now amounts to $30,503.28."

The President's Remarks.

The president moved the adoption of the report, which was seconded by the vice-president, Mr. Thomas Flynn.

The president spoke as follows:—

"We now meet at the first annual general meeting of the shareholders of the bank to receive and adopt the annual report of the directors and to elect directors for the new year.

"You will see by the statement now in your hands that the bank has been successful in its first five months' business, the net profit for that period being equal to ten per cent. on the average capital paid up for the same term, which was about $600,000. A dividend at the rate of 6 per cent. per annum has been declared, and paid, and the balance placed to profit and loss account.

"The taking over of the business of the Home Savings & Loan Company, Limited, was carried out on the 31st of December, 1905, and in a manner most satisfactory to both institutions.

"The preliminary expenses, which must necessarily accompany the organization of a new bank, have been paid off and a substantial amount placed to credit of profit and loss account to meet future development.

"The stock has been well taken, some $830,000, being now subscribed, and $733,000 paid thereon. The shares are well distributed and divided among four hundred shareholders. The directors have been very fortunate in having been able to secure for the bank's head office so handsome and so centrally situated premises. The other city offices will be in keeping with their locations.

"Branches have been opened at points considered suitable and advantageous for business, and the bank's operations will be extended whenever thought desirable.

"It is satisfactory to note the increase in the bank's deposits over the amount taken over from the Home Savings & Loan Company, Limited, when the fact is considered that the business has been practically confined to the city of Toronto, and to three branches.

"The zeal and ability displayed by the officers of the bank have been very satisfactory."

Statement of the Result of the Business of the Bank for the Period of Five Months Ended 31st May, 1906.

JAMES MASON, General Manager.

Toronto, 31st May, 1906.

Thanks Tendered the Executive.

After the adoption of the report it was moved by Mr. B. E. Bull, seconded by Mr. M. A. Thomas, that the thanks of the shareholders are due, and are hereby tendered to the president, vice-president, and directors for their careful attention to the interests of the bank.

On motion by Hon. J. J. Foy, K.C., seconded by Mr. James Gunn, the following motion was adopted: "That the thanks of the shareholders be tendered to the general manager and other officers of the bank for the efficient manner in which they performed their respective duties."

It was moved by Lieut.-Col. John I. Davidson and seconded by Sir Henry M. Pellatt, that the poll be now opened for the election of directors for the ensuing year, and that the same be closed whenever five minutes shall have elapsed without a vote having been tendered, and that Messrs. W. T. Kernahan and F. A. Fleming be the scrutineers to take the vote, and that they report the result to this meeting.

The Old Board Re-Elected.

The ballot resulted in the re-eletion of the old board as follows:—Eugene O'Keefe, Thomas Flynn, Edward G. Gooderham, M. J. Haney, C.E.; W. Parkyn Murray, Lieut.-Col. J. I. Davidson, and Lieut.-Col. James Mason.

At a meeting of the new board, held immediately after the close of the above, Mr. Eugene O'Keefe was re-elected president, and Mr. Thomas Flynn re-elected vice-president of the bank.

* * *

—At a meeting of the Hamilton Board of Trade on Monday, preliminary to the annual meeting next Tuesday, forty-eight members were nominated for the eight seats on the Council of the board. Sixteen were nominated for the Board of Arbitration. The officers were elected by acclamation:—President, F. R. Close; vice-president, R. A. Robertson; secretary-treasurer, Charles Stiff.

CHEAPER SOUTHERN IRON.

A break has occurred in the prices of Southern iron, but this need not alarm Canadian metal interests. Apparently it is merely an indication of domestic trouble in the Southern Furnace Association, one member of which sold tons of pig iron for $1 per ton less than nominal quotations, in spite of the fact that in the Northern markets an upward movement was in sight. It is not believed that in the South stocks are sufficiently large to balance the shortage elsewhere, and meantime the Canadian markets are particularly bare and firm. The Bessemer grades are unaffected in any case.

TRANSPORTATION NOTES.

M. W. Martin, of the C.P.R., Montreal, has been elected vice-president of the American Freight Agents' Association.

St. Mary's, Ont., capitalists are promoting a railroad from that place to Embro, where the C.P.R. promises to connect.

The Michigan Central Railway contemplates building a line through London, instead of using the London and Port Stanley.

The South Central Pacific Railway Co. has been allowed an extension of time in which to build from Vancouver to Fort Churchill.

The Grand Valley Railway Co. has been authorized to extend its line from Woodstock to Brantford. It operates at present roads from Woodstock to Ingersoll, and from Brantford to Galt.

The Canadian Northern Railway has given a contract to the Dominion Iron and Steel Co., Sydney, for 50,000 tons of 60-pound rails. This company is also manufacturing a large order for the Quebec and Lake St. John Railway.

The Michigan Central's gross income for the first six months of the present year was $2,460,000, an increase over the same period of last year of $203,000. Its expenses were also larger by $1,615,000. The increase in net earnings was $152,000.

Mr. W. F. Maclean, M.P., contends that a report should be published annually, showing the undelivered packages in express offices. A blue book is published, showing the unclaimed balances at banks, and many are recovered through this means.

Shipping circles in Montreal have been uneasy and Western farmers jubilant over the report that the C.P.R. had lowered its rail rates on grain from Fort William to Montreal in order to meet water competition. It is officially explained, however, that the reduction is a purely temporary expedient to increase the number of cars in the East without bringing them there empty.

Of the Grand Trunk Pacific Terminal Elevator Co. Charles M. Hays is president, and Wm. Wainwright vice-president. The idea is to erect elevators of a 2,500,000 bushel capacity at Fort William and at Tiffin (near Midland) in time to handle next year's crop. These two will likely cost $1,500,000. The company will confine itself to handling grain supplies from the North-West, and will take no part in the development of a Canadian route for American traffic.

From the Old World to the New by railroad, from Paris to New York by rail by way of Winnipeg seems the wild dream of the enthusiast. Yet a Russian Commission has just finally approved the plans for the Siberia-Alaska railroad project, and Loisq de Lobel, its promoter, says it will surely be built within ten years at a cost of $250,000,000, that the Behring Strait will be tunneled, and that the journey, 18,969 miles long, will be made in 754 hours, or thirty-one days and ten hours. All but 7,000 miles of the route is already in operation, though those intervening miles being largely in the Arctic regions would necessarily be slower in accomplishing than the rest.

The Erie Railroad directors, following towards a constant betterment and improvement of that immense railroad system, has, after two years' investigation into the possibilities of electricity as

Transportation Notes.—Continued.

a railway motive power, contracted for the installation of an electric system on its Rochester and Mount Morris Division, a distance of 35 miles. The power will be obtained from Niagara Falls. The system adopted is the Westinghouse single-phase, alternating current railway system, which is being installed by the New York, New Haven and Hartford Railway Company. There will be seven electric cars, which will haul passenger as well as freight cars.

The Dominion Government has awarded contracts for steel rails and fastenings for two sections of the National Transcontinental Railway totalling $2,488,450. Of this, $2,215,000 is for steel rails, contracts for $1,127,000 which go to the Dominion Iron and Steel Company, Sydney, N.S., and $1,088,000 to the Algoma Steel Company, Sault Ste. Marie. The total quantity of steel rails required is 65,000 tons, of which 55,000 tons will be furnished at $34 per ton and the remaining 10,000 tons at an advance of 50 cents per ton. The Dominion Iron and Steel Company will supply 23,000 tons at $34 and 10,000 tons at $34.50, and the Algoma Steel Company 32,000 tons at $34.

The "Wall Street Journal" had an appreciative article recently about the progress of the C.P.R. For example, it cites with approval the fact that with approximately 10,000 miles of railroad in operation at the present time the gross earnings range from $6,100 to $6,500 per mile, and that last year, with a mileage of 8,568, the average earnings were $5,892; while in 1901 they were about $4,000. The "Journal" warns its readers against fatuously believing that the company can keep on expanding its revenues at such a rapid rate, and presumes that the company cannot much further increase its capital stock without deteriorating the value of outstanding shares. The company only recently authorized an issue of $150,000,000 at par, and this is likely to meet all legitimate demands for extensions and improvements for some time to come.

The new Nicola branch of the C.P.R. is practically completed as far as Coutlee. It is to be extended this year six miles to Nicola Lake, and the intention is ultimately to extend it by way of Princeton and Penticton to Midway, where connection will probably be made with Spokane. Several large coal deposits are close to the railway, and the copper propositions along Ten Mile Creek, which joins the Nicola River at Lower Nicola, are so promising that the Guggenheim syndicate has bonded a large number of low-grade propositions, out of which it hopes to make a second Granby. A large amount of American capital and some Eastern Canadian money has been put into the district lately. Mr. R. J. Inglis, of Montreal, is reported to have recently sold the Golden Sovereign group there for $110,000 to Mr. J. McConnell.

* * *

It is ninety-three miles from Cobalt to North Bay, and for this distance the T. and N.O. Railway charges 16 cents per hundred weight. It is seven hundred miles from North Bay to New York, and for this distance the privately owned roads charge 35 cents per hundred weight. The Government railway, which was built for the development of this new territory, is muleting its customers three and one-third times as much as the privately owned concerns.—Temiskaming Herald.

MONEY AND MUNICIPALITIES.

Edmonton is preparing to expend $300,000 on a sewerage system.

The ratepayers of Magog, Que., voted on Saturday in favor of the municipality buying the town water-works.

Vernon, B.C., ratepayers have defeated the by-law to borrow $28,000 for the installation of a sewerage system.

Oshawa council is considering the question of taking over the Dancey-Ryan gas property and running it itself.

On Monday in New Liskeard, Ont., the ratepayers voted 84 to 7 in favor of installing a water-works system. Debentures for the purpose are already on sale.

Bids for local improvement debentures of Niagara Falls for $81,592.60 at 4½ per cent. were receivable up to Monday afternoon by Mr. John Robinson, the city clerk.

To-morrow is the last day that proposals will be received by Mr. Flannery, town clerk of North Bay for $10,000 4½ per cent. one to thirty year (serial) public school debentures.

Moose Jaw Public School District No. 1 is issuing $10,000 5 per cent. debentures, offers of which close to-morrow. Interest is payable at the Bank of Commerce, Moose Jaw.

The city of Montreal invites tenders (up till July 6th) for the whole or part of $300,000 worth of 4 per cent. registered or coupon bonds or shares, redeemable by sinking fund. The money is needed for public works.

The town of Seaforth, Ont., desires to raise $10,000 on 4½ per cent. debentures, payable in ten years, in order to loan that sum to the W. H. Willis Shoe Company, who propose to estabish a factory in the town.

Arbitrators appointed to determine the amount of money due by the town of Campbellton, N.B., to Robert L. Duncan for his land and for damage ensuing from trespasses thereon awarded him $2,645. The arbitration cost $2,234. The town had offered $825.

Assessment figures for Brandon, Man., show a large increase in the value of real and personal property. During the year real estate went up to $6,445,950, an increase of $2,421,630. Stock and personal property is valued at $109,552, an increase of $77,252. The population of the city is estimated at over 11,000.

Pincher Creek, Alta., will shortly vote on a by-lay to loan the McDonald Dunlop Co., of Calgary, $10,000 for ten years and exemption from taxation for the same period in consideration of that company erecting a flour mill with a capacity of 75 barrels per day and a distributing warehouse at a total cost of $30,000.

The township council of McKillop wishes to use an uninvested portion of its municipal loan fund for constructing public works, and is asking the Ontario Railway and Municipal Board whether this can be done under the Municipal Act. The board has replied that the township would first have to pass an authorizing by-law.

Preliminary to a scheme for financing the municipal power developments which it is intended shall follow the Ontario legislation on the subject, the Western Municipal Power Association is convening a conference at Galt on July 24th and 25th, to which the following municipalities have been invited to send representatives: Hamilton, Orangeville,

Money and Municipalities—Continued.

Milton, St. George, Brampton, Georgetown, Berlin, Waterloo, Galt, Guelph, Preston, Hespeler, Baden, New Hamburg, Tavistock, Stratford, St. Mary's, Brantford, Ingersoll, Woodstock, St. Thomas, London and Toronto.

Wood, Gundy & Co., Toronto, have bought $3,000 worth of 4 per cent. debentures of Peterborough County, repayable in twenty years. The money is for a House of Refuge.

Moose Jaw, Sask., will shortly vote on a by-law to raise a loan by debentures in order to put in a gravity system of water works, and to build a new fire hall at a cost of $25,000.

Ingersoll ratepayers on Monday, by 488 votes to 126, carried a by-law to grant T. Waterhouse & Co. a loan of $20,000 to establish a knitting mill in connection with their woolen mills. Every possible effort was made by the council and the board of trade to have the by-law carried, and automobiles were used to bring out the voters.

The Hudson Bay Knitting Co. has offered to settle at Three Rivers if the city council will accept its terms. The company asks the city to furnish, free for one year, a factory with 5,000 feet of floor space. Thereafter, if the company decides to remain, the city is to supply $50,000 for the building of the factory, which will become the property of the company as soon as $500,0000 has been paid out in wages.

Four hundred and ninety-five thousand dollars is involved in three by-laws upon which Toronto citizens will vote to-morrow. The City Council asks leave to spend $100,000 on a subway where the railroads cross Lansdowne Avenue; $195,000 on a high-level bridge across the Don, connecting Wilton Avenue and Elliott Street, which are between the Queen Street and Gerrard Street bridges, and $200,000 on improving the Don River and reclaiming part of Ashbridge's Bay. The Riverdale Business Men's Association is working for the Don improvement and the Wilton Avenue bridge.

Money and Municipalities—Continued.

As an indication of the remarkable activity in the West the following list of school districts in Saskatchewan which appear in the current number of the official "Gazette" as intending to borrow money is interesting:

Estevan—$4,000—L. H. Gordon, treasurer, Estevan.
Saskatoon—$3,000—W. P. Bate, treasurer, Saskatoon.

Strathcona—$15,000—A. T. Mode, treasurer, Strathcona.
Nelson — $30,000 — A. M. McDonald, treasurer, Lacombe.
Taber—$2,000—E. R. Lindsay, treasurer, Taber.
Talbot—$800—M. Sherbourne, treasurer, Earling.
Ketchamoot—$800—J. C. Mitchell, treasurer, Bardo.

* * *

"Picturesque Campbellford" is the title of a handsomely illustrated little book. Dozens of pictures show that the title is deserved. But Campbellford on the River Trent in Ontario is not only picturesque. It has great industrial possibilities. It is nearby falls and rapids sufficient to afford power for many manufacturing industries. Forty thousand horse-power remains undeveloped within a radius of five miles. The pools and eddies of the river also create a sportsman's paradise.

INDUSTRIAL AND GENERAL.

The Western Elevator Co. are erecting a new elevator on the Kaministiquia River, near Fort William.

The American Tobacco Company has placed an order with the Robb Engineering Company for a 125 horse-power Corliss engine for their new factory at Montreal.

Great Britain has 378,000 telephones in operation, or one for every 110 persons, and boasts of it. The Bell Telephone Company in Canada has 78,195 telephones, or one to every 68 persons.

A Vancouver city councillor asserts that he was offered money by persons representing prominent owners of gambling houses in the city's Chinatown and assured support for the mayoralty if he would help them.

The West is going ahead in manufacturing enterprises. Two new industrial companies are mentioned in the last "Gazette": The Meisel Manufacturing Co., Winnipeg, capital $250,000, to make and deal in agricultural implements, and in which Premier Roblin and D. Meisel, of Winnipeg, are interested; and Northern Constructions, Limited, capital $150,000, to build engineering works, elevators, mills, factories, etc. Eustace Estlin, of Winnipeg, is a charter member.

Another car of British Columbia halibut has reached Montreal. The demand for these fish in the East is very good, for they arrive in first-class condition.

Apples shipped from Atlantic ports from July, 1905, to August, 1906, were 2,186,131 barrels. Montreal shipped 551,914; Halifax, 312,801, and St. John, 23,613. In 1904-5 the figures were: Montreal, 375,085; Halifax and St. John, 372,369.

J. Ellsworth Fowler, Walter Fowler and J. W. Sangster, of Sackville, N.B., have entered into partnership under the name of the Sackville Manufacturing Co. for the purpose of manufacturing harness and buying and dealing in horse furnishings and rubber goods.

It is estimated that the lumber output of British Columbia this year will be far ahead of that of any previous year. The coast mills doubled their output during the past year, and are still increasing. More mills are being built. The Mountain Lumbermen's Association has decided not to advance prices for the present.

A company named the Portage Plains Land Co. has been organized at Momence, Illinois, to buy wild and improved Canadian lands. It opens an office in Portage la Prairie this week.

The run of sockeye off the British Columbia coast has started, the catches up to date being reported as very fair. Skeena River canneries are now packing fish. A scarcity of fishermen bothers the canners. Indians are better remunerated for surveying and exploratory work.

A real estate transaction worth noting is the sale of the lot, corner Drummond and St. Catherine Streets, in Montreal. The property belonged to the estate of the late Mr. John Redpath. The price paid is remarkably high for the location, being over $16 a square foot. A ten-storey building for commercial purposes is to be built on it.

R. A. Brown, an old British Columbia timber expert, estimates the marketable lumber within seventy miles of Grand Forks to be well up to 400,000,000 feet, of which 10,000,000 feet is white pine

Industrial and General—Continued

and the balance divided between fir, spruce, tamarac, cedar and yellow and black pine. Several saw-mill enterprises are said to be about to start in that district.

The British Board of Trade is sending a commercial mission to Canada to ascertain by direct enquiry the effectiveness of foreign competition with British trade in this country, the best means of successfully combating the same, and the opportunities existing for the development of British trade. Canadian correspondents of the British Board of Trade will be appointed.

The spruce lumber manufacturers of Maine have for the most part resolved to curtail production, owing to the overloaded market, and, some say, to the competition from New Brunswick and Nova Scotia. The production in Maine for some time past has been particularly large, owing to the high prices. Pine and hemlock will be sawn as usual. Some of the mill-owners are also talking of reducing wages as well as curtailing their output.

With the advent of Mr. Buxton to the Postmaster-Generalship of the United Kingdom the chances for a reduction of postal rates on newspapers and magazines sent to Canada have brightened very considerably. He seems to recognize that there is involved in the change not only Imperial sentiment, but important trade interests, which are hazarded by the vast volume of advertising matter contained in the American periodicals which flood Canada. Mr. Buxton is negotiating with the Dominion Government with a view to changing this situation.

* * *

TORONTO MARKETS.

Toronto, June 28, 1906.

Drugs, Chemicals, etc.—Since last report there has been no appreciable change in the tone of the market. A normal volume of trading is going on for this period of the year. Business in the staple lines, such as opium, quinine and carbolic acid presents few features, and is on the dull side. Menthol is also easy. The New York market is reported to be of a hand-to-mouth order, though country business looks prosperous. Baltimore chemicals are in less demand now that crop requirements have been mostly met. The English chemical market shows fair activity, the export branch showing a particularly brisk demand, while in the home trade, though it presents no features of a sensational character, a very good trade is being carried on.

Dry Goods.—The great firmness in staple woolen and linen goods continues unabated, and almost to the same extent in cottons. All reports from woolen manufacturing centres tell the same story: heavy demand and advancing prices. The shortage of flax, with the small stocks of linen in most markets produces the same consequences in the latter. Cotton (the raw material) fluctuates considerably from day to day, but this in reality does not affect the market for finished goods very strongly, as values of the latter are even now not on a parity with prices of raw material. Dress goods are selling well, the demand, both at city and country points, having set in in earnest. The fall trade promises well, travellers in the rural districts more particularly sending in good reports as to the prospects. Besides this, orders of a miscellaneous character are beginning to arrive with gratifying frequency. Payments are generally considered satisfactory, a remark which applies to practically all districts.

Flour and Grain.—Little change has occurred in these markets since our last quotations. Manitoba patents are quoted a fraction higher, while ninety per cent. patents have advanced nominally 5 cents in accordance with the stronger cables from abroad. Peas are scarce, the nominal quotation being 82c. Canadian corn is easy. Oatmeal retains its comparative firmness. Bran and shorts are firm for this season.

Fruits and Vegetables.—More plentiful supplies of strawberries are coming forward and prices are easier in consequence. Quality is fair, and the crop perhaps about average. A few domestic cherries also are on the market. Pineapples are just passing their abundance; a good many show wastage. Oranges are scarcer, and sell at good prices. Tomatoes are held at $2 to $2.50. Spinnach and new potatoes are now coming forward in greater quantity. The following represent average quotations for good articles: Strawberries, qt. boxes, 7 to 11c.; cherries, basket, $1 to $1.50; oranges, extra fancy California navels, $4.50; fancy Sorentos, $4.25 to $4.50; Mexican, $4.25 to $4.50; Valencia, $8; California blood, $3.50; lemons, Messinas, $3.50 to $4; bananas, $1.85 to $2.35; watermelons, 35 to 40c.; tomatoes, six-basket crates, $2.50.

Groceries.—There has been an advance of 10c. per cwt. in all grades of refined sugars, and the tone of the market is still strong. A steady demand is likely to be manifested from this on. In New York similar conditions prevail. Prunes are held very high, and Valencias continue firm. Other dried fruits are in about the same position as last week. Canned vegetables are still very strong in tone, and some lines are scarce, particularly tomatoes, as before noted.

Hides and Leather.—An advance of ½c. has taken place in No. 1 steers and one of a cent in cows, so those two brands are now held at the same figure. Trade is good, and values quite firm. In leather not a very great amount of business is being done, but dealers are in a buoyant mood, and they believe the season will be a good one. In tallow not a great deal is being done, and prices are steady.

Live Stock.—Better condition prevailed at the cattle market this week. Supplies were not large, and the active call, especially for choice butchers' stock, speedily cleared them out. As high as $5.12 per cwt. was realized for some extra choice lots of the latter. A few export animals were disposed of. Not many feeders and stockers were shown. Calves and lambs were steady.

Provisions.—Supplies of butter and cheese are coming into the market in fair volume, and values have not much changed since a week ago. Smoked meats are not in very full stock, and prices are tending upwards, particularly in long, clear bacon. Lard also is firm.

Wool.—A fractional actual advance has taken place in washed wool, and other lines are moving in the same direction. There can be no doubt, however, that prices are already high enough.

OUR TRUCKS
are fitted with rubber tires that do not come off. . . . .

FOR EVERY DOLLAR

of liability to Policyholders, The Great-West Life Assurance Company holds assets to the value of $1.24 (Liabilities $2,787,147, Assets $3,149,359) — an ample margin of security.

Moreover Great-West Policyholders have the added security of $750,000 of Capital Stock, subscribed but not called for.

The closest scrutiny merely emphasizes the high value of Great-West Life Insurance.

DEPENDABILITY

THE RESULT OF THE

GILBRETH SYSTEM

AND THE

COST-PLUS-A-FIXED-SUM CONTRACT

Within the past two months we have secured three-quarters-of-a-million dollars worth of building contracts. These contracts provide that the construction work shall be done on the Gilbreth System and the cost-plus-a-fixed-sum contract.

The Gilbreth System secures for construction operations exactly the same dependability that is secured for manufacturing operations by systematized organization.

The cost-plus-a-fixed-sum contract is the logical development of organization. A few years ago every manufacturer farmed out his work on the lump-sum contract. Under that system the largest manufacturer was little more than an assembler and finisher. That old order has passed because the successful manufacturer of to-day knows, that in order to guarantee the quality of his product, the time of delivery and the cost, he must control every step of production from the raw material to the finished article. It is to enable the manufacturer or owner to control his building operations exactly as he controls and directs every other department of his business that the cost-plus-a-fixed-sum contract was devised. We simply put our organization at the disposal of owners.

The owner availing himself of our services becomes for the time, possessed of a highly trained and systematized organization, a construction department just as compact and smooth running as is any other department of his business. The expense of this department is incurred only when its services are required. Under this plan the owner and contractor stand in the position of employer and trusted department head. Moreover, every detail of the work, its cost, its quality the manner in which speed is being made are constantly under the owner's supervision.

We accept contracts only on the cost-plus-a-fixed-sum basis, because we believe that this is the only logical and just form of contract—the contract which is in short, equitable alike to the owner and contractor.

CIGARETTES

STANDARD
OF THE
WORLD

SOLD BY ALL LEADING
WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, June 27, 1900.

Ashes.—Offerings have been more liberal, but quotations are fairly steady at $5.50 for first sorts of potash; second ditto, $4.90 to $5; pearls, about $6.75. It is alleged that some of the adulterated ashes, referred to in a recent issue, as being sold in Liverpool, bear the forged brand of Dyde & Major, Montreal inspectors, though they were never shipped from this port. The matter is likely to be brought to the notice of the British Board of Trade.

Cements and Firebricks.—There is a steady consumptive demand for cements at steady prices. We quote Belgian makes at $1.70 to $1.90; English, $1.90 to $2.05; Canadian, $1.90. Firebricks are steady at $17 to $21, as to quality and lot.

Dairy Products. — The exports of cheese and butter last week, while not as large as the week preceding, were fairly liberal, aggregating 81,100 boxes of cheese and 11,900 packages of butter. Cheese values have shown some advance since a week ago, and some holders are asking 11⅝c. for finest Western, though this figure is beyond the ideas of most buyers; fine Easterns are quoted at 11⅛ to 11¼c. Fancy unsalted creamery butter is quoted at 22½c., and salted at 21 to 21½c.; good dairy makes are in demand at 16 to 17c.

Dry Goods.—There has been little variation in trade conditions since a week ago. City retail trade is fairly active, and in the wholesale trade fall orders are reported as moderately good. Complaints are still frequent with regard to delayed deliveries by manufacturers. Advices are to hand of a general advance of 10 per cent. by manufacturers of Swiss embroidered handkerchiefs, etc. With regard to domestic textiles nothing new is reported.

Groceries.—The movement is of a quiet mid-summer character, and no very marked changes are noted in values. The market for sugars is about steady at $4.20 for standard granulated, in barrels, with $3.80 the lowest figure in yellows. Barbadoes molasses is quoted at 30c. by the single puncheon, and 32½c. in barrels. Canned salmon is firmer at $6 per case for River Inlet, and $6.80 for Fraser River flats. Tomatoes are very firm at $1.30; corn, still 85c., though there has been some talk of an advance. Rice is firm at the late advance, and for what little stock of sago and tapioca there is on spot 7½c. is now asked; further supplies are expected in course of a few weeks, but prices are likely to remain high. Currants and all to advance.

Hides.—The market is not a very brisk one, nor receipts at all large, but values are all steady to firm. Dealers continue to quote about 12½c. for No. 1 beef hides, and 15c. for No. 1 calfskins. Lambskins will be advanced to 35c. on Monday next.

Leather.—The market is very strong, although local manufacturers of boots and shoes are not free buyers. The English demand for sole and splits is excellent, and would-be buyers of the latter report considerable difficulty in getting supplies, while prices are again advanced, best Western splits being quoted at 27 to 28c., and Quebecs at 24 to 25c.; buff, 16½c.; pebble, 15½c.; glove grain, 14 to 14½c.; harness, 33 to 34c. Sole is quoted on the basis of 26c. for manufacturers' No. 2.

Metals and Hardware.—There are now some seasonable signs of a slackening off in the very active movement which has prevailed all spring, but business is good for the time of the year. As indicated last week, there is some cutting being done in spot prices of sheets, and Canada plates are now generally quoted at $2.50; black sheets, 28 gauge, $2.30; ternes, $6.75; galvanized sheets, $4.10 to $4.35; tin plates are steady at $4 for cokes, and $4.25 for charcoals of standard brand and weight; boiler plate, $2.30. Best Scotch brands of pig iron are quoted, ex-wharf, at $22; Summerlee, No. 2 selected, $21.50; No. 1 English, $18.50; domestic, $20.50. Bars are steady at $2 to $2.05; wire nails, $2; cut ditto, $2.10; bar steel, $2.10 to $2.20. Ingot tin shows a good deal of fluctuation, but is quoted around 44 to 45c.; antimony again dearer at 30c.; lead, $4.40; copper, firm at 21c.; spelter, 7¼c.

Oils, Paints and Glass.—Turpentine is easier at 86c. per gallon in single barrels. Fish oils are dull and neglected; linseed, 53 to 54c. for raw, and the usual advance for boiled. White leads are very firm on the basis of $6 for pure; putty, $1.40 in bulk; glass, $3.50 per 100 feet for first break.

Wool.—The volume of passing business is very light, indeed, millmen showing little disposition to buy beyond their most pressing needs, but quotations are very firmly held at 19 to 23c. for Capes; medium B.A., 38 to 45c.; fine ditto, 45 to 48c.; domestic fleece, 26 to 28c.; pulled ditto, 29 to 30c. The next series of London sales opens on the 10th July.

TOWN OF INDIAN HEAD,
Saskatchewan, Canada.

DEBENTURES FOR SALE

Sealed tenders marked "Tender for Debentures" will be received by the undersigned up till 5 p.m on Monday, August 6th 1906 for the purchase of $149,985 of the Town of Indian Head Waterworks and Electric Light Debentures, full particulars of which can be secured on application to the undersigned.

Tenders must be accompanied by a marked Bank Cheque for 1% of the amount tendered, payable to the Town Treasurer; this amount will be forfeited if purchase be not carried out.

The highest or any tender not necessarily accepted.

O. J. GODFREY, Town Clerk.

Indian Head,
June 25th 1906.

Nipissing Mines Company

DIVIDEND NOTICE

The Board of Directors has to-day declared a quarterly Dividend of Three Per Cent, payable July 20, 1906, to stockholders of record at the close of business, July 10, 1906.

Transfer books will be closed from July 11, 1906, to July 20, 1906, both inclusive.

The largest prices ever reached for Quebec spruce limits were paid at the annual sale by the Provincial Government last Friday, when 1,378 miles were disposed of for $283,665. Prices were from $165 to $1,000 per mile. Many American buyers were present. Lake St. John limits were well in the running. Some waterpowers also were sold, notwithstanding the protest of the Dominion Government, which claimed control over them on the ground that they were connected with navigable rivers.

The Metropolitan Life Insurance Co.

(INCORPORATED BY THE STATE OF NEW YORK)

The Company OF the People, BY the People, FOR the People

ASSETS, $151,663,477.29

Nearly three hundred thousand Canadians of all classes are policyholders in the Metropolitan. In 1905 it here in Canada wrote as much new insurance as any two other life insurance companies—Canadian, English or American.

The number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec, Ottawa.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905.

395	per day in number of Claims Paid.
6,972	per day in number of Policies Issued.
$1,502,484.00	per day in New Insurance Written.
$123,788.29	per day in Payments to Policy-holders and addition to Reserve.
$77,275.94	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave., New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $3,0000,00.00

THE CANADA LIFE

Paid its policyholders in 1905 $3,272,000, being the largest amount so paid in one year by any Canadian Company.

LONDON, ONT.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont
